NEW YORKER

STAINLESS STEEL IS SANITARY - STAINLESS STEEL STAYS BRIGHT -
and this trade-mark means the product is made of quality stainless

NOTHING equals stainless steel in lasting loveliness, easy cleaning, economy and immunity to destructive agents. And any time you see the U-S-S trade-mark on a stainless steel article you're buying . . . whether it's a kitchen sink or a roasting pan . . . you can be sure you're getting good stainless steel. For the U-S-S trade-mark means just this: the manufacturer has made his article of quality steel . . . and wants you to know it.

U-S-S Stainless Steel is the lasting decorative metal . . . for everything from automobiles to watches.

U-S-S Stainless Steel assures cleanliness and economy in hospitals, food plants, schools, laundries.

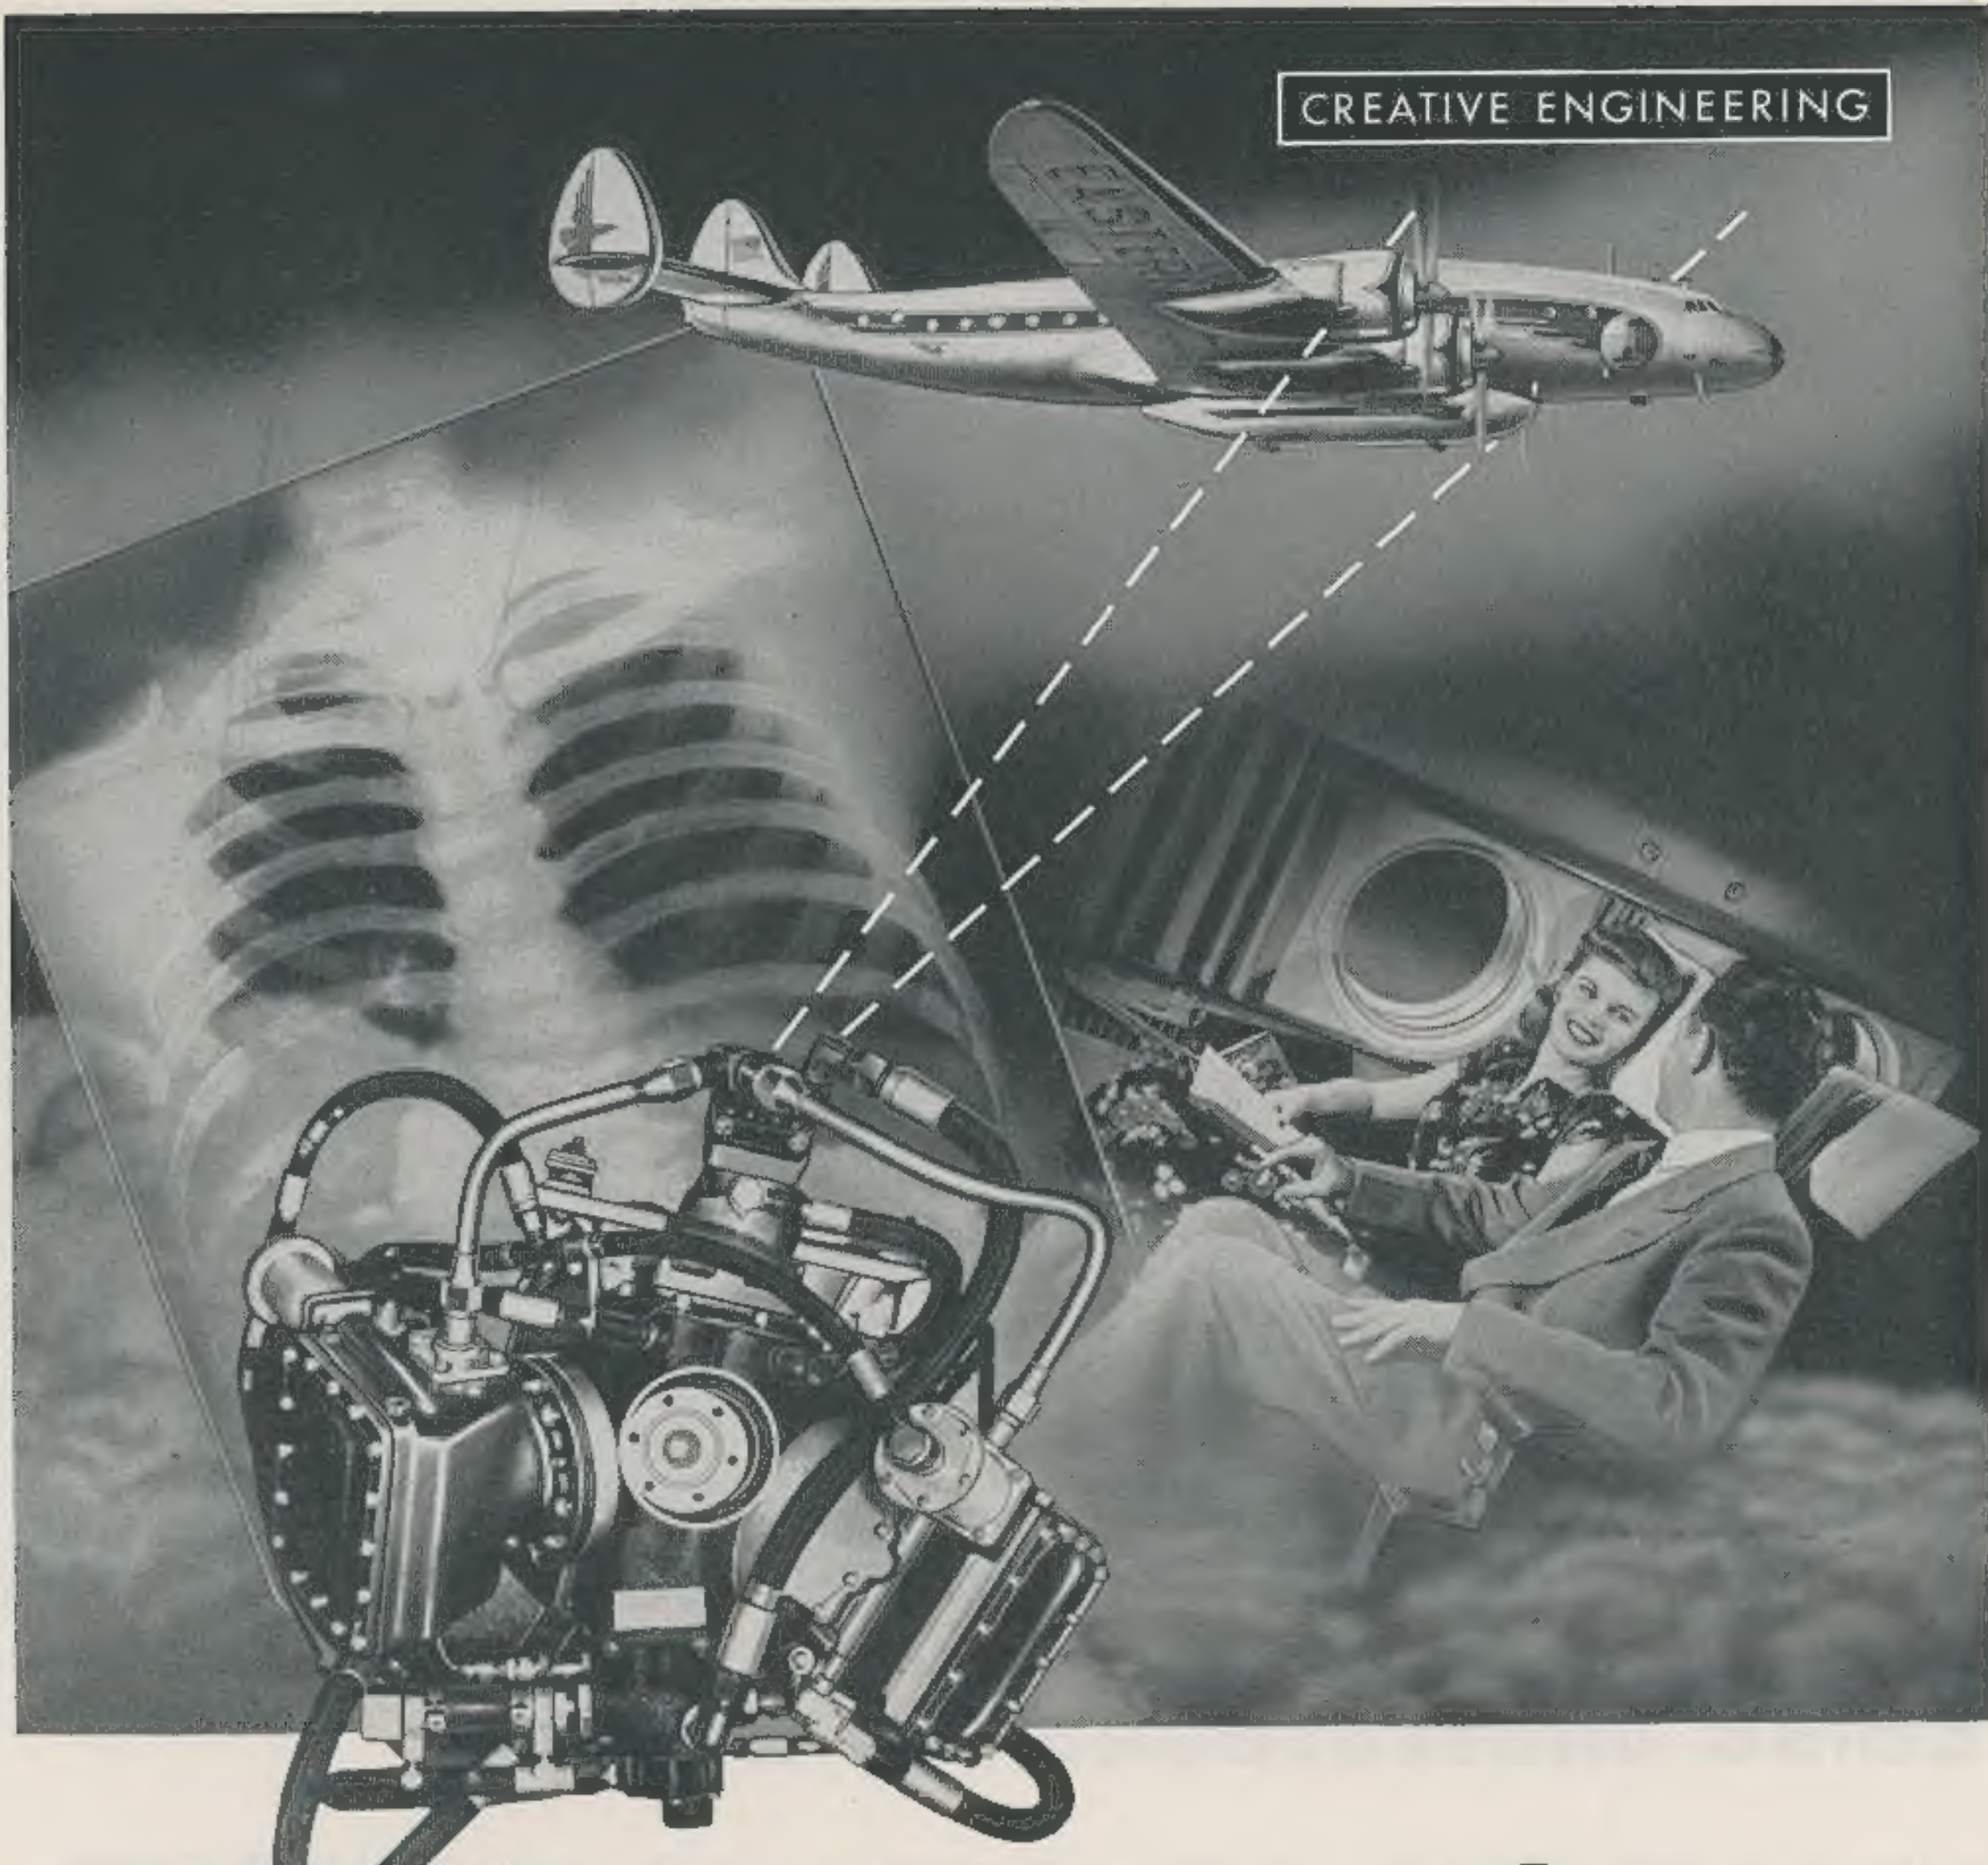

The U-S-S trade-mark shown above is one of a family of U-S-S trade-marks. Some say "Premier Spring Wire" or "Vitrenamel" or just plain "Steel" . . . but all have the big letters U-S-S prominently displayed. Whenever you see these letters U-S-S—the trade-mark of United States Steel—you know the steel is good.

LISTEN TO . . . The Theatre Guild on the Air, presented every Sunday evening by United States Steel, American Broadcasting Company, coast-to-coast network. Consult your newspaper for time and station.

CREATIVE ENGINEERING

"LUNGS" for the luxury airliners...

Up in the troposphere the big problem is *breathing!*

Outside is thin, freezing-cold atmosphere. Somehow it must be scooped up, compressed and delivered inside the cabin, richer in oxygen, near sea-level in density, *breathable*.

Now complicate the job by stingy space and weight limitations, plus a vital specification for unfailing performance, and you've some idea what AiResearch engineers faced in creating the cabin supercharger—"lungs" for luxury airliners.

Today, the majority of new military and commercial aircraft depend on AiResearch cabin pressurization and air conditioning equipment. Today, you ride comfortably at 20,000 feet or higher because AiResearch knows how to mirror-finish cabin supercharger parts to 2/10,000ths of an inch—knows how to make gears spin safely at a dizzy 32,000 r.p.m.

The engineering "know-how"... the research and laboratory facilities... and the manufacturing skills

of AiResearch are now available to you, whatever your field may be.

● AiResearch engineers—designers of rotors operating in excess of 100,000 r.p.m.—invite your toughest problems involving high-speed wheels. Specialized experience is also available in designing and manufacturing compact turbines, and compressors; actuators with high-speed rotors; air, gas and fluid heat exchangers; air pressure, temperature and other automatic controls.

For information, write: AiResearch Manufacturing Company, Los Angeles 45, California.

Cumberland County

Cumberland County, Maine's most populous area, is, like York, a scenic wonderland stretching from the mountains to the sea. Along the coast, where most vacationers enter the State, are innumerable beaches, stern headlands and cliffs, hundreds of harbors, islands and inlets, where boating, swimming and deep and shallow water fishing offer residents and vacationers alike an unlimited scope of activities.

Inland the great Sebago Lake-Long Lake chain, with its scores of lesser lakes and ponds and streams covering an area of hundreds of square miles provides a recreational area for many thousands of persons annually.

Pine Point, adjoining the Old Orchard Beach section of York County, continues the beach features of the coast, with famous resort centers such as Prouts Neck, Scarborough Beach, Higgins Beach, and Cape Elizabeth

forming the southern side of the great Casco Bay area centering on Maine's largest city, Portland. The Casco Bay area contains hundreds of islands long popular with vacationists. Along its shores, from Cape Cottage and South Portland, Route One passes through Falmouth, Cumberland, Yarmouth, Freeport and Brunswick, thence seaward southeast to the northern shores of Casco Bay, to the resort and fishing areas of Harpswell, Orr's Island and Bailey.

Portland is the metropolis for this coastal area, "the beautiful town that is seated by the sea" of its native Longfellow. On a peninsula less than a mile wide, swept by cool sea breezes, it is a city of modern hotels, banks, department stores, theaters, libraries, churches and museums. Eight golf courses, many tennis courts,

modern little town in the valley of the Carrabassett River, which provides waterpower here for several mills. Maine's first Governor, William King, lived here. It commands a marvelous view of mountains to the west, including Mount Abraham, Saddleback, Spaulding, Sugar Loaf and Crocker Mountains.

Further along on Route 27 are Carrabassett and Bigelow, small settlements on the Carrabassett and surrounded by deep forests. The Bigelow Game Preserve takes in parts of Bigelow and Dead River Plantation. It is a vast wooded area where big game, game birds and smaller animals roam unmolested. Stratton and Eustis are villages famed as campsites on the Arnold Trail, named for the route taken by Benedict Arnold and his men on their ill-fated march through Maine to Quebec. Just outside of Stratton are the famous Cathedral Pines, a tract of several square miles of tall Norway pines, one of the few remaining stands of virgin timber. From Eustis the road follows the northern branch of Dead River over the Height of Land and through Chain of Ponds to the Lake Megantic region in Quebec. There Arnold's men followed the Chaudiere River to where it empties into the St. Lawrence near Quebec City.

The most travelled road out of Farmington is Route

BANGOR

Queen City of the East...

Bangor, the gateway to northern and eastern Maine, is located on the west bank of the Penobscot River only a few miles from the Atlantic Ocean. First settled in 1769, and incorporated as a city in 1834, it has now become a prosperous and progressive community with approximately 36,000 inhabitants. It is served by all methods of modern transportation and has long been recognized as the financial and commercial center for the constantly growing eastern and northern sections of Maine.

Bangor offers exceptional educational advantages, and Bangor's high school ranks with the finest in New England. In addition to the public schools, there are John Bapst high school, parochial, private and commercial schools. The University of Maine is in Orono, eight miles from Bangor.

It is possible to drive by automobile within an hour to many of Maine's beautiful lakes, streams, brooks, mountains, and to the seashore where

recreation awaits all members of your family. Because of the many fine hotels and restaurants within Bangor, it has for many years served as the headquarters of numerous hunting and fishing parties from practically every section of the country.

Bangor is proud of its many fine churches, parks, and theatres; two daily newspapers, a morning and evening; and four radio stations furnishing complete facilities for advertising publicity, and emanation of news.

Bangor, in the heart of Vacationland, invites you to come for a visit or come here to live.

BEAR SPRING CAMPS

BERT MOSHER,
AND SON,
Proprietors

Oakland, Maine

Situated on sandy beach, north end of Belgrade Lake. Twenty-two individual cabins of two to five rooms. Open fireplaces, bathrooms, and electric lights in every cabin. Fine Bass, Trout and Salmon fishing. Garage, Tennis Court, Golf nearby. Guides, and outboard motors. Catholic and Protestant churches nearby. Fresh vegetables all season.

Rates \$35 to \$40 per week. Special rates to large parties. Booklet and references.

Region, with five of the seven lakes of the chain inside Kennebec County. Great Lake is the largest, spreading out at the center of the group. Around it are the other isle-dotted lakes, including Long, Salmon, Magrath, East and Messalonskee.

The Belgrade Lakes Region has long been famous for its smallmouthed bass fishing and the size and quantity of these gamy fish make these waters a topic of conversation among the Nation's anglers. Chinook and native landlocked salmon and trout and other lake and stream fish make record catches commonplace.

Within easy motoring distance of the shopping centers at Waterville and Augusta, the Belgrade Lakes region offers a wide range of accommodations from smart hotels and camps to simple housekeeping cottages. Some of the best canoeing in the State is offered by these closely connecting lakes and convenient streams make long portages unnecessary. The region also abounds with game and birds and deer hunting is exceptional. In the winter recreational facilities are numerous and diversified, including sking, snowshoeing, ice-boating, tobogganing, skating and ice-fishing.

Waterville, in Northern Kennebec County, is an elm-shaded city of homes, large industries and a modern commercial center. It is a city rich in historic associations dating back to the time when the Indians had a village there and across the river in Winslow. It is also the site of Colby College, established in 1818, which at present is being relocated on a beautiful 500-acre campus on May-

D DONOR
NTER

"First things first..."

This boy is doing "first things first." To him the first thing to do when he came home from Tarawa, Guam, Saipan was to give his blood to the local Blood Donor Center.

For the Boston and Maine Railroad, "first things first" means handling in 1945 an immense volume of war freight (1944 was one of the largest volume years in the history of this railroad). We have—and will—move everything we are asked to, with speed and dispatch. It means buckling down—pitching in—determined to help and to help *fast*. Shortages of ammunition, planes, tanks, food, clothing must never overtake brave men. That's our common job—and that's the job of every industry, of every transportation com-

pany, of every individual today.

To be a part of this job—to help industry get its products away from freight houses and loading platforms quickly and efficiently—to speed them on their way to the front is our immediate concern. Of course, some of us are working on post war plans, but "first things first" *for us* means speeding war material from all sections of the country to embarkation points without interruption.

We have done and are doing this and can continue to do so with ever-increasing efficiency because we know Northern New England—know the tempo of its workmen, know the problems of all shippers—and **KNOW THE NEED.**

Information Tips

Comprehensive Aircraft Texts

Just released is "Aircraft Basic Science," first book of three-volume series by Technical Development Staff of Northrop Aeronautical Institute, Hawthorne, Calif., to cover construction, inspection, operation, maintenance, overhaul, and repair of aircraft and engines. Other two scheduled volumes are "Aircraft Power Plants," and "Aircraft Maintenance and Repair." Each book is complete within itself. First-named book covers subjects generally regarded as essential for both aircraft and engine mechanics. In simple step-by-step manner it presents such subjects as theory of flight, aircraft structural components, blueprint reading, aircraft plumbing, the fundamentals of aircraft electricity, storage batteries, generators, motors, and pressure, mechanical, and electrical instruments. Publisher is McGraw-Hill Book Co., 330 W. 42 St., New York City. Price is \$6.00 (449 pp).

Jet Data Compiled

Valuable reference work for aeronautical engineers is new volume titled "Jet Propulsion Progress; The Development of Aircraft Gas Turbines" by Leslie E. Neville and Nathaniel F. Silsbee, published by McGraw-Hill Book Co., 330 W. 42 St., New York City. Theme is to present, simply and accurately, the fundamentals of the gas turbine. Included is section dealing with German jet units. Main concern lies in work of British and progress in U. S., stemming from Whittle design and stimulated by developments of British, U. S. A. F., U. S. N., NACA, and American companies such as General Electric, Westinghouse, Allis-Chalmers, and Turbo Engineering. Problems of heat-resistant alloys, special fuels, maintenance, and other details are briefly indicated. Future developments and possibilities of turbojets and propeller gas turbines for various types of aircraft, military and civil, including personal planes and helicopters, are surveyed in final chapter. Included are notes on highly promising "compound engine," comprehensive bibliography, glossary of technical terms, and other reference features. Price is \$3.50.

Carbide Tipped Tools

For production engineers, Whitman & Barnes, 2100 West Fort St., Detroit 16, Mich., have issued Catalog 101 listing and illustrating various types of carbide tipped tools. Information is contained on use and care of these tools, proper speed, feed, and grinding recommendations.

Fiberglass in Aircraft Parts

How fiberglass materials are used for reinforcement, also properties imparted to plastics by these materials, and newly developed processes for volume production are described in "The Case of Material X," new 12-page illustrated color booklet released by Owens-Corning Fiberglass Corp., Toledo 1, Ohio. Applications in aircraft parts are noted.

Abrasive Tumbling

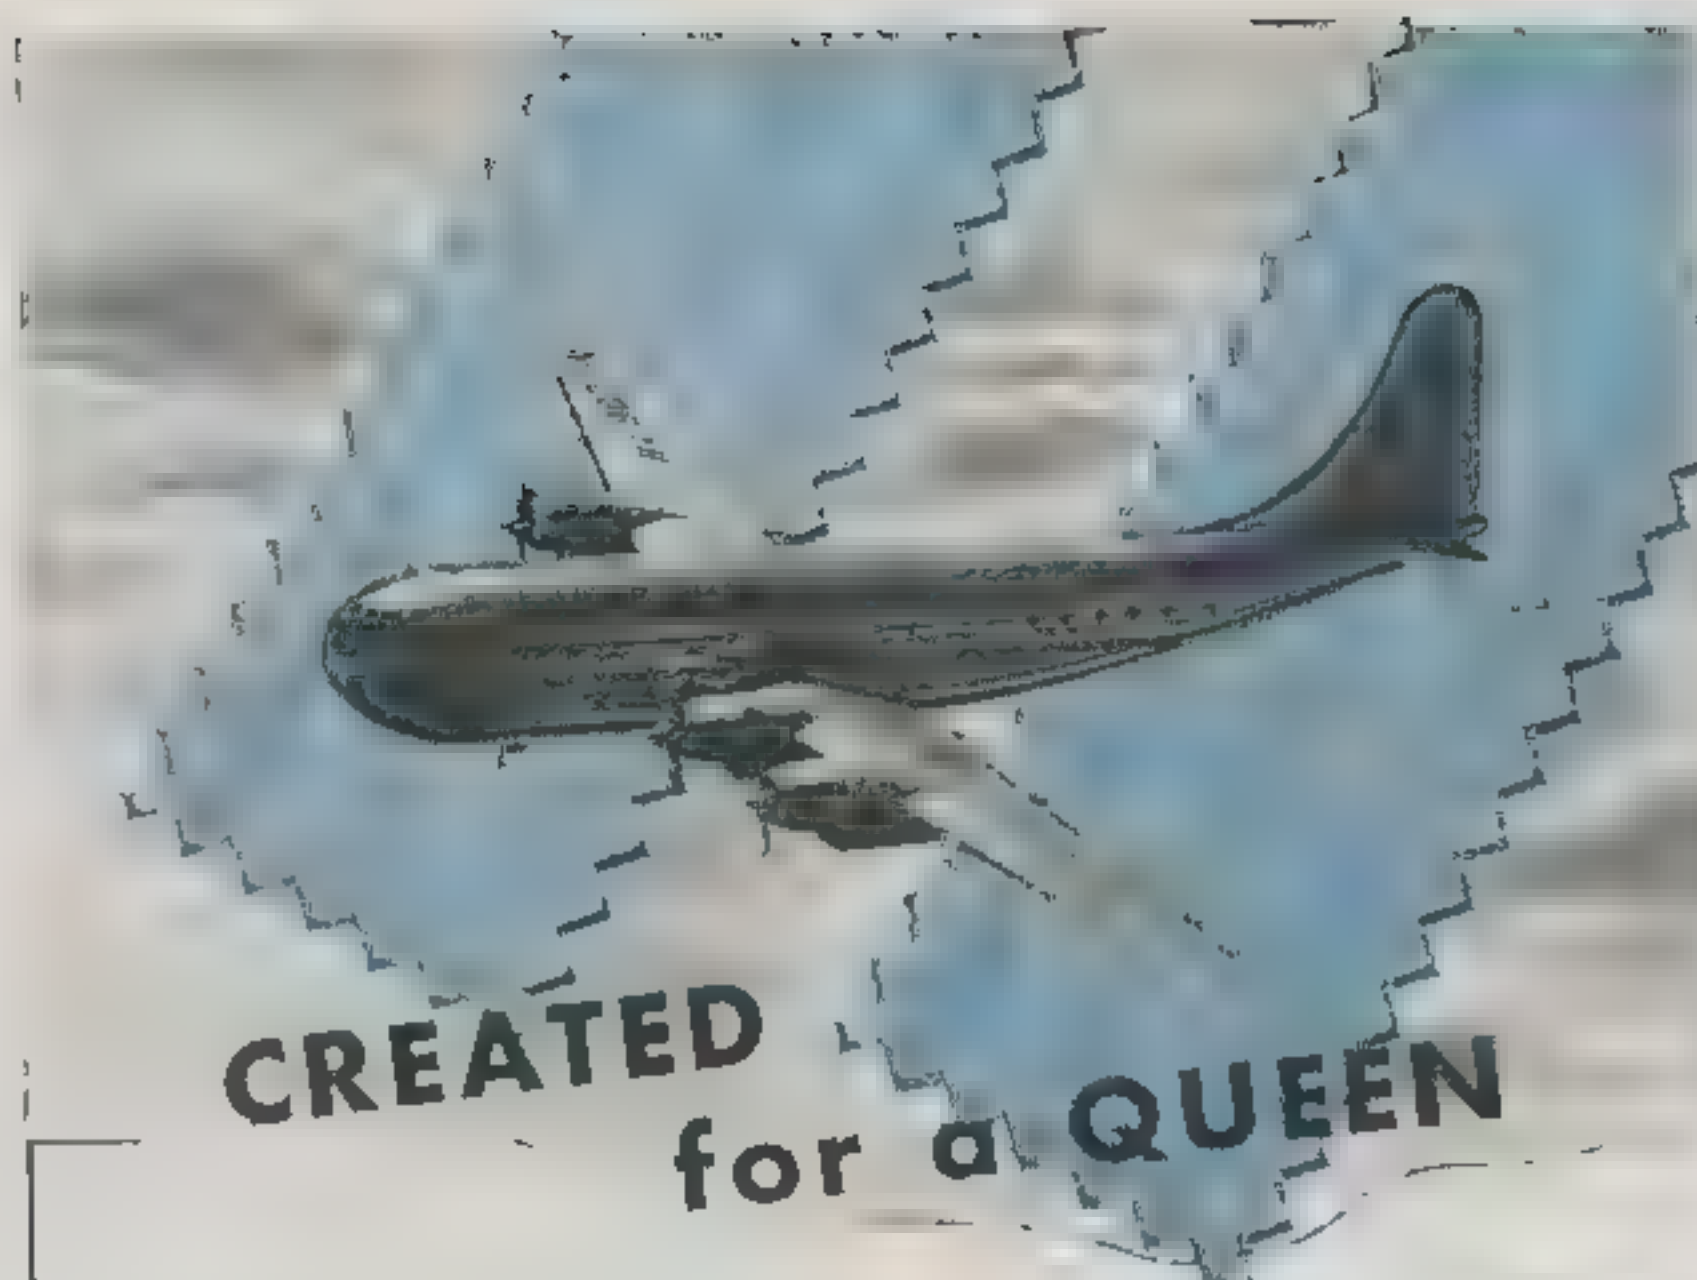

Of interest to aircraft production engineers in charge of deburring and surface finishing phases is 16-page illustrated booklet describing precision tumbling with Alundum. Issued by Norton Co., Worcester 8, Mass., publication discusses method advantages, applications, grit sizes, tumbling hints, micro-inch finishing, and numerous other details.

Tube Fabrication Equipment

Production tube benders and accessories, hand benders, cutters, flaring tools, beading kits, and tube fabricating services are described and illustrated in Catalog 401 available from The Parker Appliance Co., 17325 Euclid Ave., Cleveland 12. Helpful operational information is included.

Aviation Chemicals

Of interest to airport operators, maintenance men, and craft owners is catalog of aviation chemicals, offered by E. M. Hollingshead Corp., Camden, N. J., describing uses of 34 company products covering wide range of maintenance and servicing applications.

Bridgeport's new fabric will adorn United Air Lines' Mainliner "340"

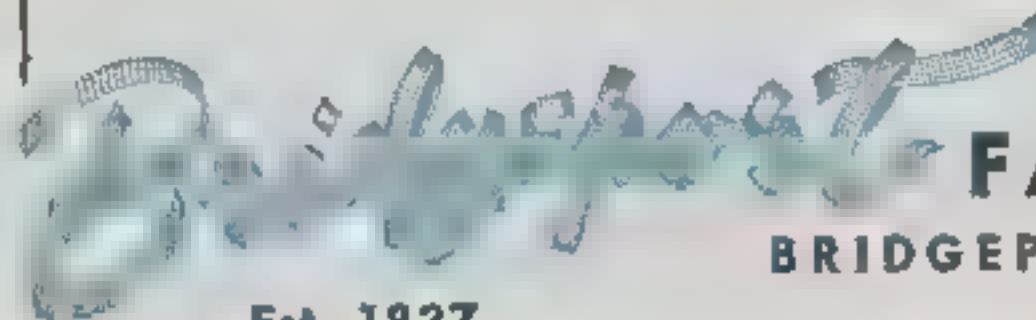

Inspired by the majestic beauty of Boeing's first Stratocruiser, "Queen of the Airplanes," Bridgeport designers have once again created a distinctive new upholstery fabric for an exacting customer. Woven to an exclusive pattern, in both powder blue and cocoa beige, the new cloth will be used solely for upholstering the chairs in two tone for outfitting United Air Lines' new Stratocruiser fleet. Because the new fabric is made of the finest quality woolens and worsteds, United's passengers will find it delightfully soft and fur-smooth, yet non-clinging. Maintenance crews will like it, too, for like all Bridgeport Aircraft Fabrics, it resists stains and dirt and makes periodic cleaning easier and faster. *It is certified flame-proof by the CAA.* What's more, special sewing and stretching characteristics will speed installation by as much as 20%.

Bridgeport's specially designed aircraft upholstery fabrics are available in many unusual weaves and appealing colors, or Bridgeport designers will create for you an exclusive color or pattern. Write for full details and sample swatches of this extremely lightweight and durable fabric.

B.F. Goodrich

FIRST IN RUBBER

Now runways stand up when the world's biggest bomber sits down

TRIAL flights of the B-36, world's biggest bomber, brought out a special landing problem. With its 278,000 pounds pin-pointed on two 110-inch tires, the B-36 couldn't use ordinary runways.

Convair engineers had been studying alternate tire designs for some time. The test flights focused attention on the B.F. Goodrich proposal of Type VII tandem twin tires.

B.F. Goodrich engineers pointed out that the tandem twin design spreads the weight over a 47% greater area of runway slab than the 110-inch

tire. That it is safer in case of blow out. Easier to service. Lighter.

B.F. Goodrich tandem twin tires were approved for the production model B-36A. And now this giant, 6-engine super-bomber will be able to use any airfield that can handle a B-29 medium bomber.

Because B.F. Goodrich twin and tandem twin landing gear assemblies offer advantages in design, safety, economy, weight, comfort and load distribution, they are fast winning wide acceptance—for both heavy and lighter planes. Multiple tires have

been a special development project at B. F. Goodrich for 16 years; the first twins used were B.F. Goodrich tires.

This record of being first on the runways with new tire developments is a result of constant research by B.F. Goodrich engineers to make flying even better, cheaper and safer. *The B. F. Goodrich Company, Aeronautical Division, Akron, Ohio.*

B.F. Goodrich

FIRST IN RUBBER

They added wheels to subtract weight

TO TRIM the Navy's Constitution to fighting weight, Lockheed design engineers needed the lightest possible landing gear equipment. At the same time, this equipment had to provide maximum safety and comfort for the 180 passengers carried by the long range transport.

Studying the problem, B. F. Goodrich and Lockheed engineers came up with a new design—*tandem twin wheels* for the main landing gears, *duals* for the nose. That's 10 wheels in all. By using more—and smaller—wheels, engineers shaved a *ton* off the Constitution's weight!

In addition, B. F. Goodrich tandem twin wheels have five other big ad-

vantages: 1) *greater safety*—if one of the four tires goes flat, the pilot's control of the plane is unaffected; 2) *greater economy*—even in landings with one twin tire flat, the wheel and often the tire are still good for additional service; 3) *more comfort* with four air chambers, landings are smoother; 4) *better design*—the four small wheels take up less space when retracted; 5) *better load distribution*—with the load distributed over a greater area, very thick runways are not needed, more airports can be used.

Besides multiple wheels—a 16-year development project of B. F. Goodrich engineers—the Constitution also uses B. F. Goodrich Ex-

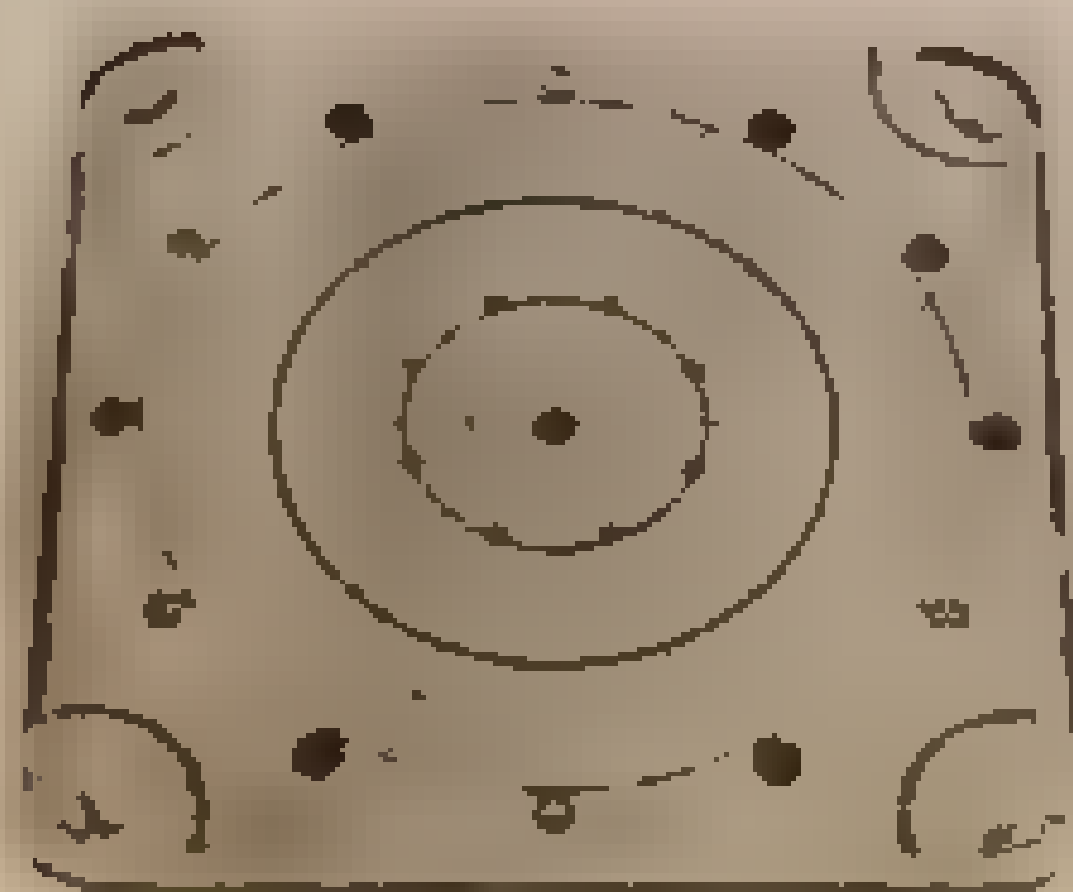

pander Tube brakes and Rotovane tires. Expander Tube brakes are simpler in design, lighter in weight and easier to maintain than other brakes. Rotovane tires—the first commercial pre-rotation tires—reduce landing shock, lengthen tire life and make possible lighter landing gears.

All these developments are the result of B. F. Goodrich research—the research that works constantly for better and safer flight. *The B. F. Goodrich Company, Aeronautical Division, Akron, Ohio.*

FREIGHT SERVICE FOR THE EXPANDING SOUTHEAST

Interior of Diesel Shop showing top of 90-ton electric drop table which serves 3 tracks

Exterior of Diesel Shop at Macon, Ga.

As in the busy, energetic territory we serve, the rate of progress on the Central of Georgia continues unabated. For instance, our Diesel fleet now includes nine freight road Diesels supplemented by a pool of twenty-three Diesel switchers. This modern power is serviced in a model new Diesel shop at Macon completely equipped for running maintenance as well as heavy repairs.

The Central of Georgia Railway is continually on its toes to give the expanding Southeast the best in modern railroad-ing. Shippers are reaping the benefits of better main line schedules—improved terminal facilities. Modern communications systems play a vital part in our efficient operation—during the past year a two-way radio system was installed in our Atlanta yard. 425 miles of our lines are operated under automatic signals—C.T.C. has been extended to include a total of 62 miles of main line operation. A system of coordinated rail-truck service covering a network of 1700 miles is planned, to bring the advantages of fast L.C.L. service to many more communities.

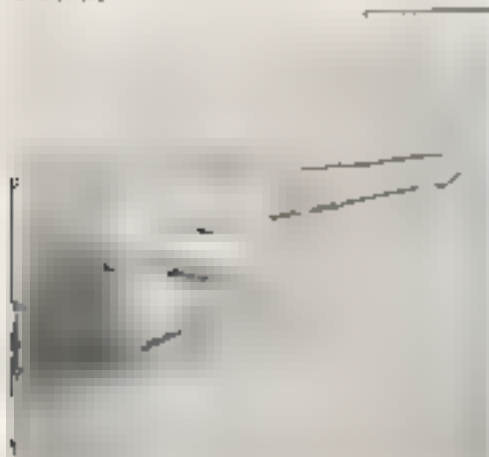

Both the industrial giants and smaller industries have found the Southeast an ideal place to grow and prosper. You will find our Industrial Department a friendly, reliable source of information and your inquiry will be treated as strictly confidential.

CENTRAL OF GEORGIA *Railway*
SAVANNAH, GEORGIA

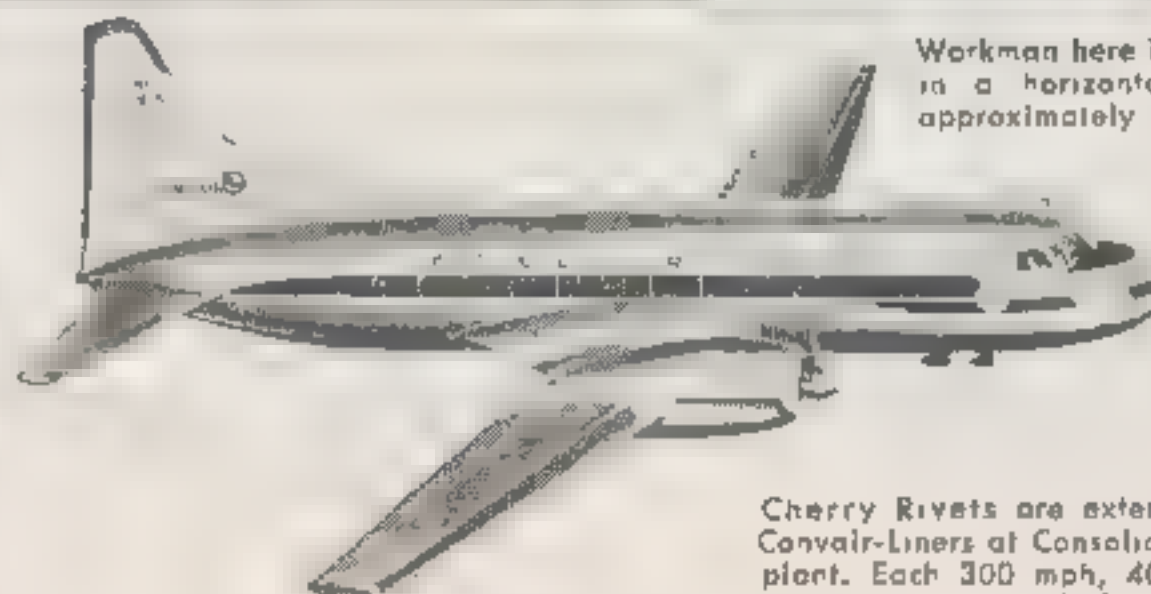

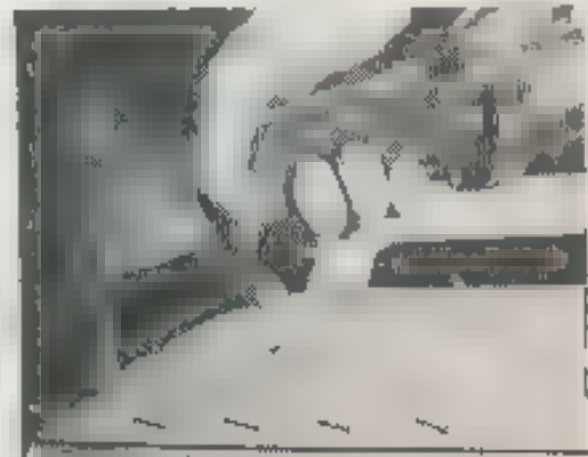

A GOOD FRIEND ALL ALONG THE LINE

Insert the rivets in the drilled holes.

With the gun, pull through the stems and expand the rivets into the materials to be fastened.

Workman here is inserting Cherry Rivets in a horizontal stabilizer in which approximately 500 rivets are used.

Cherry Rivets are extensively used in building Convair-Liners at Consolidated Vultee & San Diego plant. Each 300 mph, 40-passenger, pressurized and air-conditioned Convair-Liner uses approximately 19,800 Cherry Rivets.

CHERRY BLIND RIVETS make the hard jobs easy

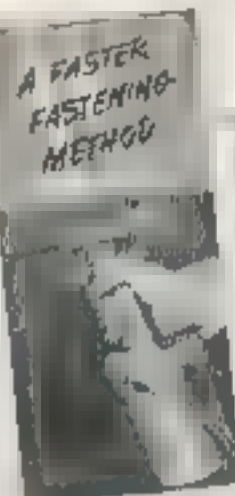

OVER THREE MILLION CHERRY RIVETS will be used for the new Convairs. Originally developed for and with the help of the aviation industry, Cherry Blind Rivets have developed into a "standard" for aviation production lines. Providing greater ease and convenience than any other blind fastening method, Cherry Riveting gives you tighter, vibration-resistant joints. Greater hole-diameter and grip length tolerances. Wider range of diameters. And a more complete choice of grip lengths.

THE WORLD'S SIMPLEST FASTENING METHOD

Cherry Riveting is accomplished from the production side of the job. Only one man is needed. It's *controlled pull* instead of pounding. Whether for assembly work or repair, try Cherry Rivets today. Gain time and cut costs on production fastening jobs. For further information, write for the Cherry booklet—"A Faster Fastening Method."

IT'S CHERRY RIVETS AND CHERRY TOOLS FOR THE BEST BLIND FASTENING JOB.

Cherry Rivets are made from aluminum alloy, steel, or Monel. Standard rivets come in five diameters and two head styles. There is a wide range of grip lengths. Special heads, diameters, grip lengths, and alloys can be made to order. WRITE US TODAY FOR FURTHER INFORMATION. BOOKLET MAILED ON REQUEST. ADDRESS: DEPT. F-110, CHERRY RIVET COMPANY, 231 WINSTON STREET, LOS ANGELES 13, CALIFORNIA.

CHERRY RIVETS, THEIR MANUFACTURE & APPLICATION ARE COVERED BY U. S. PATENTS ISSUED & PENDING

bridle paths, fresh and salt water boating and beaches are in the city or nearby. In the adjoining City of Westbrook are the great paper mills of the S. D. Warren Company, makers of the paper on which this booklet is printed, and the Dana Warp Mills of the textile industry.

Northwest from Portland, on the threshold of the great Sebago Lakes region is a farming area famous for dairy-ing and vegetable crops. This includes North Yarmouth, Gray, Windham, Standish and Gorham. In Standish is a State game preserve, where thousands of deer have sanctuary each year and populate the entire section of the State for fall hunting. In Gray, New Gloucester and Raymond are a state game farm and the largest trout hatchery in the world which annually attract thousands of lovers of wild life and anglers.

Sebago, second largest lake in Maine, is the native habitat of fighting landlocked salmon, square-tail trout, black bass and numerous other fresh water species which are caught from Spring to Fall. Bordering towns of Windham, Raymond, South Casco, Sebago and Standish offer vacation facilities by the hundreds, ranging from overnight camps to exclusive lake shore resorts. This area too, provides the sites for scores of summer boys and girls camps, the youngsters flocking in by the thousands from

FEATHER-WEIGHTS

There are two main reasons why Feather-Weight All-Aluminum Oil Coolers are now specified for so many of America's leading aircraft, including the latest developments in jet propulsion aircraft.

1. UNIQUE CONSTRUCTION. Clifford's patented method of brazing with aluminum alloy makes all-aluminum construction possible with consequent high resistance to temperature, pressure, vibration and shear.

2. ACCURATE TESTING. Feather-Weight performance under any temperature and atmospheric conditions likely to be met in service is precisely predetermined in Clifford's wind tunnel laboratory . . . largest and most complete in the aeronautical heat exchanger industry.

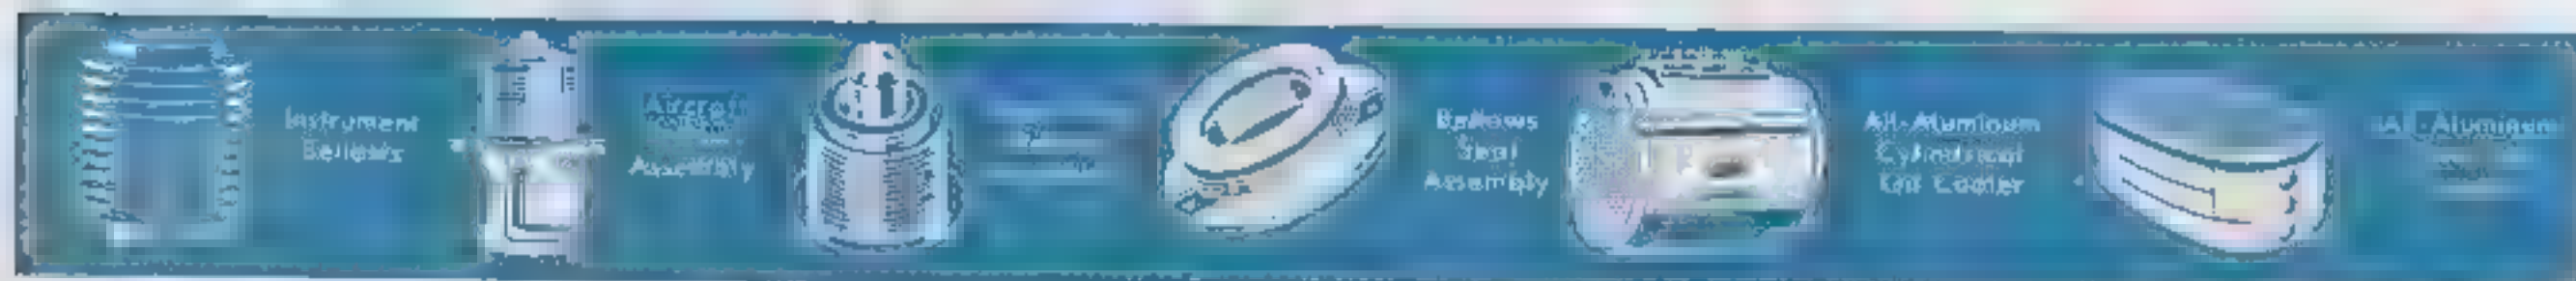

Inquiries concerning Feather-Weight All-Aluminum Oil Coolers are invited. Clifford Manufacturing Company, 561 E. First Street, Boston 27, Mass. Offices in Detroit, Chicago and Los Angeles.

CLIFFORD

Feather-Weight

ALL-ALUMINUM OIL COOLERS

HYDRAULICALLY-FORMED BELLOWS

GRUMMAN "MALLARD" COOLED BY FEATHER WEIGHTS...

The Grumman "Mallard" was designed to qualify for the highest air carrier rating. The oil coolers had to operate under severe temperature and pressure conditions, yet be light . . . strong . . . compact. Aluminum brazing of thin sections permitted the construction of coolers that are stronger and light in weight. A unique wind tunnel—the largest, most modern in the industry—allowed a basic research program which resulted in oil coolers meeting the "Mallard's" requirements. Clifford FEATHER WEIGHT Oil Coolers

made an important contribution to this great plane . . . here's why:

- They "stand up" under temperature, pressure, vibration and shear, which usually cause oil cooler failures.
- They are designed to meet the exacting requirements of Army-Navy Aeronautical specifications for strength and performance.

Inquiries concerning aluminum oil coolers are invited. Clifford Manufacturing Company, 561 E. First Street, Boston 27, Mass. Offices in Detroit, Chicago and Los Angeles.

The "MALLARD" by Grumman

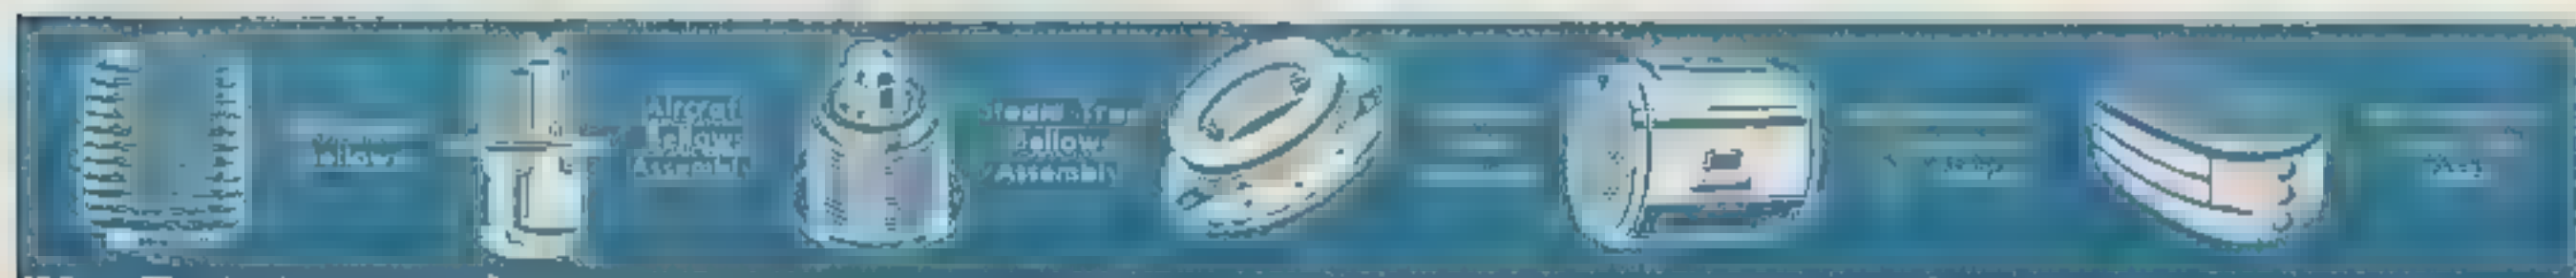

Latest in a long line of famous amphibians, it recently passed C.A.A. tests so stringent that most craft now in regular airline service would fail to qualify.

CLIFFORD

Feather Weight

ALL-ALUMINUM OIL COOLERS

HYDRAULICALLY-FORMED BELLOWS

FEATHER-WEIGHTS

**COOL MARTIN 2-0-2
AND 3-0-3 TRANSPORTS**

The new Martin 3-0-3 is a highly advanced transport design, featuring a pressurized cabin for high altitude flying and jet assistance for added performance. It carries 36 to 38 passengers at speeds up to 300 mph. This plane, together with its non-pressurized sister ship, the 2-0-2, has been ordered in greater quantity than all other twin engine transports combined.

Marking an important step forward in air transportation, the Martin 2-0-2 and 3-0-3 represent a combination of many engineering achievements. Their FEATHER-WEIGHT all-aluminum oil coolers for example, were especially developed in the largest, most modern wind tunnel laboratory in the aeronautical heat exchanger industry.

FEATHER-WEIGHT all-aluminum oil

coolers are inherently light, strong, compact...withstanding the most severe conditions of temperature, pressure, vibration and shear which usually cause oil cooler failures.

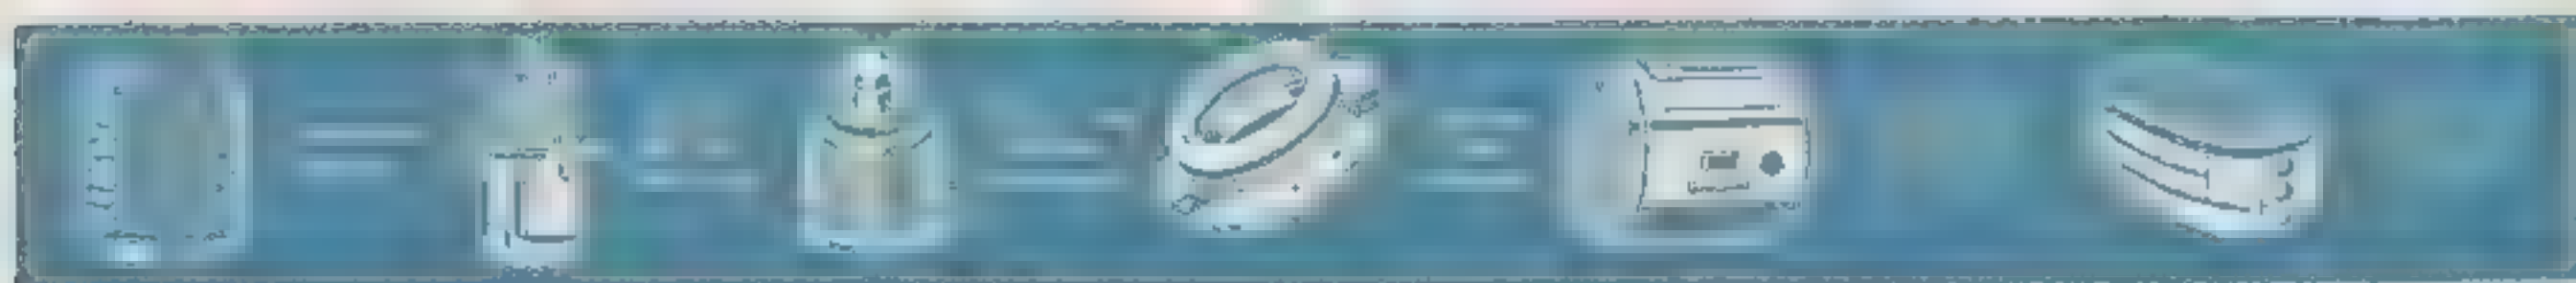

Inquiries concerning FEATHER-WEIGHT oil coolers are invited. The Clifford Manufacturing Company, 561 E. First Street, Boston 27, Massachusetts. Offices in Chicago, Detroit, Los Angeles.

CLIFFORD

FeatherWeight

ALL-ALUMINUM OIL COOLERS

HYDRAULICALLY-FORMED BELLOWS

NEW "FLYING CRANE" COOLED BY FEATHER-WEIGHTS

Test flight of the XHRP tandem helicopter, demonstrating its ability to carry a one-ton military load. It is expected to prove useful in rescues and in military river-crossing operations. Tandem rotors overcome the helicopter balance problem.

The XHRP, built by the Piasecki Helicopter Corporation in collaboration with the Navy, represents the first successful tandem rotor helicopter. Typical of the advanced engineering that went into this new ship are the FEATHER-WEIGHT all-aluminum oil coolers... developed in the largest, most modern wind tunnel laboratory in the aeronautical heat exchanger industry.

Inherently light, strong, compact, FEATHER-WEIGHT all-aluminum oil coolers resist the extremes of temperature, pressure, vibration and shear which frequently cause oil cooler failures. Inquiries concerning FEATHER-WEIGHT oil coolers are invited. Clifford Manufacturing Company, 561 E. First Street, Boston 27, Massachusetts. Offices in Chicago, Detroit, Los Angeles.

Lincoln County

With its coastal terrain jutting lacy fingers of wooded headlands and islands into the Atlantic and its inland regions composed of rolling farm lands and pine and spruce bordered lakes and streams, Lincoln County has become one of Maine's best known vacationing areas.

In early times one of the favorite locales of Indians, traders, settlers and even pirates, its coastal towns and inland lakes are today the goal of thousands of summer visitors and vacationers, many of whom own their own cottages and camps, and nearly all of whom return year after year to the bracing coastal spots or the canoeing and fishing relaxation of the lakes and small rivers.

From U. S. Route One, which cuts across the county from Wiscasset to Waldoboro, a network of excellent roads leads both to the coastal villages and resorts and northward through a farming and lake country where streams, brooks and ponds cut through the dense forests.

Wiscasset, on the westerly edge of the county, is the shire town and lies on the west bank of the wide Sheepscot River. Its beautiful old homes, mostly built by shipping merchants and sea captains, is one of the most charming towns along the Maine coast. It is the rendezvous of artists and writers who have been fascinated by its interesting atmosphere and the historical associations of its show places

many of which are open to the public. From Wiscasset roads lead north to Dresden, on the East Bank of the Kennebec, and to Alna, Head Tide and Whitefield, all on the Sheepscot River and trading centers of a large farming and camping area where small lakes and wooded streams make fishing and canoeing attractive sports.

Across the river is North Edgecomb, with its historic old fort and the famous Marie Antoinette House, which legend says was built for the royal personage who never occupied it. South on Route 27 is the pretty village of Edgecomb, where part of Captain Kidd's treasure is supposed to be buried.

From Boothbay, an important summer recreational center, other roads lead to such popular resorts as Boothbay Harbor, Ocean Point, Spruce Point, Southport, West Southport and Newagen, all of them busy places in the summer from the influx of thousands of summer residents, cottagers and vacationers. The Boothbay Harbor Region is becoming more popular every year and with its many bays and harbors it offers excellent facilities for fishing, bathing, boating and other water sports. Its first class hotels, tourist homes and cabins provide attractive accommodations of every type.

Miss Ruth Lovell Day, Director

berland-Oxford Canal; the Wadsworth-Longfellow House and Longfellow birthplace; Portland Observatory on Munjoy Hill; Victoria Mansion, the many museums and art exhibits, and Portland's nearness to beach, lake and mountain.

West of Portland, at the Southwestern entrance to the Sebago Lake region is historic Gorham, first called Narragansett. Fort Hill, Gorham State Normal School, the Baxter Museum and the Crockett-Jewett-Broad House, built in 1765, are outstanding spots in a pleasant community of fine old homes standing amid stately shade trees. It is also the center of a large farming area and is essentially a residential town.

Numerous highways lead to the Sebago Lake-Long Lake region stretching to the northern part of the county and beyond, a veritable wonderland of lakes, streams, forests and hills. Sebago Lake, 14 miles long and 11 miles wide reaches a depth of 400 feet in some places. From the crystal-pure, spring-fed waters of this lake comes the inexhaustible water supply for Portland and the surrounding area, including several of the Casco Bay islands. On the shore of Sebago in North Windham has been discovered the largest Indian burial ground in the United States and thousands of Indian relics have been collected there.

(Continued on Page 38)

Supersonic Detective

SEARCHING the very depths of heavy metal parts for hidden defects is an important part of regular safety inspections given Erie locomotives. Yes, the Supersonic Reflectoscope used for this job "looks" right into axles and driving pins by sending high frequency sound waves directly into the heart of solid steel. If there is any interior flaw, the waves detect the fault and show it on the machine's viewing screen.

Use of scientific equipment like the Reflectoscope

is typical of the Erie's modern methods for *progress in railroading*. Developing new, better and faster ways of doing things results in safer, more dependable railroad transportation—the kind you get when you travel or ship "Via Erie."

Erie Railroad

Serving the Heart of Industrial America

"IT MAKES SENSE to me—as president of Atlantic Aviation Corporation and distributor for Beech Aircraft in New England, New York and New Jersey areas — to use Esso and make sure our planes get the performance protection of high-quality aviation products."

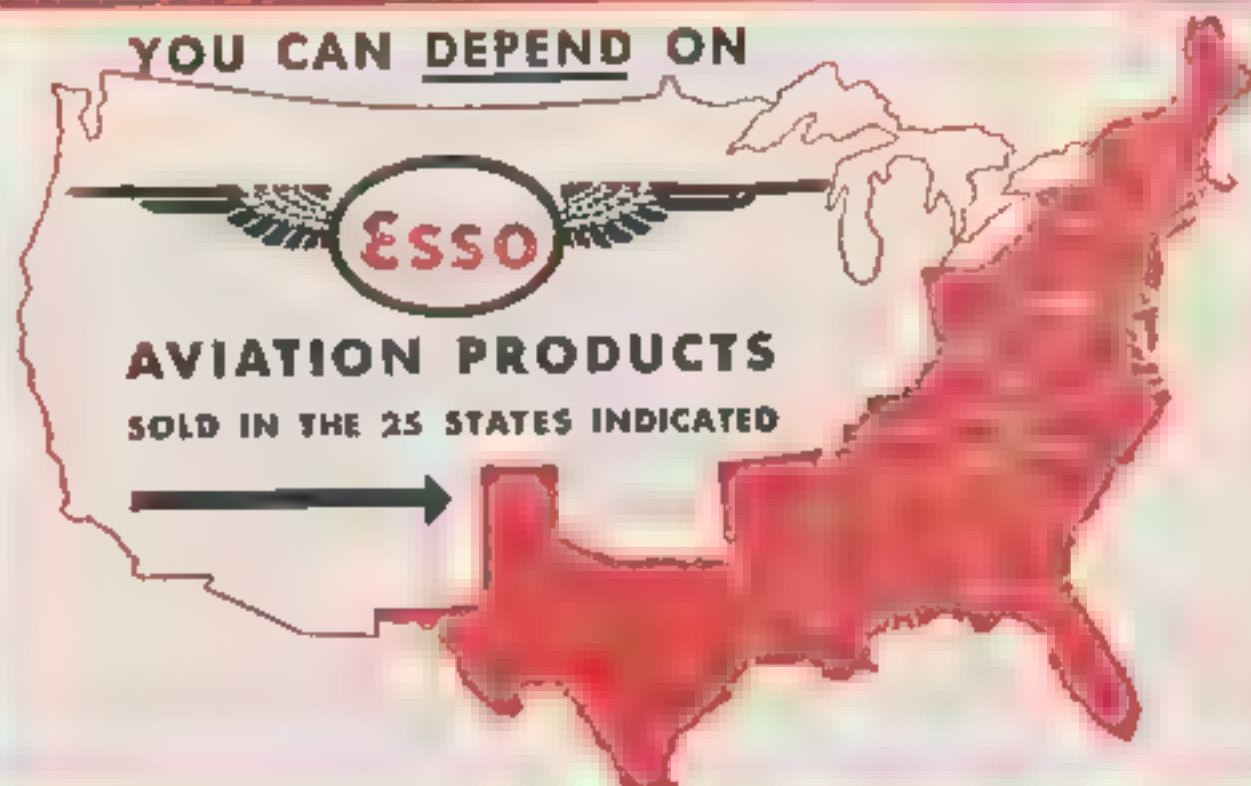

Sydney Nesbitt
President of Atlantic Aviation Corp.
and Beech Aircraft Distributor
New York..Teterboro..Boston

"FOR FIFTEEN YEARS we've used Esso Products in our trucks and machinery on tough road construction jobs and found them completely dependable. So now, using our own plane to inspect widely separated operations, and wanting dependable aviation fuels and lubricants... I again pick Esso."

George M. Brewster, Jr.
Secretary, G. M. Brewster & Son, Inc.
Road Contractor and Executive Flyer

YOU CAN DEPEND ON

FROM MAINE TO TEXAS hundreds of airports service planes with Esso Aviation Products...the high-quality aviation fuels and lubricants that are tested and proved in America's largest petroleum laboratories by the constant research of over 2000 scientists and technicians.

Wings for the ALL-AIR ARMY

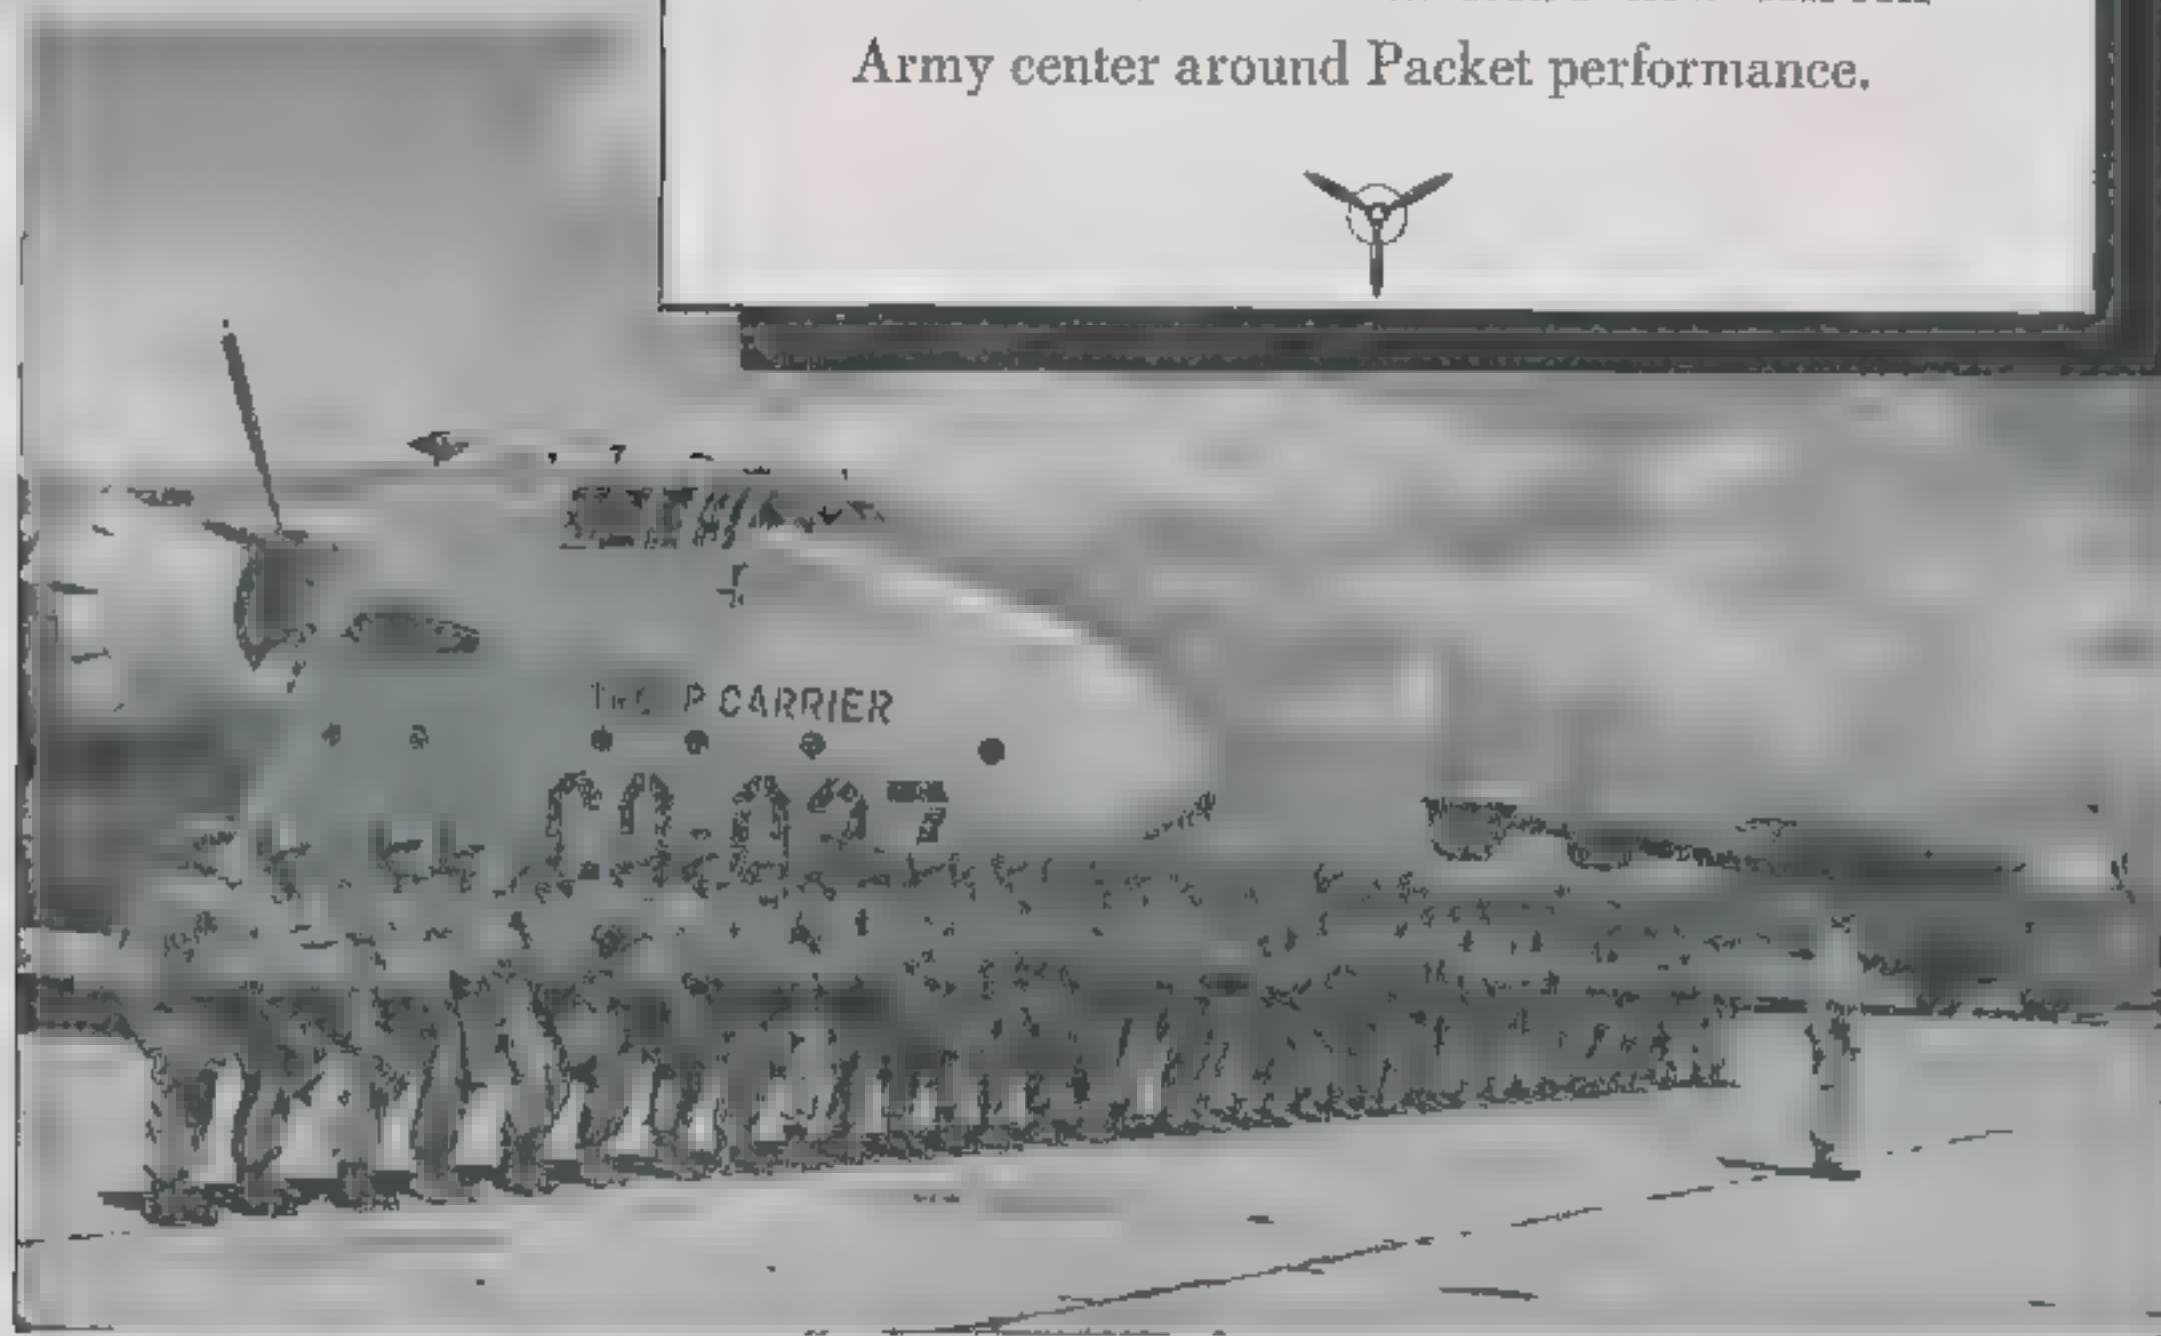

That's a 3-platoon complement of C-82's, the famous Fairchild Packet.

They are carrying 123 men, a fast-hitting, air transportable infantry unit.

The Packet is on duty in ever increasing numbers with the new Army. It lends wings to troops being trained for swift mobility and close ground-air cooperation.

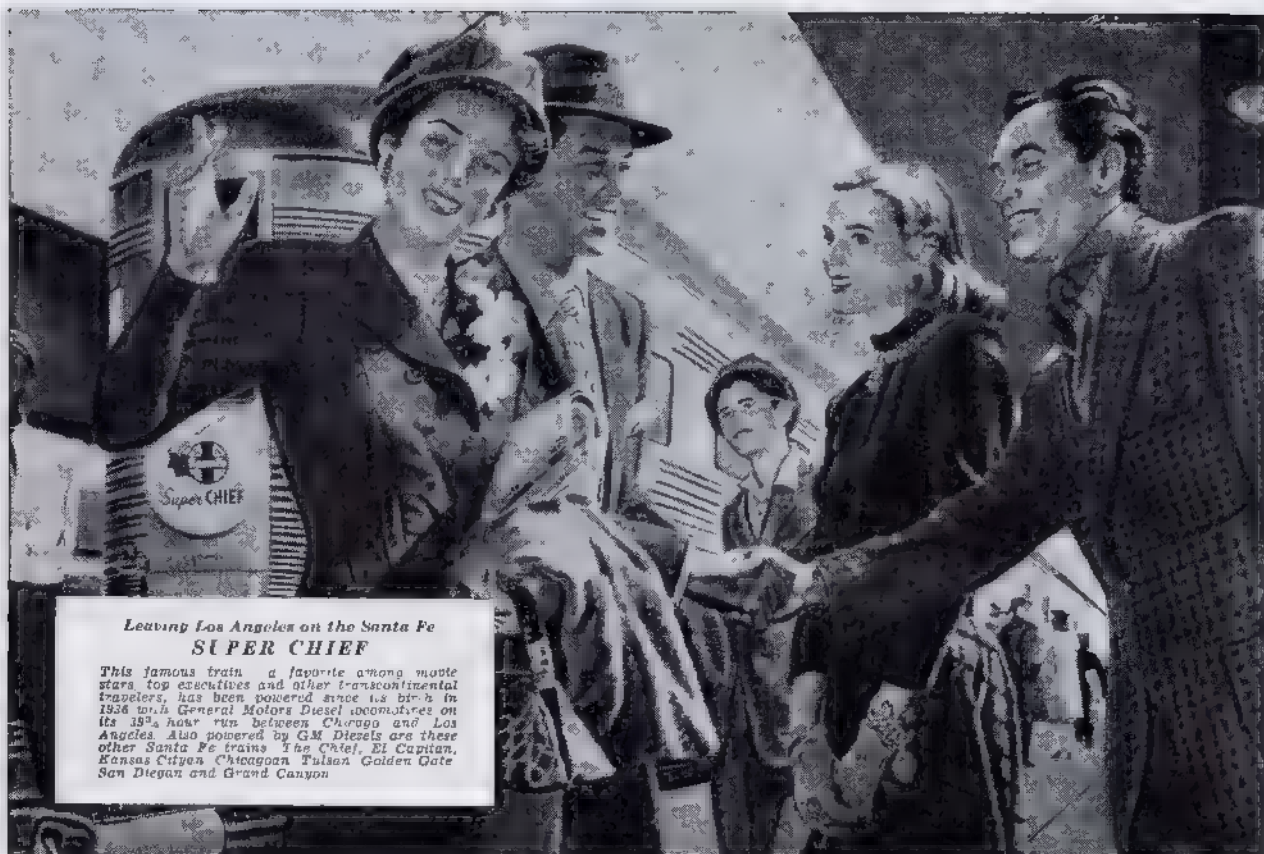

It has found scores of tasks in maneuvers. It carries guns and supplies, ammunition or men. It has successfully dropped heavy field pieces by parachute to troops on the ground.

Fairchild engineers gave the Packet the ability to do many tasks well—so well that the maneuvers of America's new All-Air Army center around Packet performance.

Fairchild Aircraft

Division of Fairchild Engine & Airplane Corporation, Hagerstown, Maryland

Leaving Los Angeles on the Santa Fe
SUPER CHIEF

This famous train, a favorite among movie stars, top executives and other transcontinental travelers, has been powered since its birth in 1936 by General Motors Diesel locomotives on its 35 1/2 hour run between Chicago and Los Angeles. Also powered by GM Diesels are these other Santa Fe trains: The Chief, El Capitan, Kansas Cityan, Chicagoan, Tucson, Golden Gate, San Diegoan and Grand Canyon.

Pleasure Unlimited!

From the moment you leave the workaday world and step into a modern streamlined train, you need never have a dull minute. Your trip can be as gay and exciting as you want it to be.

Of course the finer lounge cars on today's trains, the marvelous observation cars and domes, and other luxuries and conveniences hitherto associated only with exclusive clubs and modern hotels — these did not happen all at once.

They began when General Motors pioneered the first Diesel-powered passenger locomotive 14 years ago and developed as this new and modern power was adopted by more and more railroads.

As a consequence, more than 150 name trains on 21 railroads are now headed by General Motors locomotives — and these are just about all the top trains in the United States.

Railroad men know what these better locomotives mean in terms of faster trains; on-time schedules, and substantial operating economies.

You realize all this as your Diesel powered train glides with a new velvety smoothness over the rails — with no jolts or jerks at starting and stopping — and no smoke or cinders to mar the cleanliness of your trip.

Don't think for a moment, however, that progress stops here. Good railroading is a series of never-ending developments. You can look to the railroads for even finer trains in the future — and to General Motors for even better locomotives to head the better trains of tomorrow.

"Better trains follow General Motors locomotives"

Maine Invites You

WASHINGTON COUNTY

across the giant Bay of Fundy, the distant shores of Nova Scotia.

The U. S. Weather Bureau officials rate the summer climate in this area as the finest in the Nation and the winter temperature the same as Boston. Mosquitoes, black flies and hay fever are non-existent there and places of interest, historic spots and scenic variety are numerous.

Clockwise on the road-circle from Lubec to Eastport are West Lubec, North Trescott, Whiting, with a famous old church and cemetery; Dennysville, on the swiftly flowing Dennys River, famous for its Atlantic salmon; West Pembroke and Pembroke, with sardine and blueberry canning plants; and Perry, where a stone monument marks the exact midway point between the Equator and North Pole. Offshore in the St. Croix River is Docket Island, where De Monts and Champlain and their company spent the winter of 1604, the first white settlement in America north of Florida. Perry is also the site of the Passamaquoddy Indian Reservation, one of only two such sites in New England. The other is the Penobscot Reservation at Old Town.

Robbinston also is on Route One between Perry and Calais and is at the mouth of the St. Croix River. The rocks and sandy beaches in this area are tinged with red, creating a striking colorama.

Inland from Route One, State Highway 191 cuts north-south from Baring to East Machias, skirting the southern end of Meddybemps Lake, Cathance Lake, Rocky Lake and Hadley Lake. It passes through the villages of Meddybemps, Grove, Cooper and Jacksonville. Offshoots go through Charlotte and Ayers to West Pembroke; and through Marion to Dennysville. These roads traverse a lake and forest country, where Atlantic salmon come up the coastal streams and lake salmon, trout and togue fishing are spectacular.

Another side road, along the southern shore between East Machias and Lubec passes through Cutler, with one of the most beautiful small harbors in the United States.

Westward from East Machias to the Hancock County Line, the coast of Washington County is indented with many deep bays, whose peninsulas and islands make it one of the most rugged and picturesque sections of the Maine coast. Machias Bay, Starboard, at the coastal tip of Machiasport, Roque Bluffs, Englishman's Bay, Chandler's Bay, Jonesport, West Jonesport, Beals, Addison, Pleasant Bay, Harrington, Ripley Neck, Milbridge, Wyman, on Narraguagus Bay, Pigeon Hill Bay, Petit Manan Point, Dyer Bay, Dyer Neck and Steuben—all are names and places in this entrancing coastal area where lumbering, fishing and the recreational industry are an important means of livelihood in a setting of grandeur and beauty.

Slightly inland the larger towns of Machias, county seat and shopping center, Jonesboro, Centerville, Whitneyville, Columbia Falls, Harrington and Cherryfield are pretty villages on rivers which cut into the coastal plain.

Cherryfield, on the Narraguagus River; Harrington, on a coastal river and the center of forty-six different trout fishing streams, Columbia Falls, on the Pleasant River; and Whitneyville on the Machias River all are centers for the "king of

game fish", the Atlantic salmon. They also are points from which excellent fishing and hunting grounds in the beautiful forests back from the coast may be reached.

From Cherryfield starts beautiful "Cherryfield Woods Road", State Route 193, which follows the Narraguagus River north through Deblois to Beddington. Here Route 9 cuts across the center of Washington County from west to east. This is the famous "Air Line" road, mecca of deer hunters and fishermen, tapping the Mopang Lakes, Pleasant River, Machias River, Chain Lakes, Crawford Lake and Pocomoonshine Lakes areas, with their villages of Wesley, Pokey, Crawford, Alexander and Baileyville, where Route 9 joins U. S. Route One between Baring and Woodland. This is the "heart" of the Washington County wilderness, famous for fishing, hunting and bird shooting.

Cutting across the center of the county, the famous Grand Lakes chain reaching up into Penobscot County is teeming with togue, trout, salmon, pickerel and other gamy fish, making it the Mecca annually for thousands of sportsmen. Connecting Grand Lake and Big Lake is Grand Lakes chain reaching up into Penobscot County water known to all experienced fishing enthusiasts.

North of Calais is Woodland, site of the St. Croix Paper Company; Princeton, gateway to the Grand Lakes area; Waite and Talmadge, in the heart of a great hunting and fishing area; Topsfield, Brookton, Eaton and Danforth, all on U. S. Route One traversing the northern section of the county. Vanceboro is the gateway to the Spednic and Chiputneticook Lakes area.

took Railroad. Its wartime shipping record has been important. Here also is the Penobscot Marine Museum, the most valuable of its kind in the State. It is in charge of Lincoln R. Colcord, famous Maine writer of sea stories, whose home is nearby.

Stockton Springs, with its nearby Fort Point, a charming retreat for tourists, and Prospect, on the western approach to the Waldo-Hancock Bridge over the Penobscot, are village centers for nearby summer estates and resorts. Near Prospect is Fort Knox, a massive structure of Mt. Waldo granite, commanding one of the most beautiful views on the Penobscot River. On the road to Frankfort are the surface quarries of Mt. Waldo, where countless tons of fine granite have been cut out of the mountainside. Frankfort is a riverside town, once an important seaport, overshadowed by Mt. Waldo.

Winterport is an historic town of many fine homes, including the Blaisdell homestead, built in 1789 and designed by Christopher Wren, famous English architect. As the head of winter navigation on the Penobscot it was once an important shipbuilding community and seaport and these activities still are carried on to a limited extent.

One of the main roads leading into Belfast from the west is Route 3 from Augusta. This traverses the Waldo County towns of Palermo, Montville, Liberty, Searsmont and Belmont. Belmont's Tilden Pond is a popular summer resort, while Lake Quatabacook between Searsmont and North Searsmont offers many cottages and charming scenery in every direction. Ben Ames Williams has his farm home near the village and does much of his writing here. Liberty, on Georges Lake, is the site of the 3,793-acre St. George State Park, which stretches over into adjoining Montville and is a favorite resort. Palermo is near Sheepscot Lake, making it an ideal place to fish, rest and enjoy life in the open.

Waldo, Brooks, Knox, Morrill, Freedom, Thorndike, Unity, Troy and Burnham are on Route 137 and connecting roads and in an area serviced by the historic and unique Belfast and Moosehead Lake Railway. All are inland towns that have rivers, lakes, streams and groves that appeal to those in search of recreation and rest. Unity Lake is one of the best black bass and brown trout fishing waters in this section of Maine.

Swanville is located on Swan Lake, noted for its salmon fishing and offers fine accommodations for tourists. Monroe and Jackson are farming and lumbering communities where tourists may rest at farm homes and enjoy the delicious foods that Maine women always seem to know how to cook best.

Brand new LOG LODGE and CABINS, on white sand beach, UNITY LAKE. Cabins have complete baths, hot and cold water, fireplaces, and unusually well furnished. Attractive Lodge also dining room with superlative meals, artistic table pottery and gracious service. Rates \$35 to \$45 a person, per week, American plan. This is a NATURAL BASS LAKE, also pickerel and perch. Golf, water sports and others. All churches near. Train, plane or bus service. Please write for information. Limited accommodations.

FORT KNOX: In Prospect, Waldo County; 124 acres; granite fort; picnicking.

FORT McCLARY: In Kittery Point, York County; 27 acres; hexagonal stone and wooden fort; picnicking and bathing.

FORT WILLIAM HENRY: Pemaquid Beach, Lincoln County. Fort and historical relics. Picnicking and bathing.

They Sure Move Freight!

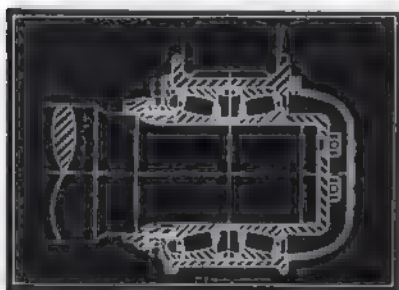

Diesel Locomotives have contributed greatly to the progress made by American Railroads in swift, economical, freight movement. Hyatt roller bearing journal boxes and traction motor bearings have been active partners in this development.

There is a very definite trend toward the more widespread use of modern roller bearing freight cars that can be

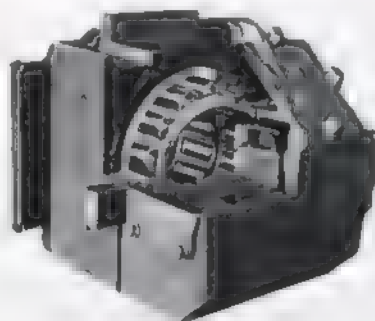

freely interchanged among all carrier systems.

Hyatt developments in the freight car field over the past twenty years will be just as enthusiastically received as our present series of locomotive and passenger car journal boxes.

J-M Thermoflex Blankets protect new Boeing XB-47 Stratojet Bomber

ABOVE: Arrows indicate Thermoflex Blanket around turbine casing of the Boeing XB-47.

BELOW: Close-up of Thermoflex Blanket showing flexibility which assures easy application.

THE BOEING XB-47 is powered by six General Electric J-35 axial-flow jet engines of 4,000 lbs. thrust each. Shielding the intense heat at tail cones and around turbines are J-M Thermoflex Blankets.

Developed by Johns-Manville expressly for insulating the engine cones, turbine casings and tail pipes of jet engines, the Thermoflex Blanket combines excellent thermal properties with the light weight and

flexibility that are also essential in this service. It gives continuous, satisfactory performance against the temperatures encountered in current jet engines and its construction is such as to permit ready adaptability to future advanced designs.

Thermoflex Blankets are custom-made in thicknesses of $\frac{1}{2}$ " and up. The complete blanket as used in the XB-47 is $\frac{3}{4}$ " in thickness and averages 9 ounces per square foot in weight. Lighter weight blankets

using various types of meshes, screen cloths and foils are also available.

For further information about Thermoflex Blankets, address Johns-Manville, Box 290, N.Y. 16, N.Y.

Can you identify these U. S. Air Force Planes?

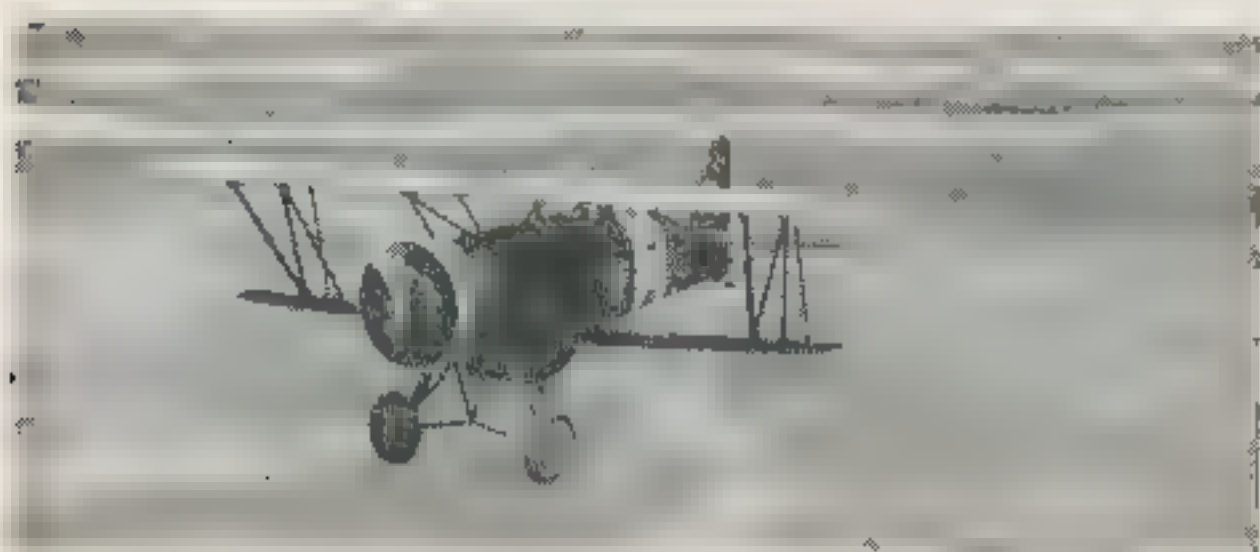

(EACH WAS A MILESTONE IN AVIATION HISTORY)

1. This was the world's first military aircraft, accepted by the U.S. Army August 2, 1909. A twin prop pusher powered by a 30 h. p. engine, it had a 36'-5" wing span and flew all of 42 m.p.h. If you said "Wright Bros., B-Pusher," you're right.

2. French made, but one of the best AEF fighters of World War I, this highly maneuverable ship had a 180 h.p. Hispano engine, did a spectacular 127 m.p.h. and carried a 37 mm. cannon. By now you recognize the Spad VII. (Larkins Photo)

3. With its monocoque fuselage, this model was a real achievement in 1931. Its 171 m.p.h. speed made it a popular racer, and it carried U.S. Airmail. It's the Boeing P-12. (U.S.A.F. Photo)

4. This sleek, all-metal craft made its appearance in 1935. With a Pratt-Whitney engine that delivered 950 h.p., it ripped along at 281 m.p.h. Its name? Seversky P-35. (Larkins Photo)

5. And here's a 1948 jet model. Carrying six .50 cal. machine guns and eight 140 lb., 950 m.p.h. rockets, this amazing craft does 600 m.p.h., climbs 535 feet per second. You can't help recognizing Republic's F-84 Thunderjet. (U.S.A.F. Photo)

One of the most important "milestones" in the progress of military aviation has been *aluminum*. Since the early days of flying it has been used in ever increasing quantities to make planes faster, stronger, more powerful.

This forward march of aviation with aluminum has been accelerated by the opening of another dependable source—*Kaiser Aluminum*. Its producer, Permanente Metals Corporation, is proud of the part it is playing in aviation progress . . . proud it has set new standards in the industry for on-time deliveries of highest quality aluminum.

Today every major U. S. aircraft builder uses

Kaiser Aluminum

product of Permanente Metals Corp.

under low temperature conditions.

- Precision fuel systems of the type used for turbojet, turboprop, and fuel injection reciprocating engines are most seriously affected by ice precipitation from fuel, particularly when micron type fuel filters are used in these systems.

- Both kerosene and gasoline type fuels can have appreciable ice precipitation at fuel temperatures of approximately $+15^{\circ}\text{F}$.

- Ice precipitation effects on fuel systems operating in cold weather conditions must be diagnosed on the basis of actual fuel temperature rather than ambient air temperature, for the reason that the fuel is frequently warmer or colder than air temperature would indicate.

- Ice precipitation may be effectively prevented by the addition of alcohol to the fuel in small quantities approximately equal to the anticipated water content of the fuel, and this should be adequate for fuel temperatures down to approximately -40°F .

New Notching Method Saves Time on Press

An improved method of performing notching operations on a punch press has been developed at the Glenn L. Martin Co. by Herbert A. Stran.

The procedure—utilizing an adapter plate and safety guard—is claimed to save considerable time in set-up and in running production parts.

The adapter plate is fastened to the bolster plate with four dowel pins and set screws, assuring accuracy of work. Plates formerly used were somewhat unsatisfactory since they had to be wired at one end to keep from shifting.

The slotted steel safety guard, with flange bent under and bolted to the adapter plate, affords a clear view of the operation. Eliminated is two-hand control, thereby speeding up the production run.

It is estimated that a saving of two hours per eight-hour running time on each punch press has been realized.

AVIATION WEEK, June 14, 1948

Klad Polish gives Martin 2-0-2 Transports a showroom shine at less cost!

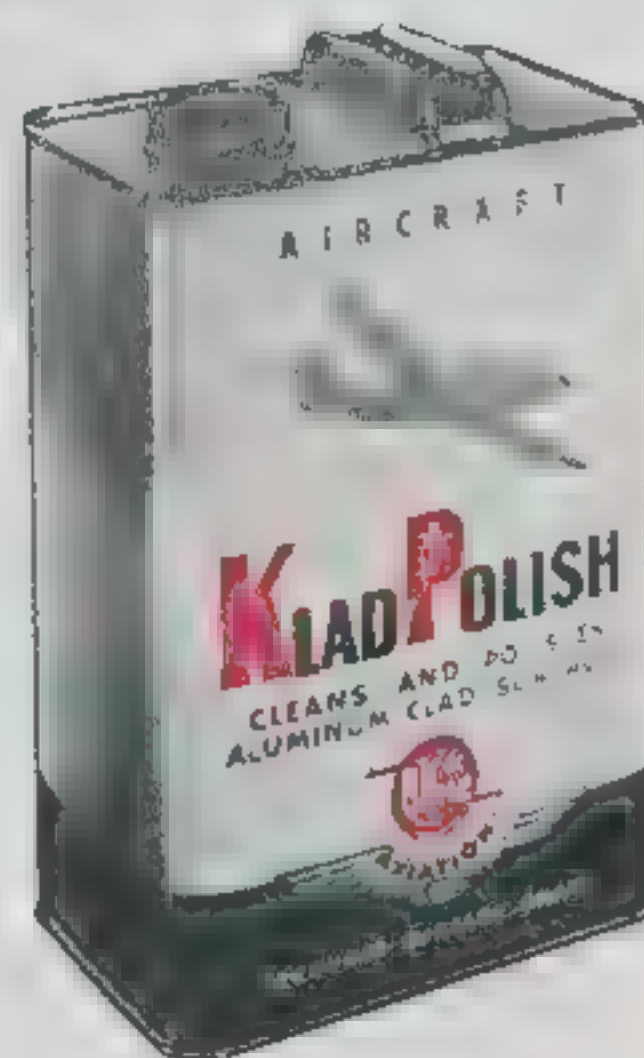

The Glenn L. Martin Company and Northwest Airlines are enthusiastic boosters for Klad Polish! Martin uses Klad Polish to slick up its air giants for delivery. Northwest uses Klad Polish to *keep* the ships looking slick. They both know that Klad Polish does a better job *in one operation . . .* saves man-hours and money.

When necessary, Klad Polish can be applied to the whole ship before it is rubbed down. And you'll find it much easier to rub down Klad Polish—even if it has thoroughly dried in direct sunlight. These facts and the outstanding efficiency of Klad Polish add up to better results with substantial savings in man-hours and costs.

This is only one item in the *complete* line of Whiz Aviation Chemicals that help airlines, plane manufacturers, and fixed base operators get better results at lower costs. A Whiz distributor in *your* territory is prepared to give prompt service.

R. M. Hollingshead Corporation, Camden, New Jersey; Toronto, Canada.

The complete WHIZ line includes Klad Wax for aluminum surfaces; an all-purpose Windshield Cleaner; a Cleaner and Wax for painted and doped surfaces; Hydraulic Fluids; Degreasing Concentrates; Fast Acting Paint Strippers; and other important, time-saving, labor-saving items.

LEADER IN MAINTENANCE CHEMICALS

Somerset County

Somerset County is another of the northern tier of Maine counties, its southern end a part of the fertile and industrial region of Central Maine and its northern reaches traversing a vast roadless area of rivers, lakes and forests extending into Canada.

The great Kennebec River flows southward for more than half its length within the borders of the county and in the northern part of the county are the headwaters of the St. John and Penobscot Rivers. The southern border of the county invades the famous Belgrade Lakes section of Central Maine.

Skowhegan is the name of the largest town and the county seat. It is the hub of a network of roads entering the county from various directions. From it the main roads lead north through the county to Jackman and into Quebec.

The center of a rich farmland area, Skowhegan is an up-to-date small city with modern stores, hotels, restaurants and other facilities and a residential area with many fine historic homes and tree-shaded streets. Leading industries are woolen goods, shoes, pulp and paper, canning, wood products and commercial activities.

Five miles from Skowhegan is Lakewood, world fa-

mous summer resort and summer theatrical center on the shore of Lake Wesserunnett. Its summer theatre dates from 1900 and it has achieved fame as "Broadway in Maine" because it annually attracts the leading stars of the New York stage with performances of Broadway hits.

Norridgewock, southwest of Skowhegan, was the original shire town of the county and is rich in Indian and historic lore. There still stands the early Congregational Church, the old county jail and the Danforth Tavern, where the old bar and ballroom remain intact. The trip from Norridgewock to Madison leads past the Old Point section, where Father Rale, missionary to the Indians, was murdered in 1724.

Other towns in the southern corner of the county include Mercer, a little lumbering and farming village; Smithfield, between North Pond and East Pond on the road from Oakland in the Belgrade Lakes chain of Kennebec County; Fairfield, an industrial and business town with neat homes on the road from Waterville. Canaan, Palmyra, Stark, Larone and Hinckley, the latter containing the famous Good Will Farm of 2,600 acres and

Like Lockheed, you too can profit by specifying Lord Dynafocals for engine suspensions. Here's why:

- 1) New high quality rubber stock that insures maximum service life.
- 2) Advanced design, with superior vibration isolation and positive safety features.
- 3) Low weight, without loss of strength or performance.
- 4) Exact selection to suit your requirements from Lord's complete range of Dynafocal types and sizes.

You'll want these advantages when buying replacements . . . and you'll get all of them by specifying Lord Dynafocals. For additional information, write to Lord . . . Headquarters for Vibration Control Systems.

Lord builds a complete line of Dynafocals for practically all engines, all aircraft. Check your requirements with this list. And write for your copy of the Lord Service and Maintenance Manual containing valuable information on maintenance problems, suggestions for increased service life, and parts lists.

Why pay a premium for a "custom-built" hangar?

This modern building, constructed for the County Airport Corporation, at Westchester Airport, White Plains, N. Y., is a typical example of the unusual versatility of Luria standard hangars. Complete with two-story masonry lean-to's and control tower, it has a clear door opening of 120 feet, with a center clearance of 30 feet.

Regardless of size, LURIA can meet your exact requirements from a standard line.

With *Standard Hangars* by Luria, you can avoid the extra expense, the delay, the planning and engineering that go into a "special" hangar. Yet the Luria line is so complete—and so *flexible*—that these Standard Hangars can, in effect, be custom-tailored to meet your precise requirements. Even "special" features can be included, retaining many of the cost-saving advantages of Luria standardization.

Whatever your airport building requirements, Luria is prepared to meet them—faster, easier, and at lower cost. And Luria Buildings are *available now*—permanent, steel-frame structures, with curved or gable-type roofs, and with clear door openings of from 60 to 200 feet. They can be supplied in any desired length, in increments of 20 feet. One or two-story lean-to's can be included, to provide extra shop or office space. Write today for complete information. Dept. A1.

York County

"Maine in a nutshell"—that's how a Maine visitor once described York County. For here in this "southern gateway to Maine" the State's travelling guest finds every form of natural advantage for vacationing, from world-famous beaches of sparkling white sand, from lakes and hills and streams to quaint, historic hideaways of inland country and shore where for more than 300 years people have found relaxation and peace.

To 80 per cent of Maine's vacationers, the wonders of the State begin to unfold in York County. At Kittery, only 50 miles north of Boston, at Eliot, the Berwicks, and Lebanon, the main traffic arteries enter the State from the South.

Along the shore travel line from Kittery, site of the so-called "Portsmouth" Navy Yard, one comes to the historic and beautiful town of York, with its neat sand beaches, spectacular cliffs and quiet rural hamlets, favorite havens of writers, artists and tourists. York Village, York Harbor and York Beach all are strung out like pearls along a branch of Route 1A. The first chartered city in America, York was a popular summer playground for the Indians before it became a Royal Colony in 1641.

Ogunquit, locale of one of America's great summer theatre activities and a world-famous art colony, is an Indian name meaning "Beautiful Place by the Sea." Its beach, together with the beautiful strip of sand at Wells Beach, annually draws thousands of vacationers and summer colonists, to their dreamy quiet shores.

A few miles further north along the coast is Kennebunk Beach and Kennebunkport, where Kenneth Roberts and other famous authors and artists have their summer homes. Both places are on the shore side of the Town of Kennebunk, whose up-to-date business district and charming residential section retain so much of the Early American atmosphere and tradition. Cape Porpoise, a famous fishing village a few miles north of Kennebunkport, was the scene of one of Maine's outstanding Revolutionary War engagements. Beachwood is one of the town's popular resort colonies.

Fortune's Rock and Biddeford Pool are on the ocean side of Biddeford, largest city and metropolis of York County situated at the mouth of the mighty Saco River. Biddeford is the site of the famous Pepperell Mills, home of Lady Pepperell sheets and other Pepperell fabrics known throughout the world. It is also the hub of road traffic for northeastern York County, leading inland to the hill and lake sections and shoreward to Bay View, Ocean Park and Old Orchard Beach.

The Marshall House YORK HARBOR, MAINE

Large Summer Resort Hotel of Brick, Cement, Fireproof Construction. Equipped with automatic sprinklers in every room and closet. Surrounded by extensive private grounds, encircled by ocean, river and salt water swimming pool.

Sea bathing, canoeing, boating, golf privileges at York Country Club which has an 18 hole course, also 12 tennis courts

The CASE of AIRLINE Z

Martin 2-0-2 Flies Its Route 25% Faster than Prewar Plane!

HERE ARE THE FIGURES!

FLIGHTS	Using Martin 2-0-2	Using Standard Prewar Plane
Boston to New York	45 min.	85 min.
New York to Philadelphia	37 min.	44 min.
Philadelphia to Baltimore	30 min.	40 min.
Baltimore to Washington, D. C.	20 min.	24 min.
Washington, D. C. to Elkins, West Va.	50 min.	74 min.
Elkins, West Va. to Parkersburg, West Va.	31 min.	43 min.
Parkersburg, West Va., to Cincinnati	51 min.	77 min.
Cincinnati to Indianapolis	40 min.	49 min.
Indianapolis to Chicago	52 min.	68 min.

MINUTES count when you're flying short-hop routes, because they're the places where profits leak away. That's why the Martin 2-0-2's time-gaining speed and much greater payload capacity are great news for airlines! This modern airliner offers high-speed luxury service to shorten schedules, attract more passengers and generate more traffic in cities with airports too small for most other airliners. The 2-0-2 can serve these smaller airports because it is CAA-approved to take off and land with maximum load in the shortest distance of any postwar airliner. It carries 36 passengers to the standard prewar twin-engine plane's 21. And its simplified loading, unloading and servicing means shorter stops between hops.

Airline Z is a typical example! Based on actual performance figures, a Martin 2-0-2, being 50% faster than pre-war planes, on this hypothetical route would save almost 2½ hours between Boston and Chicago. That is a minimum saving of 25% in route time. Thus, the 2-0-2 would be landing in Chicago while the prewar plane was only halfway between Parkersburg, West Va., and Cincinnati, Ohio. And these figures assume the same ground time for both planes. *Actually*, the Martin 2-0-2 would save still more time because it requires less time on the ground between landing and taking off! Just additional velvet on the 2-0-2.

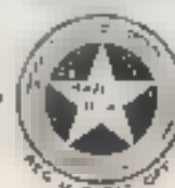

Here's one more example of why the Martin 2-0-2 . . . the world's top twin-engine airliner . . . is the plane to put airlines in the black! For full details, write today to: The Glenn L. Martin Company, Baltimore 3, Maryland.

Builders of Dependable

Aircraft Since 1909

Here's **PROOF** of why **MARTIN 2-0-2** Airlines Spell **PROFITS** for Airlines:

Northwest Airlines, first domestic airline to modernize its twin-engine fleet, has found in nearly a year of service that the Martin 2-0-2 airliner means:

HIGHER SPEEDS . . . 100 miles an hour faster than prewar twin-engine planes it replaces.

GREATER PAYLOADS . . . Almost twice as much revenue-producing payload is available in the Martin 2-0-2 as in the prewar plane.

REDUCED GROUND TIME . . . Built-in tail ramp . . . faster servicing through convenient access hatches . . . underwing pressure fueling . . . carry-on baggage arrangements.

UNRESTRICTED LOADING . . . Widest CG range of any postwar airliner . . . minimizes loading difficulties and passenger irritation.

GREATER VERSATILITY . . . CAA-approved for the shortest runway lengths of any postwar airliner . . . generates more traffic by bringing high-speed luxury service to small as well as large airports and cities.

UNPRECEDENTED ECONOMY . . . Design and construction of the Martin 2-0-2 keep operating costs to a minimum.

Higher speeds . . . greater payloads . . . reduced ground time . . . wider operation . . . all spell increased earnings to the airlines

Did you miss "The Case of Airline X," "The Case of Airline Y" or "The Case of Airline Z"? We'll be happy to send you copies of these factual case histories. Just drop us a line today.

"FLAK BAIT," Devon Francis' new book (Duell, Sloan & Pearce), is the thrilling story of the heroic men who flew and serviced Martin B-26 Marauders in bomber strikes from the Southwest Pacific to the Aleutians; from North Africa to the gates of Berlin. The Glenn L. Martin Company is proud to be mentioned in the combat roll call of these gallant airmen.

From High-Speed Bombers to High-Speed Transports MARTIN LEADS THE WAY INTO THE FUTURE!

YESTERDAY: The famous Martin B-10 bomber, faster by 100 m.p.h. than any other bomber of its day and speedier than most pursuit ships, made obsolete nearly all the world's military aircraft; won the 1932 Collier Trophy for Glenn L. Martin.

TODAY: The Martin 2-0-2 as a military transport can carry 61 military personnel or more than 15,000 pounds of military cargo—over twice the capacity of twin-engine equipment used in World War II and still in service. And the 2-0-2 cruises at speeds 100 m.p.h. faster than the World War II planes it replaces . . . yet operates from the same short runways, small airports.

Tomorrow

Martin engineers are constantly at work harnessing higher and higher speeds to the transport and combat needs of our Military Services. In the days to come, look to Martin for rotary wing aircraft and other swiftly developing fields.

that finds expression in numerous clubs, societies and organizations. During the war it has also been an important center of Naval activity.

From Rockland and Thomaston main highways lead southward to the shore areas fronting on the southwestward side of Penobscot Bay, a resort area containing outstanding hotels, summer estates, cottages and fishing villages. Owl's Head, South Thomaston, Spruce Head, St. George, Long Cove, Tenants Harbor and Port Clyde are picturesque fishing and resort villages in the coves and inlets along the shore and small boats ply between them and the islands off shore.

North of Rockland is Glen Cove, another vacationing center, and Rockport, with a V-shaped waterfront on Goose River that has been landscaped by Mrs. Mary Louise Bok-Zimbalist.

North of Rockport is Camden, one of the loveliest of all Maine coastal towns, where towering mountains rise almost from the ocean's edge to a height of more than 1,500 feet. These Camden Hills, Mount Battie, Megunticook, Bald and Ragged, were marvelled at by Champlain and Capt. John Smith because of their beautiful setting on the shores of Penobscot Bay. Here a National Park recreation area is being developed, containing picnic and camping sites, nature trails and ski trails. Citizens of Camden started this development with the Camden Bowl, in which events are held both summer and winter. Eventual size of the park will be nearly 6,000 acres between Lake Megunticook and the seashore. The Sagamore Picnic Area, just off Route No. One and on the seashore, contains 20 acres and already is rated as one of the finest in New England.

Not only have the year-round and summer residents of Camden taken particular interest in landscaping, both in the town and along the surrounding shore and countryside, but in the summer baskets of flowers decorate the lamp-posts in the business section and create an atmosphere of beauty and charm that is found nowhere else in the world. A notable group of musicians also make their summer homes in Camden and the beautiful Bok Amphitheater, seating 1,500 persons in a landscaped setting of trees, shrubs and plants and the remodelling and redecorating of the Camden Opera House, also have been special projects of Mrs. Zimbalist.

Both Camden and Rockland also are headquarters for schooner cruises, which are gaining in popularity every year.

Among the larger islands in Penobscot Bay reached by boat from Rockland and other Knox County towns are North Haven and Vinalhaven, both fashionable resort islands, Isle au Haut, Matinicus and Cribhaven, whose primitive charm is well known to lovers of nature.

Inland Knox County, with its network of lakes, streams and farmlands, contains the towns of Union, Washington, Appleton and Hope. These are farming and orcharding communities in a region of lakes, streams and mountains, with excellent fishing, canoeing, hiking and mountain climbing. Appleton is the center of the apple region and also has a State Fish Rearing Station. Megunticook Lake, Crawford Pond, Seven Tree Pond, Sennebec Lake and Washington Pond are but a few of the many bodies of water that dot this area like gems.

Good Eating

One of the prime delights of a Maine vacation is the enjoyment of Maine home-cooked foods prepared by men and women who have made it their business for years to provide good eating.

Until you have enjoyed the thrill of a real "Down East" meal, whether it be on the seafood or mainland side, you have been missing one of the joys of living known to Maine vacationists for many years.

Whether it be the regal lobster, prepared in any one of a score of delectable ways, or the other products of the coastal fisheries, such as clams, sardines, crab meat, delicious fish species or chowders, or whether it be the inland dishes of fresh meats, salmon, trout, or the other inland fish surrounded by crisp and flavorful Maine vegetables, hot biscuits and other tasteful accessories, your Maine host can place a spread before you that even few kings can today enjoy.

The world's best food, genial hospitality, some of the Nation's most outstanding scenic wonders, ample facilities for every type of vacation—small wonder so many thousands return to Maine year after year.

ROCKWOOD, MAINE

RELIEF FROM HAY FEVER

Maine is rapidly becoming known as a mecca
for those suffering from hay fever.

Broadly speaking, places in the forested re-
gions offer great relief and in many cases entire
immunity is had, particularly in northern Oxford
County and in the Rangeley region and the
wooded country around Moosehead Lake. Prob-
ably anywhere up in the "Big Woods", region of
Maine where grasses and pollen bearing weeds
are not found can be confidently recommended.

Along the coast where the growth is principally
coniferous, Monhegan Island, Newagen, Squirrel
Island, Mount Desert Island, Petit Manan and
Eastport are recommended.

BIG HOUSTON CAMPS

Box 217, Brownville Jct., Me.

Tel. Brownville 5-13

North from Milo an excellent tarred road leads to Brownville and Brownville Junction, then a gravel road to a good airport and the Katahdin Iron Works. This road opens up a heretofore hard-to-get-to hunting and fishing country of wide renown. The Katahdin Iron Works is the site of an unused mine and smelting mill which at one time worked a bog of iron ore, a variety of hematite, found in the area at the foot of Ore Mountain. Deposits of pigments and copper and asbestos also have been found here. Some lumbering operations are now carried on there.

Nearby, reached only by trail, is the "Grand Canyon of the East", at what is known as the Gulf on the West Branch of Pleasant River. Here the stream is deeply entrenched in a slate canyon. Water falls, sheer walls, fantastic shapes and unusual rock formations make a scene of surpassing beauty. Trout fishing in the various waters is excellent.

North through the roadless forest from this region are Whitecap and Jo-Mary Mountains, the Jo-Mary Lakes and the northern section of Pemadumcook Lake on the West Branch of the Penobscot. The Appalachian Trail traverses this wilderness, which reaches to the southern limits of Baxter State Park and the Katahdin area.

Baxter State Park is a 112,945-acre wild life sanctuary, offering opportunities for mountain climbing of every description, for the study of wild life, geology, wild flowers and everything pertaining to the wilderness. Mountain trails, campsites and shelters harmonize with the unspoiled surroundings. It is the most wildly spectacular spot in the Eastern United States.

WILSONS NEARING ITS 80TH YEAR

One of our Cottages

Here at Wilsons those fatigued by business and professional cares may relax in the delightful out-of-doors. From the porch at Wilsons there is a twenty mile uninterrupted view of Moosehead Lake at its widest point—a beautiful panorama of lake, mountains and forest.

Precision Transportation IS MORE THAN A SLOGAN

— To industrial leaders looking for a good plant site, the railroad is a decisive factor .

The Land of Plenty offers . . .

— Rail service that reaches *north, south, east and west* with connections to all points of the nation . . .

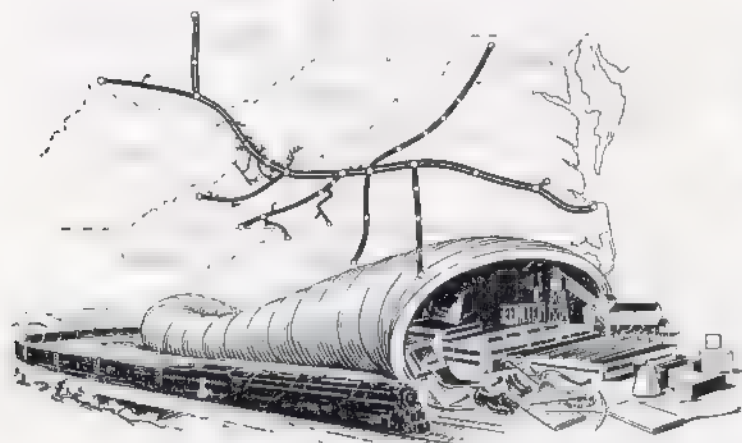

— Rail service *direct to shipside* at the modern, ice-free, year-'round Port of Norfolk . . .

— Rail service that is *fast, safe and dependable* because the most modern equipment and sound operating methods are used . . .

Precision Transportation of the Norfolk and Western Railway means all these things to discerning manufacturers who locate in the *Land of Plenty*.

Precision Transportation is a Norfolk and Western pledge you can depend on in the *Land of Plenty*—the six great states served by this railway system.

- Variety of raw materials . . .
- Manpower—intelligent and "home rooted" . . .
- The Norfolk and Western Railway . . .
- The port of Norfolk, gateway to world markets . . .
- Dependable electric power and industrial water . . .
- An uncrowded territory of sensible real estate levels . . .
- Cooperative state and local governments . . .
- The world's finest Bituminous Coal in the heart of the territory . . .
- Progressive communities where industrious people are content . . .
- Equable, healthful climate . . .

Norfolk and Western RAILWAY

For complete information about any section of *The Land of Plenty*, write the Industrial and Agricultural Department, Drawer T-112, Norfolk and Western Railway, Roanoke, Va. All information furnished in strictest confidence.

LAND OF PLENTY

Maine Invites You

is beautiful hill and lake country, with Sokokis Lake, Little Ossipee River, Pequawket Lake and other lesser ponds and streams and villages and pleasant valleys that made it a favorite region of the Indians and early settlers.

In the north central part of the county is the famous Saco River Valley region of Dayton, Hollis Center, Bar Mills and West Buxton, the latter made famous by, among other things, Kate Douglas Wiggin's "Old Peabody Pew". The scene of this famous story and play is the old Tory Hill Meeting House at Buxton Lower Corner. The spectacular Salmon Falls Gorge of the Saco River divides Buxton and Hollis and the park there is visited annually by thousands.

Besides its two world-famous textile plants at Biddeford and Sanford and its unequalled recreational advantages, York County is a highly developed agricultural area, having 140 days annually without killing frosts. It is part of the Atlantic Truck and Vegetable Region, growing crops such as peaches and melons usually grown farther south. Dairying, poultry raising, orcharding and forestry are important components of its rural economy and it contains the largest orchard in Maine of more than 16,000 trees.

Well-kept homes and farms, excellent highways, varied industrial opportunities, every form of recreational advantage close by, from the mountains to the sea, and the keen civic consciousness of its residents justify them in regarding their section of the State as the "show window of Maine".

A 45-mile toll superhighway, called the Maine Turnpike, is now in operation between Kittery and Portland. Side exits and entrances are in operation at Wells, Biddeford and Saco and a fourth interchange for Kennebunk is to be completed this Summer.

The Kittery entrance from U. S. Route One is, for east-bound traffic, just beyond the Maine New Hampshire Memorial Bridge. It leaves Route One in a broad, sweeping curve to the left.

At the northern end, the turnpike rejoins Route One on the outskirts of South Portland, while a spur access enters Portland on Outer Congress Street, on State Routes Nine and 22.

The four-lane, bisected toll highway (50 cents for passenger cars, \$1.50 for trucks) makes possible a fast trip to Biddeford and Portland for motorists not desiring to take the scenic route along Maine's southern beaches and coastal communities.

Motorists desiring to stay on U. S. Route One should continue straight ahead at the Kittery intersection, where signs for both routes are in place. U. S. Route One, between Kittery and Portland, is mostly three- and four-lane, except through some cities and towns. It affords glimpses of shore scenery at many places and numerous access roads lead directly to all shore and beach areas.

Meet the Men Who Keep 'Em Flying!

(NO. 1 OF A SERIES)

MR. W. P. HOARE, Director of Maintenance Bases, United Air Lines

Servicing and maintenance work on United's fleet of 180 and 230 Mainliners.

Men charged with the responsibility of supervising the service and maintenance of a fleet of airliners are quick to realize the importance of details. To such men, the widespread use of OSTUCO Tubing — in practically all modern aircraft — is just one more example of the importance of details.

The strength-without-weight advantages inherent in OSTUCO Seamless Steel Aircraft Tubing are obvious to maintenance man and aircraft designer alike.

Consider, too, OSTUCO's continuous research, precision craftsmanship, low record of rejects and prompt delivery, and the overwhelming choice of OSTUCO by leading aircraft manufacturers becomes equally obvious.

THE OHIO SEAMLESS TUBE COMPANY

Plant and General Offices: SHELBY, OHIO

SALES OFFICES: CHICAGO, Civic Opera Bldg., 20 North Wacker Dr. CLEVELAND, 1328 Citizens Bldg. • DETROIT, 2857 E. Meet the Men Who Keep 'Em Flying!

(NO. 3 OF A SERIES)

The men who design modern aircraft, and the men who direct inspection and maintenance programs for modern airlines, share a common objective: absolute perfection.

Designers strive for perfection in creating new, improved aircraft; maintenance directors strive to maintain that perfection. To both groups, the achievement of that objective is based upon meticulous attention to every detail, however trivial.

The universal use of OSTUCO Tubing in modern aircraft is an outstanding example of the importance of details. The inherent strength-without-weight advantage of OSTUCO Aviation Tubing is only one important contribution to the creation of more efficient aircraft. Other details which figure prominently in the choice of OSTUCO Tubing include OSTUCO'S continuous research, precision craftsmanship, years of engineering leadership, an amazingly low record of rejects and, finally, prompt delivery of the finest aviation tubing available.

Small things in themselves, yet each detail helps bring the objective, absolute perfection, a step closer to realization.

Abbott's Fleet

All Designed by
Phil Rhodes

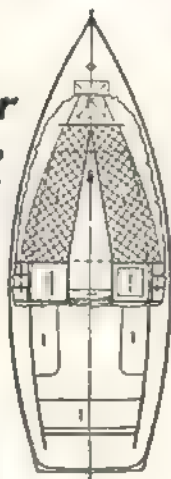

*Dater

Available
now with
inboard
power

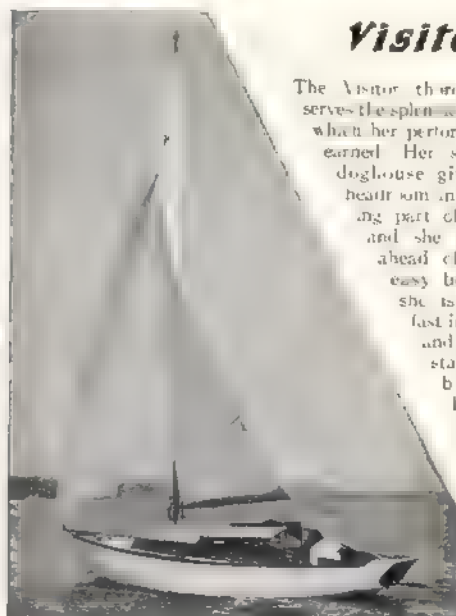

20' 6" x 18' 0" x 7' 6" x 3' 8" draft — 222 sq. ft.

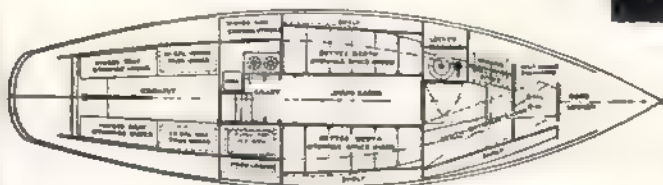

With a cylindrical, unobstructed cockpit the Dater is the swiftest, prettiest combination of luxury and two-bank cruiser. There's sitting room below the terrace, two positions for toilet stool and no extra water. Phil Rhodes' magic has added amazing speed, ruggedness in any weather. The Dater has so thoroughly proved herself that she will be continued without change. Now available with inboard power as an extra.

*Visitor

The Visitor thoroughly deserves the splendid reputation which her performance has earned. Her streamlined doghouse gives 6' 2" headroom in the working part of the boat and she has 5' 6" ahead of it. With easy beam lines, she is able and fast in a seaway and her substantial freeboard allows for a high-backed, self-bailing cockpit.

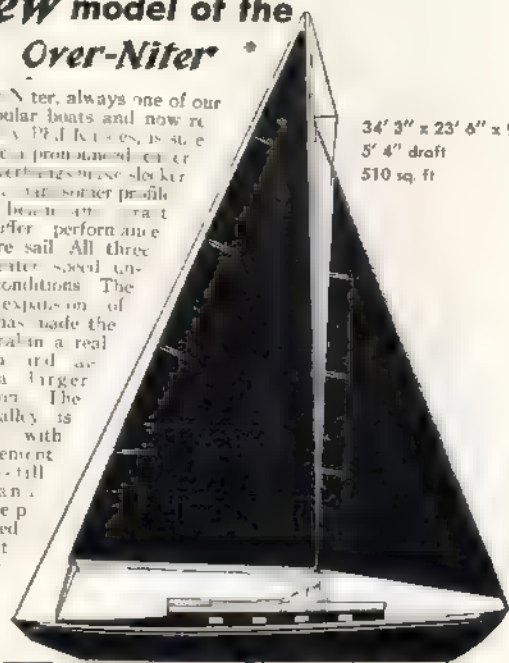

30' 0" x 20' 6" x 8' 0" x 4' 6" Sail area 372 sq. ft.

A New model of the Over-Niter *

The Over-Niter, always one of our most popular boats and now re-modeled by Phil Rhodes, is sure to become a pronounced center-liner and a true summer profile. Greater beam and a flat deck mean stiffer performance with more sail. All three main greater speed under all conditions. The general expansion of the hull has made the forward cabin a real stateroom and allowed a larger toilet room. The bigger galley is equipped with a convenient outside till icebox and a deep high-backed cockpit and wide fittings-free decks are both enlarged.

34' 3" x 23' 6" x 9' 0"
5' 4" draft
510 sq. ft.

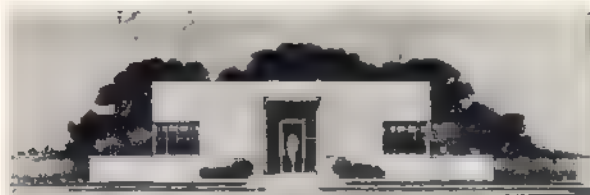

Both the Over-Niter and Week-End have the Pullman berths and anchored folding cabin table shown below.

*Coracle

8' 0" x 4' 0" x 20" clearance. A planked plywood pram, this dingy has our fore-and-aft double thwart for trim adjustment with any load and being very light is easy to take aboard.

New Office — Completed December 1, 1947

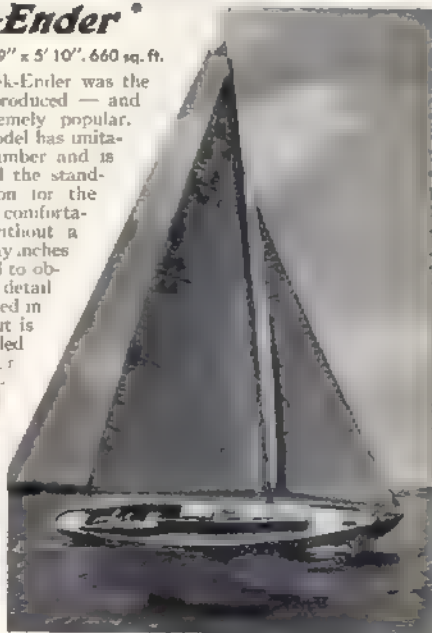

Week-ENDER*

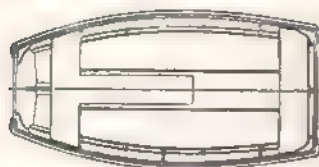

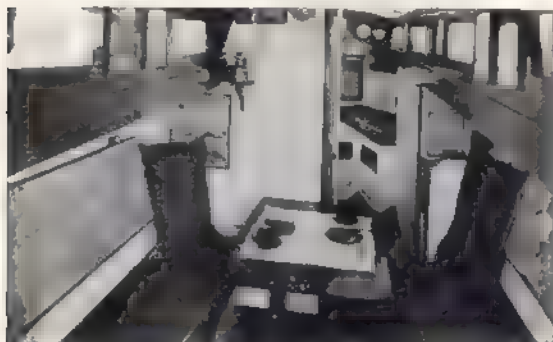

39' 0" x 27' 0" x 9' 9" x 5' 10". 660 sq. ft.

The original Week-ENDER was the first model we produced — and she is still extremely popular. This perfected model has unitations without number and is widely considered the standard of comparison for the biggest boat it is comfortable to handle without a paid hand. The way inches have been juggled to obtain perfection of detail cannot be described in this short text but is fully told in detailed printed matter available on request. It takes time to build a Week-ENDER the way we insist on making it — so only others are strongly recommended.

When you see there are many copies but no others of our Week-ENDER.

Both the Over-Niter and Week-ENDER have the Pullman berths and anchored folding cabin table shown below.

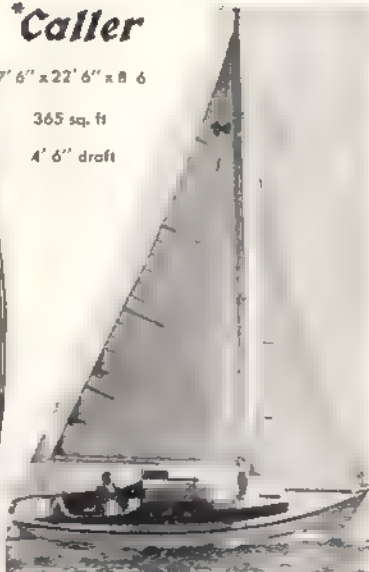

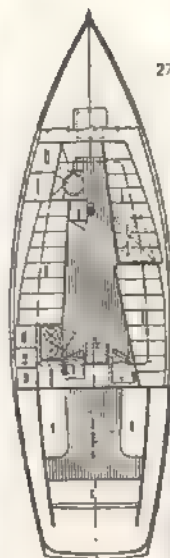

*Caller

27' 6" x 22' 6" x 8' 6"

365 sq. ft.

4' 6" draft

The beamy round-bottomed hull of the Caller combines stiffness, speed and interior roominess — is easier to build than the S-section form. The doghouse and forward hatch allow full standing headroom everywhere, except opposite the mast, and leave the forward deck unbroken for handling ground tackle. The galley is amidships where it should be and the deep self-hailing cockpit gives the helmsman his own position on either tack. Finally, the tall rig, gradual sheer and high bow make the Caller one of our handsomest boats.

*Wood-Pussy

13' 6" x 6' 0" — 110 sq. ft.

We are agents for this phenomenal little pocket — which is so able, fast, modern and good looking that she has definitely put the cat back on the yachting map. Intended primarily for youngsters training, so many adult club classes have been formed that the first National Championship was held on West Long Island Sound in September 1947 with over thirty boats participating.

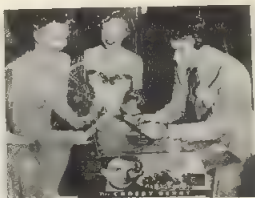

Plenty of cockpit space for three adults

Bing Crosby Derby game by Ben Morganway

14, Stafford

Doug Carr and Marion Holten

"CROSBY DERBY," NEW SENSATIONAL GAME NOW AVAILABLE AS \$1.98 RETAILER

THE Bing Crosby Derby, which made its bow in 1947, is now said to be up among the leaders, in volume of sales, in the game field. It had terrific publicity and advertisements in such magazines as Life, Saturday Evening Post, Cosmopolitan, Esquire, True, Sunset, Popular Mechanics, New Yorker, Sports, Photoplay, Movie

Life, Motion Picture, Movie Show, Downbeat and Hit. Newspaper columnists like Walter Winchell, Louella Parsons, Jimmy Fidler, Dorothy Kilgallen and Danton Walker, mentioned it favorably in their syndicated columns.

It is now mentioned daily on several coast-to-coast radio programs and is

periodically mentioned on some evening programs. No game has received greater publicity, and none has been received by the public with such acclaim in such a short time.

The Crosby Derby, up until now, was sold in only the DeLuxe model, retailing for \$2.95. To meet the popular demand a new model has been

TOYS and NOVELTIES—March, 1948

added to retail for \$1.98. The Crosby Derby, is therefore, now available in the DeLuxe and the popular model. The popular priced, \$1.98 retailer retains all of the features of the DeLuxe model, and is packaged in a beautifully covered box measuring 9 x 15". The DeLuxe model has been improved by the use of a heavier playing board, which is cloth-lined. Customers with their initial order receive display material of photographs showing movie stars playing the Crosby Derby.

Just as Bing Crosby, for the fourth consecutive year, was the leading box office attraction in the U. S., so too, it appears that the Bing Crosby Derby will be a real leader in game sales. It is manufactured and distributed by Fishlove Industries, 712 N. Franklin St., Chicago, Ill.

CANADIAN NOTES

By WM. McNULTY

Myer Zatsman, of Dartmouth, N. S., who has recently opened a toy and sport goods store there, has named it Myer's Sport Shop. One section of the store is allotted to toys, games, tricycles, carts, scooters, trains, dolls, dishes, etc.

"Toyland," also known as "Toy Town," and sponsored by James Baird Co., St. John's, Newfoundland, was established by William Woodley, a member of the staff. A display of toys, games, etc., was arranged on the floor, with town layout—streets, lighting, post office, library, homes and stores. Each of the model buildings contains a stock of playthings, sales not being made over a showcase or counter, but from the buildings. Given special attention are dolls, trains, general toys, books and games.

A change in the managerial policy of the toy and sport goods department of W. H. Thorne & Co., St. John, N. B., has resulted in management being vested in three members of the department staff instead of only one individual. The change was effected by A. H. Wood, who became retail manager for Thorne about six months ago, having come from the S. S. Kresge Co. in Ontario. He had been with Kresge in several Ontario locations,

including Peterboro and Kitchener, for about 8 years.

C. A. O'Connor, who had been connected with the toy and sport goods department of the Thorne store for about 25 years, and had been manager about six weeks, closed out his connection and became a road salesman for a Montreal pipe manufacturer.

Mr. Wood decided to make a shift, as a trial, by dividing the department management among three staff people, each assigned to specified items.

The East End Variety Store, St. John, N. B., established about two years ago, has been enlarged recently. Two buildings south of the store have been purchased and remodeled. Both are 3-story, wooden structures. The additional space will be used for showing, stocking, and selling toys, games, sport goods, bicycles, tricycles, carts, scooters, etc. The business is owned by the Catholic Community Club, which has a hall on the second floor. Frank O'Brien, who became manager when the store was opened, was succeeded by Cyril Moore, who had been on the staff. More recently, Mr. Moore retired and was followed by Philip Bowes, who was connected with W. H. Thorne & Co. of St. John for about 31 years.

New Export Buying Service

Bernard Gottlieb, formerly export manager for the Schranz & Bieber Co., Inc., of New York, has now set up his own organization, and at this time is representing, exclusively for export, as sales agent, Standard Toykraft Products, Inc., of Brooklyn; M. A. Henry Co., Passaic, N. J.; and George S. Scott Mfg. Co. of Wallingford, Conn. Other firms, too, are showing interest in having Mr. Gottlieb represent them on an export basis.

He is also acting as resident buying office for several overseas wholesalers, and expects to add many more accounts in the near future.

Leader Merchandise Moves

The Leader Merchandise Company has moved to new and larger quarters at 45 East 20th Street, New York City, where it will continue to feature its fast-selling, low-priced merchandise, in addition to many new lines.

The company is now handling a complete line of toys, notions, novelties, plastic specialties and many other profitable items in the 5 cent to \$1.00 field.

Leader has a constant stock on hand of all its items, with many new products being supplemented to the line from time to time.

The Fall line this year will contain a huge assortment of mechanical toys made of metal and plastic, decorations of every type and style for the tree and home, and other interesting items.

Samples of the entire line are on display at the new show room.

American Specialties Show Room

Herman Kesler, president of American Metal Specialties Corp., announces the opening of a permanent New York showroom at 200 Fifth Avenue, Room 456, where their manufactured lines of all-steel toys, housewares, and closet accessories will be on permanent display.

The staff is now being selected.

Give Him a Boy Scout Gift

By
W. B. STODDARD

Attractive window by The Broadway, Los Angeles

THERE is probably no youth organization that has made such rapid strides as the Boy Scouts, and no other in which practical living and high ideals are so strongly stressed. To the thousands of Cubs and Scouts in every part of the land, their pack and their troop is the big thing in their life, and to enjoy it to the full they want the complete equipment that will enable them to take part in all the activities of their group. Nothing pleases a Scout more than something to add to his equipment, and the wise dealer will see to it that at the close of school, when camping and hiking trips are being planned, Boy Scout paraphernalia is given wide publicity.

The Jones Store, Kansas City, Mo., sent out a folder to the parents of all the Boy Scouts in that district. On the front page was the cut of a Boy Scout, and the heading, "Give that Boy Scout of yours a complete outfit for

his summer camping trips. The Boy Scouts of America is one of the finest organizations in which to train your boy into becoming a young man of the future. In order to make his hiking and camping trips complete be sure he has the right equipment." On the inside pages was listed everything necessary for a complete outfit, with a range of prices for each item, and a square in front of each in which to check the wanted articles. In the department several complete camp kits, cook kits, and books on Scout projects were shown on a long table, with the figures of a Scout and a Cub, fully equipped, standing at each end.

Boy Scout Ad

Sanger Bros., Dallas, Tex., ran a page length, double column ad, with Boy Scout at the top, and captioned, "Camping Gifts for the Boy Scout." It featured a complete outfit for \$9.50, and also illustrated and priced a number of the principal items of equipment and books needed by Boy Scouts.

The most effective form of advertising, however, is the display window, as it attracts both the Scouts and their parents, and other relatives.

The Hugh J. Lowe Co., Santa Ana, Calif., arranged a central island window, in which was a big card, "Give him a Boy Scout gift for his graduation from Junior High." Beside the card stood a Scout. Overhead were branches of pine needles and cones. Many scout items were scattered about. The firm ran a special ad, 14-in., double column, with photo of a Scout at the top, headed, "Gifts for

Boy Scout window by The Famous, Glendale, Calif.

TOYS and NOVELTIES—March, 1948

Boy Scouts." The ad listed 12 items especially needed by Scouts, ranging in price from \$1.00 to \$2.50, and a sleeping bag at \$9.50.

The Broadway, Los Angeles staged a National Scout Round-up. The window showed a camp in the forest, with a pup tent and several Scout pennants. Scoutmaster, Scout and Cub were shown. A cooking kit was placed over a camp fire. In the Boy Scout section were cook kits, water bags, axes and knives in sheaths, compasses, pedometers, and wrist watches, all put up in gift boxes. There were several larger boxes, supposed to contain cook kits, wrapped in cellophane, with cards of congratulation (graduation) attached.

A display that called instant attention to Boy Scout items as much desired gifts was arranged by The Famous, Glendale, Calif. Against a

background of olive green was hung a tall red panel headed, "Scouting Equipment." To the pane were fastened signal flags, knapsacks and neckerchiefs. Camp equipment was fastened to a panel at one side. A red fixture in the form of a stylized fir tree held hunting knives, neckerchiefs, belts and various small leather goods. In the center of the display were figures of scoutmaster, scout and cub. Scout supplies were scattered over the floor. A long table at the intersection of the boys' clothing and toy departments held numerous items of scout equipment—pedometers and compasses being especially featured.

Boys' Camp Displayed

The Long Beach, Calif., store of this firm arranged a big window, backed with deep blue, spangled with silver stars. The floor was covered with pine needles and cones, with

small trees at each end. A boys' camp was depicted, there being two tents. Beside one stood a Scout, signal flags in hand. In front of the other tent a blanket was spread, on which was a set of aluminum cooking and eating dishes, and a number of books on scouting, which a kneeling Cub was examining. These included, Wolf Cub Book, Hand-book for Boys, and Sea Scout Manual. Scattered around were other books on Scout projects, water bag, axe, nest of aluminum dishes, hunting knife, small camera and first aid kit.

In catering to the Boy Scouts, the Girls Scouts and Campfire Girls should not be overlooked. They are in the market for most of the equipment used by the boys, and an occasional display and ad calling attention to camp lines in which they are interested is sure to be productive of good results.

Phil Connell With Noma

Henri Sadacca, president of the Noma Electric Corporation, announce the appointment of Philip T. Connell to the EFFanBEE Doll Division of the corporation.

Mr. Connell, who has had many

PHILIP T. CONNELL

years of experience in the doll and toy field and is well known to all the trade, will assist in promoting chain store sales for the company.

Mr. Connell will make his headquarters at the EFFanBEE showroom, 200 Fifth Avenue, where he will be happy to meet his many friends.

TOYS and NOVELTIES—March, 1948

"Can I talk to you for a few minutes—alone, Ella?"

TOY INDUSTRY LEADERS

Praise WALT DISNEY CHARACTERS

BRIGHTEST stars to shine at the 1948 Toy Fair are the Walt Disney toys produce by Disney Character licensees. These outstanding leader of the toy industry all speak enthusiastically of their sales success

with their Disney lines, which have directly resulted in a happy combination of added prestige, profits and sales.

The majority of Walt Disney-toy manufacturer affiliations have existed for years, and these old-time Disney licensees are exhibiting many appealing Disney toys at the Fair. Among these items are new designs in addition to the all-time favorites, of which some are appearing in new, improved versions.

Of equal interest to the assortments being offered by old-time Disney licenses, are the completely new collections by new Disney licensees. These collections are staging their world premiere, and merit very special attention.

Tom Smith, President of Sun Rubber Company, Barberton, Ohio, and an old-time Disney licensee, reports enormous current popularity for Sun's Disney line, and predicts an excellent sales future for those items. Sun has already an entire production line to Disney autos, tractors and aeroplanes, with plans afoot for amplified facilities to produce more Disney rubber toys for 1948.

A long-time leader in the development of lithographed wood pull toys, Fisher-Price Inc. has made Disney pull toys for a number of years. Fisher-Price's President, Herman Fisher, says that each year his firm has found it necessary to produce more Disney toys to meet steadily increasing demands. New designs specially utilizing a modern treatment of perspective, are high-lighted in Fisher Price's exhibit.

One of the newer Disney licensees, A. Swedlin of Gund Manufacturing Company, has been carefully guarding his new line, holding it for a dramatic

introduction at this year's Toy Fair.

"We are very proud of the Gund-Disney line," says Mr. Swedlin, "and regard it as a major development in our business. First of our Disney toys are Bongo and Lulubelle, the boy and girl bears of 'Fun and Fancy Free.' In these stuffed toys we feel we have captured the lovable appeal of the screen characters themselves, and it is our pledge to make all the Disney Character toys equally worthy of their creator, Walt Disney."

George Dessler of Louis Marx, Inc., relates his firm's success with Disney mechanical and wind-up toys as being "... just what we like. Our Disney wind-ups are steady volume sellers years

representatives for the copyrighted Walt Disney Characters) in developing their new line of Disney inflatable vinylite toys. Disney inflatables are made exclusive-

DAISY TARGETTEER

AIR PISTOL OUTFIT

READY FOR ADULTS AND CHILDREN!

The famous DAISY TARGETTEER—America's favorite family indoor fun gun before the war—is again ready to bring you profitable sales to sports-loving adults and children! Complete Targeteer Outfit has Air Pistol, targets, tube of 500 special .118 calibre shot, backstop—yet retails at only \$2.95! Targeteer has the feel and weight of a real automatic. Long 10-inch barrel. Quality built of heavy-gauge steel, blued. Low muzzle velocity prevents indoor damage—yet shoots hard enough for accuracy up to 12 feet. Perfect for living-room "contests." Genuine Daisy quality—typical Daisy long-value retail price. See it at Toy Fair—ask your jobber.

ANOTHER FINE NOMA PRODUCT

FAIRFORM FLYER

WILL YOU PAY
ONE QUARTER MORE FOR THREE
TIMES AS MUCH BOAT?

As a matter of sound investment, if you
contemplate acquiring a cruiser, send for
our Bulletin CC on comparative costs.

Sold direct to the owner, with all the value put into the boat, the constantly expanding Fairform Flyer Fleet is owned from Boothbay to Brisbane by distinguished and well satisfied yachtsmen. Her useful life is evidenced by our earliest boats still in service in their 20th year. During this time and through some four million miles of operation, no Fairform Flyer equipped with the Fairform Safety System has ever had fire or explosion. She is the Safest Vehicle Known to Man.

She has weathered hurricanes when boats all around her have perished. Because of her stability, seasickness is unknown aboard. Livability arises from infinite attention to the details of comfort. And she is the fastest seagoing yacht in the world.

Because of her excellence, first cost is higher but because of her lower operating and upkeep costs, and far longer useful life, she is the cheapest boat to own and run. Last year we delivered a larger fleet of diesel yachts than ever before produced by *any* builder, in *any* year — and an equally large fleet of Chrysler powered boats.

Come South this winter. Visit the Florida Marina.
View the Fairform Flyer in the flesh.

HUCKINS YACHT CORPORATION, FLORIDA MARINA
P. O. Box 6336 Jacksonville, Florida

*Very prompt action is necessary if you want one
for next summer.*

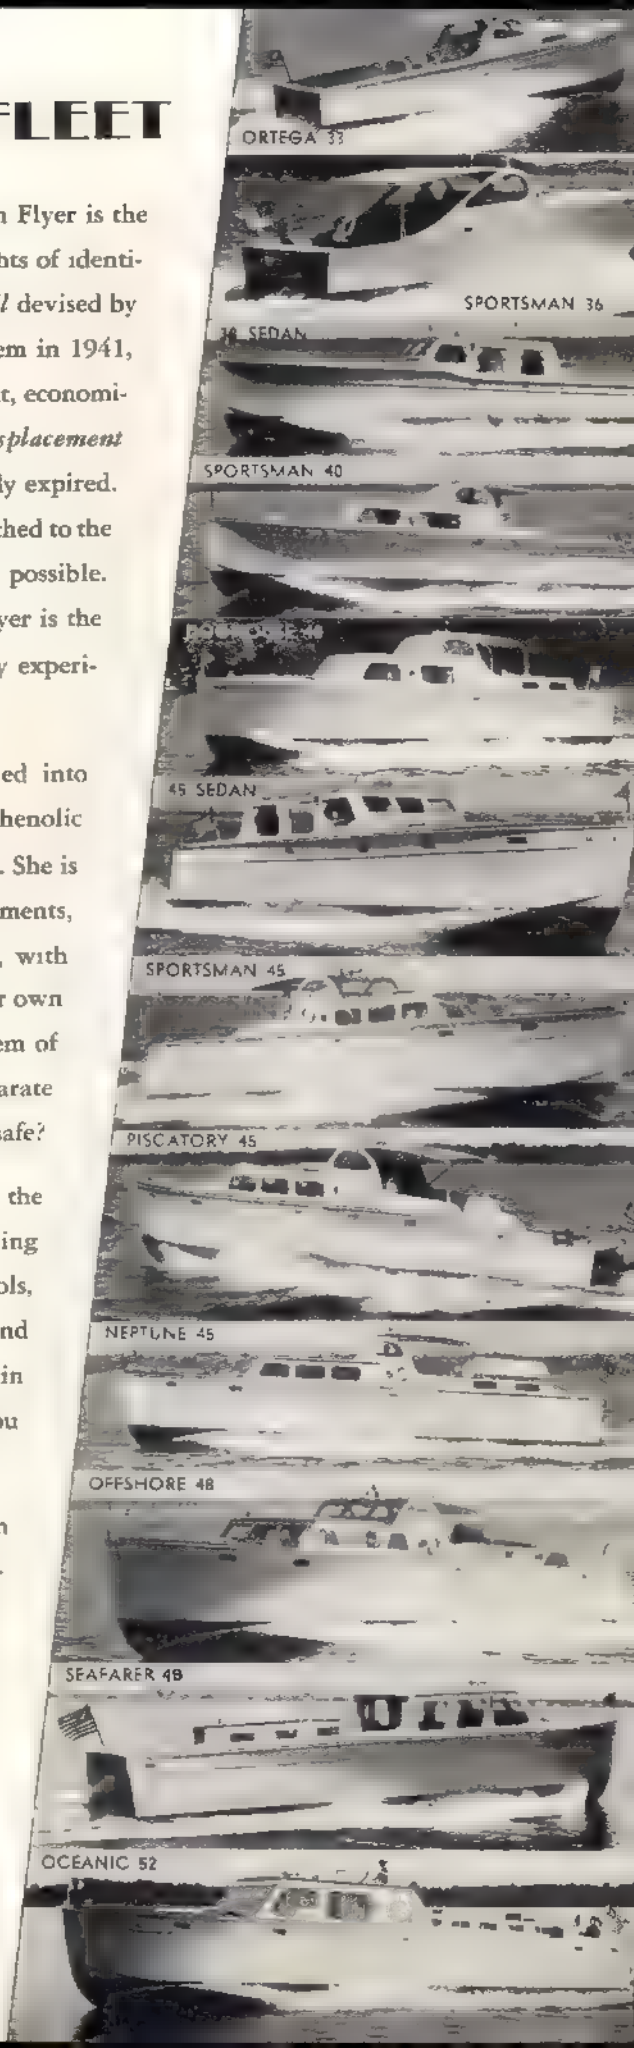

The FAIRFORM FLYER FLEET

Far from being an *all-new* postwar brainchild, the Fairform Flyer is the mature progeny of a long-established family of *planing* yachts of identical character. Her non-pounding seagoing *Quadraconic Hull* devised by Huckins research in the 1920s, solving the PT Boat Problem in 1941, continues unchanged in form or formulae — most buoyant, economically propelled and fastest motor yacht hull extant. No *displacement* hull can compete; five builders of such boats having recently expired. As the price of survival, our most able competitors have switched to the planing boat, imitating the Quadraconic Hull as closely as possible. We wish them well. But bear in mind that the Fairform Flyer is the sole planing cruiser with long experience behind her. Why experiment with anything immature?

Her hull is triple, diagonal planked of mahogany, bonded into enduring and leakless unity by means of hot-polymerized phenolic resin, and with the Laminated Keel of Huckins basic patent. She is subdivided by numerous bulkheads into Watertight Compartments, making her apparently unsinkable. Fuel Tanks of Monel, with Fairform Fuel Induction System, are sequestered within their own watertight compartments. Engines, with the Fairform System of Thermo-Siphon Ventilation, are installed within *their* separate watertight compartments. Can you afford to own a boat less safe?

Many instruments such as the Fairform Fuel Leak Alarm, the Fairform Automatic Synchronizer and the Fairform Recording Log; most apparatus such as the Fairform Precision Controls, Fairform Electric Toilet and Fairform Electric Pumps, and nearly all fittings are from our own design, manufactured in our own plant, designed for the specific purpose. Can you match such things in any other boat?

The Fairform Flyer Fleet consists in sixteen standard twin screw models of lengths from 33 to 100 feet, covering all requirements from fishing to year-around living aboard. They are far less costly than any *custom* boat, free from the hazards of untried design. They are superior to all *stock* boats, in every way. They are within the reach of any successful man. Ask for our brochure if interested.

Ford's out Front with "The Car of the Year!"

THE ONE AND ONLY NEW CAR IN ITS FIELD

SAFETY

59% more rigid "Lifeguard" Body. New lower box-section frame with five cross-members. The new lower center of gravity gives better roadability, greater safety and holds the car on an even keel on all kinds of roads.

New "Picture Window" Visibility all around. The windshield alone is almost a whole square foot bigger. Actually there's more than 20 sq. ft. of window area in the new Ford. You can really see out of the new Ford!

Larger, 35% Easier King-Size Brakes. Brakes that stop at a tip-toe touch, because built-in "Magic Action" uses forward momentum of the car for more stopping power—a real blessing, especially in heavy traffic!

COMFORT

YOU RIDE BETWEEN THE WHEELS!

• You get a "Wild Ship" Ride in the level center section of the '49 Ford, where the going's smoothest. Plenty of hip and shoulder room for six big people on new sofa-wide seats!

BEAUTY

New low silhouette beauty. Inside and outside, the entire car is new—new all the way through. Much lower, yet there's still ample road clearance and head room. You'll love the new low look!

New beauty protection—side, front and rear. Extra-heavy, massive front and rear "Fender Guard" bumpers. A real help in tight spot parking! Handsome new "Body Guard" side rails, too!

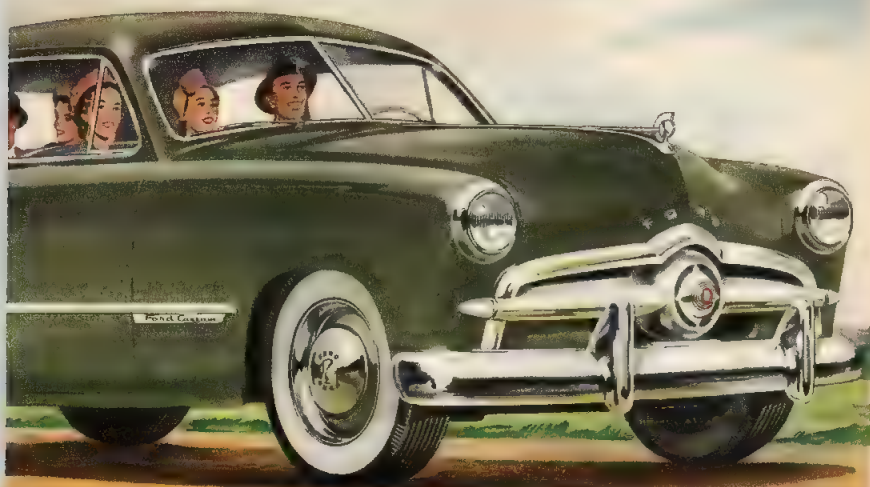

10 new colors that stay new! Ford's own special enamels are baked on rustproofed steel to help keep that wonderful "Showroom Complexion" under all weather and climate conditions. In ten colors!

CHOICE OF COLOR

- Hard Top:
1. BLACK
 2. COLONY BLUE
 3. DAYVIEW BLUE
 4. THE MUST GREEN
 5. ARABIAN GREEN
 6. MIDLAND MAROON
 7. BIRCH BEET
 8. GUNMETAL GREY
- Convertibles:
9. FIVE RED
 10. MIDLAND CREAM

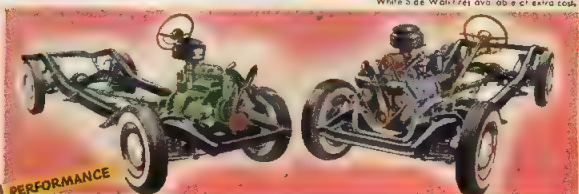

New "flight panel dash"... the instruments are compactly grouped around the speedometer for instant, easy visibility. To avoid glare, the instruments are "black lighted." It's the most practical instrument panel you ever saw!

• New "Hydra-Coil" Front Springs combine coil springing with double-action aircraft-type hydraulic shock absorbers. • New extra-long, extra-strong "Para-Flex" Rear Springs are built parallel to the new frame. • New "Magic Air" Temperature Control, optional at extra cost, gives you year 'round interior comfort!

57% more luggage space... You'll love all of the extra room in the new Ford "Deep Deck" Luggage Locker. In addition to the spare tire, you get 19 cubic feet of usable space—space you can really make good use of! That's plenty of space for the whole family's baggage!

YOUR CHOICE OF 2 NEW ENGINES... V-8 OR SIX (100 H.P.) (95 H.P.)

New Overdrive optional at extra cost New "Deep Breath" Manifold
New Top-Side distributor mount New Lubrication System

New "Equa-Flo" Cooling

More miles per gallon! ... Yes, you can expect up to 10% better economy, thanks to new "Equa-Flo" Cooling, new lubrication system and "Deep Breath" Manifold. The new Overdrive optional at extra cost is an automatic "fourth gear" that cuts engine speed 23%, saves about 15% of your gasoline at ordinary speeds, gives longer engine life.

DISNEY TOYS by Sunruco

MICKEY MOUSE AEROPLANE—Zoom! It's Mickey Mouse in his flashy aeroplane! Mickey's movable head and the plane's revolving propeller make this an "action" toy.

DONALD DUCK ROADSTER—Here's a speedy, sporty roadster with a lot of boy appeal. Donald Duck is at the wheel, while Pluto crouches in the rumble seat. Donald's head is movable.

MICKEY MOUSE TRACTOR—Here's Mickey Mouse chugging along on a big realistic tractor! Large moulded-rubber wheels turn on Sunruco's patented nickel-plated axles. Mickey's head is movable.

MICKEY MOUSE FIRE TRUCK—Mickey Mouse drives this easy fire truck at breakneck speed, while Donald Duck braces himself at the back and grabs his hat. Real appeal that parents and children can't resist.

© WALT DISNEY PRODUCTIONS

SUNRUCO LATEX CRIB-CRADLE TOYS

Sunruco "toddler" age toys provide endless entertainment for the child in his crib, tub, or play-pen. Sunruco toys are **SAFE**. They can be chewed, squeezed, or thrown. The realistic dyes

used are harmless, fast colors that are washable without fading. The new Sunruco squeeze whistle is firmly "built to stay" in the toy. Packaged in cellophane bags for easy display.

CLEAR THE TRACKS FOR

Banner brings to the Toy Fair and to the toy world a new, comprehensive, colorful line of plastic toys. Each one is a sales star and Banner sales stars mean profits! The Banner railroad is just one of the dramatic lines for 1948.

Capturing the adventure and thrills of railroading in plastic by Banner has been an achievement, resulting in more than a year of planning and engineering. The Banner freight line, consisting of a locomotive, tender, four additional connecting cars, plus station and a wonderful group of accessories sets a new pace in plastic playthings. All have movable wheels and are two or three color assemblies and have coupling devices.

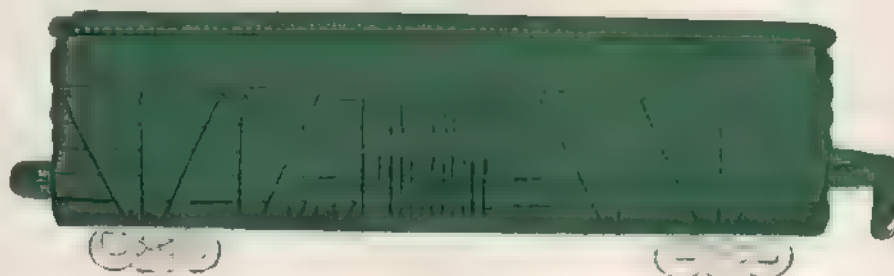

The Banner train line is available in single car units, as well as attractive boxed train sets.

Single units are:

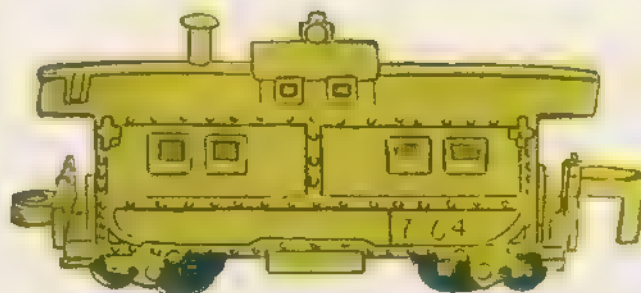

- No. 131. Pennsylvania type heavy-duty freight locomotive.
- No. 132. Realistic coal tender which couples to engine.
- No. 133. True to life oil tanker car.
- No. 135. Open latticed work cattle car.
- No. 134. Coal car with minute detailing.
- No. 136. Scaled model of caboose to complete train.
- No. 170. Companion piece for the Banner freight train. 4 color lithographed steel station.
- No. 153. Deluxe train boxed set.
- No. 152. Junior train box set.
- No. 151. Complete set of railroad accessories boxed.

THE

PUTT

***Wins** first place with Young America because they just pump it up and away it speeds with a realistic putt-putt that sounds exactly like a real gas engine.*

***Wins** praise from parents because it's sturdy—made of $\frac{1}{8}$ " aluminum . . . has inflated, puncture-proof tires . . . has no springs or gears to wear out or break . . . has a spring bumper to protect furniture and walls.*

***Wins** acclaim from magazines, newspapers and radio because it's the **only** pneumatically-powered toy on the market, and truly an example of American mechanical genius.*

***Wins** enthusiasm from dealers and buyers as the fastest selling, most appealing year-'round toy in the mechanical field.*

1947's Most Publicized Mechanical Toy

Called the "trickiest U.S. model" by TIME. Written up in HOUSE BEAUTIFUL, PARENTS, POPULAR SCIENCE, SCIENCE & MECHANICS. Publicized in SATURDAY EVENING POST, LOOK, LIFE, LIBERTY and COLLIER'S. Featured in newspapers and on radio. Prominently displayed in leading toy catalogs.

Read what these buyers say about the TORNADO!

From a leading Chicago department store:

Your TORNADO Racer aroused tremendous customer interest and resulted in a great quantity of sales. It can be said as one of the fastest selling toys in my entire section. I look forward to an even greater year in 1948 with your new and improved model.

BUYER

Here is a statement from a toy jobber:

"My original purchase of one gross TORNADO Racers was made from you as late as November 1947. The demand from my dealers, however, was so great that by December 5 we had sold more than 25,000. As you know I do all my own selling; consequently, I can say thanks for a fine product. You have my order for the new 48 model."

PRESIDENT

*Names furnished upon request.

IRON BENCH PLANES**STANLEY "BAILEY," ADJUSTABLE**
Materials and Finish

Iron body, japanned inside, polished bottom and sides, rosewood handle and knob, cutters adjustable endwise and side-wise

The Plane Iron or Cutter

Cutting edge made of crucible steel of extra high carbon content. Remainder of cutter made from a lower carbon crucible steel and acts as a backing for cutting edge. Both parts are welded together when originally cast in the ingot. They positively cannot be separated.

Construction permits use of a higher carbon content steel for cutting edge than is practical in any other construction. Soft backing of steel yields readily to pressure of cap and lever and permits a firmer seat on frog. Easier honing or grinding is possible than if entire bevel was high carbon steel.

In the heat treatment the utmost care is used. All cutters are individually hardened and tempered.

Smooth.

IRON BLOCK PLANES**STANLEY "BAILEY"**

Adjustable Throat

Cast iron frame; japanned trimmings, tempered tool steel cutter, "handy grip."

The cutter rests on its seat at an angle of 20 degrees, and is adjustable endwise or sidewise. Throat is adjustable for coarse or fine work.

Each

No. 9¾—8 in. long; 1½ in. cutter; wt. each 1½ lbs.

STANLEY LOW ANGLE

Endwise Screw Adjustment

Cast iron frame; japanned trimmings, tempered tool steel cutter, "handy grip", milled and ground bottom and sides.

The cutter rests on its seat at an angle of 12 degrees. The low angle of the cutter makes it easy to plane across hardwood.

Each

No. 60¾—8 in. long; 1½ in. cutter; wt. each 1½ lbs.

No. 80—11 $\frac{1}{2}$ in. long; 2 $\frac{3}{4}$ in. blade, wt. each 1 $\frac{1}{2}$ lbs. \$

No. 80B—Extra blades \$
One in a box.

TOY INDUSTRY LEADERS

Praise WALT DISNEY CHARACTERS

BRIGHTEST stars to shine at the 1948 Toy Fair are the Walt Disney toys produce by Disney Character licensees. These outstanding leader of the toy industry all speak enthusiastically of their sales success

with their Disney lines, which have directly resulted in a happy combination of added prestige, profits and sales.

The majority of Walt Disney-toy manufacturer affiliations have existed for years, and these old-time Disney licensees are exhibiting many appealing Disney toys at the Fair. Among these items are new designs in addition to the all-time favorites, of which some are appearing in new, improved versions.

Of equal interest to the assortments being offered by old-time Disney licenses, are the completely new collections by new Disney licensees. These collections are staging their world premiere, and merit very special attention.

Tom Smith, President of Sun Rubber Company, Barberton, Ohio, and an old-time Disney licensee, reports enormous current popularity for Sun's Disney line, and predicts an excellent sales future for those items. Sun has already an entire production line to Disney autos, tractors and aeroplanes, with plans afoot for amplified facilities to produce more Disney rubber toys for 1948.

A long-time leader in the development of lithographed wood pull toys, Fisher-Price Inc. has made Disney pull toys for a number of years. Fisher-Price's President, Herman Fisher, says that each year his firm has found it necessary to produce more Disney toys to meet steadily increasing demands. New designs specially utilizing a modern treatment of perspective, are high-lighted in Fisher-Price's exhibit.

One of the newer Disney licensees, A. Swedlin of Gund Manufacturing Company, has been carefully guarding his new line, holding it for a dramatic

CHATS WITH WELL KNOWN TOY BUYERS

(Continued from page 437)

it in a hotel. It deserves the same space and display as the auto industry, hardware industry or motor boats; a place like Madison Square Garden or Grand Central Palace. That is the way they hold the British Industries Show, and it has always been extremely successful."

"Is that the way they held the Leipzig Fair?"

"No, but it inherited the same evils of any show that has narrow halls and narrower doorways. I have passed down the corridors of both shows, and never noted many an exhibit I might have found interesting, because I couldn't get in the entrance, or it was so crowded inside I couldn't see what they had to offer."

I could easily see his point. He continued:

"In an open space like the 'Garden' or Grand Central Palace one sees a glimpse of everything in much less time. Too, I think too many disinterested persons wander around the Toy Fair as it is now conducted, and take up time and space that bona fide buyers could use to advantage. Other industries charge admission even to buyers, and it has been found favorable

to responsible firms, so long as they got their observations done, and some orders placed."

"What do you think about the public? Don't you think they should see what is forecasted for the coming season?"

"That would present no problem in a place like I have just mentioned. Between five in the evening and nine at night, a demonstrator or attendant could be kept on duty and the public admitted for a fee, to observe beyond a rope guard, what will be new for Christmas. It would mean additional revenue for the sponsors of the show, and nothing would interfere with the legitimate hours for buying or taking notes."

I asked Mr. Stroebel next, what predictions he had regarding supply and demand for the coming season. He assured me he felt quite certain that many backlogs of demand for metal and wood toys, wheel goods and trains had been substantially absorbed. There would continue, however, a demand for train accessories.

"What about mechanical toys, which proved so popular last season?" I asked.

"That demand also will show a decrease, as it was pretty well supplied in one season. What we will have a shortage of, however, will be actual novelties. There have been few in the

past seasons. Everyone was too busy filling orders for established items," he observed.

"Will the foreign market fill any of that need?"

"Not likely. The novelties we are looking for will no doubt originate right here in the United States. The items supplied by European markets in the years between the two wars were possibly only about one percent of our business."

"And didn't they affect chain stores mostly?"

"Yes, but even that picture is changing. The chains are no longer 'dine' stores. They are really buying moderately high priced items these days, so are looking to the American market for their supply."

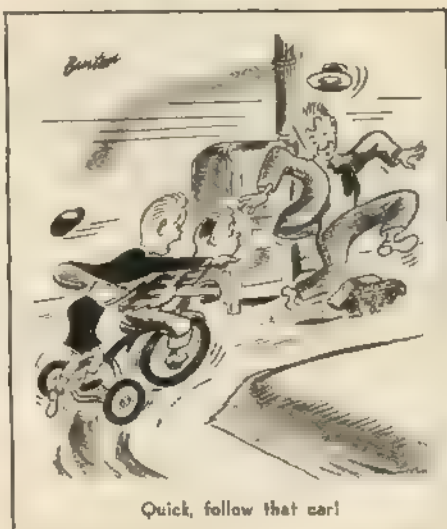

I felt I had taken a great deal of a busy man's time, so asked a little how he relaxed, if he ever found time.

"Bowling and golf," he shot back, with quite the same speed as he answers questions about toys. "I like all sorts of sports, either to be participated in, or observed at meets. I am rapidly becoming a home television fan for all sports too. And yes," to my question about esthetic things, "I like good music."

And we parted on that note. A busy man, but not too busy to express some extremely interesting opinions.

*"Have you heard
the one about..."*

He: My face is my fortune.
She: You're lucky. Most people have to pay an income tax

What are you putting away for your old age?

Boards

Why, boards?

I want to be sure I have a roof over my head

Are you saving up for a rainy day?

Nope.

Why not?

What the heck can you do on a rainy day?

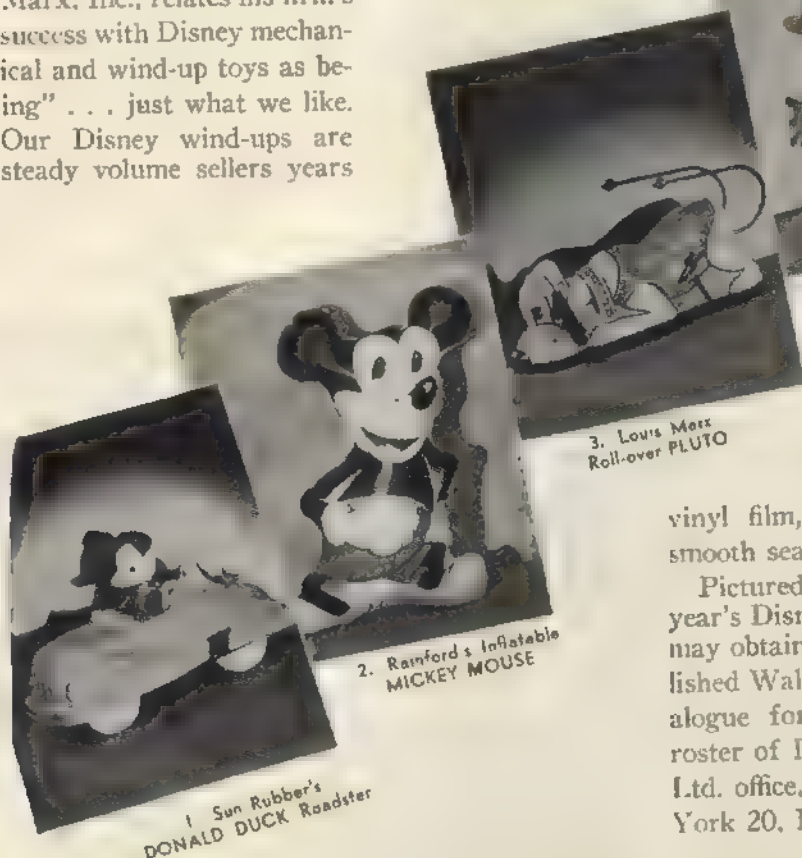

introduction at this year's Toy Fair.

"We are very proud of the Gund-Disney line," says Mr. Swedlin, "and regard it as a major development in our business. First of our Disney toys are Bongo and Lulubelle, the boy and girl bears of 'Fun and Fancy Free.' In these stuffed toys we feel we have captured the lovable appeal of the screen characters themselves, and it is our pledge to make all the Disney Character toys equally worthy of their creator, Walt Disney."

George Dessler of Louis Marx, Inc., relates his firm's success with Disney mechanical and wind-up toys as being "... just what we like. Our Disney wind-ups are steady volume sellers years

representatives for the copyrighted Walt Disney Characters) in developing their new line of Disney inflatable vinylite toys. Disney inflatables are made exclusive-

1. Sun Rubber's DONALD DUCK Roadster

2. Rainford's Inflatable MICKEY MOUSE

3. Louis Marx Roll-over PLUTO

4. Gund's BONGO

5. Fisher-Price's DONALD DUCK Pull Toy

in and year out. This year we have many new Disney items in production, and plan to introduce these to the trade as soon as we can take care of quantity deliveries."

Newest of Louis Marx's Disney line is the Goofy and Donald Duck duet, which has been on chain, syndicate, and department store best-seller lists for months. Other of their Disney items may be seen over at the Louis Marx showroom, 200 Fifth Avenue.

W. S. Rainford Products, Inc., just recently granted a Disney license, has worked closely with the Kay Kamen Ltd. office (world licensing rep-

ly of Bakelite Corporation's 12-gauge vinyl film, and come with specially designed smooth seams and safe tuck-a-way valve.

Pictured here are a few highlights of this year's Disney toy collection. Buyers and jobbers may obtain reference copies of the recently published Walt Disney Character Merchandise Catalogue for 1947-1948, containing a complete roster of Disney toy names, at the Kay Kamen Ltd. office, 1270 Avenue of the Americas, New York 20, N. Y.

YOU OWN THE Best

Elco 30 SPORT CRUISER . . .

Speed of a runabout, with the comforts of a cruiser! Twin screws. Speed 27-29 m.p.h. Sleeps four below decks, one or two in cockpit seats (optional extras). Sturdy enough for offshore fishing and cruising. Write for folder.

Elco 27 SPORT CRUISER . . .

Biggest boat of her size! Speed 22-24 m.p.h. Sleeps four. Complete lavatory. Full galley. Features all the famous Elco PT-proven advancements. Literature on request.

Elco 35 CRUISETTE . . .

Big enough for the whole family! Sleeps six. Speed 23-25 m.p.h. Fully equipped galley-on-deck. Revolutionary Elco Transfer Drive. She's fast, seaworthy and luxuriously comfortable. Send for illustrated folder on this beautiful boat.

Never before in boating history have you been able to buy pleasure craft like these! The brilliant boats of the great new Elco fleet offer thrilling speed, beauty, comfort, craftsmanship and advanced engineering features that you'll find only in an Elco.

For only Elco, through thousands of trials run on the war-famed Elco PTs, has developed the revolutionary Elcoplane V-bottom underbody, the rugged double-diagonally planked construction, the remarkable Elco Transfer-Drive method of power transmission that places engines in the stern, away from living quarters.

Only Elco incorporates in all its boats over 55 years of fine boatbuilding craftsmanship, the kind of craftsmanship that makes each Elco a source of lasting pride and satisfaction to its owner.

BUILDERS OF THE FAMOUS ELCO PT
Navy records show that Elco built more PT boats for U.S. and Allied Governments, than all other American boat builders combined.

Elco

WHEN YOU BUY Elco

And only in an Elco can you enjoy such comfort and convenience: rubber cradled engines to cut down vibration, sound proofing to reduce noise to a minimum, the new Elco galley-on-deck (on certain models) that allows the 'galley slave' to stay with the party.

Roomy cockpits and cabins, complete lavatories, full-size berths, plenty of locker space, and many other features combine to make each Elco a richly fitted 'home afloat.'

Ask for fully illustrated literature on the individual models of the new Elco 'flee'.

And be sure to secure your copy of the revealing new Elco VALUE COMPARISON CHART. It shows in detail how much more you get for your money in an Elco.

See your Elco dealer, or write to us direct.

Elco 40 EXPRESS CRUISER. ⬆

Able to cruise anywhere! Sleeps six with the comforts of a 'home afloat.' Speed 25-27 m.p.h. Two cabins. Two complete lavatories, one with stall shower. Spacious deck house with full galley-on-deck. A great boat! Write for fully illustrated literature on the Elco 40.

Elco 47 DELUXE CRUISER . . . ⬇

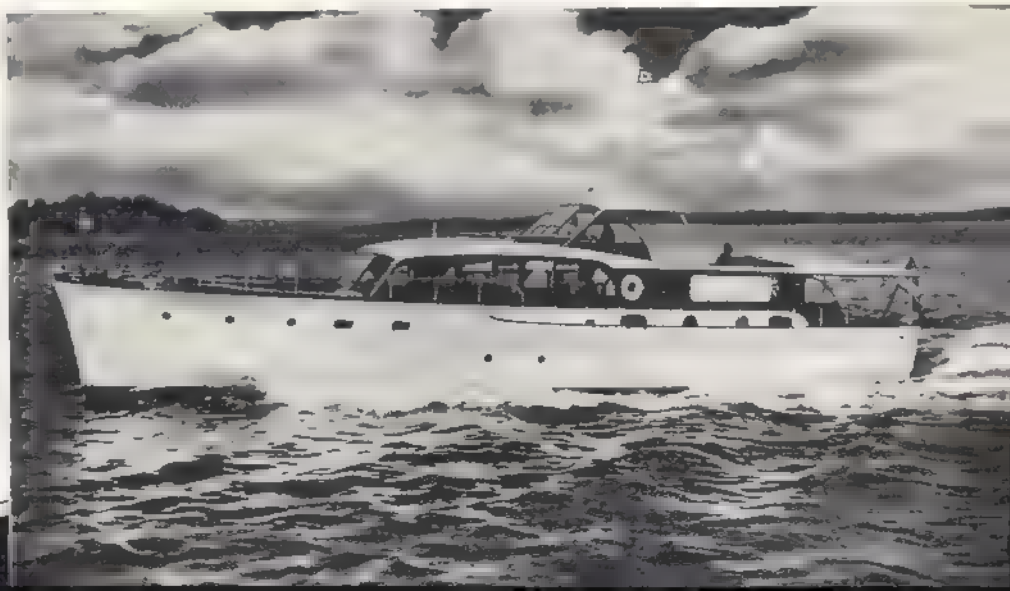

A large, beautiful cruiser with all PT-proven advancements. Elcoplane Y bottom underbody, famed Elco Transfer Drive, double diagonally planked mahogany construction. Speed 21-23 m.p.h. Sleeps six. Two cabins. Two lavatories, one with shower. Large galley. Folder on request.

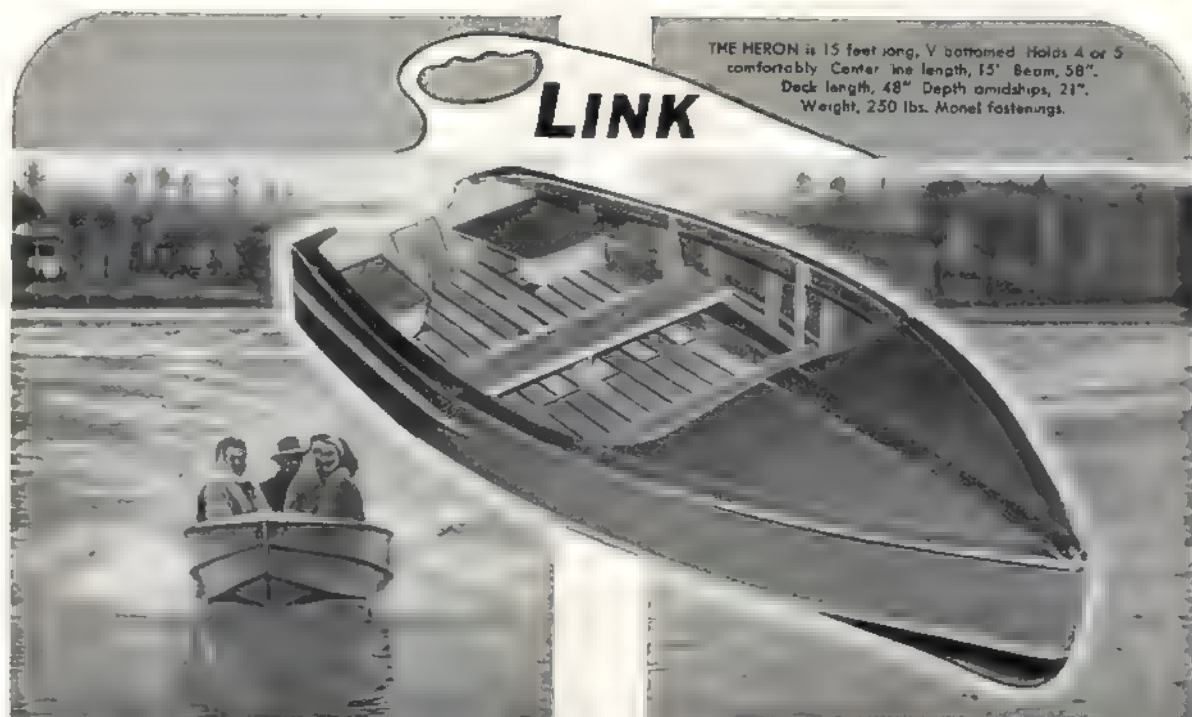

Elco 62 MOTOR YACHT ⬇

Deluxe accommodations for seven in owner's party, two crew. Luxurious furnishings and fittings throughout. Flying bridge. Speed 14-19 m.p.h. Gasoline or Diesel engines. Designed and built for ocean cruising. Write for folder.

WRITE TODAY FOR LITERATURE on the new Elco models, and for the revealing Elco VALUE COMPARISON CHART. Elco Yacht Division, Electric Boat Company, 175 Avenue A, Bayonne, N. J.

THE FINEST FLEET AFLOAT

THE HERON is 15 feet long, V bottomed. Holds 4 or 5 comfortably. Center line length, 15'. Beam, 58". Deck length, 48". Depth amidships, 21". Weight, 250 lbs. Metal fastenings.

LINK

CHART YOUR COURSE FOR VACATIONLAND WITH **LINK** GRAND NEW RIGID BOATS

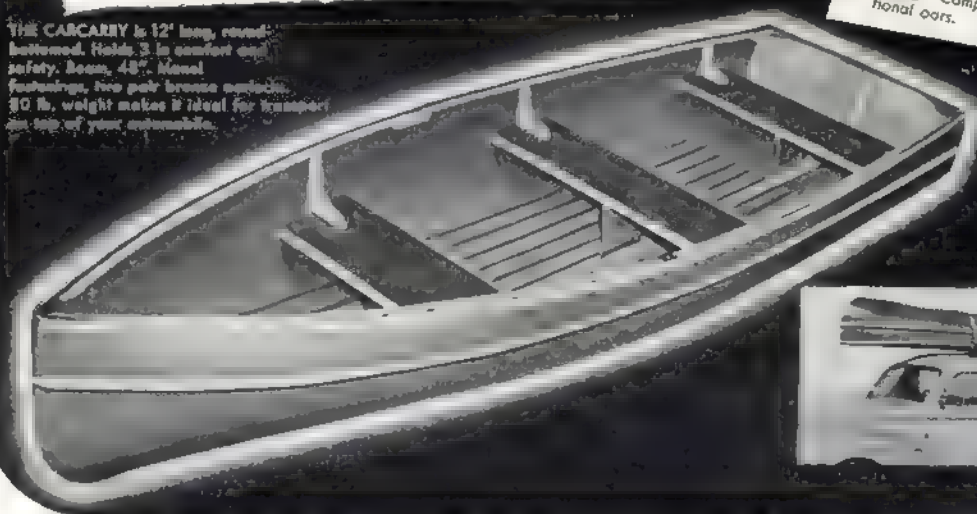

They're the first in postwar small-boat construction . . . sturdy and streamlined . . . built to take it in rough waters. The Heron has frames, keel and stem of oak, planked with 1/4-inch marine plywood, mahogany finish, is capable of speeds from 9 to 30 mph.

The CARCARRY is oak ribbed and solidly built throughout. Both have splash rails, both are made with the same precision workmanship which Link puts into its sectional craft and the famous Link Trainer.

Be sure to see these sensational new boats at the Link exhibit on the mezzanine floor of the N. Y. Motorboat show. Link Aviation, Binghamton, N. Y.

THE CARCARRY is 12' long, round-bottomed. Holds 3 in comfort and safety. Beam, 48". Metal fastenings. Two pair bronze oarlocks. 80 lb. weight makes it ideal for transport on top of your automobile.

SEE LINK'S THREE SECTIONAL BOATS

LINKBOAT—sturdy rowboat, outboard or sailing dink. Assembles in 10 minutes. Stows in 2 bags, weighs 79 lbs. . . . for plane or car carrying.

Price \$265.00

LINKANOE—14 1/2-foot rugged, guide canoe. Carries 4 safely, comfortably.

Price \$179.50

LINK SKIFF—sectional, St. Lawrence-type, rowing skiff. Ideal as a sneak boat, for fishing. Complete with sectional oars.

Mama & Papa VOICES

PA-PA

Margon is proud of the contribution it has made to the supremacy of the American doll throughout the world. Millions of little girls have been made happy with dolls that have all the lifelike characteristics made possible only by Margon voices. Little wonder that smart buyers insist on Margon Mama, Papa, and Crying voices in the dolls they buy.

ONE OF 25 WORKING MODELS shown in the 4-color, 12-page instruction book . . . completely keyed for easy, step-by-step building. Countless other models can be devised . . . even by small children.

WRITE FOR SAMPLE TODAY

Sales tests reveal why there's a ready market

In a market test of BUILDER BOY conducted just before Christmas of '47, one important factor stood out: Parents of 5, 6, and 7-year-olds welcomed this set with open arms! They could see that here, at last, was a construction set "Junior" could assemble easily, quickly.

And they bought because the price was right . . . \$1.98 for 25 fascinating toys in one — real

working models illustrated in the four-color instruction book.

Examine a sample of this new "start 'em young" construction set, and you'll agree that it's a ready market proposition in any locality. Because distribution will definitely be limited to materials available . . . Write or wire today to:

THE NORWOOD COMPANY
6467 N. AVONDALE AVE., CHICAGO 31, ILL.

Manufacturers of the "Song Flute" and other plastic and steel specialties.

"Put us down for 12 gross in '48."

SOUTH BEND

So writes the buyer for a leading department store in South Bend, Indiana (Pop. 119,600) Without benefit of demonstrator or newspaper advertising, this store re-ordered four times in 15 days . . . sold 504 sets in 20 days before Christmas '47.

BUILDER BOY was displayed on same "island" with competing sets . . . outsold them all by a wide margin.

"Biggest selling toy we've ever handled!"

ELKHART

— an unsolicited statement from the buyer of an Elkhart, Indiana, department store . . . in a typical Midwest city of 37,800. Re-ordered three times. Sold 162 sets in 22 days (no demonstrator). Outsold other sets put together by 6 to 1!

"Averaged a gross a day."

CHICAGO

The four stores here got a late start . . . just 18 selling days. But what a finish! Total sales: 2,592 sets by these outlets of a well-known department store chain. Demonstrator used part-time in one of the four stores.

**STORE
TESTED**

Sets retailed for no less than \$1.95 in any store

New **SENSATIONAL MECHANICAL TOY...** **FASCINATING IN ITS LIFE-LIKE ACTION** **NY-LINT LIFT TRUCK**

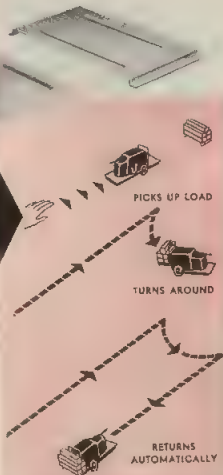

Retail Price
\$3.98 each

PICKS UP LOAD...
URNS AROUND...

RETURNS *Automatically!*

Here is a new and different action toy; a natural for gift sales throughout the year! Youngsters are fascinated by its life-like action... parents appreciate its value as a quality-built toy. The LIFT TRUCK moves forward a controllable distance, lowers its lift platform, picks up a load, and returns to the operator—all automatically! Straight-run and turnabout travel, as well as raising and lowering of the platform, are all governed by a patented double-cam mechanism*. The body is one-piece, deep drawn, heavy-gauge metal for durability, and the spring-powered mechanism is strongly built to assure dependable operation. Truck is 11" long x 4" wide x 4" high; comes in gleaming, lamp-baked, red or green enamel; weighs 2 lbs. Load capacity is 14 oz. Each truck is packaged in an individual gift box with complete operating instructions. Carton contains 24 boxes.

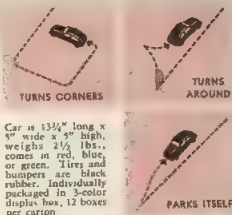

SELL THE AMAZING NY-LINT CAR

IT TURNS CORNERS • IT TURNS AROUND • IT PARKS ITSELF

Retail Price
\$3.98 each

Be sure to feature the popular, wonderfully realistic NY-LINT car! It will run to a selected spot, make a backing turn, and come back. It will turn corners, like driving around the block. Or, it will park itself like a real automobile by backing into a selected space. Like the LIFT-TRUCK, it has a one-piece body and firmly assembled mechanism.

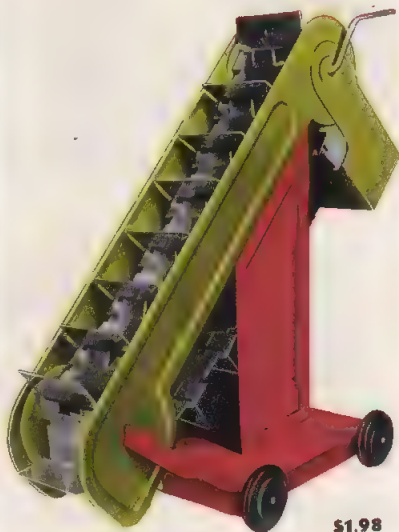

Car is 13 1/4" long x 9" wide x 5" high, weighs 2 1/2 lbs., comes in red, blue, or green. Tires and bumpers are black rubber. Individually packaged in 3-color display box, 12 boxes per carton.

*Pat. No. 2,172,416—Other Patents Pending

THE

WINS!

Wins first place with Young America because they just pump it up and away it speeds with a realistic putt-putt that sounds exactly like a real gas engine.

Wins praise from parents because it's sturdy—made of $\frac{1}{8}$ " aluminum . . . has inflated, puncture-proof tires . . . has no springs or gears to wear out or break . . . has a spring bumper to protect furniture and walls.

Wins acclaim from magazines, newspapers and radio because it's the *only* pneumatically-powered toy on the market, and truly an example of American mechanical genius.

Wins enthusiasm from dealers and buyers as the fastest selling, most appealing year-round toy in the mechanical field.

1947's Most Publicized Mechanical Toy

Called the "tinkiest U.S. model" by TIME. Written up in HOUSE BEAUTIFUL, PARENTS, POPULAR SCIENCE, SCIENCE & MECHANICS. Publicized in SATURDAY EVENING POST, LOOK, LIFE, LIBERTY and COLLIER'S. Featured in newspapers and on radio. Prominently displayed in leading toy catalogs.

Read what these buyers say about the TORNADO!

From a leading Chicago department store:

"Your TORNADO Racer aroused tremendous customer interest and resulted in a great quantity of sales. It can be listed as one of the fastest selling toys in my entire section. I look forward to an even greater year in 1948 with your new and improved model."

BUYER

Here is a statement from a toy jobber:

"My largest purchase of one gross TORNADO Racers was made from you in late November 1947. The demand from my dealers, however, was so great that by December 15 we had sold more than 25 gross. As you know, I do all my own selling consequently I can say thanks for a swell product. You have my order for the new 48 model."

Sturdy Steel Pull Toys with

A BIG STEEL AUTO TRANSPORT. A modern, streamlined version of the auto transports you see on the streets and highways today. 8-wheel trailer-type transport with two cars being carried to the dealer. Double deck trailer can carry cars inside or on top. Metal ramps for loading cars. Cab uncouples from trailer and can be "driven" around separately. Shiny radiator grill and dummy headlights. Enameled in bright colors. Metal wheels.
48 W 1272—22 inches long overall. Shipping weight 4 lbs. .1 98

B MAGNETIC CRANE AND TRUCK. Really picks up metal just like cranes used on construction jobs. Swings the revolving cabin around and pick up any metal load up to about 2 lbs. A strong magnet fastened to the lifting hook operates on the flashlight battery that fits in the cabin. Modern design Crane and Truck are made of heavy steel finished in bright baked-on enamel colors. Battery not included. (See 86 T 3259X below). Steel boom which lifts the objects is operated by a hand crank which raises or lowers it. Size: 25 in. long, 4 3/4 in. wide, 1 3/4 in. high to top of boom.
48 T 1331—Shipping weight 5 lbs. .3 19
86 T 3259X LEAKPROOF FLASHLIGHT BATTERY. Wt 12 oz or 2 for 18¢

C JEEP WRECKER. A replica of the famous Jeep truck equipped with removable wrecker boom. Made of heavy-gauge steel; hood raises realistically to disclose large compartment. Body 5 by 4 1/4 in., has movable tail gate. Boom 8 inches high fits into body. Equipped with ratchet noise maker; metal wheels, dummy headlights. Finished in bright baked-on enamel. 15 1/2 in. long overall.
48 T 1228—Shipping weight 3 lbs. 1 94

D RED PLASTIC TRACTOR AND TRAILER. Accurate scale models of International Harvester farm equipment. Details are accurate, even to the "Farmall" name. Overlays black rubber tires. Front wheels steer on Trailer. Tractor hitched to trailer with color pin. Made of plastic, accurately enough constructed to be a model collector's item. Tractor and trailer each sold separately, or as a set.
48 W 1363—TRACTOR only. 8 in. long. Ship. wt. 1 lb. 1 59
48 W 1368—TRAILER only. Body 10 in. long. Ship. wt. 12 oz. 1 39
48 W 1367—TRACTOR AND TRAILER. 1 lb. 12 oz. 2 79

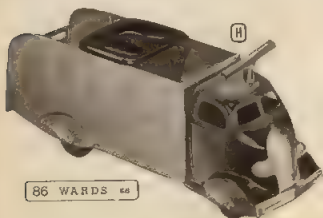

E GROCERY DELIVERY TRUCK. Filled with an assortment of miniature cartons of well-known brand products. Large stake type body, modern design truck cab. Dummy headlights and shiny radiator grill. Steel body, metal wheels. Finished in bright baked-on enamel. 14 1/4 inches long overall.

THEY'RE CHILD CONDITIONED

● Conditioned to appeal to the child's desire for authenticity and accurate detail... so important to him.

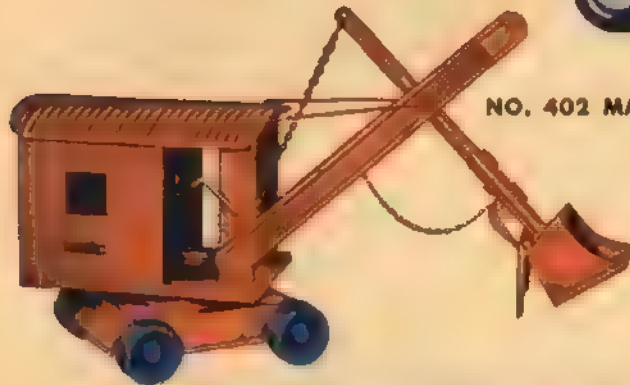

● Conditioned to withstand rough playtime abuse indoors or out. This is, of course, mighty popular with parents.

● Conditioned to provide real live-action in every boy's world of make-believe... so essential in fine toys.

● You'll find universal appeal in **STRUCTO Live-action Pull Toys**. Styled by engineers who designed the popular International Truck, these outstanding new toys are colorful, accurate, up-to-date reproductions of their larger counterparts. For play value and fidelity of detail you can't beat **STRUCTO** — best for 37 years.

The New Look

IN TOYS

"REALISM IN MINIATURE"

Model TOYS

YOUNGSTERS demand it!

TESTED AND
COMMENDED
by
PARENTS'
MAGAZINE
CONSUMER
SERVICE
BUREAU

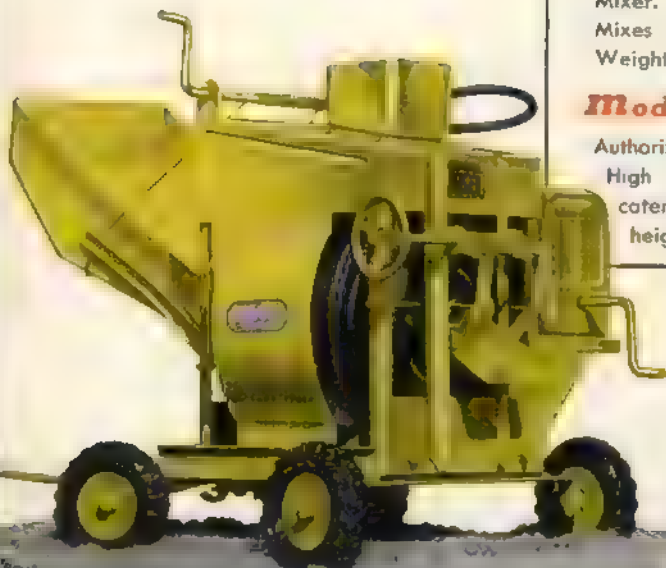

Model CONCRETE MIXER No. 2002

Authorized Reproduction of Jaeger Concrete Mixer. All steel; Goodyear rubber tires. Mixes real concrete! Overall length, 15". Weight, 7 lbs.

Model BUCKET LOADER No. 2001

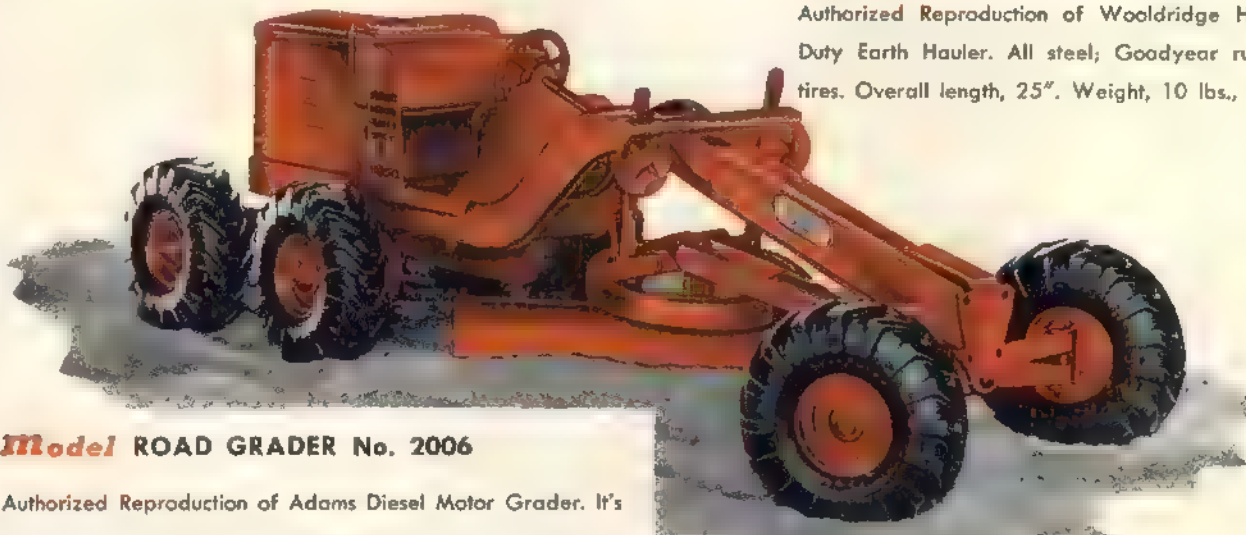

Authorized Reproduction of Barber-Greene High Capacity Bucket Loader. All steel, caterpillar tread; chain drive. Overall height, 18". Weight, 9 lbs. 13 oz.

Model EARTH HAULER No. 2000

Authorized Reproduction of Wooldridge Heavy Duty Earth Hauler. All steel; Goodyear rubber tires. Overall length, 25". Weight, 10 lbs., 9 oz.

Model ROAD GRADER No. 2006

Authorized Reproduction of Adams Diesel Motor Grader. It's the new, 1948 addition to the Doepke line; and your sales will be on the up-grade the minute you stock it! For more information, see next page!

✓ Built as ruggedly as the heavy construction equipment from which they're scaled, **Model Toys** are designed to last through a whole childhood! They're far and away the best buys in the toy field, for they provide years of play, summer or winter, indoors or out!

Children like the realism of **Model Construction Toys**! No "never-never land" of make-believe fantasy for today's youngsters; they like toys that actually work! So, the **Model Road Grader** grades and smooths the "construction site". The **Bucket Loader** fills the **Earth Hauler**, and the **Concrete Mixer** can actually load, mix, and pour real concrete.

That shows how **Model Toys** sell each other

Parents, too, welcome the shift in child play patterns from the destruction of war to the construction of peace. They want toys for their children that challenge young minds and hands... in a constructive way. And they want results from the dollars they spend for their children's happiness.

That's why...

**The best-built toys in America are
the best-selling toys in America!**

AT THE TOY FAIR

"NICE TO HAVE YOU ABOARD... to see the great new 1948 Owens Fleet!"

Each boat is a salt-water job . . . the product of an East Coast builder. The East Coast, you know, is the cradle of American boat-building. We have learned how . . . from the roughness of sea and sun and age. This knowledge, which only experience can give, has built the new Owens Fleet.

You'll find to a great extent, more of the modern in more of the old in the Owens 1948 Fleet. Our stringers are heavier, our ribs more numerous, our hull strength is greater. Our

materials are longer-lived . . . and she's tops in roominess and luxury afloat. The fact that they're moving at a pretty fast clip on our seven block-long assembly lines means that the prices on these fine boats are *right*.

Next best thing to the thrill of skipping one of these craft is to read about it. And . . . if you want more details without obligation, get in touch with your nearest dealer or write direct to the Owens Yacht Company, 2-41 Stansbury Road, Baltimore 22, Md

THE 3-CABIN FLAGSHIP . . . *more roomy, more livable, more beautiful!*

Like all salt-water built boats, this handsome 42-footer has been built to take anything Father Neptune can dish out! For example, she features the famous ocean-liner round-bottom Duraform hull . . . steam-bent, white oak frames, closely spaced and then completely sheathed from sheer to keel with an inner strength-skin, and THEN carvel planked (full thickness) with clear grain cedar. This construction is the highest development of East Coast

boat-building. *This* is your all-weather cruiser. You have a sleek mahogany bridge deck (made particularly strong)—when the sea is bright and sunny, then you and all your guests can enjoy the aft cockpit together. But when Mother Nature kicks up a nasty storm, you will still enjoy taking the inside controls to drive her home hard. That's the advantage of our new dual controls.

"Just like my living room at home . . . with big picture windows, a soft day-bed, venetian blinds and a rich carpet! It's 11'9" long by nearly 12' wide. Radio, controls, bar, 110 volt wiring and everything!"

"Just like my automobile—dependable and handy. Right at my fingertips are the tachometers, ammeters, oil pressure gauges . . . everything I need to put this big baby through her paces. Same set-up's outside on my flying bridge!"

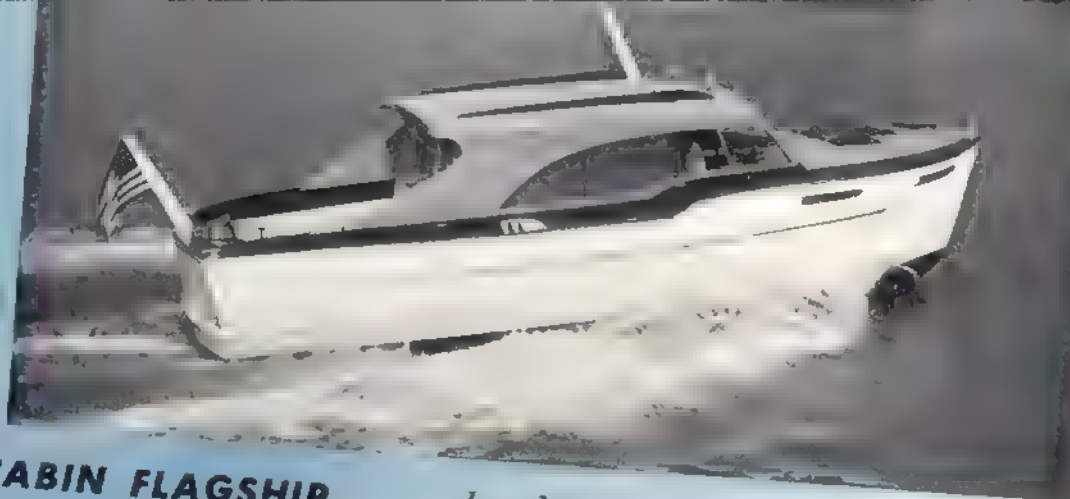

"Plenty of work space, beautifully arranged, sold me on this galley! I've got a big, top-feed ice box below, storage lockers, dish racks . . . and, of course, a recessed stove and sink!"

"You'd never believe it, but this smoothie of a dinette changes in a twinkie to a big double berth with huge lockers beneath!" Located directly to port of the galley.

Value — FAR OUT FRONT . . .

THE 2-CABIN FLAGSHIP . . . *durability, seaworthiness, livability!*

It was hard to improve on the famous pre-war Owens "30", but we did it! Now, she's 33 feet long, with a 12-foot beam. Her stout oak ribs are extra reinforced at the turn of the bilge with copper bands. Round-bottomed, of course, for

traditional strength and durability, and built for Miami-to-Nassau runs. Her roominess, like all of these trim craft, is astounding to folks used to lesser boats. Ask for our new broadside.

"My husband says I'm always elbowing him away from the wheel but this cruiser is so easy to handle . . . and it's FUN!" Main deck cabin is nearly 11 feet wide and better'n 11 feet long

"When we first got the boat, it was exciting to find the many, many lockers and other storage space . . . now, we find other boats cramped! That berth above is pull-man type, sleeps two on innersprings.

"This, to me, is a sea-goin' galley! It's actually more complete and bigger'n my apartment kitchen!" Huge icebox, two-burner stove and recessed sink, plus cupboards and racks

OWENS FLAGSHIPS

Roominess never before obtainable in a . . . **1-CABIN CRUISER!**

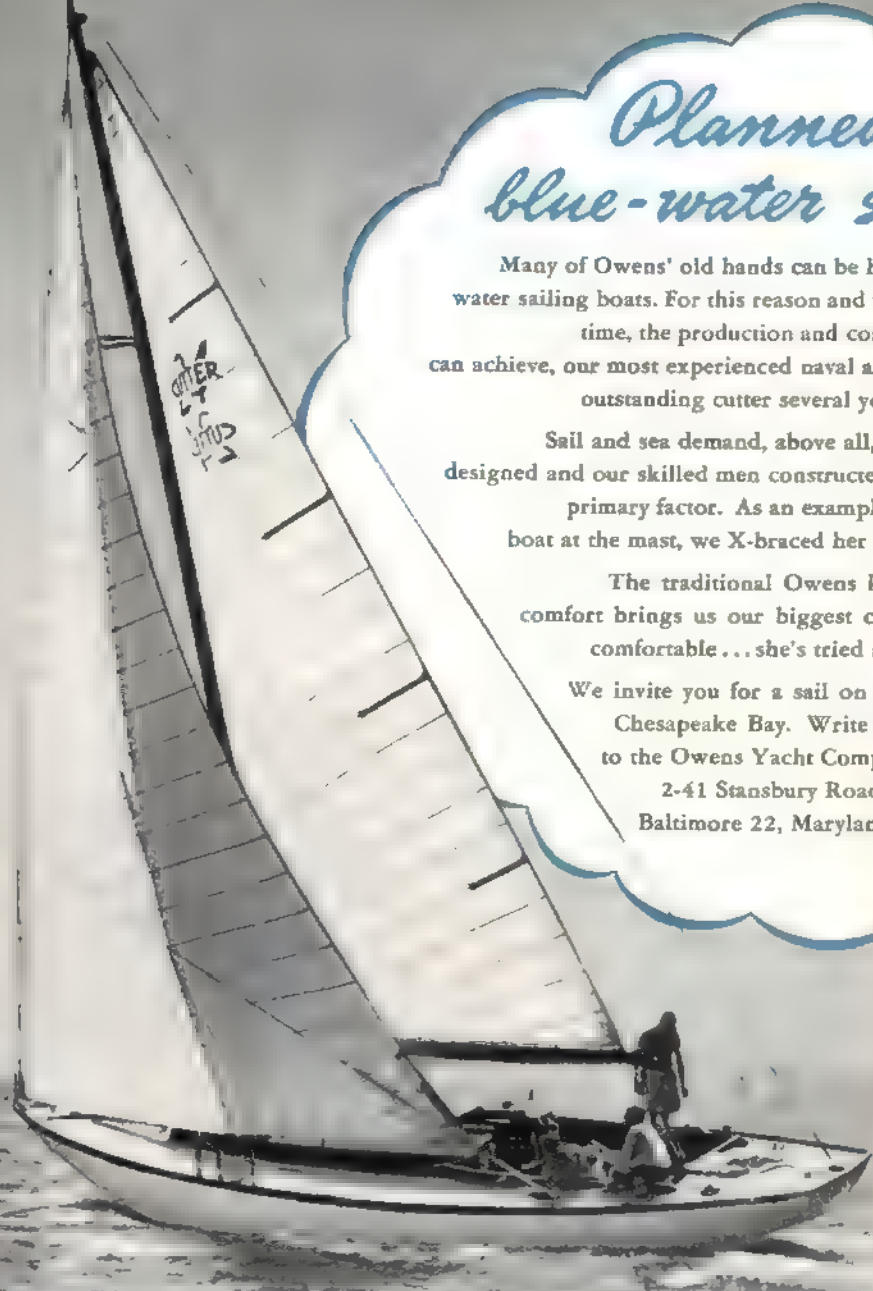

Might as well make your step-up from a runabout a big step-up! This is not an ordinary 1-cabin Cruiser! You and your family can really *live* comfortably and travel far. But, shucks . . . you need a trial cruise. Ask for it!

"The upper berth swings down to make a comfy seat . . . and the other double berth doubles as a couch in my huge living room deck cabin!" No narrow aisle — instead, a living room.

"But you never saw a 27-footer that had so much room! And she handles like a dream!" Lots of sea-ability from the skipper's stand. Self-bailing cockpit aft is 8' long and includes a weather-proof seat.

1-Cabin, 2-Cabin, 3-Cabin Flagships and a blue-water Cutter!

Planned for blue-water sailors!

Many of Owens' old hands can be happy only when building deep-water sailing boats. For this reason and to offer sailboat men, for the first time, the production and cost advantages that only a large builder can achieve, our most experienced naval architects developed this outstanding cutter several years ago.

Sail and sea demand, above all, a strong boat. Our naval architects designed and our skilled men constructed this boat with this as the primary factor. As an example, instead of simply X-bracing the boat at the mast, we X-braced her from stem-head to stern-post.

The traditional Owens knack for plenty of room and comfort brings us our biggest compliments. She's fast, comfortable... she's tried and proven... she's fit for the sea.

We invite you for a sail on the beautiful Chesapeake Bay. Write direct to the Owens Yacht Company, 2-41 Stansbury Road, Baltimore 22, Maryland.

HERE'S YOUR NEW

Playboy**YOU'LL THRILL TO
EVERYTHING ABOUT THIS BOAT!**

You'll thrill to the way it rides, the way it handles, the way it keeps you dry! Its waterproofed U. S. Plywood molded hull is the answer to your desire for an all-tight boat requiring practically no care.

The Playboy was designed and styled by top flight boat engineers of the country. It's built and trimmed by skilled Holland craftsmen with years and years of experience in fine quality woodworking. The Playboy is built to an ideal but its most modest price makes it right for everyone. Priced at just \$1,495. See it at the New York and Chicago Shows or write for free folder giving complete information!

The Playboy is finished to a "T". Solid mahogany trim, comfortable seats for 5, a model of craftsmanship in a low cost low upkeep sportster.

You'll get more use from the Playboy! Take it with you wherever you want for fishing, skiing or pleasure. Specially designed auto trailer makes transport easy.

The Playboy's enclosed 45 h.p. Gray gives that feeling of power that gets you places, but quick! When you have a Playboy, you've 15 feet 6 inches of zip and go.

See it! Chicago National Boat Show, Space S-49.

See it! New York Boat Show, Space B-20 (4th floor).

**America's Keenest
Sportsmen Agree . . .
For Tops in Outboarding
"MAN A MARTIN!"**

MARTIN MOTORS have not only set a New Standard of Performance . . . they have set new records for public acceptance—and for sales.

Now . . . there are THREE great motors in the MARTIN line, with more on the way. And each motor maintains the reputation MARTIN MOTORS have established for top quality. They have been thoroughly tested by the country's keenest sportsmen . . . tried and proved under all conditions of weather and water. And, those who know outboard motors best, say, "For tops in outboarding . . . Man a Martin!"

That whole-hearted approval PLUS a hard-hitting sales and advertising campaign has boosted MARTIN MOTORS to a position of leadership in a comparatively short time. That's why the nation's outstanding dealers know that to "Man a Martin" means tops in outboarding enjoyment and to "Sell a Martin" means tops in outboard sales.

For the first time in outboard motors MARTIN has incorporated time-proved mechanically controlled poppet valves, insuring even fuel distribution, easy starting, and uninterrupted acceleration from smooth trolling speed up to exhilarating top speed.

Exclusive Combined Filler Cap, Air Vent and Spare Shear Pin Clip eliminates conventional screw on type cap. Cap can't come loose. Cap's rattle can't be lost. Springs open at a flip of the latch. Underside holds two spare shear pins. Built in is a positive, ball-bearing type, leak-proof air vent.

Exclusive Martin Vertical Stern Adjustment can be operated while boat's underway. A few turns of the smooth-contoured knob between the stern clamp handles gives the correct vertical position of the motor.

Exclusive Patented Full Size Valve makes it simple to swing lower unit into boat for inspecting shear pin, fouled propeller or water intake.

Two Great New Motors Scott-Atwater 1-12 AND 1-20

A New Experience in Outboard Motoring

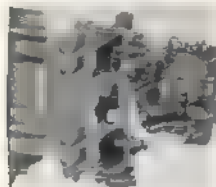

What do you want in an outboard motor? Sensational performance? Faithful reliability? Simplicity of operation? You'll find extra measure of all of these in the new 1948 Scott-Atwater Motors! Plus luxurious styling and real Scotch value.

Your dealer will gladly demonstrate Scott-Atwater's superb performance and all-weather, bother-free reliability. See the new porous metal filter (exclusive) that keeps even water out of the fuel system. Scott-Atwater's new high-pressure water pump (exclusive) permits slowest trolling for hours on end without over-heating, and super-ignition keeps spark plugs clean all season long, just as the super-sealed lower gears require attention but twice a year. Truly, Scott-Atwater gives you the kind of reliability you'll expect only in a fine motor car.

Scott-Atwater's performance is amazing! And its "A B C" simplicity of operation and distinguished styling impress you immediately. Best of all, you get more horsepower per dollar.

One mph trolling
Twelve mph top speed

One mph trolling
Twenty mph top speed

Multiple Feather Intake Valves

Give phenomenal idling and top speeds by automatically changing timing to suit optimum charge at all speeds (not possible with other types of valves) . . . Flood-proof for easy starting . . . and wear-proof.

Full-Expansion Exhaust

plus jet-silenced cut-out. Reduces back pressure to an absolute minimum . . . a major contribution to Scott-Atwater's remarkable high speed . . . slow trolling . . . and easy starting.

Concentric Bowl Carburetor—With automobile type dual jets gives correct mixture at any speed—even idling to 50%. **New Type Magneto**—Shoots hot spark for one-pull starting, clean-plug trolling.

High Pressure Water Pump

Oscillating rotor type located on drive shaft operates 60% faster giving positive circulation at slowest trolling. New synthetic rubber out-boards metal. Patent pending.

Scott-Atwater 1-12 Deluxe Sunde with Auto. Rev. n Starter 3.6 h.p., GBC Certified (at 4,000 rpm). Price del. \$114.25 Standard \$109.25

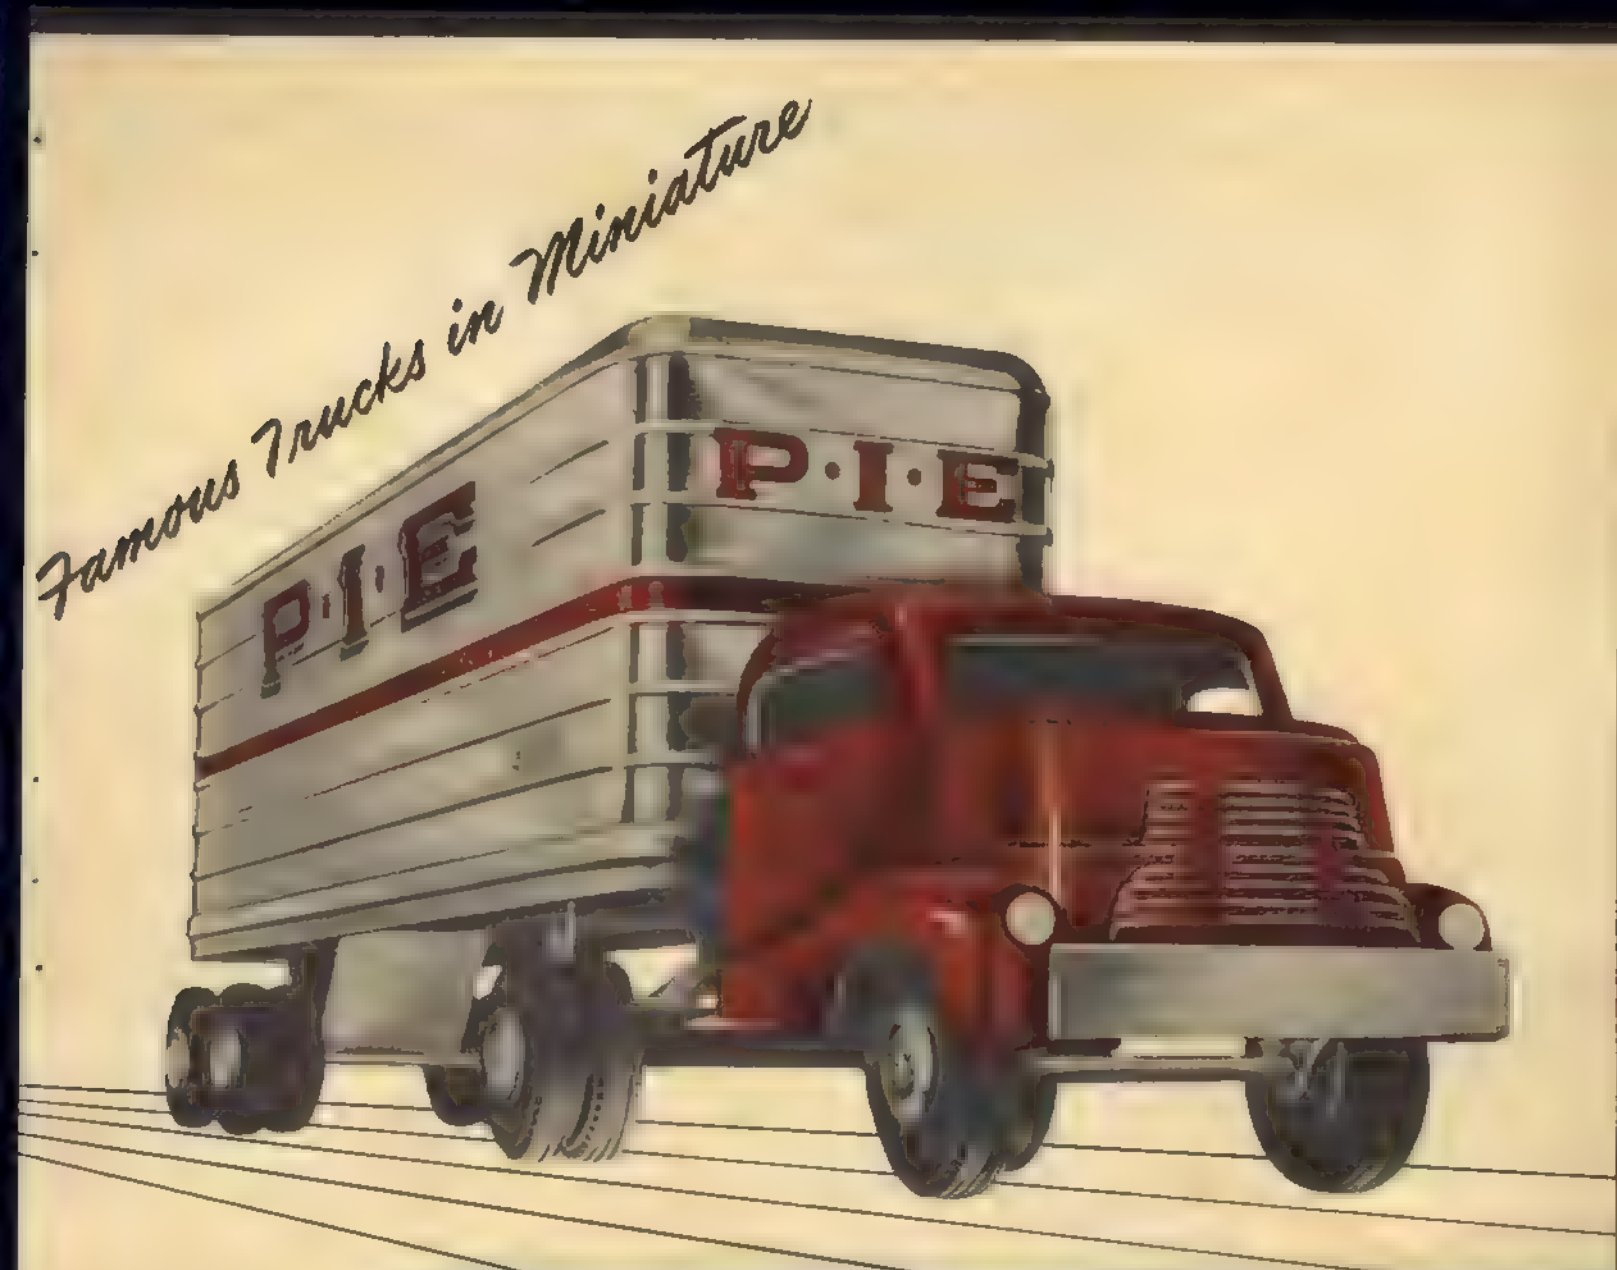

Also in table Scott-Atwater 1-20 Deluxe, Aspirate Prime Tux, 7 1/2 h.p., GBC Certified @ 4,200 rpm. Price del. \$176.25

304-K KRAFT FOODS. Yellow cab and body, delivery van type. Kraft decal with blue checkerboard corners. 4 treaded rubber wheels.

New Body Styles

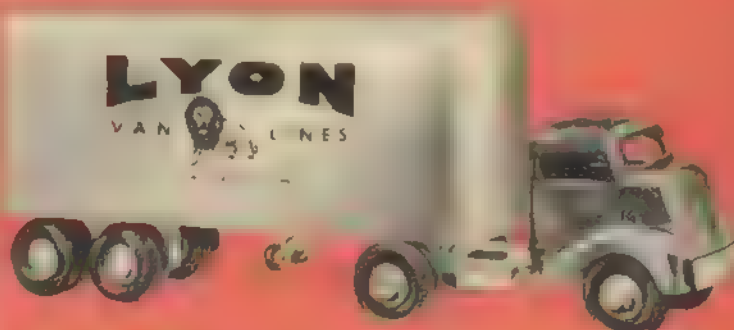

L 14" W 5½" H 7". Individually boxed. Approx. Shipping Weight Doz. 50 lbs.

307-L REDWOOD LOGGER. Green cab. Natural hardwood stakes. Load of 3 "logs." Retractable landing gear. Full length die-cast frame. 14 treaded rubber wheels. Floating tandem duals.

Scale Model Realism

L 22½" W 6¼" H 6¼". Individually boxed. Approx. Shipping Weight Doz. 60 lbs.

308-V LYON VAN. Blue cab. White van trailer with Lyon decal. Opening rear door. Retractable landing gear. 14 treaded rubber wheels.

L 22½" W 6¼" H 8¾". Individually boxed. Approx. Shipping Weight Doz. 90 lbs.

311-E SILVER STREAK EXPRESS. Polished aluminum cab and body. Retractable landing gear. Full length die-cast frame. 14 treaded rubber wheels. Floating tandem duals.

L 23½" W 6¼" H 6¼". Individually boxed. Approx. Shipping Weight Doz. 72 lbs.

312-P PACIFIC INTERMOUNTAIN EXPRESS. Red cab, polished aluminum trailer with red and black "P.I.E." insignia on front and sides. Rear opening doors. Retractable landing gear. 14 treaded rubber wheels. Floating tandem duals.

Supreme Quality

L 24" W 6¼" H 9". Individually boxed. Approx. Shipping Weight Doz. 90 lbs.

TOYS MILLER

Let quality-built Smith-Miller trucks build your toy business to still bigger volume in '48. Here is one of the great lines of America's fine toys,

now in its fifth year of public acceptance. You are invited to compare their quality construction and "big truck" realism, point by point.

NEVER BEFORE has such sturdy play-proof construction gone into a toy truck. Smith-Miller "Famous Trucks in Miniature" are built with full-length die-cast aluminum frames. This is a superior-value feature you'll want to point out to your customers.

Note also the I-beam reinforced construction, trailer landing gear, and floating tandem duals—just like knee-action. Always turn the truck over

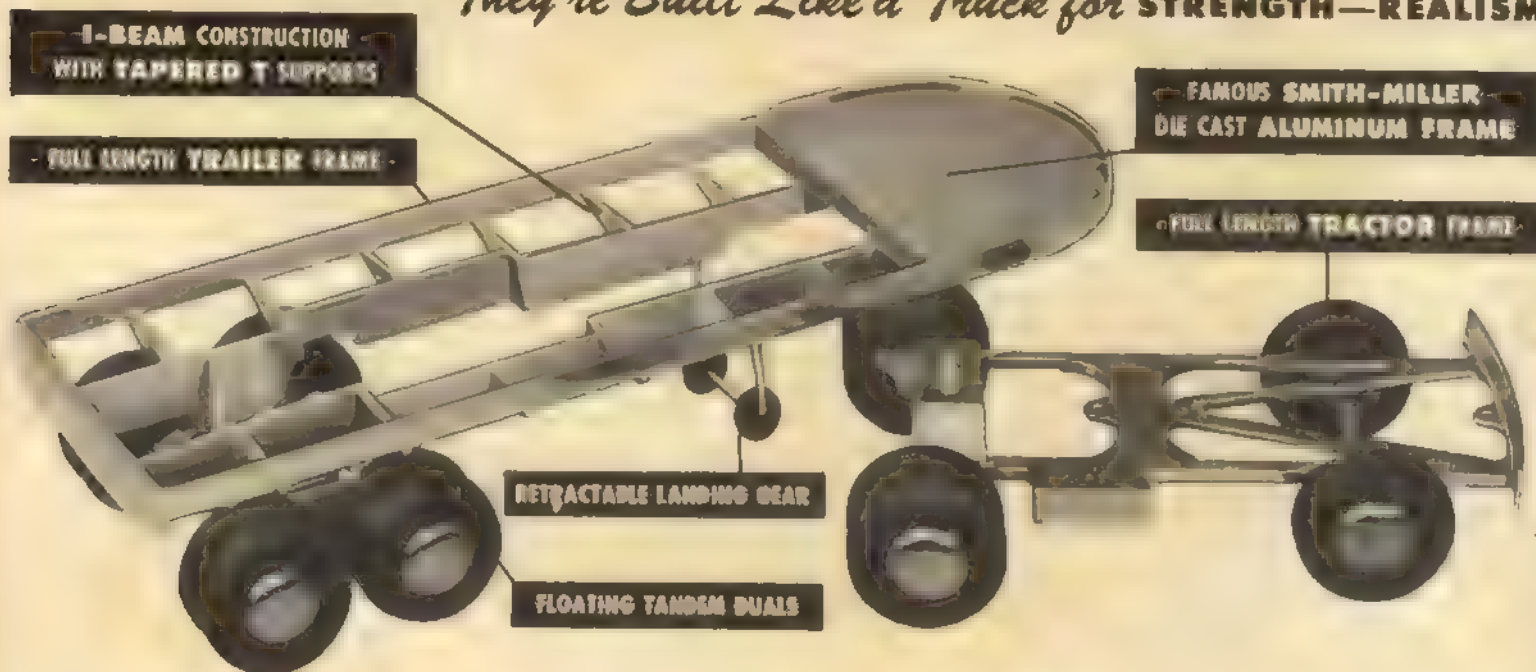

and let your customers see these details—hallmarks of Smith-Miller ruggedness and realism!

These vivid "reason-why" advantages inspire prompt purchase of Smith-Miller "Famous Trucks in Miniature," spell steady sales for your small wheel goods department throughout the year.

Knuckle Joint, Nickel Trimmings. Nos. 18 and 19 have steel Knuckle Joint Lever Cap which snaps into position and holds the cutter firmly.

No.	Length	Cutter	Wt. ea.	Each
18	6 in.	1 1/2 in.	1 1/2 lbs.	\$6.40
19	7 in.	1 1/2 in.	1 1/2 lbs.	6.80

SCHOOL—LOW ANGLE

Designed especially for manual training classes. It is practically unbreakable, has few adjustments and fits the boy's hand comfortably.

Made entirely of steel. Low angle—Cutter rests on its seat at an angle of 12 degrees. Screw adjustment. Non-adjustable throat. Brass knob. Nickel plated trim.

No.	Length	Cutter	Wt. ea.	Each
118	6 in.	1 1/2 in.	1 1/2 lbs.	\$5.80

STANLEY PLANES

LOW ANGLE BLOCK

The cutter rests on its seat at an angle of 12 degrees. The low angle of the cutter makes it easy to plane across hardwood. The cutter is adjustable endwise by means of the steel adjusting screw. The bottoms and sides are milled and ground.

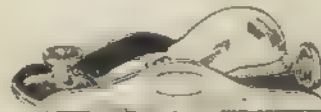

High grade steel cutters, ground and sharpened. Japanned finish. Adjustable.

No.	Length	Cutter	Wt. ea.	Each
60 1/2	6 in.	1 1/2 in.	1 1/2 lbs.	\$5.70
65 1/2	7 in.	1 1/2 in.	1 1/2 lbs.	5.90

Adjustable, nickel trimmings.

No.	Length	Cutter	Wt. ea.	Each
60	6 in.	1 1/2 in.	1 1/2 lbs.	\$6.10

Steel cap, knuckle joint, nickel trimmings

No.	Length	Cutter	Wt. ea.	Each
65	7 in.	1 1/2 in.	1 1/2 lbs.	\$6.70

BULL NOSE RABBIT

Adjustable throat. Specially designed for working into corners.

No.	Length	Cutter	Wt. ea.	Each
73	4 in.	1 in.	1/2 lb.	\$2.40

EDGE TRIMMER

For trimming ends of boards. Cutter works on skew giving easy shaving cut.

No.	Length	Cutter	Wt. ea.	Each
95	6 in.	3/4 in.	1 1/2 lbs.	\$4.80

SIDE RABBIT

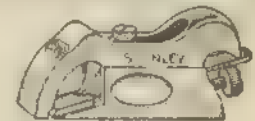

For side rabbeting in trimming dados, mouldings and grooves of all kinds. Has a reversible nose piece so it can be worked into corners. Fitted with a depth gauge.

No.	Length	Cutter	Wt. ea.	Each
79	5 1/2 in.	3/4 in.	1 lb.	\$6.40

All planes one in a box

CABINET MAKERS' RABBIT

Especially valuable when fitting rabbeted shoulders for apices and mortises, and for any fine rabbit work on cabinets, patterns, etc., where accuracy is essential. They can be worked either right or left hand. Throat opening is adjustable. Cutters are adjustable. Nickel plated.

Bull nose pattern and can be used in corners or other hard to get at places.

No.	Length	Cutter	Wt. ea.	Each
90	4 in.	1 in.	1 lb.	\$10.40

With the front removed they can be used as chisel planes to remove glue or uneven places in corners.

No.	Length	Cutter	Wt. ea.	Each
92	5 1/2 in.	3/4 in.	1 1/2 lbs.	\$12.10
93	6 1/2 in.	1 in.	1 1/2 lbs.	14.50

CARRIAGE MAKERS' RABBIT

Malleable Iron Bottoms

To accurately cut a rabbit joint across the grain; to cut and smooth rabbets on hardwood, and for heavy rabbit cuts in mining and construction work. Double iron and "Bailey" adjustments. Rosewood handles and knobs.

No.	Length	Cutter	Wt. ea.	Each
10 1/2	9 in.	2 1/2 in.	3 lbs.	\$13.50
10	13 in.	2 1/2 in.	4 1/2 lbs.	15.20

IMPROVED RABBIT

Can be used either right or left hand, to plane into corners or against perpendicular surfaces. Fitted with a spur and a detachable depth gauge. Japanned finish with nickel plated trimmings.

No.	Length	Cutter	Wt. ea.	Each
190	8 in.	1 1/2 in.	2 1/2 lbs.	\$6.30
191	8 in.	1 1/4 in.	2 1/4 lbs.	6.30
192	8 in.	1 in.	2 lbs.	6.30

DEPT. 2

RABBIT AND FILLETSTER

This plane has two seats for the cutter, one for regular work, and the other for bull nose work for working close into corners. It is fitted with a spur and a removable depth gauge. The adjustable fence can be used on either side of the plane. When used in the rear seat the cutter is adjustable endwise. Japanned finish with nickel plated trimmings.

No.	Length	Cutter	Wt. ea.	Each
78	8 1/2 in.	1 1/2 in.	3 lbs.	\$8.00

IMPROVED DADO

Will cut true, even in the narrow widths. The skew cutter and two adjustable spurs assure smooth clean cuts. Fitted with an adjustable depth gauge. Japanned.

No.	Length	Cutter	Wt. ea.	Each
89	8 in.	1/4 in.	1 1/2 lbs.	\$9.00
		3/8 in.	1 1/2 lbs.	9.00
		1/2 in.	1 1/2 lbs.	9.00
		3/4 in.	2 lbs.	9.00

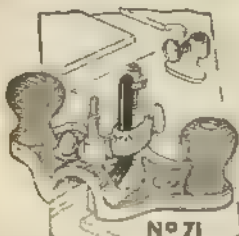

TONGUE AND GROOVING

Cuts 1/4 in. groove, on boards 3/4 in. to 1 in. Two separate cutters, plow and tongue tool. Nickel plated. Matches 7/8 in. boards.

No.	Length	Wt. each	Each
118	9 in.	2 3/4 lbs.	\$11.60

WOODWORKERS' ROUTER

For surfacing bottom of grooves or other depressions. Furnished with 3/4 and 1/2 in. bits and a "V" smoothing cutter. Nickel plated body, maple knobs.

No.	Wt. each	Each
71	2 3/4 lbs.	\$9.50

All above one in a box

STANLEY PLANES

ADJUSTABLE CIRCULAR

Has a flexible steel bottom which can be adjusted to plane convex and concave surfaces. Cutters are adjustable endwise and sidewise. Japanned frames.

No.	Length	Cutter	Wt. each	Each
20	10 in.	1 3/4 in.	3 1/2 lbs.	\$20.50

One in a box

PLOW, BEADING AND MATCHING PLANE

Small combination plane for light work. Adapted for plow, beading, matching and rabbet work. Fitted with spurs, depth gauge, and a fence with a 5-inch adjustment. Metal handle, nickel plated. Includes the following cutters:

Plow and Dado: 1/4, 3/8, 1/2, 3/4, 1 inch

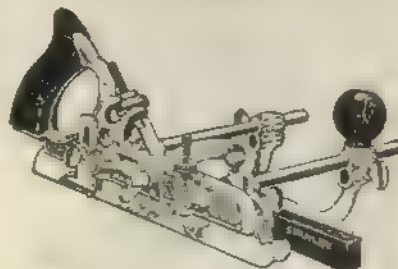

Beading: 1/4, 3/8, 1/2, 3/4, 1, 1 1/4 inch.

Tonguing: 1/4 inch.

No.	Length	Wt. each	Each
50	9 1/4 in.	3 1/4 lbs.	\$24.50

One in a box

ADJUSTABLE BEADING, RABBIT AND MATCHING PLANE

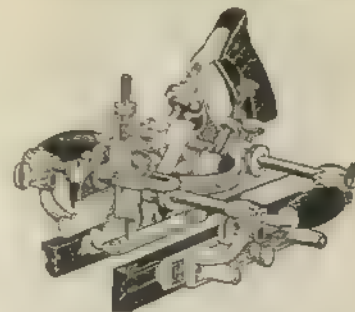

Combines seven planes in one, beading, and center-beading plane, plow, dado, rabbet and filletster. Match plane, sash plane, slitting plane. Fitted with spurs for use across the grain and can be used either right or left hand. Metal parts are nickel plated. Rosewood handle, knob and fence. Includes 23 cutters.

No.	Wt. each	Each
45	9 1/4 lbs.	\$39.80

One in a box

"FIFTY-FIFTY" PLANE

Combination beading and center beading plane, plow, dado, rabbet, filletster and match plane, sash plane, slitting plane and molding plane. Accommodates cutters of almost any shape and size. Fitted with spurs for working across the grain, and a special cam rest to keep the fence from sagging, or to prevent the possibility of the plane rocking. Metal parts are nickel plated. Rosewood handle and fences. With 55 cutters.

No.	Wt. each	Each
55	15 1/4 lbs.	\$72.30

One in a box

SCRAPER PLANE

Iron bottom. Double handle veneer or scraper. The blades are adjustable endwise and for angle, and can be firmly locked in position desired.

No.	Length	Blade	Wt. each	Each
12	6 1/4 in.	2 3/4 in.	3 1/2 lbs.	\$11.50

One in a box

Extra Blades	Per doz
.....	\$14.00

One-half dozen in a box

CORNERING TOOLS STANLEY

For rounding sharp edges. A different sized cutter at each end, sharpened to cut with grain of wood without changing position of work. Length, 5 1/2 inches.

No.	Cutters	Wt. per doz.	Per doz
29	3/4 and 1/2 in.	1 1/2 lbs.	\$10.00
28	1/2 and 3/8 in.	1 1/2 lbs.	10.00

One dozen in a box

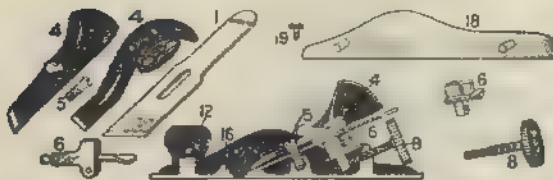

EXTRA PARTS FOR STANLEY PLANES

FOR PLANES NOS. 91, 15, 17, 18 AND 60

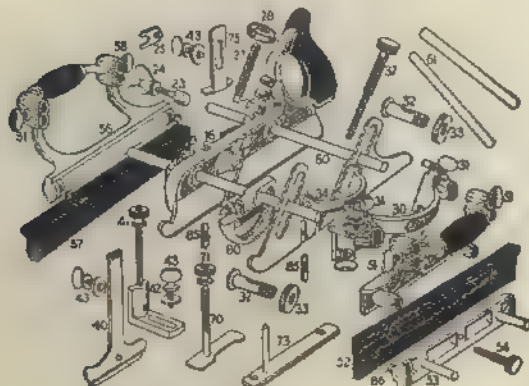

FOR PLANES NOS. 3 TO 8

FOR PLANES NOS. 102, 103, 110, 140 AND 220

	24 in.	5 lbs.	10.50

One in a box

Full nickel plated throughout. With ground glasses, two plumbs, grooved bottom.

No.	Length	Wt. each	Each
37-G	24 in.	5 lbs.	\$13.30

One in a box

EMPIRE TORPEDO

Hollow reinforced construction of aluminum alloy. Polished top plate. One level, one 90 degree plumb, and one 45 degree plumb glass, all with colored fluid.

No.	Length	Wt. per doz.	Per doz.
26-E	9 in.	3 lbs.	\$32.40

One-half dozen in a box

DISSTON TORPEDO

Die cast aluminum alloy. Sides of level parallel, tapered ends slightly rounded. The level glass view on top, 90° plumb glass at one end; 45° angle glass at other end.

No.	Length	Wt. per doz.	Per doz.
A-11	9 in.	1 1/2 lbs.	\$30.00

One-half dozen in a box

MAYES TORPEDO

Magnesium. Fitted with one level, one plumb and one 45 degree.

No.	Length	Wt. per doz.	Per doz.
1204-M	9 in.	2 1/4 lbs.	\$30.00

Five-twelfth dozen in a box

MILLERS FALLS

Die plastic with metal top plate. One 90 degree plumb, one 45 degree plumb, and one level glass.

No.	Length	Wt. per doz.	Per doz.
390	9 in.	4 lbs.	\$27.50

One-third dozen in a carton

MAYES

Handy pocket level, made of walnut wood, natural weather proof finish. Fitted with one level, one plumb and one forty-five degree glass.

No.	Length	Wt. per doz.	Per doz.
30	9 in.	3 lbs.	\$20.50

One-half dozen in a box

STANLEY

Seasoned walnut. Fitted with one plumb, one level "cat's eye" glasses.

No.	Length	Wt. per doz.	Per doz.
259	9 in.	3 1/2 lbs.	\$18.00

One-half dozen in a display box

DEFIANCE TORPEDO

Walnut stock. Proved cat's eye level glass. Nickel plated top plate.

No.	Length	Wt. per doz.	Per doz.
1293	9 in.	3 1/2 lbs.	\$8.40

One-half dozen in a box

STEVENS POCKET

Hard drawn 3/4 inch hexagon aluminum tubing, with pencil clip.

No.	Length	Wt. per doz.	Per doz.
356	5 1/4 in.	1/2 lb.	\$13.20

One dozen in a display box

EMPIRE POCKET

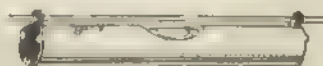

Hexagon aluminum tubing fully polished. Proved glass with yellow fluid.

No.	Length	Wt. per doz.	Per doz.

VIAL CASES

EMPIRE

For Adjustable Empire Aluminum Levels. Constructed in the form of a cylinder having a segmental projection containing the level or plumb glasses. When two of these glass cases are set together they interlock, allowing two glasses to be mounted in the same opening. This makes it possible to adjust or remove either glass independent of the other.

One-half unit for levels and plumbs Nos. 1E, 2E, 3E, 20E.

THE '48 *Steelcraft*

OUTDATES, OUTVALUES ALL OTHERS

These "years-ahead", steel-hulled Steelcraft "beauties" top the Show. Point for point, feature for feature, price for price they outclass any other boats in the 26 ft. class. See! Compare!—and you're bound to buy a Steelcraft.

TWIN STATEROOM

Sedans From **\$3995***

One of the three new, fully equipped, 1948 Steelcraft Sedans, replete with innovations to provide maximum comfort and privacy.

DeLuxe Sedan (illustrated) \$4385*

Custom Sedan (prices on request).

DRIEST 26 FT. BOAT AFLOAT!

"STEELS" THE SHOW!

STEEL MAKES THEM SISTER SHIPS

WHY YOUR NEW BOAT SHOULD BE A

Steelcraft

● **PRICED THOUSANDS LESS**—Now you don't have to be a millionaire to buy a steel-hulled pleasure boat. Yet even those with unlimited means cannot buy a smarter, safer, more seaworthy craft of similar size.

● **ALL-STEEL HULL**: Recognized by "old salts" and new boat owners as today's greatest advance in providing maximum safety, minimum maintenance cost, longer life, and ability to meet all weather conditions and climes. Truly a lifetime hull.

● **EXTRA COMFORTS AND CONVENIENCES** make every Steelcraft "a home afloat". Full headroom in both cabins, more privacy. Two separate twin staterooms (on Sedan models); ingenious space-usage on models that sleep two; insulated for comfort; smart upholstery; full length clothes lockers; modern galleys with newest type refrigerators and sinks; fully enclosed marine toilets; ample spaces for stowing gear—these and many more "extras" to assure a truly "bon voyage".

● **SMARTNESS!** Designed by a famous marine architect, Steelcraft's trim, sleek lines challenge the entire boat field for outstanding grace and smartness. All eyes say "Aye! Aye!" when they see a Steelcraft!

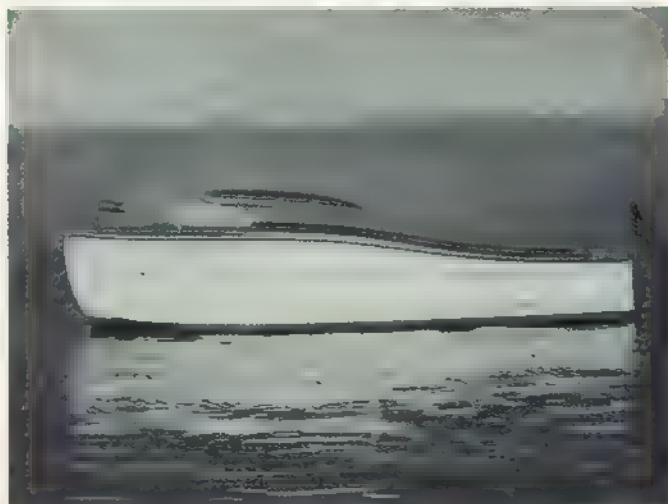

● **FULL ENGINE POWER!** You get the most out of the horsepower of your Steelcraft's engine—thanks to Steelcraft's new Sea-Vee bottom, which lessens drag, increases hull-efficiency, makes for smoother, easier going under all conditions. Choice of engines: from 75 HP to 360 HP, single or twin screw, with speeds from 15.1 MPH to 42.3 MPH (in tests made under ideal conditions at shipyard).

Other Steelcraft models from \$1985.*

*ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE, and FOB our yard at West Haven, Conn.

See for yourself these and many other outstanding Steelcraft advancements at the **MOTOR BOAT SHOW**, Grand Central Palace, New York City, **JANUARY 9th to 18th inclusive**—or **SEE THEM AT YOUR LOCAL STEELCRAFT DEALER**. (turn to next page.)

THE ONLY COMPLETE 26' CRUISER UNDER \$3000*.

THE NEW 26' *Holiday Cruiser*

Latest addition to the Steelcraft fleet. Designed especially for those who have Saturday afternoons and Sundays for summer cruising. Also ideal as a party fishing boat. Sleeps two; seating capacity for twelve. Unusually large cockpit

\$2985*

STEELCRAFT *Day Cruiser*

Big 26 ft. Day Cruiser with full headroom in cabin which sleeps two. Enclosed marine toilet, galley, and full length clothes locker. Sound-proofed permanent top, ventilating windshield, side-protecting vane and insulated engine box make it a perfect boat for fishing or cruising.

\$3755*

CHURCHWARD & CO., INC., West Haven, Conn., World's Largest Builders of Steel Boats

NEW SCANDINAVIAN-BUILT SAILBOATS

NOW AVAILABLE FOR SPRING DELIVERY IN U.S., READY TO SAIL

again by a freak storm which dropped 15 inches of rain in 8 hours, 11 of the 15 inches falling in 3 hours. This on top of a previous excess of 30 inches of rain above normal for the period caused such serious flood conditions that a state of emergency was declared in the area. Commander Bentley was called upon to organize the members of the Fort Lauderdale Power Squadron for emergency rescue work. The men responded magnificently, in line with the best traditions of the USPS for hel business and service. They brought into the area and then took responsibility for manning 20 Army assault boats which were used practically on a 24-hour basis to evacuate families marooned by the floods, to take feed to dairy cattle and cattle herds and to do other rescue work. Unfortunately in assisting in this work, Commander Bentley was painfully injured and had to be hospitalized before operations were completed, but Lieutenant Commander McLean carried on in his place until the services of the squadron were no longer needed.

And so it is possible to go on reading from the log of the good ship United States Power Squadrons for many more hours, but it is hoped that the foregoing extracts will merely prove the point that in sail or power, our members are able and practical yachtsmen, keen for competition, and able to give a good account of themselves under all conditions.

LET'S HAVE MORE MARINAS

(Continued from page 112)

There are several enormous projects under way that well deserve superlatives in description. According to unbiased comments from many sources, California gives every indication of becoming a leading market for the boating industry. In support of this prediction attention is called to the \$12,000,000 Mission Bay, San Diego, project which is progressing magnificently.

Mission Bay is ten miles north of the entrance to San Diego Bay, is separated by a narrow sandspit into East and West "Bays," and will provide about nine square miles of anchorage space. In 1943, the San Diego City Council authorized a \$2,000,000 bond issue for the construction of a recreational boat harbor, playground and waterfront park.

In 1945, the council authorized an additional \$1,500,000 and finally, in 1946, the project was included in a Congressional "Rivers and Harbors Bill," to receive federal assistance. Channels, basins and slips in the west portion of the Bay will soon accommodate an estimated 2400 craft.

The Missouri Valley Authority is developing "yachting country" where little or no boating existed before. The new bodies of water are primarily aiding the farmers, but these masters of our nation's food basket will soon become proficient in handling cruisers and sail boats. Traditionally, the Navy has culled its greatest number of enlistments from the central parts of the U. S. Perhaps these sharp-eyed sons of Cincinnati will now have better, and more varied recreation at home.

Boat basins are being built by the federal government on both TVA and MVA waters and leased to operators. These are being made to be self-sufficient, profitable operations, benefiting the government's and the operator's exchequers, as well as the boat owner.

The National Association of Engine and Boat Manufacturers maintains contact with hundreds of groups and municipalities desirous of establishing or currently working on a marina. We attempt to keep ourselves abreast of marina developments, regardless of the size or location, and recently there was an excellent opportunity to compare progress on two projects in Florida. One was a municipal campaign for "... a yacht club and basin second to none in this country ..." according to a newspaper report, and the other was the swift action of the Miami Beach city council, in contracting to have a marina built.

In justice to the former group, they may eventually build their claimed giant project; but it is the alert and persevering "do-it-now" attitude of the Miami Beach city fathers which is going to relieve docking congestion in the boating metropolis of the South, when the southbound safaris start next fall. The Miami Beach city council ordered a lease to be drawn up with

COMPENSATOR

CUTTS

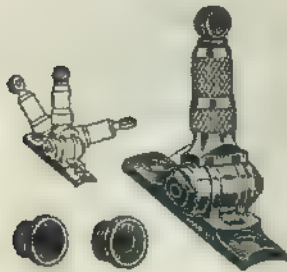

An attachment for single barrel trap guns, repeating or automatic shotguns. Developed for recoil reduction and pattern control through the various type tubes supplied with the Compensator. Black finish, aluminum construction. The Cutts Compensator is supplied with two tubes, to be selected by the shooter from the following selection:

- No. 675 Long Range No. 1.
- No. 680 Long Range No. 2.
- No. 690 Long Range No. 3.
- No. 705 Full Choke.
- No. 725 Modified Choke.
- No. 740 General Purpose.
- No. 755 Skeet Spreader Tube.

Each Cutts Compensator is packed in a small, handy wooden carrying case, complete with wrench and brush and should be fitted by a competent gunsmith. To obtain best results, the gun should be returned to have Compensator fitted as each make of barrel varies in diameter. Otherwise specify make, model and gauge of shotgun and whether plain, rib or ventilated rib barrel. Fitting charges are extra. Supplied in 12, 16 and 20 gauge.

62 T 2726 R—As above, but for Long-play and Standard Records 184.95

FACTS ABOUT THE NEW LONG-PLAYING PHONOGRAPH RECORD

A new long-playing 33½ RPM. micro-groove phonograph record is being introduced this fall. It plays as long as five standard records and is especially adaptable for music now available in album form. Standard 78 RPM. popular and classical records will continue to be made for both single selections and albums. A standard phonograph, however, will not play the new type record.

because it requires a special tone arm, pickup and motor. The above radio-phonographs are available with standard changer or with standard changer plus provision for playing the new type records manually. When long-playing records are freely available, other models may have this feature. Low-priced long-playing record players also will be available.

62 W 2714R—Only \$28 Down and \$10 Monthly.....or Cash 139.95

FACTS ABOUT FM (FREQUENCY MODULATION)

You will enjoy the superb musical brilliance of FM... the delightful loveliness of musical reproduction attained by broadcasting the musical overtones (very high tones that add life-like fullness to the notes played). FM is free from major interference of power lines, electrical appliances, street cars and other sources of static. These are the main advantages over AM.

We recommend you select a radio with FM because you will want its many special advantages if an FM station is now operating (or planned) near you. The range of FM is limited to about 50 miles. For radio area then 20 miles from an FM station, an outside FM antenna is recommended for better reception. See Antennas—FM in Wards Full General Catalog.

Wire Recorder and Table Radio - phonograph

TINY PERSONAL PORTABLE

NEW AIRLINE PLUG-IN WIRE RECORDER

A In the opinion of several impartial nationally known sound experts who have tested the Airline Wire Recorder, it has tone quality and fidelity of reproduction equal or superior to that of recorders selling up to \$600.00. A fine gift for music-lovers, speakers, students and others. Take it anywhere to put music, voices, and special events on wire... in laboratory tests wire played 18 million times without wearing out.

Records from Microphones or Records played on its own turntable. Plug into your present radio to play back wire or records. Can connect to make recording direct from radio. Fits into most console record compartments.

Records up to ONE HOUR CONTINUOUSLY. One 15-minute spool included. Order 30-min. and 60-min. spools below. Wire has celluloid leader for easy threading, shuts off recorder automatically at end of wire. Erase wire easily. Easy to Use. Simplified pushbutton control. Recording level indicator. Safety lock prevents accidental erasing of wires. Newly designed Tone Arm with Airline Muted Stylus pickup. 2500-play needle. 4-tube plus rectifier. Airline crystal microphones, instructions and cables included. Molded steel cabinet. Can be carried in attaché case (sold separately below). For 125 to 125 volts, 60 cycle A.C. only. Size 14x13x7 in. high overall. Ship. wt. 36 lbs. Express.

Length overall, in.	38

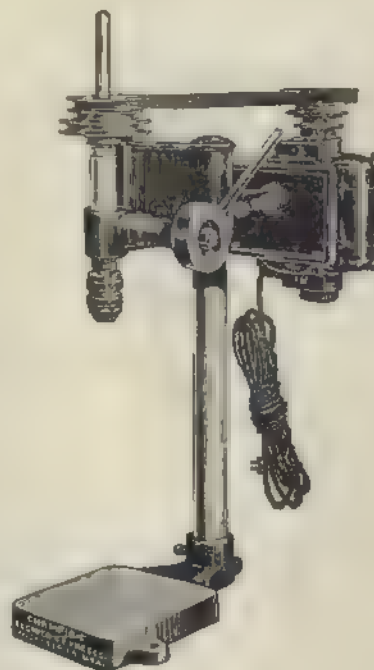

No.	Wt. each	Each
616	115 lbs.	\$100.00

Cast iron frame mounted on a post, fitted steel shaft and spindle. Drill has both hand and adjustable three speed automatic feeds, adjustable slotted table is furnished. Fitted with chuck for $\frac{1}{2}$ -inch shank drills.

Drills to center of circle, in. . . .	14
Spindle diameter, in.	1
Run of table, in.	11 $\frac{1}{2}$
Drills holes up to, in.	1 $\frac{1}{2}$
Run of feed, in.	3 $\frac{1}{2}$
Length overall, in.	38

No.	Wt. each	Each
614-R	95 lbs.	\$88.00

A drill sold at a very low price, yet does a wide range of work within the capacity found on so many higher priced drills. Has a positive grip adjustable $\frac{1}{2}$ inch chuck, three speeds, 3450, 1725, 860. Graduated quill with its drilling head adjustable to any height desired. Motor base adjustable to properly tighten the belt.

Specifications:

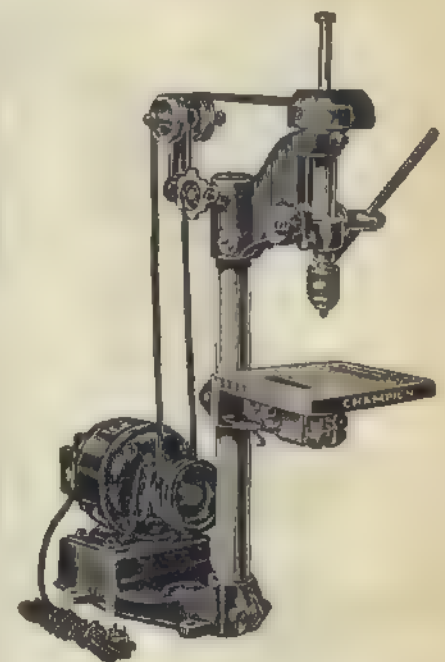

Height overall, 27 inches.
Drills to center of 12-inch circle.
Diameter of spindle, $\frac{1}{2}$ inch.
Greatest distance from base to chuck, 11 $\frac{1}{4}$ inches.
Spindle travel, 2 $\frac{1}{2}$ inches.
Capacity, $\frac{1}{2}$ inch.
Base size, 7x6 inches.
V-belt and motor pulley are included—less motor.

No.	Wt. each	Each
1100	75 lbs.	\$38.00

For motors use $\frac{1}{2}$ horsepower.

See catalogue, page 2281.

All above, one in a crate

A quality drill whose performance compares favorably with drills costing many times more. Table can be tilted both directions, and raised up and down, or swung around. Spindle has six speeds, 1150, 1750, 1600, 1270, 1000, 780 and an automatic depth collar quill is graduated. Drill furnished with positive grip adjustable $\frac{1}{2}$ inch chuck.

Specifications:

Height overall, 32 $\frac{1}{4}$ inches.
Drills to center of 12-inch circle.
Diameter of spindle, $\frac{1}{2}$ inch.
Greatest distance table to chuck, 11 inches.
Greatest distance base to chuck, 14 $\frac{1}{2}$ inches.
Spindle travel, 3 inches.
Capacity, $\frac{1}{2}$ inch.
Table travel, 11 inches.
Table size, 8x8 inches.
V-belt and motor pulley are included—less motor.

No.	Wt. each	Each
1250	100 lbs.	\$42.00

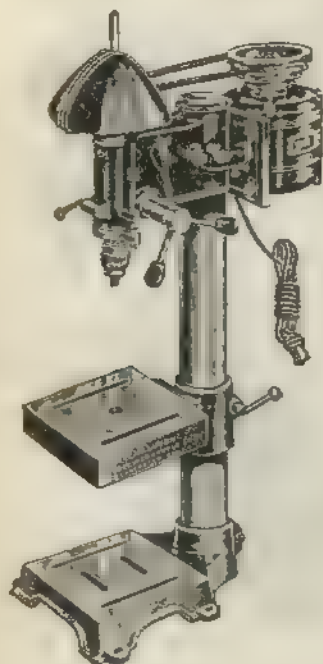

For motors use $\frac{1}{2}$ horsepower.

See catalogue, page 2281.

DRILLS

CHAMPION ELECTRIC BENCH

With geared adjustable chuck, $\frac{1}{2}$ inch capacity. Ball-bearing throughout, for metal or wood work, for drilling, routing, carving; can be used as wood shaper; also as mortiser and sander with extra attachments. Base height, 38 inches. Base, 16x11 inches with column $2\frac{1}{4}$ inches diameter. Drills to center of 16-inch circle. The spindle has up and down travel of 4 inches. The spindle is full ball-bearing. Graduated depth gauge equipped with automatic stop. Table is 10x10 inches and can be tilted to any angle, and locked and levelled in any position. Table and base are slotted for bolting on. Greatest distance from chuck to base is 16 inches. Machined surface of base is 10x10 inches. Spindle is equipped with $\frac{1}{2}$ inch geared three-jaw adjustable chuck. The head of the drill can be reversed and table placed above the reverse spindle, which permits the spindle to project through the center hole in the table, making it a first class shaper. The head of the drill can be swung around giving the user the advantage of a radical drill press.

Capacity, $\frac{1}{2}$ inch in iron.

Spindle speeds, 5100, 2800, 1600, 950 and 450 R.P.M.

V-belt and motor pulley are included—less motor.

CHAMPION ELECTRIC FLOOR

A high-grade full ball-bearing production drill up to 1 inch capacity. A stocky direct V-belt drill, has six speeds, taking a large range of work. Table raises and lowers with crank, all gears being enclosed. Table tilts to any angle up to 45 degrees and can be swung out of the way. Drillhead is clamped to ground column, can be raised or lowered or swung completely around. Table has four slots and base two T-slots. Depth gauge for drilling can be set to drill any depth up to 5 inches. Spindle is graduated in $\frac{1}{8}$ the inch, and is bored for No. 3 Morse Taper Shank Bits.

Specifications: Height, 68 inches; six speeds, 340, 620, 1170, 1750, 2365, 3080 R.P.M. with 1750 R.P.M. motor. Distance spindle to table, 27 inches; distance spindle to base, $43\frac{1}{4}$ inches; distance from column to center spindle, $10\frac{1}{2}$ inches; size of table, $14\frac{1}{2}$ x $12\frac{1}{2}$ inches; table raises and lowers 18 inches. Diameter of spindle, $\frac{1}{2}$ inch. Traverse of spindle, 5 inches. Diameter of column, $3\frac{1}{2}$ inches. Machined base, $15\frac{1}{4}$ x $12\frac{1}{4}$ inches. Base overall, 28 x $16\frac{1}{2}$ inches.

ALICE IN WONDERLAND TEA-TIME* SETS

Decorated to Enchant Little Hostesses

Pretty pastels . . . hand-painted on dishes and "silverware", styled so realistically they look like miniatures of Mommy's set. Best of all, each piece is decorated with fabulous story-book characters—right out of Lewis Carroll's immortal *Alice in Wonderland*. There's the Queen, Mad Hatter, Cheshire Cat, Tweedle-Dee, Dodo, March Hare, and Alice herself. All in washable, durable plastic.

Sets in various sizes—each in colorful box that forms an effective 3-dimensional display. See them in Plasco's Toy Fair Exhibit.

LIONEL ELECTRIC TRAIN ACCESSORIES

ELECTRICALLY OPERATED CARS

For "O" and "O27" Gauge

All Lionel "O27" and "O" gauge rolling stock uncouples at the pressure of a remote control button. Cars are equipped with real railroad-type automatic Knuckle Couplers—a feature exclusive with Lionel.

OPERATING MILK CAR WITH PLATFORM

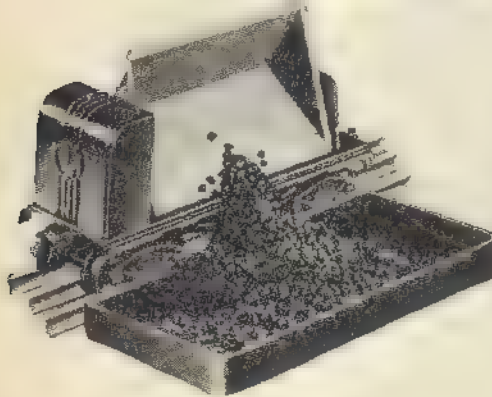

One of the most remarkable automatic cars ever made. Eight miniature milk cans load through a roof hatch and, at each touch of the remote control button door opens and milkman pops out to deliver a milk can to platform. Car is handsomely finished in white enamel and has complete detailing. Platform is of heavy gauge steel.

Each

No. 3462—Car 9 in long \$

OPERATING DUMP CAR

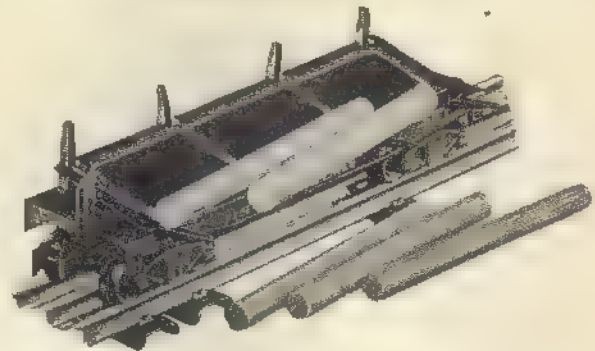

Artificial coal unloads by remote control. Operating mechanism is located in housing at rear of car. Bin and sack of artificial coal included.

Each

No. 3559—Car 7½ in. long \$

OPERATING LUMBER CAR

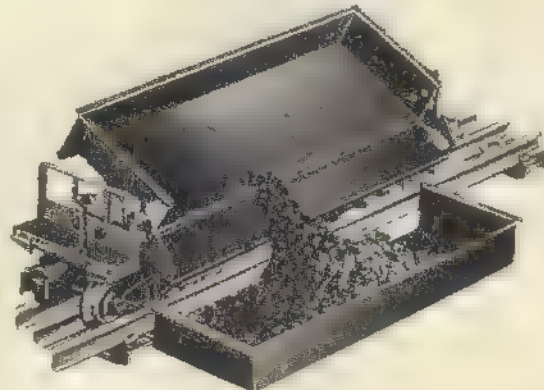

Completely automatic. By remote control uprights swing down and load of lumber tumbles into a bin placed beside the track.

Each

No. 3451—Car 9½ in. long \$

OPERATING COAL OR ORE DUMP CAR

Realistic, super-detailed car which operates at a touch of the remote control button. When panel button is pressed, body tilts, sides lower and cargo of coal or ore slides out into bin.

Each

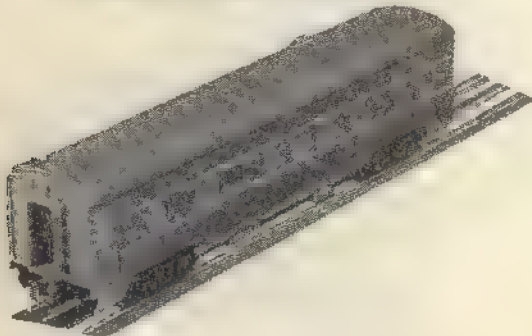

No. 3459—Car 9½ in. long \$

SCALED DETAILED CARS

For "O" and "O27" Gauge

Accurately engineered with precision detailing. Each Car is an exact replica in miniature of the real thing. Each car has the exclusive Lionel Remote Control; real railroad-type Knuckle Couplers. Wheels are solid steel. Truck sides and journal boxes are die cast.

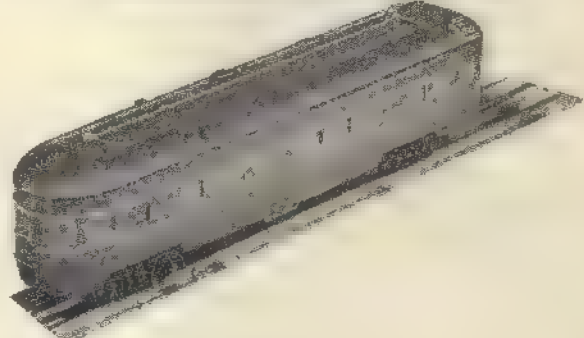

STREAMLINED PULLMAN CAR

Each

No. 2400—Car 11½ in. long \$

STREAMLINED OBSERVATION CAR

Each

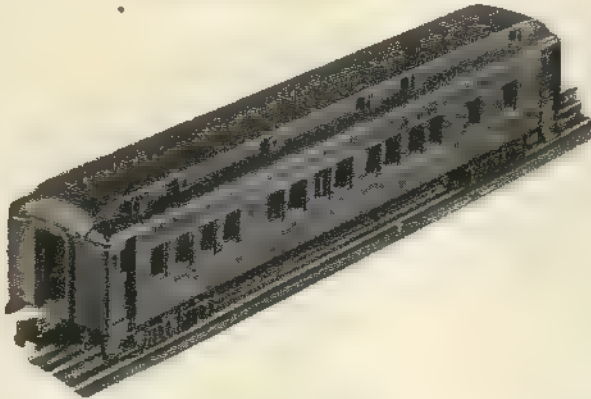

No. 2401—Car 11½ in. long \$

All above, one in a carton.

LIONEL ELECTRIC TRAIN ACCESSORIES

"TRAINMASTER" TRANSFORMERS

Equipped with extraordinary speed control throttles. This multi-control transformer has two built-in reversing buttons and two whistle control buttons, for the simultaneous operation of two trains on the same track layout. Dual speed control throttles enable operator to run two trains at the same time.

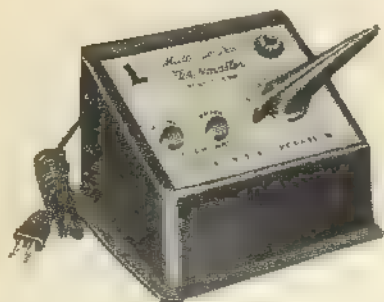

Has four output circuits, each independently controllable, plus a built-in, automatic circuit breaker. Current overload and power-on are indicated by red and green pilot lights. Handsome durable bakelite case.

Each

No. ZW—250 watts, 115 volts A.C.,
50-60 cycles; wt. each 14 lbs. .\$. . . .

No. VW—150 watts, 115 volts A.C.,
50-60 cycles; wt. each 12 lbs.

One in a carton

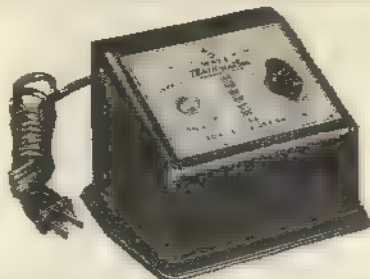

Multi-control transformer with variable voltage speed control throttle. Has built-in whistle control and reversing button. Two variable voltage ranges, one high and one low. Heavy gauge steel case.

Each

No. RW—110 watts, 115 volts A.C.,
60 cycles; wt. each 6 lbs. .\$. . . .

One in a carton

"TRAINMASTER" TRANSFORMERS

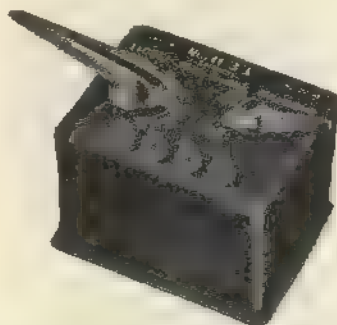

Has two continuously variable voltage ranges from 6 to 16 volts and from 14 to 24 volts. Complete with automatic, built-in circuit breaker and current overload pilot light.

Contained in a heavy gauge welded steel case, attractively finished.

Each

No. A—90 watts, 115 volts A.C.,
60 cycles; wt. each 6 lbs. .\$. . .
One in a carton.

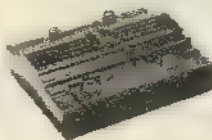

Has speed control throttle for easy operation of train, plus a special two-position spring return lever to enable engineer to blow whistle or reverse locomotive.

Extra sturdy bakelite case.

Each

No. 1033—80 watts, 115 volts A.C.,
60 cycles; wt. each 5 lbs. .\$. . .
One in a carton

WHISTLE CONTROLLERS

For use with whistling locomotives. One operating button blows whistle, another controls locomotive.

Each

No. 167—Can be used on "O" or
"O27" gauge locomotives .\$. . .
One in a carton

SMOKE PELLETS

For use with all smoke locomotives illustrated in this catalog.

Per box

No. SP—50 pellets in a box .\$. . .
Open stock.

LOCOMOTIVE LUBRICANT

Scientifically prepared lubricant designed for Lionel locomotives.

Per tube

No. 925—Liberal size tube .\$. . . .
Open stock.

ILLUMINATED STATION PLATFORMS

A handsomely engineered accessory for intermediate station stops. Fence which divides platform contains four colorful billboards of the kind found in real suburban stations. Two lamps under the roof provide bright illumination.

Each

No. 156—12 in. long, 3 1/4 in. wide;
3 1/4 in. high .\$.

One in a carton.

ILLUMINATED STOP STATIONS

An ingenious device concealed in interior of station automatically stops all trains, detains them for a moment and then speeds them on their way. Detailed construction, inside and outside lighting. Other features include panelled windows, clock, swinging doors and ornamental grille.

Each

No. 115—13 1/2 in. long, 9 1/4 in. wide,
8 1/2 in. high .\$.

One in a carton

LAMP POSTS

Graceful, ornamental design similar to lamp posts used in many large cities. Ivory enamel finish.

Each

No. 58—7 1/2 in. high .\$.

One in a carton.

BOULEVARD LAMPS

Fitted with an opalescent, plastic shade and ornate cap, held by screw-type finial. Shade and cap can be removed for lamp replacement.

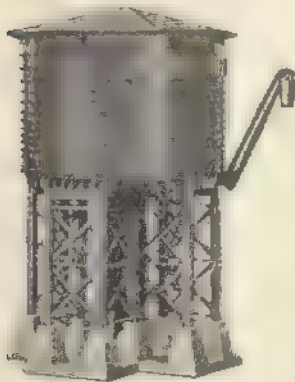

Each

No. 35—6 3/8 in. high .\$.

One in a carton.

LIONEL ELECTRIC TRAIN ACCESSORIES

WATER TOWERS

A striking realistic accessory that is a must in every train layout. Through remote control action, spout lowers over waiting tender. When control button is released spout folds back to vertical position.

No. 30—Translucent polystyrene tank Each
One in a carton. \$.

A detailed copy of the kind seen in real freight yards and terminals. Has life-like spout.

No. 93—8½ in. high Each
One in a carton. \$.

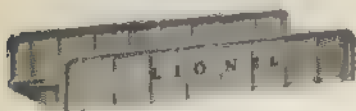

ILLUMINATED TRETTLES

Scaled down replica of the big steel railroad bridges that span real rivers. Heavy rolled steel trestle contains built-in landmark beacon light. Gussated girder steel members are deeply embossed with accurately placed rivet heads.

No. 315—24½ in. long Each
One in a carton. \$.

PLATE GIRDER BRIDGES

Die cast, an exact, precision engineered reproduction of the kind in use on every major railroad. Can be used in multiple with striking effect.

No. 314—Single span, 10 in. long Each
One in a carton. \$.

SEMAPHORES

An interesting device that operates like the real semaphores on a railroad right of-way. When train nears the semaphore blade is in an upright position and the green bull's-eye glows steadily. After last car has passed, blade drops to a horizontal position and red light winks on. Action is wholly automatic. Includes contactor, bulb and connecting wires.

No. 151—Semaphore Each
One in a carton. \$.

AUTOMATIC BLOCK SIGNALS

An amazing, fully automatic accessory that enables two trains to run at the same time on the same track without danger of accident. When first train enters safety block, signal flashes red, slowing or halting train that follows.

Contactor, bulbs, Lock-on, fibre pins and connecting wires included.

No. 153—Automatic Block Signal Each
One in a carton. \$.

CROSSING GATES

When train approaches crossing, red warning light flashes on and gate lowers automatically, shutting off highway traffic. When last car passes, light is extinguished and the gate rises. Contactor, bulb and connecting wires are included.

No. 152—10½ in. long Each
One in a carton. \$.

FLASHING HIGHWAY SIGNALS

A realistic accessory, accurately modeled after real highway signals. Traffic signal flashes alternate red warning lights when train approaches. After train has gone by flashing ceases.

Bulbs, contactor and connecting wires included.

No. 154—9 in. high Each

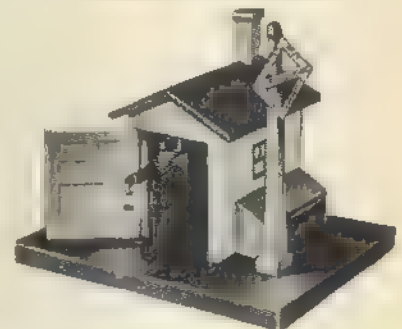

OPERATING WATCHMEN

When train approaches this tireless, grade crossing watchman waves his red flag up and down warning motorists. A clever fully automatic accessory. Stands 7 in. high. Contactor and wires included.

No. 1045—7 in. high Each

CROSSING GATEMEN

A remarkable, highly ingenious accessory. When train approaches, door opens and gateman rushes out, swinging his red lantern. After train has passed, gateman returns to his shack and door shuts behind him. Action is automatic. Complete with bulb, contactor and connecting wires.

No. 45—Crossing Gateman Each
All above, one in a carton. \$.

YARD SETS

Realistic set of signs found on real railroad right-of-ways.

Enameled white with black lettering.

No. 308—5-piece set Per set
One set in a box \$.

LIONEL ELECTRIC TRAIN ACCESSORIES

ELECTRIC CONVEYOR LOG LOADERS

One of the finest Lionel accessories, completely automatic in operation and of extra heavy all steel construction.

Logs are unloaded into bin and carried to upper platform on a new-type endless belt where they are emptied by remote control into the lumber car standing in readiness.

Entire operation completed on same track—needs for sidings eliminated.

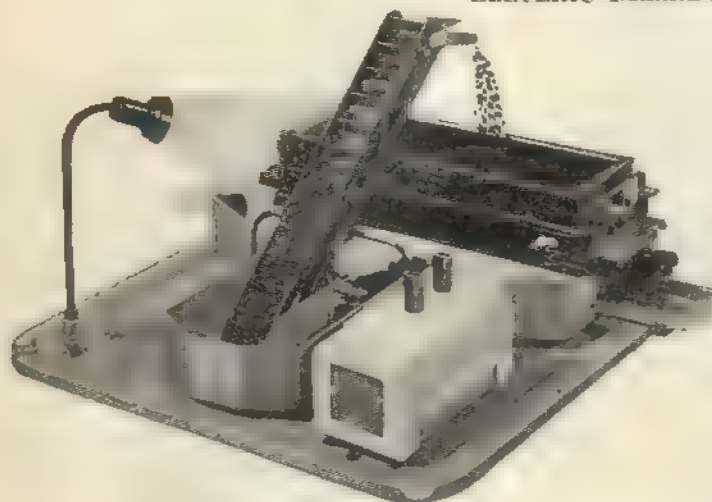

Conveyor belt has automatic take-up keeping taut at all times. Illuminated red-green signal lamp.

No. 364—Conveyor Lumber Loader

One in a carton.

Each
\$

ELECTRIC DIESEL-TYPE COAL LOADERS

One of the most unusual accessories ever created. Coal can be loaded and unloaded from same track by remote control. Switches, siding, extra track, etc., are unnecessary.

Powerful floodlight provides illumination. When coal is dumped from car, it is fed to conveyor by means of an ingenious vibrating motion. Rubber buckets on an all rubber, endless belt pick up coal and carry it to the top from which point it tips into the waiting car.

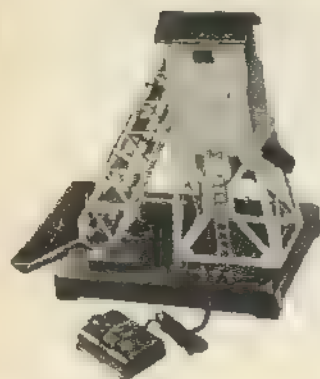

Motor is encased in accurately designed Diesel-type housing. Heavy cast base.

No. 397—Diesel-type Coal Loader

One in a carton.

Each
\$

ELECTRIC COAL ELEVATORS

An exciting accessory which permits coal cars to be loaded by remote control. A series of buckets on an endless chain scoops up artificial coal deposited in the well. Automatically, the chain conveyor lifts the tiny baskets to the top of the bunker where their contents are tipped into the loft. Then, at the touch of a button, the gate opens and coal pours down the chute into the waiting car.

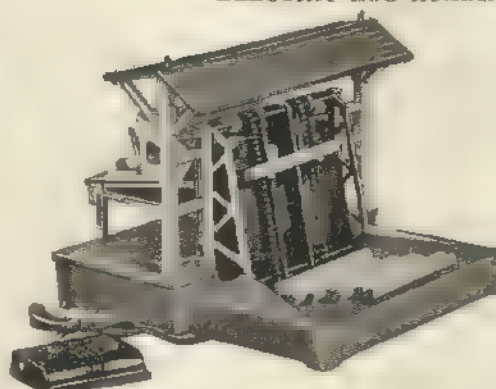

Remote control unit provides a knob to operate the endless chain and a push button to open the chute gate. Artificial coal included. Height 12 inches.

No. 97—Electric Coal Elevator

One in a carton.

Each
\$

ELECTRIC LOG LOADERS

One of the most exciting Lionel accessories ever created, this automatic Log Loader will make your miniature freight yards a beehive of activity. After lumber cars have unloaded their logs into the trough, hooks on a revolving chain carry logs up to the elevated loading platform. When control but-

ton is pressed, lumber tumbles into a car which is standing in readiness on the siding.

With each Log Loader, the control unit contains a knob to operate the electric motor that revolves the endless chain, and a button, to release logs from loading platform. Action is simple and realistic.

Load of logs, plus necessary connecting wire included. Dimensions: 9 in. high, 11 $\frac{1}{4}$ in. wide and 10 $\frac{3}{4}$ in. long.

No. 164—Electric Log Loader

One in a carton.

Each
\$

NOTE

All Accessories Shown On This Page will Operate Equally Well With "O27" or "O" Gauge Trains

LIONEL ELECTRIC TRAIN ACCESSORIES

BASCUL BRIDGES

One of the most popular accessories ever manufactured. When remote control button is pressed, the bridge slowly lifts open halting the approaching train. After a few seconds, bridge lowers and train is automatically started up to continue its trip.

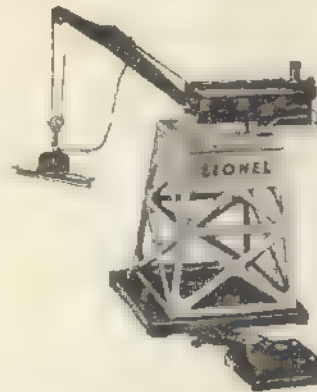

Bridge is constructed of heavy gauge steel with deeply embossed rivets, plates and other structural details. Motor is enclosed in bridge tender's shell. A steel aligning frame is provided in order that bridge can be used on even floor level without the need of grade approach and allows bridge to span actual model gulf or chasm.

Can be used with either "21" or "O" gauge trains. Dimensions: 21½ in. long, 9¼ in. enclosed

No. 313—Bascule Bridge Each \$..

One in a carton.

TRIPLE-ACTION MAGNET CRANES

Unlike any other train accessory ever made, this Lionel model will perform all of the operations of a real crane—at a touch of the buttons. A remote control motor operates a winch to raise or lower the block and tackle. Another action revolves the derrick, in either direction, in a full 360 degree circle. When magnet is energized, steel scrap can be picked up from pile and unloaded into a waiting car by shutting off the current. Wheel at rear of illuminated cab raises or lowers the boom. Cab is superdetailed.

Height of crane is 10 inches. Base measures 6x6½ inches. Bag of steel scrap and receiving bin included.

No. 182—Triple-Action Magnet Crane Each \$..

One in a carton.

LIONEL CONSTRUCTION SETS

The most unusual advancing construction set ever offered. Completely different and far ahead of the times. Uses building techniques and methods just like those employed in industry.

Easy to use rivets and bolts are the secret. Awkward, cumbersome nuts and bolts are entirely eliminated. The all metal, square tubing members can be put together at different angles in an almost endless variety of lengths. You can make realistic bridges, drill presses and dump trucks, hoists, gantry cranes and ferris wheels that actually operate.

Includes sufficient building material to make more than 25 complete construction models including a fire tower, hoists, playground slide, gravel sifter, road block, etc.

Only tool necessary for assembling items is a screwdriver packed with set—used for tightening screws on pulleys

No. 121—Complete with illustrated construction manual; wt. per set 2½ lbs. Per set \$..

One set in a carton.

Handsome sturdily boxed set containing enough pieces to build dozens of complete models many of which operate by means of the powerful Lionel Electric Motor included with set.

Tray supports allow easy access to various parts. Attractive box has snap catch and convenient carrying handle.

No. 232—Complete with illustrated construction manual; wt. per set 5½ lbs. Per set \$..

One set in a carton.

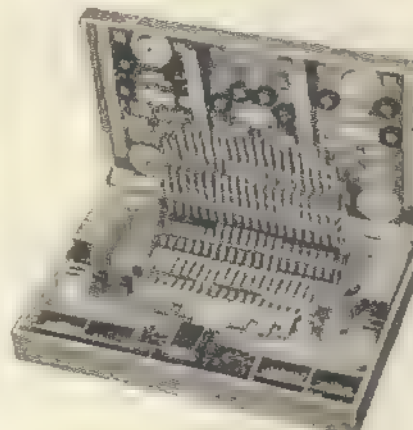

By far the finest set in its price range. Box and packing inserts are a marvel of design and engineering.

Builds Gantry crane, bascule bridge, airplane ride, derrick, etc. Electric motor included with set has four speeds forward and three in reverse and contains five shafts which revolve at speeds ranging between 50 and 3,000 R.P.M. Motor can be used to put many of the models into realistic action.

No. 343—Complete with illustrated construction manual; wt. per set 7½ lbs. Per set \$..

One set in a carton.

A complete building unit, masterfully packed in a highly attractive oak box. Clever step display for tubing members pops up when lid is raised.

Scores of models can be made with this set. Electric motor with set has four forward and three reverse speeds and shaft speeds which range between 50 and 3,000 R.P.M. Motor also has built-in transformer which can be used to illuminate models

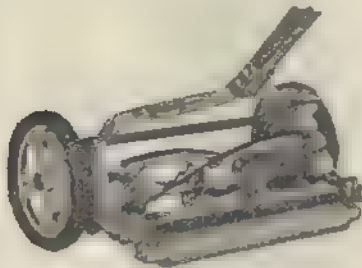

No. 454—Complete with illustrated construction manual; wt. per set 9½ lbs. Per set \$..

One set in a carton.

LAWN MOWERS

PENNSYLVANIA JUNIOR—HIGH WHEEL

BALL BEARING—FIVE BLADES

RUBBER TIRED

Pennsylvania Junior lawn mowers have a train of three cut gears on each side in dust proof housing. In each wheel are two hardened steel pawls, extra wide, preventing any lost motion. The cylinder has five crucible steel blades, extra wide double riveted to unbreakable malleable iron supports and fitted with Braun bearings as illustrated on preceding page. The flipped edge stationary knife is crucible steel, positively self-sharpening, until worn out. All parts malleable and cast, machined on jigs to insure accurate fitting. Staytite handle with adjustable steel clamps.

No.	Width cut	Diam. wheels	Wt. each	Each
PJ-17R	17 in.	10 in.	52 lbs.	\$47.20

PENNSYLVANIA JUNIOR—LOW WHEEL

BALL BEARING—FIVE BLADES

RUBBER TIRED

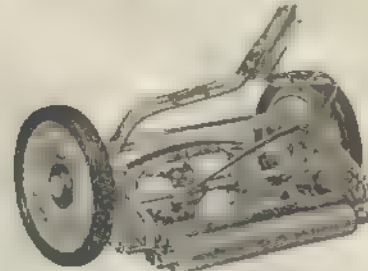

Same as No. PJ-17R but with 8-inch wheel.

No.	Width cut	Diam. wheels	Wt. each	Each
PJ-18R	18 in.	8 in.	44 lbs.	\$47.20

All above packed one in a carton, handle separate

PENNSYLVANIA METEOR

BALL BEARING—FIVE BLADES

RUBBER TIRED

The new Pennsylvania "Meteor," Aluminum mower, is built for quietness in action, easy pushing, and fast cutting.

The wheels, side plates, and pinions are tough aluminum alloy, and the back for lower knife is iron, to give weight where required.

The five crucible analysis tool steel blades are oil hardened and tempered, and extra wide. Raised edge lower blade is of hardened steel.

Ball bearings run on hardened steel cones and cups. Eccentric screw adjustment has positive lock.

Stub tooth gear of special (long wearing) aluminum alloy in each wheel. Steel wheel axles screwed and bolted to side plate. Steel bushing in aluminum wheels. Lower blade adjusted by opposing set screws for positive precision adjustment.

The wheel axle is hollow and packed with grease. Two small holes permit it to ooze out and keep the bearing lubricated throughout the season.

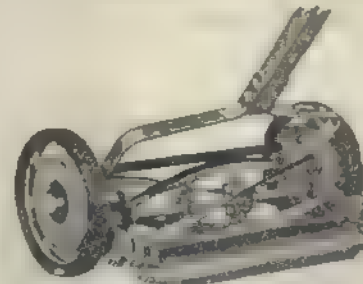

The roller brackets, also the cylinder bearings are packed with grease, but provision is made to further lubricate them when necessary.

The solid rubber tires are securely held to the wheels.

No.	Width cut	Diam. wheels	Wt. each	Each
M-16-5	16 in.	10 in.	36 lbs.	\$50.50
M-19-3	19 in.	10 in.	39 lbs.	58.20
Same as above, but with seven blades				
No.	Width cut	Diam. wheels	Wt. each	Each
M-16-7	16 in.	10 in.	38 lbs.	\$54.20

GREAT AMERICAN

BALL BEARING—FIVE BLADES

RUBBER TIRED

Bottom knife self-sharpening, raised edge crucible tool steel. Hardened steel cup and cones. Eccentric screw adjustment with positive lock. Pinions on cylinder operating with internal gear on each wheel. Parts malleable and cast, machined on jigs to insure accuracy. Height of cut $\frac{1}{2}$ to $1\frac{1}{2}$ inches. Will cut grass 6 inches high. Staytite hardwood handle. Adjustable steel clamps on cross-bar. Roller bracket hooks for grass catcher. All parts interchangeable and guaranteed against defects.

Blades—Crucible tool steel oil hardened and tempered.

Ball Bearings—Braun self-aligning.

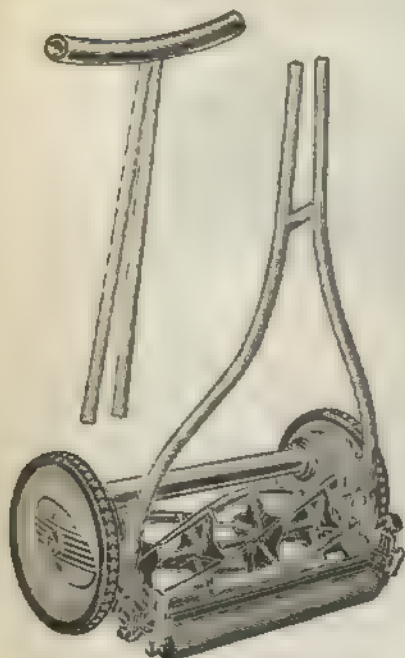

Finish—Aluminum frame, gold cylinder, gold wheels, blue and red trim.

No.	Width cut	Diam. wheels	Wt. each	Each
GA-15R	15 in.	10 in.	43 lbs.	\$41.00
GA-17R	17 in.	10 in.	45 lbs.	46.00
GA-19R	19 in.	10 in.	47 lbs.	51.00

DEPT. 2

LAWN MOWERS

CLEMSON PRECISION—FIVE BLADE

Embodies many unique features, is made of materials new to usual lawn mower construction. Beautifully finished in lasting chrome plate and baked-on enamel. Roller, ball and oilless bearings with no oil holes or grease cups and no lubrication required during its life. One piece indestructible metal handle, easily detached. All adjustments for proper operation by hand without need of wrenches or other tools

RUBBER TIRED

No.	Width cut	Diam. wheels	Wt. each	Each
E-17	17 in.	10 in.	33 lbs.	\$46.00

Penna-Lawn	16 in.	10 in.	46 lbs.	\$31.00

One in a carton; handle, loose

EXCELLO—FIVE BLADE

RUBBER TIRED

Solid steel side plates and grass catcher hooks. Automatic spring tension. Adjustment on reel bearing. Five high speed crucible blades mounted on ball bearing reel. One piece cutter bar with crucible blade knife. One piece tubular steel handle.

No.	Width cut	Diam. wheels	Wt. each	Each
Excello	16 in.	10 in.	37 lbs.	\$29.30

Packed in two cartons

LAWN SWEEP
EXCELLO

Sweeps leaves, grass clippings, etc., into heavy canvas bag with swift easy action. Lightweight, non-injurious to finest lawns. Sturdy aluminum construction.

Specifications:

Five individual sturdy bassine fibre brushes, 3 1/2-inch length mounted on 3/4-inch cold rolled steel shaft.

All castings of special aluminum alloy which is light, strong, durable and rust proof.

All gears fully enclosed.

Semi-pneumatic rubber tires eliminate wheel marked lawns.

Entire brush unit mounted on self-adjusting chrome steel ball bearings.

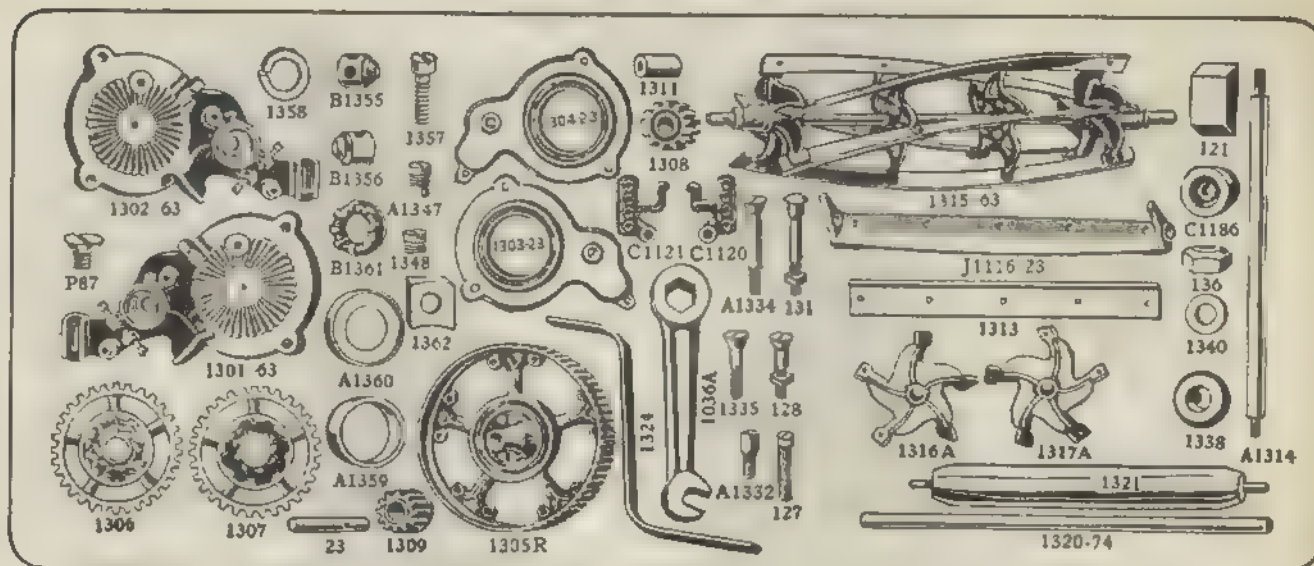

Aluminum alloy caster wheels provide ease of operation.

No.	Width	Wt. each	Each
LS	24 in.	40 lbs.	\$43.00

Packed in two cartons

LAWN MOWER REPAIR PARTS

PENNSYLVANIA JUNIOR, HIGH WHEEL

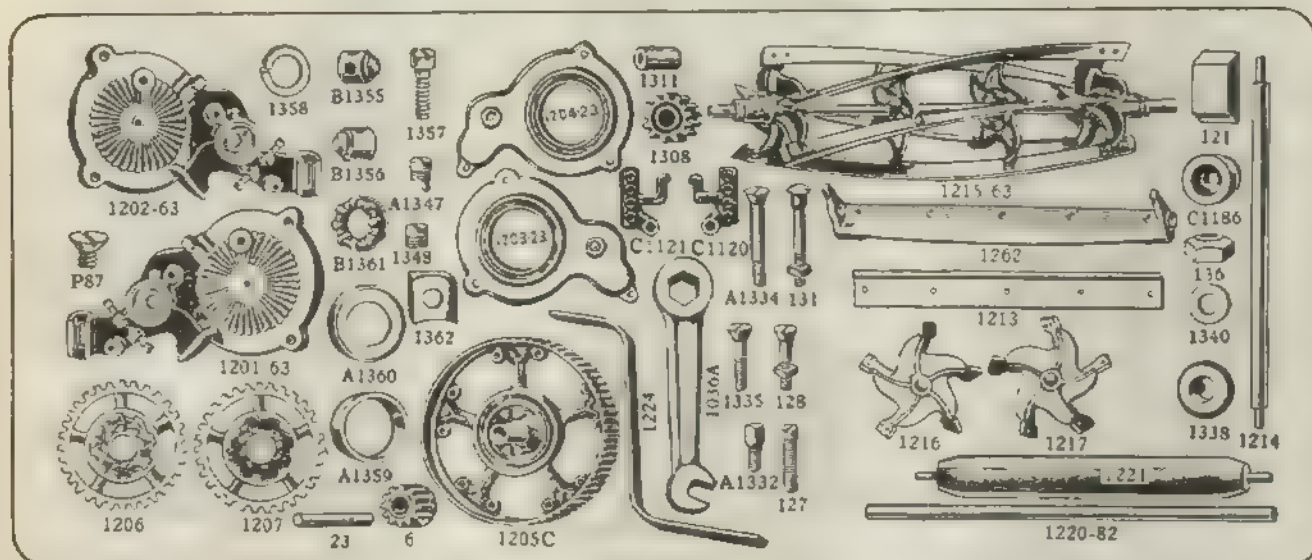

DIRECTIONS FOR ORDERING The right or left side of a lawn mower is determined by standing in back of the machine, as when in use. Give number with description of part wanted. Where possible, the number is cast on the part, otherwise refer to the illustrations. Be sure to state serial letter and number appearing on Left or Right Hand Side Plate, and the size of the mower (width of cut) which will be found stamped on the cast back. Parts needed will be found in the illustrations above, description in table below. Part numbers are listed numerically in the table.

No.	Article	Ship. wt.	Each	No.	Article	Ship. wt.	Each

LAWN TRIMMER REPAIR PARTS

PENNSYLVANIA

DIRECTIONS FOR ORDERING The right or left side of a lawn mower is determined by standing in back of the machine, as when in use. Give number, with description of part. Where possible, the number is cast on the part, otherwise refer to the illustrations. Always give name of machine and width of cut. The size is stamped on the lower bar to which the knife is attached. Parts needed will be found in the illustrations above, description in table below. Part numbers are listed numerically in the table.

No.	Article	Sup. wt.	Each	No.	Article	Ship. wt.	Each		
E-077	Handle Stick	2	bs	\$0.95	CK-776	Cone, both alike, $\frac{3}{8}$ Hole	4	oz.	\$0.50

Factory Lists

DEPT. 2

WOOD WORKERS VISES

STANLEY

Jaws machined parallel to hold work firmly, horizontally as well as vertically. Steel parts are bright and rest of tool is japanned.

No.	Size Jaws	Jaws open	Wt. each	Each
700	4 5/8 in.	4 in.	5 1/2 lbs.	\$11.00

PICTURE FRAMERS' TOOLS

STANLEY

Mitre Vise

Clamps any molding up to 4 inches wide and joins any frame larger than 3 1/2 x 3 1/2 inches. The universal base is made so that the vise can be tilted. Frame is made of gray iron finished in blue enamel with orange trimmings.

No.	Wt. each	Each
400	20 lbs.	\$23.00

BENCH VISES

STANLEY

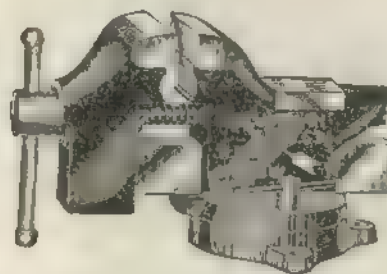

The screw (body, head and collar) is turned from one solid piece of cold rolled steel and has a square, lathe cut thread. The steel jaws are hardened and all jaws are ground to meet square and true.

No.	Size Jaws	Jaws open	Wt. each	Each
761	1 1/2 in.	1 1/2 in.	3 1/4 lbs.	\$ 8.90
763	2 in.	2 in.	4 lbs.	10.00
765	2 1/2 in.	2 1/2 in.	6 lbs.	11.50
766	3 in.	3 in.	10 lbs.	15.30

GARAGE VISES

COLUMBIAN RED ARROW

Sturdy vise for the homeshop. Built in pipe jaws and anvil, locking device for swivel base.

No.	Size Jaws	Jaws open	Wt. each	Each
03 1/2	3 1/2 in.	3 1/2 in.	13 lbs.	\$8.00

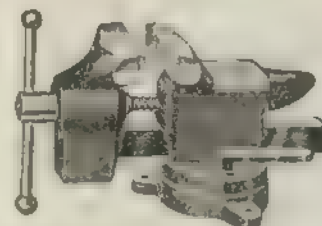

LITTLESTOWN

Well constructed vise for garage and household use. Steel inserted jaws. Swivel base.

No.	Size Jaws	Jaws open	Wt. each	Each
112	3 1/4 in.	3 in.	12 lbs.	\$6.80

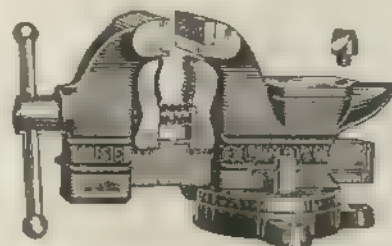

LITTLESTOWN

Garage and household vise with removable cast iron pipe jaws.

No.	Size Jaws	Jaws open	Wt. each	Each
900	3 in.	3 in.	10 lbs.	\$6.40

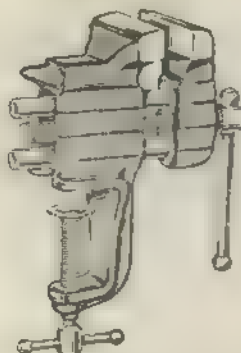

COLUMBIAN

Tempered steel cut-off tool, heavy steel sliding bar, swivel base. Replaceable heat treated, steel jaw faces. Chrome-nickel alloy replaceable pipe jaws. Finished in red enamel, with polished metal jaws and anvil.

No.	Size Jaws	Jaws open	Wt. each	Each
C43	3 in.	3 1/4 in.	14 lbs.	\$10.20
C43 1/2	3 1/2 in.	4 in.	17 lbs.	12.40
C44	4 in.	4 1/2 in.	30 lbs.	17.60

DEFIANCE

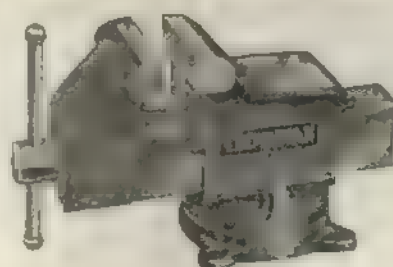

Machine cut steel screw. Body and head red finish.

No.	Size Jaws	Jaws open	Wt. each	Each
1207	1 1/2 in.	2 in.	2 lbs.	\$3.70
1209	2 1/2 in.	2 in.	3 1/2 lbs.	4.50

All above, one in a carton

COLUMBIAN WELDED STEEL

Engineered for strength, welded steel front and back jaws. Heat treated steel jaw faces. Replaceable, interlocking pipe jaws. Forged steel screw and handle, malleable iron nut replaceable. Steel swivel base.

No.	Size Jaws	Jaws open	Wt. each	Each
804	4 in.	5 in.	25 lbs.	\$22.90

REED VISES

The body and sliding jaw for Reed vises are made of a mixture of steel and iron which gives the utmost rigidity, strength and durability. All parts for Reed vises are carefully machined, accurately hardened and tempered under electric heat control. There are no weak spots in Reed vises.

MACHINISTS' VISES

STATIONARY JAW AND BASE

No.	Size jaws	Jaws open	Wt. each	Each
R108	3 in.	4 in.	22 lbs.	\$ 32.00
R108 1/2	3 1/2 in.	5 in.	30 lbs.	38.00
R104	4 in.	6 in.	45 lbs.	40.80
R104 1/2	4 1/2 in.	7 in.	60 lbs.	49.60
R105	5 in.	8 in.	77 lbs.	64.00
R106	6 in.	10 in.	139 lbs.	124.80
R108	8 in.	12 in.	247 lbs.	240.00

STATIONARY JAW—SWIVEL BASE

No.	Size jaws	Jaws open	Wt. each	Each
R203	2 in.	4 in.	27 lbs.	\$ 41.80
R203 1/2	3 1/2 in.	5 in.	38 lbs.	48.00
R204	4 in.	6 in.	51 lbs.	54.40
R204 1/2	4 1/2 in.	8 in.	66 lbs.	64.00
R205	5 in.	8 in.	89 lbs.	96.00
R206	6 in.	10 in.	153 lbs.	166.00
R208	8 in.	12 in.	278 lbs.	318.00

SWIVEL JAW—SWIVEL BASE

The swivel jaw has a taper locking pin, locking the jaw as rigidly in place as in the stationary jaw type of vise.

No.	Size jaws	Jaws open	Wt. each	Each
R403 1/2	3 1/2 in.	4 in.	43 lbs.	\$ 64.00
R404 1/2	4 1/2 in.	5 1/2 in.	75 lbs.	89.60
R406	6 in.	9 in.	164 lbs.	182.40

All above, loose

COMBINATION VISES

Jaws made to withstand strain of pipe work. Grips of hardened steel. Can easily be replaced when necessary. Grips do not project beyond face of vise jaws.

No.	Size jaws	Holds pipe, ins.	Wt. each	Each
R1C	3 1/4	1/2 to 1 1/2	54 lbs.	\$ 56.00
R2C	4 1/2	1/2 to 3 1/2	83 lbs.	76.80
R3C	5	1/2 to 4 1/2	120 lbs.	121.60
R4C	6	1/2 to 6	185 lbs.	192.00

Loose

WOODWORKERS' VISE

STATIONARY JAW AND SWIVEL BASE

Extra long beam and high, rigid smooth-faced parallel jaws.

No.	Size jaws	Jaws open	Wt. each	Each
R224 1/2	4 1/2 in.	11 in.	78 lbs.	\$72.00

Loose

DRILL VISES

YANKEE

For use on Yankee bench drills, or separately, attached to bench. Removable case hardened steel swivel jaw.

No.	Size jaws	Jaws open	Wt. each	Each
090	2 1/2 in.	3 in.	4 lbs.	\$10.00

One in a carton

DRILL VISES

YANKEE

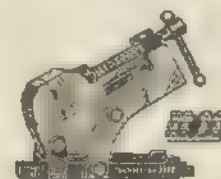

Mounted on a swivel base for use on bench. Hardened steel block with V-shaped grooves of various sizes for holding round or irregular shapes.

No.	Size jaws	Jaws open	Wt. each	Each
1993	2 1/2 in.	3 1/2 in.	13 1/2 lbs.	\$25.20

Same vise as No. 1993 without base.

No.	Size jaws	Jaws open	Wt. each	Each
993	2 1/2 in.	3 1/2 in.	5 lbs.	\$18.00

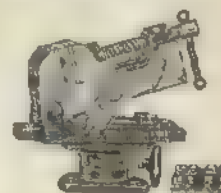

YANKEE ANGLE VISE WITHOUT SWIVEL BASE

Accurately machined for angle work, drilling, milling, sawing, grinding, and filing. Grooved V-block for holding rounds supplied with each vise.

No.	Size jaws	Jaws open	Wt. each	Each
3992	2 in.	1 1/2 in.	5 1/2 lbs.	\$16.00
3993	2 1/2 in.	3 in.	12 1/2 lbs.	23.50

YANKEE ANGLE VISE WITH SWIVEL BASE

No.	Size jaws	Jaws open	Wt. each	Each
4992	2 in.	1 1/2 in.	7 1/2 lbs.	\$21.00
4993	2 1/2 in.	3 in.	17 1/2 lbs.	29.00

All above, one in a carton

CHAIN PIPE VISES WILLIAMS'—"VULCAN"

Vise can be readily and firmly attached to bench, post, or other support without the use of bolts, or screws. Drop forged jaws are saw-tempered for file-sharpening. Chains are of superior quality as those in Vulcan Tongs. Jaws, chain, nut and handle are interchangeable with similar parts of Vulcan Vise No. 1.

No.	Pipe size	Wt each	Each
21	1/4 to 2 in.	5 1/2 lbs.	\$12.40

WILLIAMS'—"VULCAN SUPERIOR"

Overhead adjustment, the handle is on top for easy operation. Reversible jaws, drop-forged base, jaws, handle and chain-arm. Chains are of the same quality as those in Vulcan Chain Pipe Tongs.

No.	Pipe size	Wt each	Each
11	1/4 to 2 1/2 in.	7 lbs.	\$13.00

WILLIAMS'—"VULCAN"

Made from wrought steel, drop-forged jaws, tempered.

No.	Pipe size	Wt each	Each
1-V	1/4 to 2 in.	4 lbs.	\$11.20
2-V	1/4 to 4 in.	10 lbs.	24.00
3-V	1/4 to 6 in.	18 lbs.	43.20

All above, one in a carton

PIPE VISES RIDGID—BENCH CHAIN

Pipe support. 1 inch pipe bender. Equipped with Lon-Grip jaws, small pipe cannot be pulled between jaws.

No.	Pipe size	Wt. each	Each
BC-2	1/4 to 2 in.	5 1/2 lbs.	\$11.00
BC-4	1/4 to 4 in.	13 1/2 lbs.	22.20
BC-6	1/4 to 6 in.	20 1/4 lbs.	39.80
BC-8	1/4 to 8 in.	33 1/2 lbs.	53.20

RIDGID—BENCH YOKE

With special malleable frames and hardened tool-steel jaws. Equipped with pipe support and practical pipe bender, except No. BY-1 1/4-inch. Lon-Grip jaws in 2-inch to 4-inch sizes.

No.	Pipe size	Wt. each	Each
BY-1 1/4	1/4 to 1 1/4 in.	3 1/2 lbs.	\$ 9.40
BY-2	1/4 to 2 in.	11 1/2 lbs.	14.10
BY-2 1/2	1/4 to 2 1/2 in.	12 lbs.	16.80
BY-3	1/4 to 3 in.	16 lbs.	22.40
BY-4	1/4 to 4 in.	24 lbs.	30.60
BY-5	1/4 to 5 in.	30 lbs.	34.80
BY-6	1/4 to 6 in.	50 1/2 lbs.	78.30

RIDGID—KIT YOKE

Handy portable yoke bench vise, same construction as bench yoke vise. Has vise screw clamp.

No.	Pipe size	Wt each	Each
KY-2	1/4 to 2 in.	17 1/2 lbs.	\$17.60
KY-2 1/2	1/4 to 2 1/2 in.	18 1/2 lbs.	22.80

All above, loose

REED—LONG JAW

The long jaws eliminate the tendency to mar, bend or crush any kind of pipe. The lower jaws are reversible, doubling their period of efficient service. It is equipped with a strong and convenient pipe bender.

No.	Pipe size	Wt each	Each
00-R	1/4 to 1 1/2 in.	6 lbs.	\$12.00
0-R	1/4 to 2 in.	8 lbs.	14.20

2-R	1/4 to 3 1/2 in.	18 lbs.	31.30
3-R	1/4 to 4 1/2 in.	27 lbs.	35.20

Loose

REED—LARGE CAPACITY

The pipe jaws are cut from fine tool steel bars. The base has a flat bottom and no apron, so it can be mounted on any plane surface.

No.	Pipe size	Wt. each	Each
04-R	1/4 to 6 in.	49 lbs.	\$79.00

Loose

TOLEDO OPEN SIDE

A pipe vise which eliminates the need of unlatching and tipping back a yoke, for long lengths of pipe. The frame and all parts of this vise are extra heavy.

No.	Pipe size	Wt. each	Each
00-T	1/4 to 1 1/2 in.	6 1/2 lbs.	\$14.00
0-T	1/4 to 2 1/2 in.	12 lbs.	18.00
3-T	1/4 to 4 1/2 in.	27 lbs.	34.00

One in a carton

POWER VISE STAND OSTER

Drives Pipe Tools Up To 4-Inch Capacity

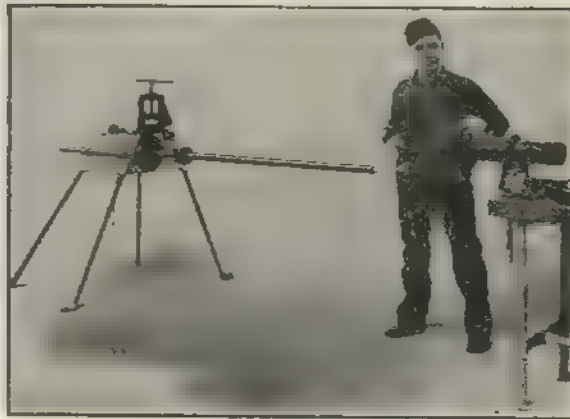

Illustration shows UNIVERSAL DRIVE SHAFT

With this new POWER VISE STAND, your regular die-stocks, cutters and reamers are converted to Power Tools. At the lowest price of any pipe machine in the history of the industry this new machine enables you to thread, cut-off, ream and turn up fittings on all sizes of pipe up to 2 inches, at the snap of a switch. With a special, universal drive shaft with which the machine can be hooked up to geared die-stocks and cutters, its range is increased to 4-inch pipe.

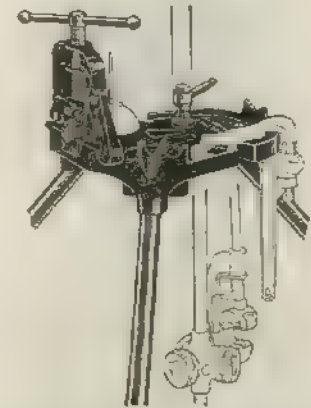

The extreme portability of this POWER VISE STAND makes it ideal for use out on the job as well as in the pipe shop. Width, 20 inches, height, 40 inches. Weight only 140 lbs. Machine furnished without 1-inch pipe legs, hand vise or pipe tools. Feet for front legs and universal, reversible motor and switch are furnished as standard equipment.

No.	Weight each	Each
422	140 lbs.....	\$320.00

Universal drive shafts for above to connect to large size stocks and dies EXTRA.

STAR HAY CARRIERS

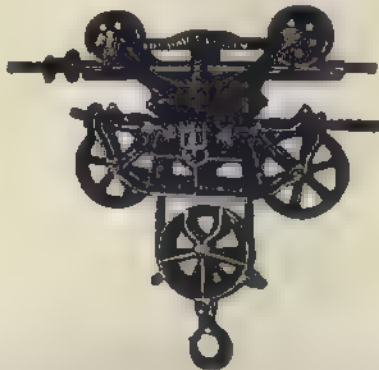

Star Hay Carriers are adjustable in width to fit any make of steel track. Carriers come equipped with trip blocks for use on Star Double Angle Track. Be sure to specify make of track when ordering carriers to work on track other than Star. We can supply trip blocks for most any make of track.

Style—Reversible, for Star double angle steel track.
 Wheel Base—15 1/2 inches, center to center.
 Tracker Wheels—3 inches in diameter.
 Sheaves—7 inches in diameter, grooved for both 3/4-inch rope and 1/2-inch wire cable.
 Fork Pulley—Improved design, fitted with self-closing fork hook.
 Trip Block—Made of best malleable iron.
 Rope—Either 3/4-inch or 1/2-inch Manila rope or 3/4-inch wire cable.
 Finish—Gray enamel.

No	Wt each	Each
493-A	50 lbs	\$45.00

FOR CABLE TRACK

Similar to the No. 493 Carrier, with the exception that this carrier is designed to operate on 3/4-inch cable, only. The trip block swings loose on the cable so that by gravity its position under the cable is maintained under all conditions. The wheel base is 15 1/2 inches and the large rope sheaves are 7 inches.

Finish—Gray enamel.

No	Wt each	Each
4100	54 lbs.	\$48.00

FORK OR LIFTING PULLEYS

	Each
7-inch roller bearing as furnished with Carriers Nos. 493 and 496	\$6.50
5-inch as furnished with Carriers Nos. 564 and 503	5.00

Style—Reversible, for Star double angle steel track.
 Wheel Base—15 1/2 inches, center to center, with tracker wheels 3 inches in diameter.
 Sheaves—Four-inch diameter. Revolve on 3/4-inch turned steel axes.
 Fork Pulley—Latest design, with self-closing fork hook.
 Trip Block—Made of best malleable iron.
 Rope—For use with 3/4 or 1/2-inch Manila.
 Finish—Gray enamel, trimmed in blue.

No	Wt. each	Each
564-A	35 lbs	\$37.00

FOR WOOD TRACK

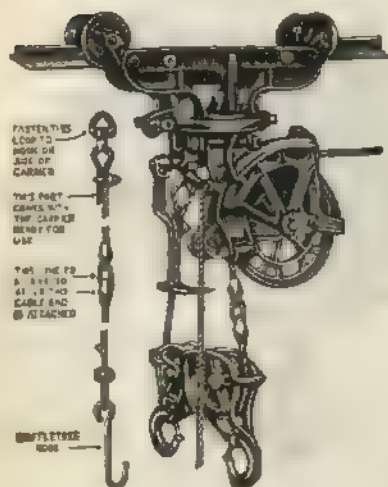

Style—Reversible.
 Wheel Base—12 inches, center to center.
 Tracker Wheels—3 inches in diameter.
 Sheaves—4 inches in diameter.
 Fork Pulley—Latest design, supplied with self-closing fork hooks for holding fork.
 Trip Block—Made of best malleable iron.
 Rope—For use with 3/4 or 1/2-inch Manila.
 Finish—Gray enamel; trimmed in blue.

No	Wt. each	Each
503	34 lbs.	\$39.20

All above, loose

DEPT. 2

STAR HAY CARRIERS, TRACK AND FIXTURES

SLING CARRIER
FOR STEEL TRACK

Giant reversible roller bearing sling hay carrier. Best grade malleable iron frame. Wheel base, 17 1/2 inches center to center, with 3-inch tracker wheels and with lathe turned, cold rolled steel axle. Sheave is 9 1/2-inch diameter with six long cold rolled bearings contained in a housing. Malleable iron trip block. Trip rope releases carrier from trip and locks load suspended at any desired height. Long neck roller bearing sling pulleys with automatic self-closing hook.

No.	Wt each	Each
1134	68 lbs.	\$34.00

DOUBLE ANGLE STEEL TRACK

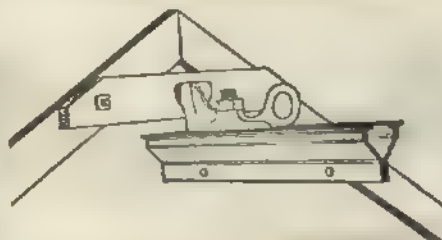

Nos. 581—Track and 583 Hangers

Double angle steel hay carrier track is built of the same material as is used in the construction of railroad rails. The two, inch by inch steel angles, separated by iron spacers, are riveted firmly together. The heavy rivets are spaced 12 inches apart so that it is impossible for the track to bend, buckle or get out of line. The construction of the track permits the hangers to be spaced to conform to the arrangement of the rafters regardless of the distance apart. Guaranteed to be as strong at the splice as at any other point.

No.	Length	Wt. per 100 ft.	Per 100 ft.
581	6 ft.	200 lbs.	\$75.00
	10 ft.	200 lbs.	75.00

One splice included with each piece of track

TRACK END STOP BLOCKS

Two No. 1256 End Stops are furnished with each carrier, one for each end of track. They are used as shown in the illustration. Both should be pushed up snug against a 2x4 or 2x6 cleat bolted to the rafters. This prevents track from working endwise and keeps carrier from running off the end of the track. Carrier can easily be taken off when necessary by unbolting the cleat and stops.

For Double Angle Track

No.	Wt. per doz.	Per doz
1256 (Old No. 580)	2 lbs.	\$8.20

BRACKETS AND HANGERS
FOR DOUBLE ANGLE STEEL TRACK

BRACKET

No. 1043

HANGER

No. 583

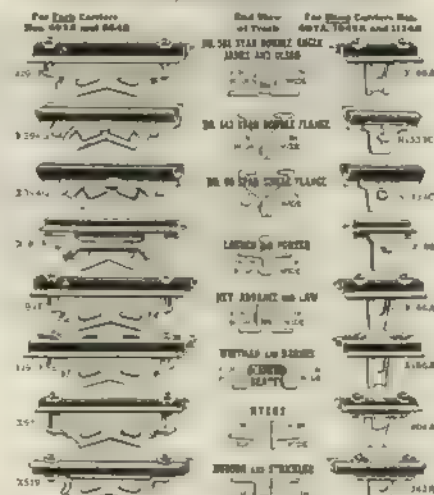

No. 1043 Rafter Bracket is used with No. 583 Track Hanger. This combination eliminates more than half the work of installing hay carrier track. All the brackets are nailed into place, being nailed up by a chalk line stretched from one end of the barn to the other. Length of hanger, 6 inches.

No.	Wt. per doz.	Per doz
1043 Bracket	4 lbs.	\$2.00
583 Hanger	5 lbs.	5.20

TRIP BLOCKS

Replace Your Old Worn Out Carriers

Star carriers & any standard steel track. They are adjustable and are included with trip blocks for any steel track as shown below.

Star carriers used with either forks or slings can be used to replace old carriers, which do not handle the hay as well as the up-to-date Star carriers. In many cases the old track is still good. So the latest Star carrier may be used by using the correct trip block, as illustrated.

No.	For Track	Each

*1197B	For Wood Track.....	1.90

Average Weight, 2 lbs each

*Not illustrated.

EXTRA TRACK SPLICE BLOCKS

Double angle track is furnished with one malleable iron splice block for each length of track. Splice blocks consist of three pieces and make a positive, tight joint. This track joint splice is as strong as the track at any other point.

No.	Weight each	Each
582	1 1/2 lbs.	\$0.90

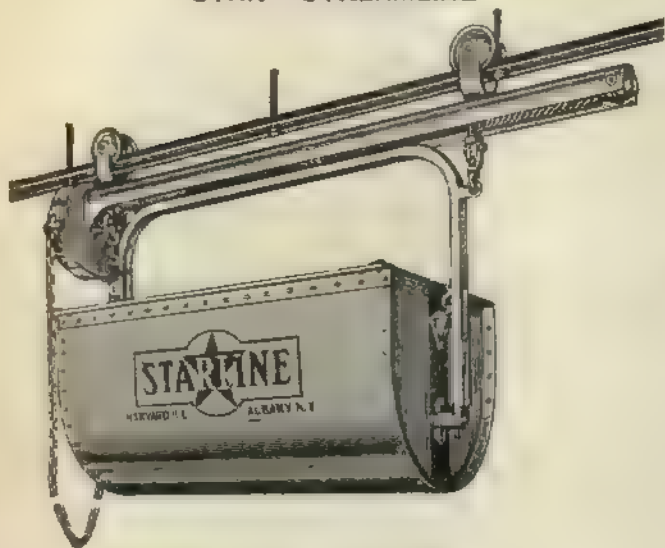

Note: Brackets and Hangers should be spaced about every two feet on the track.

All the above, loose

DEPT. 2

LITTER CARRIERS

STAR—STREAMLINE

No. 411 with No. 6T Tub

Easiest to raise by actual test.

Easiest and quickest to stop when lowering.

Hoisting Shaft is a simple windlass completely covered by the heavy 10 gauge steel housing which supports the shafts.

Heavy arched housing provides triple bearing for the shaft; keeps shaft from bending; holds it in line.

Bearings are oscillating; conform to any slight irregularity a strain might put on the shaft.

Tub raises level; both ends go up together.

Wrap chains wind evenly on shaft; cannot twist or pile up.

Conveyor all steel except track wheels and shaft bearings.

Can be locked only when lowering tub has been brought to a stop.

Lowering tub slowed down or stopped entirely by a slight swing of the hand chain or by a pull on the brake handle.

Operates on STARLINE double angle steel track. With switches, curves, lift-out sections and hangers of various lengths, will go anywhere and conform to any overhead arrangement.

All Working Parts Completely Enclosed by Heavy Steel Housing. Fully Protected From Ice, Snow, Dirt.

Heavy arched cover of the hoisting shaft supports the shaft and covers it, and guards against any damage from the weather.

The tripping chain and the channel ball of the tub is enclosed by a channel steel cover. This insures the perfect operation of the tub tripping device.

Heavy pressed steel case encloses and protects the chain wheel and the gears which drive the hoisting shaft.

Cut steel gears mounted in the chain wheel housing make raising and lowering easy and noiseless. They are practically wear-proof.

Standard model for ceilings up to 9 ft. high.

Tub of 18 gauge galvanized steel. One piece ends reinforced with heavy plates. Top reinforced with galvanized angles. Size of tub, 26 inches wide, 40 inches long, 19 inches deep. Capacity, 10 bushels.

Tub is self-cleaning when dumped. Locks automatically at both ends. Heavy channel steel ball that holds it rigid.

Clearance from top of track wheel to bottom of tub—upright 42 in. For dumping tub 53 1/2 in. Clearance below track 4 1/2 inches more than above figures.

No.	Wt. each	Each
411	200 lbs.	\$136.00

1974-1975 ELEC-TRUCK TOYS, INC.

WHETHER you're a speed boat fan, a fisherman, a power cruiser owner, the skipper of an auxiliary sail boat or just a guy who likes to get out on the lake in an outboard-powered canoe, your engine is an important adjunct to your enjoyment of boating. The man in any of the above categories will find just the motor he's been looking for at the National Motor Boat Show. Just in case he couldn't get to the Show, we offer these pages as a substitute. Old standbys with 1948 improvements, and new and striking models are included in the engine offerings for the year, and they're all well worth looking into, preferably at the Show; as a substitute, here.

The Universal Motor Company's crankshaft finishing department

ENGINES OF EVERY SIZE AND TYPE

UNIVERSAL 50TH ANNIVERSARY MODELS

► The year 1948 marks not only the 50th Anniversary of the Universal Motor Co. of Oshkosh, Wis., but will also be the occasion of its offering the most complete line of marine motors—with 1-, 2-, 4-, 6- and 8-cylinder models ranging from 8 to 141 hp.—in the company's history.

Heading the list is the well-known Fisherman model, a single cylinder, water-cooled 8 hp. motor which is available in two models, with or without built-in clutch and reverse gear. Two separate models are offered in the Universal Blue Jacket Twin series, one with magneto ignition and the other having electric

at 3000 r.p.m., this 149 cu. in. motor incorporates numerous postwar changes.

First of the Universal 6-cylinder series is the Blue Jacket Six of 148 cu. in. and 60 hp. These are built in both direct and reduction drive models with battery ignition. The 1948 Cruiser Six is a 90 hp motor of 280 cu. in. displacement with either direct drive or Universal silent herringbone drive. Optional reduction ratios are available, a new 3:1 ratio recently being added. The larger 110 hp Sea Lion Six models are also offered with 3:1 reduction gears.

Universal will again offer two 8-cylinder engines. One is the 125 hp. Cruiser Eight and the other, the largest in the line is the 141 hp. Sea Lion Eight.

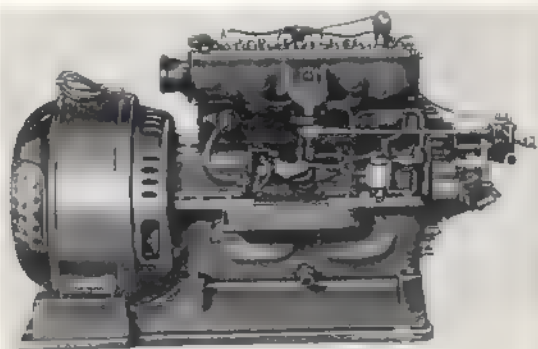

The Blue Jacket Racer will again be available. This 130 cu. in. 4-cylinder motor provides 75 hp. at 4500 r.p.m.

The company's 1948 line of marine light and power plants includes a number of new models and improvements on present ones. There are, for example, 6- and 12-volt battery chargers in capacities of from 250 to 350 watts. A series of 32-volt charging plants ranges from 650 watts up to 10 kw. In addition, 110-volt plants for direct or alternating current can be supplied from 500 watts to 25 kw.

All 32-volt battery chargers are now available with battery automatic controls.

KERMATH OFFERS WIDE RANGE OF INSTALLATIONS

► Marine propulsion engines to fit almost every type of installation are to be found in the wide range of units on display in the booth of the Kermath Manufacturing Co., Detroit, Mich. In this highly diversified line the following units are representative: Sea Cub "Four"—This 25-hp 4-cylinder model will serve in runabouts up to 18', cruisers up to 20', small utility craft and launches, or as auxiliary power for boats up to 34'. It is obtainable in direct

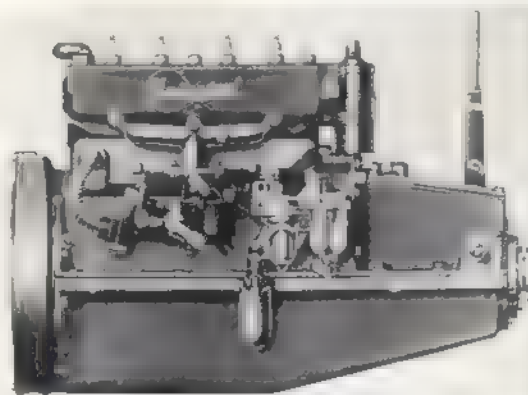

A Universal 4-cylinder marine electric plant. The company's 1948 line of marine light and power plants includes a number of new models and improvements on present ones.

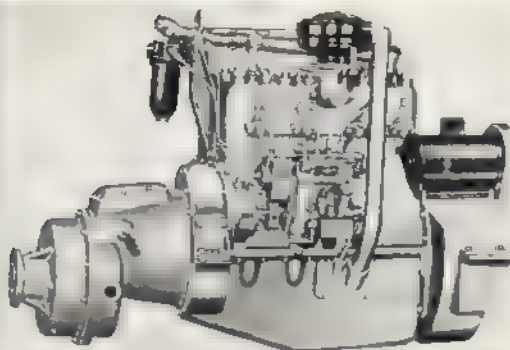

starting equipment. In the 4-cylinder type, five different series are in production. First is the 25 hp. Utility Four.

A newcomer to the Universal line is the Atomic Four Series. This new postwar motor is both small and compact, measuring but 26 $\frac{3}{4}$ " over all and weighing but 314 lbs. The Atomic Four is of 65 cu. in. and develops 25 hp. at 3500 r.p.m.

The Universal Flexifour is third in a complete line of five series of 4-cylinder motors which develop 40 hp. at 3500 r.p.m. and are of 99 cu. in. displacement. The "stevedore" of the 4-cylinder group is the Superfour series. Developing 50 hp.

The Universal 25 hp direct drive Atomic Four. This postwar motor measures but 26 $\frac{3}{4}$ " over all and weighs but 314 lbs.

The "4-226" Kermath diesel with the manufacturer's straddle mounted Bulldog reduction gear. This 55-65 hp. 4-cylinder diesel is suited to a wide variety of installations.

drive or with combination 2:1 reduction and reverse gear.

Sixty-one hp. "Sea-Jeep" — This model provides an exceptional turn of speed in runabouts up to 22' and, when equipped with either the Kermath Greyhound or Bulldog straddle-mounted reduction gears, it makes a compact and powerful small cruiser engine.

"Sea Prince" — This 6-cylinder engine is a new 230 cu. in. type designed to develop 100 hp. at 3600 r.p.m.

"Sea-Raider" — This 1414 cu. in. 12-cylinder valve-in-head engine combines ruggedness and exceptional power delivery. At top speeds of 2600 r.p.m. it provides 590 hp.

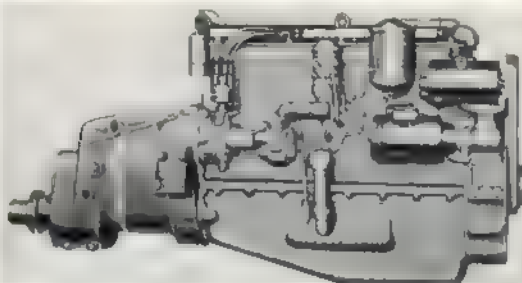

"Sea-Mate Special" — A compact 404 cu. in. engine of 160 hp. rating which has been primarily designed for reduction gear usage. It is available in all three types of Kermath reduction gears, having a choice of ratios in half steps from 1½:1 to 4:1.

Here are some of the Kermath diesels:

"2-127" — A small and compact unit which delivers 27 hp. at normal engine speeds and which is available with the built-in Kermath-Upton 2:1 combination reverse and reduction gear.

"4-226" — This 55-65 hp. 4-cylinder design is available in a direct drive unit or with three distinct types of reduction gears in a wide choice of gear ratios which have been designed for Kermath engines exclusively.

6-474" — This is Kermath's largest diesel. It is a 6-cylinder engine rated at 113 hp. and is of the conventional 4-cycle design. One of the features incorporated in this model, as well as the company's 2-, 4- and 6-cylinder units, is the exclusive turbulence chamber in the combustion head.

Kermath's 130 hp. Sea Rover, like the manufacturer's other 6-cylinder designs, has a seven main bearing crankshaft, balanced and Tocco hardened. This model is available with direct or reduction gears.

EVINRUDE HAS NEW SPORTWIN

► The new model Sportwin, embodying a number of new features, is introduced at this year's Show by Evinrude Motors of Milwaukee, Wis. A 2-cylinder, alternate firing motor, developing 3.3 hp. at 4000 r.p.m., this engine has been redesigned and now incorporates a wide variety of new accessories, among them a gasoline gauge.

A new development in carburetion gives it added flexibility and smoothness throughout its speed range. "Fore and aft" carrying handles of new design make the motor easier to handle between boat and dock, to clamp onto the stern and to steer in reverse. A "transom trigger" provides flick-of-the-finger adjustment to correct vertical driving position. There is no fuel vent or shut-off to open and close; the carburetor adjustment lever performing these duties automatically. A new type fuel filler closure, which is leverlocked and leakproof, simplifies all phases of fueling.

The Weedless Drive lower housing, originally developed on this model, is incorporated in the 1948 Sportwin and has proven successful in service in all kinds of foul water. This feature is also standard on the smaller Sportsman model, a 2 hp. outboard widely used on dinghies and other small craft. Users report that the Weedless Drive housing not only keeps the engine going in thick reeds and other water growth but that it will effectively ride over deadheads, stumps, rocks and shoals.

In the higher-power brackets, Evinrude offers three 4-cylinder models, all incorporating features developed in the storm boat motors used in the invasion of Germany.

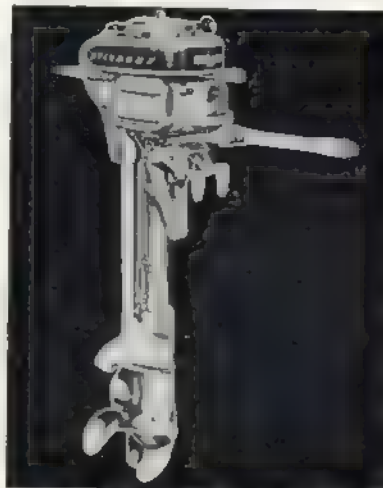

Evinrude's Weedless Sportsman is rated at 2 O.B.C. certified brake hp. at 3500 r.p.m.

GRAY ADDS A SIX-CYLINDER DIESEL

► The Gray Marine Motor Co., of Detroit, Mich., is offering a total of 30 different models of marine engines for 1948. The principal addition to the line is a new 6-cylinder diesel model which develops 150 hp. at 2000 r.p.m., and weighs 2950 pounds. At the other extreme is the "Light Four-60," a small engine rated at 10-16 hp. and only 29 inches over all.

For economy of manufacture and interchangeability of parts, all Gray units are built around seven piston displacement sizes. These are, in turn, subdivided into four speed groups: the "Lugger" series for working speeds of 2400 r.p.m., the "Express" series which operate at speeds of 3200 r.p.m., the "Phantom" series for speeds of 3600 r.p.m. and the "Fireball" series of engines which develop 4000 r.p.m.

A closed system of fresh water cooling is standard on all Gray diesels and is optional equipment on all other engines in this line, except the smallest "Jolts."

This Evinrude heavy duty Light Four has special reduction gear, and may be obtained with a 15" longer shaft.

Engines with this equipment have a centrifugal circulating pump which requires no lubrication or priming. Two options of heat exchangers are available, either inboard or outboard. The latter features a compact copper "keel cooler" for installation in place of the usual water scoop. This provides direct contact with the sea water and renders a sea water pump unnecessary. The length of this unit varies from 24" to 48", depending on the size of the engine. A thermostat provides positive temperature control.

Gray's standard gasoline engines feature direct cooling and are equipped with a gear-driven sea water pump with neoprene impellers.

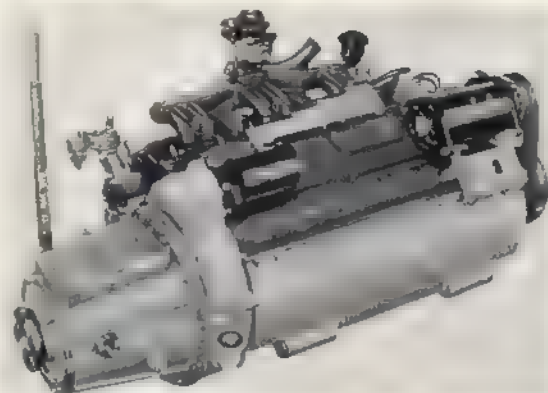

Another new Gray offering for the 1948 season is a sealed unit instrument panel which incorporates several interesting features, including a register of engine operating hours and an automatic flash indicator, electrically operated by a thermocouple, which warns of excessive engine temperatures. Other instruments include an oil pressure gauge, a tachometer and an ammeter.

Gray also is making a line of reduction gears which includes ratios of 1.5:2, 2.5:3, 3.5:5 and 5:1. Mounting brackets to fit all engine beds are optional. Extra 6- and 12-volt generators are also available as are 12-volt starting and lighting systems to replace the standard 6-volt system.

FAGEOL SHOWS TWO MODELS

► The Marine Division of the Fageol Products Co., which came out a year ago with the first models of its horizontal gasoline engine for boats, is showing both a vertical and a horizontal version of these engines this year. The Fageol Marine

One of Packard's new marine engines on the test block. These propulsion units are 6-cylinders, 100 hp., and 8-cylinders, 150 hp. All are equipped with Packard's Fingertip Control reverse gear.

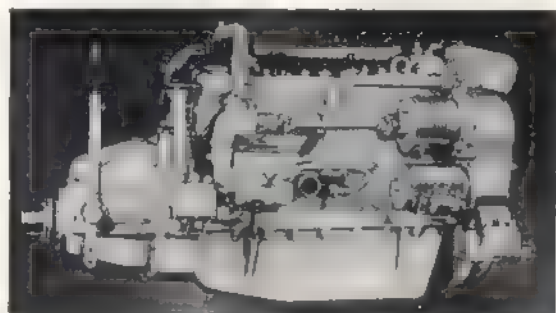

The horizontal-cylinder version of the Fageol Marine gasoline engine (left) is a space saver for installation beneath decks and cockpit floors, being less than 20" high. It develops 225 hp at 3400 r.p.m.

Engine is produced in a 225 hp. model, turning 3400 r.p.m., or a 200 hp. model at 3200 r.p.m.

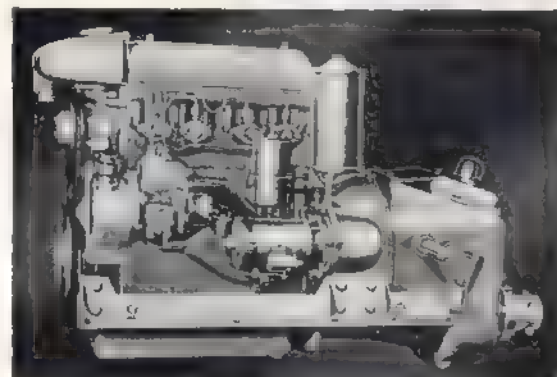

When installed horizontally, the motor has an over all height of only 19½" against 33" when vertically mounted, offering obvious advantages in compact installation.

Three-point, rubber-mounted suspension is a feature of these engines, as is full counterbalancing to eliminate vibration. Standardized Fageol design permits right and left hand installation from the same block and head. This is accomplished in assembly by use of right or left hand pan, bell and chain housing. All other parts are interchangeable.

Gray's Express Six-226 is shown equipped with centrifugal circulating pump for use with the "closed system" with keel cooler. Fresh water cooling is now available on most Graymarine engines.

Menning Bros. photo.

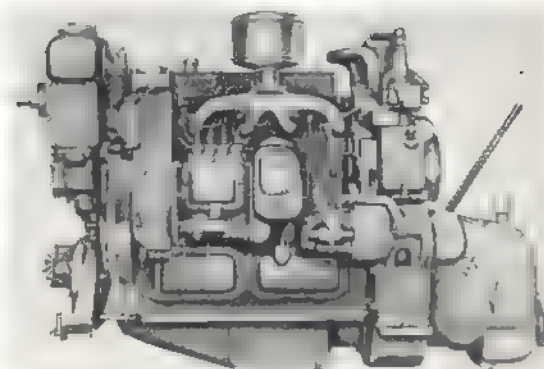

The "Four-D157" is typical of the four cycle, high speed Graymarine diesels. Both Bosch injector and fresh water cooling systems are standard. This model is rated at 35 hp at 1800 r.p.m.

PACKARD SHOWS 100 AND 150 HP. ENGINES

► A 100 hp. and a 150 hp. marine gasoline engine will be exhibited by the Packard Motor Car Co., of Detroit, Mich. The 100 hp. engine is a 6-cylinder job, with a piston displacement of 245 cu. in. It comes in four models, one with direct drive and the others having reduction gears with ratios of 1.45:1, 2.04:1 and 2.52:1. Bore and stroke in each case are 3½" x 4¼". The weight of the direct drive engine is 920 pounds, with reduction gear from 1000 to 1040 pounds.

The 150 hp. engine also comes in one direct drive and three reduction gear models, with reduction gear ratios the same as for the 100 hp. motor. The larger engine has 8 cylinders, a piston displacement of 356 cu. in. and a bore and stroke of 3½" x 4½". The direct drive engine weighs 1210 lbs., the others 1260 to 1320.

All engines are available in right and left hand rotation, all develop their rated horse power at 3200 r.p.m. and all of them are standard-equipped with Packard's Fingertip Control reverse gear, a hydraulic mechanism which literally permits reversing at the touch of a finger.

Caterpillar's D315 diesel marine engine. This is one of the six marine engines made by the firm. The Caterpillar booth will have on exhibit a complete line of parts in addition to a showing of marine films.

NEPTUNE SHOWS 6 OUTBOARDS

► Six 1948 models of the Neptune outboard motor, made by the Muncie Gear Works, Inc. of Muncie, Ind., are displayed at this year's Show. The company has reduced the number of models formerly offered and concentrated production on these six as the most popular.

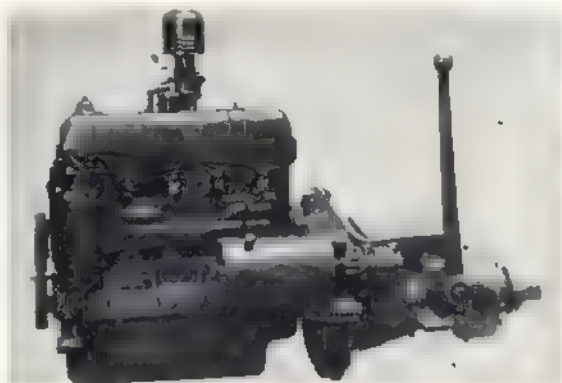

The models run from a 17-lb. single cyl., 1.7 hp. lightweight to the 2-cyl., 62-lb. Hi-Speed model developing 9.8 hp. Other models develop 2.5, 2.7, 4.1 and 6 hp., at 4000 r.p.m., and weights are respectively 30, 33, 40 and 52 lbs.

Cylinders are of aluminum alloy with cast iron sleeves and pistons of aluminum alloy. In most of the models needle bearings are used on the crankshaft and bronze on the drive and propeller shafts. Tillotson Automotive type nonflooding carburetors are standard equipment.

NEW CATERPILLAR DIESELS

► Three new marine diesel engine models, giving substantially increased power without additional weight as compared to the corresponding older models of this company, have been put into production

The Brennan Imp Jr., one of the smallest and lightest of the 4-cylinder engines. Weighing from 150 to 200 lbs., its piston displacement is 44 cu. in. and it develops 25 hp at 7000 r.p.m.

Logan

by the Caterpillar Tractor Co., of Peoria, Ill. They are the D311 4-cylinder model rated at 38 b.h.p. for continuous service at 1600 r.p.m.; the 4-cylinder D315, developing 53 hp., and the 6-cylinder D318, developing 80 hp., both at 1600 r.p.m. They replace, respectively, the D3100, D4400 and D4600 Caterpillar models.

An increase of $\frac{1}{4}$ " in the bore, in each case, over the older models is accompanied by heavier and stronger crankshaft with larger journals and crank pin bearings; redesigned inlet and outlet manifolds; new oil pressure control systems; new fuel injection valve design; a new governor, and other improvements in the design and construction of the engines.

Caterpillar marine engines are backed by 16 years experience in building heavy-duty diesel engines. All models are of rugged, heavy-duty design, conservatively rated to permit 24-hour operation with full equipment. The Caterpillar-designed and built pre-combustion chamber type fuel system makes it possible not only to operate on low cost fuel but to run successfully for long periods at low or idling speeds without choking or fouling up.

LORIMER DIESEL SHOWS "STURDY SCOT"

► Yachtsmen desiring a slow speed, heavy duty diesel engine will be particularly interested in the "Sturdy Scot," manufactured by Lorimer Diesel Engine Co., Inc. of Oakland, Calif., a compact unit which is available in three sizes: 10

hp. at 600 r.p.m., 12 hp. at 720 r.p.m. and 14 hp. at 800 r.p.m. With Timken roller main bearings and force-feed lubrication to main, crankpin and piston pin bearings, it is full diesel in design which assures low cost of operation.

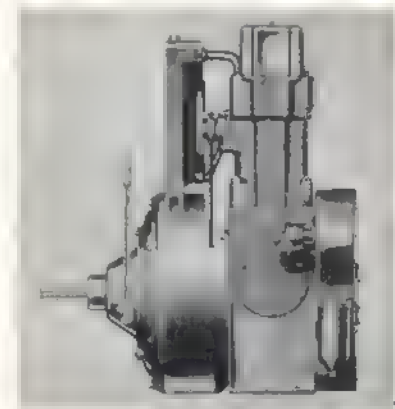

Lorimer's standard models range from 45 to 225 hp. and from three to eight cylinders. R.p.m. are in the 600, 720, 800 range.

An inherent feature of Lorimer diesels is their extremely fast starting; even the largest models passed Navy tests starting from cold condition in 10 seconds or less. Hand cranking models start on reduced compression, and are equipped with a carburetor and high-tension magneto.

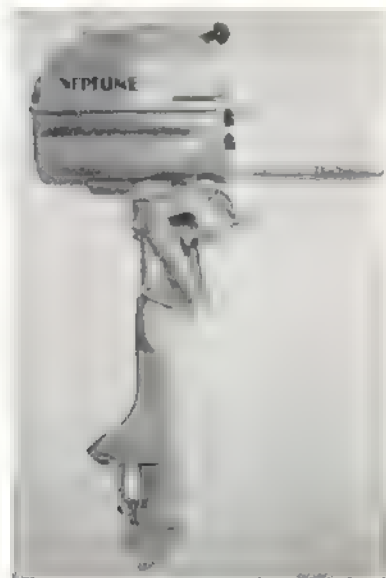

BRENNAN IMP DISPLAYED

► Featured in the Show display of the Brennan Motor Mfg. Co., of Syracuse, N. Y., is the company's line of "indieget sized" engines, the Imp series. These are four-cylinder engines of 25 hp., one with 44 cu. in. piston displacement turning up 7000 r.p.m. and the other with 50 cu. in. developing its full horse power at 5000 r.p.m. Weights are 150 and 200 lbs., respectively.

In addition to these small power units designed for small runabouts, yacht tenders and similar service, the Brennan Company's line includes 4- and 6-cylinder engines ranging from 15 to 200 hp.

Lorimer's "Sturdy Scot" diesel is available in three sizes, ranging from 10 to 14 hp. at from 600 to 800 r.p.m.

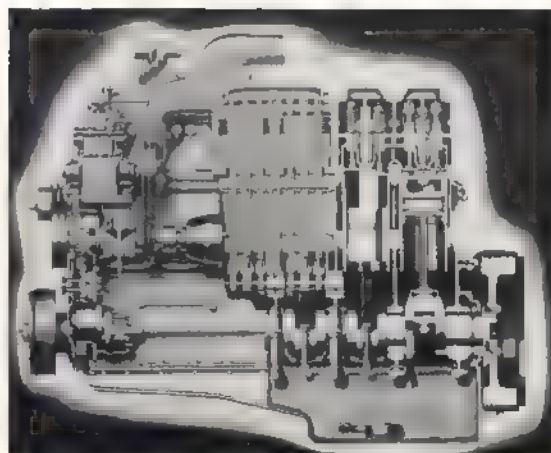

One of the new 1948 Neptune outboards

THREE MERCURY OUTBOARDS

► Three models of the Mercury outboard motor are currently in production in the plant of the Kiekhaefer Corp., of Cedarburg, Wis., which is exhibiting at the Show. They are the 3.6 hp. Comet, the 7.5 hp. Rocket and the 10 hp. Lightning. The Comet is a light weight single for small craft; the Rocket a twin designed primarily as an all-purpose family boat motor and the 59-lb. Lightning will drive light runabouts up to more than 30 m.p.h. Kiekhaefer has several other models in preparation.

Examples of the engineering to be found in Mercury outboards are: Mercury rotex-pump, waterproof magneto, forged steel connecting rods, multiple-disc co-pilot,

A Series NHS-600 Cummins diesel, cut away to show the working of the inner parts, features the manufacturer's display at the Show. This model will demonstrate the mechanical features of these engines, including piston action, cylinder liners, operation of dual intake, exhaust valves and other working parts

Spencer W. Curtis

CUMMINS SHOWS CUTAWAY MODELS

► Cutaway models of one of its engines and its exclusive patent fuel system are interesting features of the Boat Show exhibit of the Cummins Engine Co., Inc., of Columbus, Ind.

The cutaway sample of the Cummins Series NHS-600 engine demonstrates clearly the mechanical features of these engines, including piston action, cylinder liners, operation of the dual intake and exhaust valves and other working parts. The single-plunger, low-pressure, distributor type fuel pump will be shown both in the actuated cutaway version of the engine and in a separate fuel pump display.

In addition, Cummins is exhibiting two of its diesel engines, the models NHM and LM. The Model NHM-600 has a power rating of 132 hp. at 1800 r.p.m. for continuous heavy duty service, and a maximum rating of 200 hp. at 2100. It is shown with a Twin Disc MG-166 4.38:1 reverse and reduction gear and a heat exchanger of Cummins design with Ross elements. Other equipment includes a water-cooled exhaust manifold, variable speed Woodward hydraulic governor, Twin Disc front power take-off, centrifugal bilge pump, electric starting system, oil cooler and mounting rails.

The Model LM-600 is a 6-cylinder engine rated for continuous heavy duty at 177 hp. at 800 r.p.m., and maximum of

Spencer W. Curtis

250 hp. at 1000 r.p.m. It is shown with a Capitol 2:1 reduction and reverse gear, heat exchanger and other equipment.

FLAMBEAU PLANS NEW MODEL

► The Metal Products Corp., of Milwaukee, has two of its Flambeau outboard motors on display at the Show and is planning to start production on a new and larger model this year. The models shown are the 2.5 and the 5 hp. models, the larger of which weighs only 32 lbs.

One of the Flambeau motors features its patented propeller drive mechanism, which disengages the prop when it strikes

Flambeau's 5 hp outboard, O.B.C. certified at 4000 r.p.m.

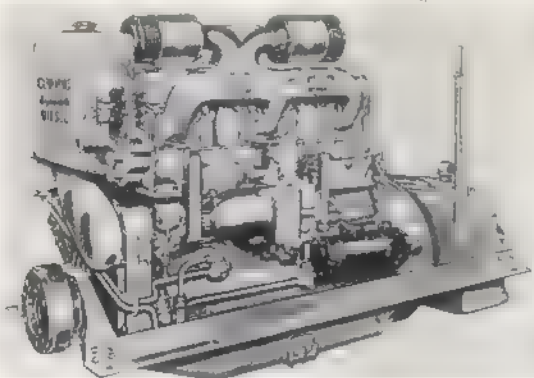

an obstruction and re-engages it as soon as the propeller is in the clear again, eliminating shear pin replacement troubles. Another Flambeau feature is the two-piece over all housing, which makes it quick and easy to remove and replace bearings, cylinder sleeves and all operating parts. Dual carburetion assures the right fuel mixtures for all speeds.

Mercury's KE4 Deluxe Rocket outboard

una-cast gear housing, vari-timed valves and magna-pulled starters.

The Mercury outboards have ball and roller bearings on crankshaft, crankpins wrist pins, drive shaft and propeller shaft giving what their makers describe as "full jeweled power." In tests, Mercury motors have been in continuous operation for more than 10,000 hours without a major overhaul.

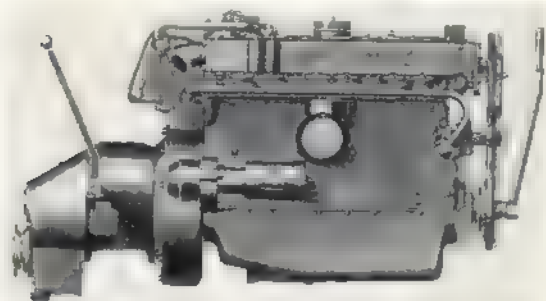

This model NHM-600 Cummins marine diesel has a maximum rating of 200 hp. at 2100 r.p.m. It is shown with a Twin Disc reverse and reduction gear and a heat exchanger of Cummins design with Ross elements

Johnson Model TD is of 5 O.B.C. hp., weighs 44 lbs. and is suitable for large canoes, all types of outboard boats and as auxiliary power for sailing craft.

FIVE MODELS OF THE JOHNSON "SEA HORSE" SHOWN

► The well-known "Sea Horse" line of outboards, manufactured by Johnson Motors, of Waukegan, Ill., is available in five models, all twin cylinder, two cycle jobs, ranging in size from the little 2 1/2 hp. Model HD (weighing only 31 lbs.) to the big Model PD which delivers 22 O.B.C. certified hp. at 4000 r.p.m.

Buda's BD-MR-230 60 hp. diesel marine engine. At the Show Buda will introduce an 8-cylinder marine diesel and a 15 kw. electric marine type generator.

No radical changes have been made in its models by Johnson since last year. It is, however, improving the quality of its service by establishing additional service stations in strategic locations and by sending service personnel to the factory for training. In spite of expanded production schedules, the company is still obliged to allot motors to its dealers and will probably have to continue this practice through the spring buying season.

The "Sea Horse" motors feature such refinements as dual carburetor, alternate firing, full pivot reverse and Johnson's Ready-Pull starter. Other features are Rubber-Flow Shock Absorber drive, which prevents shearing the drive pin when the propeller hits an obstruction, weedless propellers and Alrok treatment which offers protection to aluminum parts from salt water corrosion. Smooth operation from trolling speed to top speed is a characteristic of all Johnson motors.

PALMER BROS. PROPERTY CHANGES HANDS

► Palmer Bros., of Cos Cob, Conn., pioneer engine builders, and for many years familiar to boatmen and Show visitors, come back to this year's Show under a new-old management headed by Ray Bolling who was with Palmer Bros. for 15 years in many capacities, from service engineer to sales manager, when the concern was still under its original ownership.

Mr. Bolling and a group of his old-time associates, former employees and friends of the Palmer brothers, have purchased the entire property, buildings, equipment and designs from the interests which bought control of the plant a few years ago.

On display at the Palmer booth, in its familiar location on the mezzanine at the Palace are Model PH, RND, YT and ZR engines and the Palmer clutches.

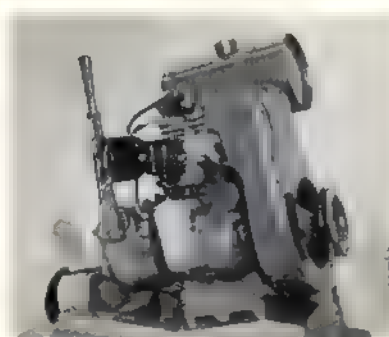

BUDA DISPLAYS 7 ENGINES AND DIESEL-ELECTRIC GENERATOR SET

► The Buda Company, of Harvey, Ill., is showing seven different models of its well-known marine engines in sizes ranging from a small 40 hp. job to the big new model 8-DCMR-2505 which develops 300 hp. at 1100 r.p.m. This is the first time this motor has been shown. The new model has 8 cylinders with a bore of 6 3/4"

and a stroke of 8 3/4". It is equipped with heavy duty reverse and reduction gears and has a heat exchanger cooling system. This big fellow is intended primarily for heavy duty service and would make an ideal installation for fishing and tow boats as well as larger sizes of motor yachts.

Buda is also showing for the first time a 15 kw. diesel-electric generating set which is compact in design and has controls, motor and generator mounted together on a single base. The motor is a new series BD high speed job which is compact in design and of relatively light weight. The new set will be an ideal installation for power yachts where ample electric capacity is wanted.

In addition, this exhibitor is showing six other models ranging from 40 hp. to 200 hp. — the latter being a heavy duty marine engine with a front-end power take off.

One of the single-cylinder Wisconsin air-cooled engines displayed at the Show by John Reiner & Son.

REINER DISPLAYS ENGINES

► A line of air-cooled engines from 3 to 13 hp. is one of the features of the Show display of John Reiner & Co., of Long Island City. The engines are suitable for marine installation, some of them being equipped with clutches, and are of single and two-cylinder models.

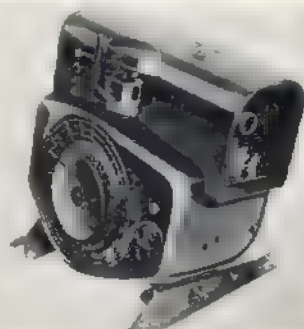

A line of battery charging generator sets, both air and water cooled, is also in this display. They are manufactured by D. W. Onan and Sons and by Continental Motors Corp., and range from 240 to 3500 watts output and from 6 to 115 volts.

In the diesel driven line, Reiner builds marine generating sets and auxiliary units to fit varied requirements. One is the Model MDGL-7 1/2 Y, which consists of a 2-cyl. Hercules diesel direct-connected to a 7 1/2 kw. generator of 32 or 115 volts.

ONAN GENERATORS AND ENGINES

► An economical source of marine electric current is the improved Model MKH, single cylinder, water cooled battery charging set made by D. W. Onan & Sons, Inc., of Minneapolis, Minn. Remote control electric starting is supplied with the MKH model. Models include 115-volt a.c. from 500 to 750 watts and also 6-, 12- and 32-volt battery chargers from 400 to 1000 watts capacity. The a.c. model is supplied with a 12-volt starting battery. Larger models are also available.

Onan will also display its line of air-cooled marine engines. These deluxe 2-cyl., 4 cycle, 10 hp. engines combine desirable features for smaller craft.

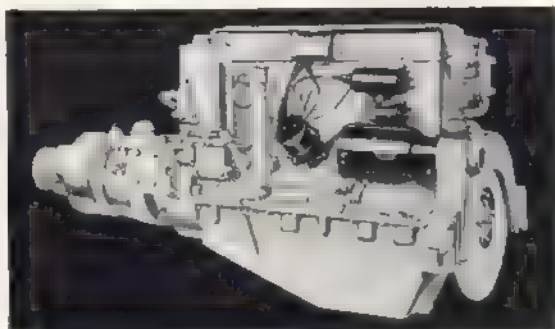

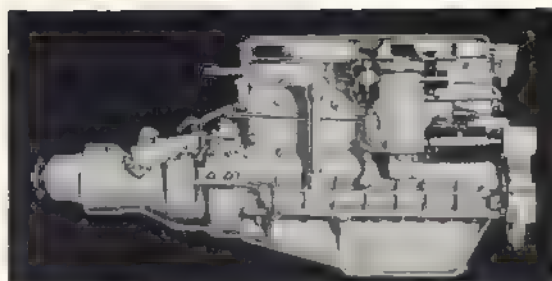

Onan model MCK-5 air-cooled marine engine.

CHRYSLER MAKES SIX MODELS

► The Marine Division of the Chrysler Corporation offers the boating public six models, with up to date improvements, in its 1948 Twentieth Anniversary Line.

The line consists of three basic engines, the 92 hp. Ace, the 115 hp. Crown, and the 141 hp. Royal, but each model is available in a variation, with its flywheel at the after instead of the forward end of the engine, a design which in certain cases

Chrysler's "Royal" M-28 marine engine, shown with 1.43:1 reduction gear. Eight cylinders, bore 3 1/4", stroke 4 1/4", displacement 323.5 cubic inches. Compression ratio 6.8:1.

The Chrysler Crown is a popular engine used in many stock and custom built boats. It is a 6-cylinder model developing 115 hp, shown here with reduction gear of 1.43:1 ratio.

facilitates fitting the engine into the boat with a minimum of waste space. The engines are all designed, engineered and built by Chrysler.

A wide selection of reduction gear ratios is available with each of the engines, so that they can be adapted to efficient and economical operation in different types of craft, from heavy work boats and auxiliaries where a slow-turning, big-diameter propeller is a necessity, to light, high-speed runabouts where direct drive produces the best results. Helical reduction gears, with a high degree of interchangeability, can be assembled in four different positions to accommodate various shaft angles and to fit into diverse interior layout plans in different boats.

The full-ball-bearing planetary reverse gear, designed and built by Chrysler, eliminates brass bushings and has anti-friction ball bearings, while pinions in all reverse gears are needle-bearing mounted. Molded woven friction material is used in the reverse band, and the gear is lubricated under pressure from the main engine lubricating system. Clutch plates are grooved to insure proper lubrication and prevent scoring.

Engine temperatures are thermostatically controlled, to keep them at the desired level for fuel and oil economy. The engines have a combination oil cooler, heater and filter, of full flow type. The oil is thus filtered before it goes to the engine bearings, cooled in the crankcase, and is warmed when the engine is cold and cooled when it is too hot.

Corrosion resistant electrical equipment is used on these engines, and generators are waterproofed. A new rubber water pump gear, with a capacity of 15 gallons per minute, is built to withstand abrasion and corrosion and to pass hard particles through without damaging the gears. Stainless steel valve springs are used, and

lightweight aluminum pistons help give the engines a high rate of acceleration.

Backing the engines is Chrysler's nationwide parts distribution, through some 175 Chrysler marine dealers, to insure both yachtsmen and work boat operators a minimum loss of time in commission for making repairs.

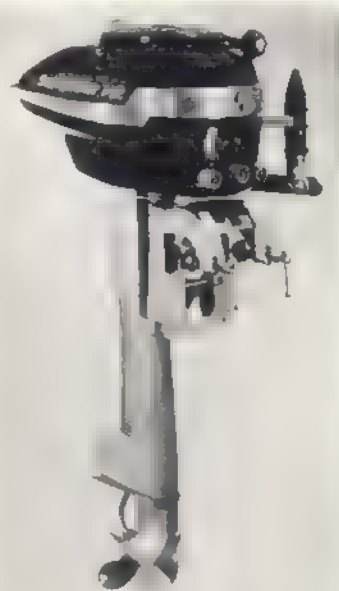

LAUSON AIR-COOLED AND OUTBOARD ENGINES

► Inboard 4-cycle air-cooled engines and a 2 1/2 hp. air-cooled outboard will be featured by The Lauson Co., New Holstein Wis., in its booth at the Motor Boat Show.

The distinctive features of the Lauson air-cooled inboard engine are well known. The 4-cycle design and principle of their engines, together with the high tension magneto and marine type carburetor give

instant starting. Pertinent among their design characteristics are: thrust bearings incorporated in the crankcase, installation possible at angles up to 15°, aluminum and die-cast parts processed to withstand the corrosive action of salt water spray, special float feed carburetors, throttling to trolling speeds. These engines turn up from 1800 to 3000 r.p.m., and develop from .86 to 4 1/2 hp.

The Lauson Sport King 4-cycle air-cooled outboard is designed to use gasoline and oil separately. It is of 2 1/2 hp. at 3000 r.p.m.

George H. Ryan

Scott-Atwater's 1-12, a new 1948 model

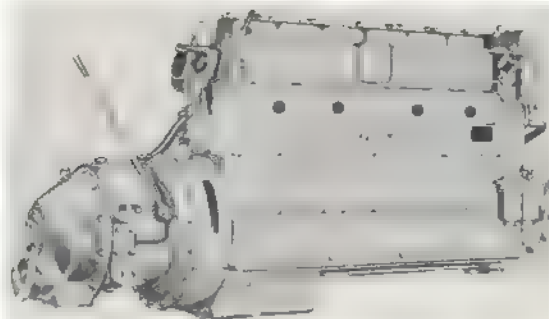

The Lauson 2 1/2 hp. Sport King

SCOTT-ATWATER OUTBOARDS

► Two new outboard motor models, the 1-12 and the 1-20, are announced by the Scott-Atwater Manufacturing Co., of Minneapolis. The former is a single-cylinder motor, producing 3.6 hp. at 4000 r.p.m., weighing 40 to 43 lbs. and costing \$107 to \$117. The 1-20 is a twin, putting out 7 1/2 hp. at 4200 r.p.m., weighing 51 lbs. and priced at \$165. In tests of the new models, each throttled down to a trolling speed of under a mile an hour, while they attained top speeds of 12 m.p.h. and 20 m.p.h., respectively.

Improvements in these motors include a practically floodproof valving system; a

The Atlas diesel 6-cylinder model 6 ES253 is of 135 b.h.p., and 900 r.p.m. Of the 25 models in the Atlas line, a diversified group will be on display at the Motor Boat Show.

new magneto which gives a high-energy spark at low speed; instantly detachable skirts, to facilitate getting at the parts; a porous metal fuel filter; and a new automotive type concentric bowl carburetor, according to C. E. Scott, president of the company, which he says set new production records in 1947. He expects to increase them, with a large factory addition, this year.

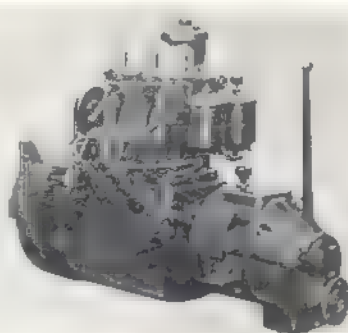

DIVERSIFIED ATLAS DIESELS

► For the past 34 years the Atlas Imperial Diesel Engine Co. of Oakland, Cal., has been building a diversified line of marine engines and, of the 20 odd models now in production, a representative group will be on display at this year's Motor Boat Show.

Of special interest to the yachtsman are one 4-cylinder and three 6-cylinder engines. The Atlas 4EM253 has 4-cylinders, turns 900 r.p.m., develops 90 hp., has jerk pump fuel injection system, gear drive and weighs 6400 lbs. Model 6I-M253 is a 6-cylinder engine of 135 hp., at 900 r.p.m., with jerk pump fuel injection system, gear drive, and weighs 8250 lbs. Models 6HM2124 and 6HM3338 are both 6-cylinder engines. The former is 425 hp. at 325 r.p.m., while the latter is 600 hp. at 300 r.p.m. Both are direct drive.

HALLET MAKES SMALL DIESELS

► Small marine diesels, of 8 and 18 hp., are a specialty of the Hallett Mfg. Co., of Inglewood, Calif. The 8 hp. is a one-cylinder power unit of 50 cu. in. piston displacement, weighing 660 lbs., with a

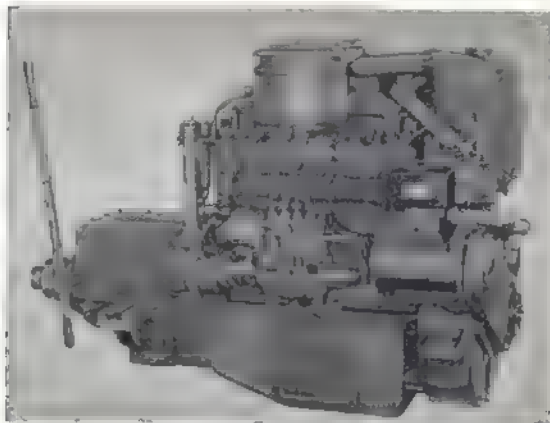

Hallett's 2-cylinder, 4-cycle, 18 hp. diesel engine with 2½:1 or 3:1 reduction gear

length of 37½" and height above crankshaft of 22", while the 18 hp. model is 2-cylinder, weighing 810 lbs. and taking a length of 49" and height of 25" for installation. Each develops its rated horse power at 1500 r.p.m., and the cylinders are 3⅞" bore by 4¼" stroke. Available accessories for these engines include reduction gears, 12-volt electric starting, and fresh water cooling equipment. The same engines are available in yacht generator units.

RED WING SHOWS NEW MODEL

► Feature of the exhibit of the Red Wing Motor Co., of Red Wing, Minn., is a new model, compression ignition, solid injection "full diesel" for heavy duty service. The engine shows a maximum power of 79 hp. at 2600 r.p.m. and at 1900 r.p.m., the recommended speed for continuous operation, it produces 65 hp.

The new Champion model 2K standard single cylinder outboard (upper right) of 4.2 hp. It weighs but 36 pounds. The new 4-cylinder, 65 hp. "full diesel" (left) which will be seen at the Red Wing Motor Co. exhibit

Bore and stroke are 4¼" × 4½", piston displacement is 255 cu. in. and the weight approximately 1250 lbs. It is available either with direct drive or with 2:1 or 3:1 reduction gears, and is especially suited for a variety of boats from 25' to 50'.

A complete fresh water cooling system is regular equipment on the new engine. The electric starting system is 12-volt and of extra high capacity. Glow plug for cold weather starting is also supplied. The engine features the overhead valve system, and removable dry sleeve cylinder inserts. It has a large capacity oil cooler and adequate fuel, oil and air filtering system.

Other Red Wing models in present production include three sizes of spark diesel marine engines from 42 to 140 hp. and seven gasoline models from 7 to 140 hp., six of which will be at the Show.

NEW CHAMPION OUTBOARD

► A new addition to the line of Champion outboard motors, the model 4K Deluxe Alternating Firing Twin, will be introduced at the Show. This motor will develop 7.9 hp. at 4200 r.p.m. Weighing but 47 pounds, it is of the alternate firing type, dual rotary valve and full reverse.

Two other models to be featured this year are the 1K Standard Single and the 2K Deluxe Single. These two motors have identical power heads, developing 4.2 hp. and the Deluxe model has full reverse and built-in Pull-o-Matic starter. The standard model weighs 36 lbs. and the Deluxe 37½ lbs. Both feature the company's new built-in silencer. Champion is now perfecting a new 22 hp. model.

All 1948 models contain a non-vibrating "co-pilot" which keeps the boat on a steady course when the hand releases the tiller, a silent-pull starter and a non-back pressure expansion chamber.

Champion outboards are manufactured by the Champion Motors Corp., Minneapolis, Minn.

MARTIN MOTORS HAVE MECHANICALLY CONTROLLED VALVES

► The Martin Motors division of the National Pressure Cooker Co., of Eau Claire, Wis., has embarked on an expansion program. Part of the new plant is already in production on the Martin "60" (7.2 hp.) and the Martin "40" (3.8 hp.).

The new Martin "20" (2.5 hp.), capable of extremely slow speeds which makes it particularly suited to trolling, is being introduced to the public at the New York Boat Show. All Martin motors feature mechanically controlled poppet valves, a leakproof filler cap and vertical adjustment, which may be altered while under way.

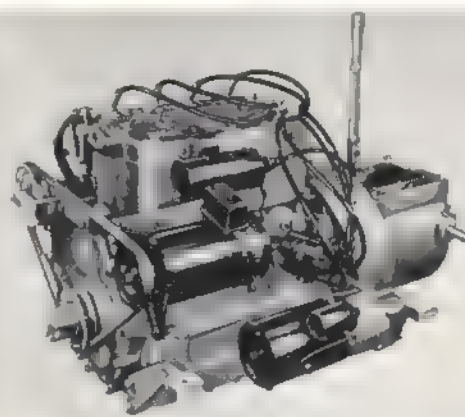

Martin Motors new "20" is of 2.5 hp.

FLAGSHIP OFFERS INFORMATION BOOK

► In line with the Flagship Co.'s policy, it is offering an Owner's Information Book which is in no sense an ordinary "catalog." The new book is well illustrated with line drawings and is written in non-technical language. Although, naturally, describing the Flagship engines in detail, the book is intended as a guide

The Arnolt Sea-Mite engine weighs as little as 181 lbs. in its lightest form. Various models produce 5.8 hp. at 800 r.p.m., 14.2 hp. at 1800 r.p.m. and 20.2 hp. at 2800 r.p.m.

ARNOLT SEA-MITE ENGINE

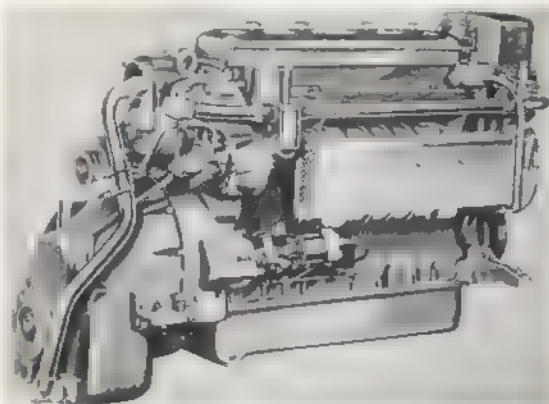

► Minimum weight and dimensions for an engine producing up to 20.2 hp. are found in the Sea-Mite four-cylinder engine built by the Arnolt Corp., of Warsaw, Ind. Producing 5.8 hp. at 800 r.p.m., 14.2 hp. at 1800 r.p.m., and 20.2 hp. at 2800 r.p.m., this little power plant has been used successfully in small craft of all types from fast, light runabouts to heavy auxiliary cruisers, reduction gearing up to nearly 4:1 ratio being available for the heavier work.

The Sea-Mite weighs as little as 181 lbs., in its lightest form, and has a width of 16" and an over-all length of less than 30". It is built in fresh and salt water models and with either light or heavy flywheel, depending on the type of duty

to the important features of any marine engine. The book is free for the asking and may be secured at the Show or by writing to The Flagship Engine Co., Lynch Cove, Baltimore 22, Md.

The Flagship 6-cylinder engines in both direct and reduction gear drive models offer numerous features of advanced design. They are compact and occupy small space for their power. The 72-lb. crankshaft develops almost no vibration due to both static and dynamic balance, counterweights being cast integrally with the shaft. Alloy timing gears, rubber mountings and individually ported fuel distribution add to the engine's efficiency and quiet operation. The camshaft design gives a comparatively flat engine torque curve, indicating high efficiency throughout cruising range.

This 6-cylinder 200 hp. General Motors Series 71 marine diesel is equipped with hydraulic reverse gear. By utilizing the engine flywheel as a functional part of the reversing mechanism, savings up to 40 per cent in gear box space have been achieved

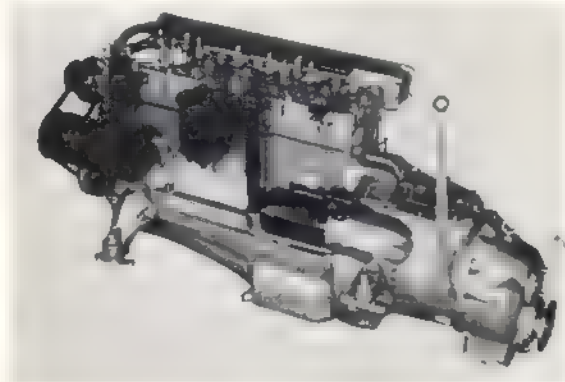

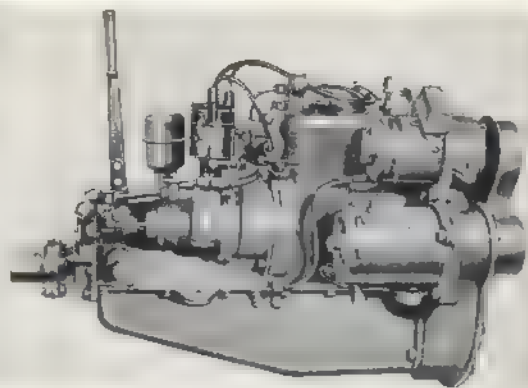

Alloy timing gears, rubber mountings and individually ported fuel distribution are features of the Flagship 6-cylinder engines in both direct and reduction gear drive models

for which it is desired. Accessories are all of standard, well-known makes. The engines are priced up to \$444, for the heavy duty salt water model, with reduction gears costing from \$98 to \$190 extra.

GM DETROIT SHOWS VARIED LINE

► The Detroit Diesel Engine Division's exhibit will feature a variety of models for both propulsion and auxiliary power. The General Motors Series 71 2-cycle diesels displayed range in size from 2 to 12 cylinders and from 65 to 400 shaft hp. Most significant advance in the 1948

United States Motors Corp.'s 10 hp Model 8X35 is a 2-cylinder, water-cooled engine turning 2200 r.p.m. Of 39 cu. in. displacement, it weighs 265 lbs. Standard equipment is electric starter, generator, battery ignition and built-in reverse gear.

Series 71 propulsion engines is the introduction of 1 to 1 gear ratio models in 3-, 4- and 6-cylinder sizes which replace all of the old direct drive units. The standardization of gear case design accomplished by this change has materially reduced the dimensional variations between models and accounts for considerable speed-up in distributor delivery ability. Fuel savings up to 9 per cent are possible as a result of the use of smaller output injectors, which in turn have been made possible by the enlargement of cylinder liner intake ports.

With the exception of the 2-cylinder units, the entire line of propulsion power plants is equipped with hydraulically operated reverse gears so assembled as to form an integral component of the engine itself. Perhaps the foremost advantage of the GM hydraulic reverse gear is the saving in over-all size. By utilizing the engine flywheel as a functional part of the reversing mechanism, savings up to 40 per cent in gear box space have been achieved. Series 71 marine diesel engines are available in a wide variety of gear ratios ranging from 1:1 to 6:1.

Of particular interest is the display of a pair of matched 200 hp. 6-cylinder diesels especially designed for twin screw installations. Port and starboard engines rotate in opposite directions and each is equipped with outboard manifolds. Also shown is a diesel "Twin 6" power plant capable of producing 400 shaft hp. and demonstrating the possibility of obtaining high horse power output with small high speed engines when constructed as multiple units.

Generators on display are a 60 kw. self-contained set driven by a 6-cylinder engine rated at 90 continuous hp. and a 20 kw. packaged outfit powered by a Series 71 2-cylinder diesel with a rating of 33 continuous hp.

It is interesting to note that many basic engine parts such as bearings, connecting rods, pistons, fuel pump and valves are interchangeable in all of the Series 71 models, both auxiliary and propulsion, regardless of size.

One of the highlights of the exhibit is a chromium plated rotating cutaway of a 3-cylinder Series 71 engine.

TWO NEW U. S. ENGINES

► Two new Falcon marine engines will be introduced at this year's Show by the United States Motors Corp., of Oshkosh, Wis.

One is a 1½ hp. one cylinder engine which has a 2" bore, 2" stroke, 6.28 cubic inch displacement, and operates at 2800 r.p.m. The other new 1-cylinder model, which is of 7 hp., operates at 2900 r.p.m. It has a 3" bore, 3¼" stroke, 22.97 cubic inch displacement and weighs 160 pounds. Both engines are available with direct drive or with built-in clutch. The new U. S. 2-cylinder engine is rated at 10 hp. at 2200 r.p.m. and has a built-in reverse gear. It is available for hand cranking, or with a 6-volt starter and battery ignition.

The U. S. line of air-cooled marine engines will, as in previous years, consist of units of 1½, 4 and 7 hp. and will be available with either direct drive or built-in clutch. Heavy duty Falcon engines of one cylinder at 5 hp. and two cylinders at 10 hp. will be standard in 1948. Both models come with battery or magneto ignition and with direct drive or with built-in reverse gear.

The firm's 1948 line will include a wide variety of marine electric plants, including a new 1500 watt unit weighing but 330 lbs. Its design permits a wide diversification of application. In addition there will be exhibited a new four cylinder diesel unit which provides 10 kw. 125 volt service. It weighs 1300 lbs.

SHIPFITTINGS TO SHOW ENGINES

► Gladden Bee-Line air-cooled marine engines, manufactured by Gladden Products Corp., of Glendale, Calif., will be featured in the engine exhibit of Shipfittings Inc., of New York, N. Y. The Bee-line engines come in 4, 6 and 7½ hp. sizes. Each size will accommodate Shipfittings' own clutch and reverse gear. Also included in the exhibit are Bacor reverse gears, manufactured by the Downey Machine Co., of Downey, Calif., and the Chinook reverse gear, made by the Olympic Manufacturing Co., of Seattle, Wash. The Chinook gear is designed especially for high speed inboard air-cooled engines up to 10 hp. It weighs only 17 lbs. and measures 6" by 8" by 14", but its maker says that it is husky enough for heavy duty towing jobs. Olympic also produces a one-way clutch operating on the same principle as the gear.

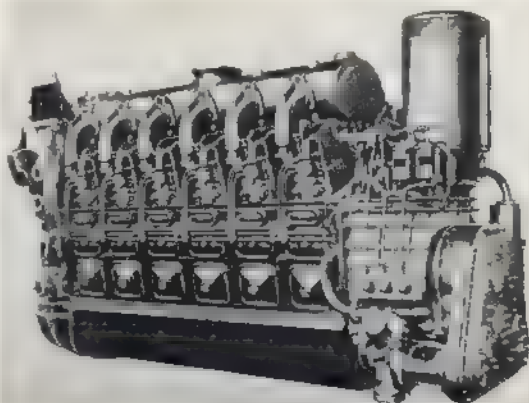

GM CLEVELAND SHOWS 1200 HP. DIESEL

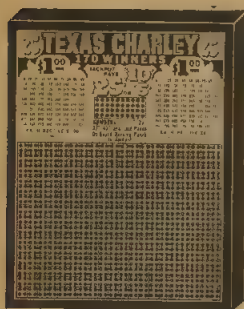

► The Cleveland Diesel Engine Division of General Motors Corp. will exhibit its Model 278A, 1200 hp. diesel. This is a 12-cylinder, 2-cycle engine of steel-type construction designed for ship propulsion. It utilizes the GM unit fuel injection system and uniflow scavenging.

This engine during the war provided propulsion and auxiliary power for many types and sizes of American war craft. With it, together with a small auxiliary, General Motors is enabled to install the complete power plant, including main and auxiliary power, for ships of all sizes. The 278 engine is available in either 6, 8 or 12-cylinder units and is supplied with direct-connected generators for electric drive or with Airflex clutch and reverse gear. Auxiliary engines range in size from two cylinders with 20 kw. to six cylinders with 60 kw. One of the most popular is the Model 71, a 2-cylinder, 20 kw. marine generator set for auxiliary power.

The war record of these engines extended from supplying the main and/or auxiliary power in battleships, submarines, crash boats and DEs to supply-

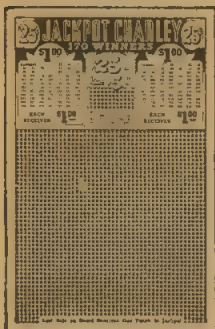

This Model 278A General Motors diesel will be exhibited at the Motor Boat Show. It is a 12-cylinder, 1200 hp. engine and is supplied with direct-connected generators for electric drive or with Airflex clutch and reverse gear.

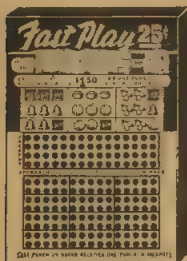

No. 4484—Texas Charley. The latest sensation in 25c Charley boards that reaches a new high in fast profits. Made in extra large 1200-hole size at \$100 per sale. Takes in \$100.00 and has average payout of \$197.72.
Each **\$1.70**

25¢ Charley BOARDS

No. 485—Jackpot Charley. A 25c board with plenty of winners! Extra thick jackpot style. Made in full-size 1200-hole size at 25c per sale. Takes in \$200.00 and has an average payout of \$197.90.
Each **\$1.29**

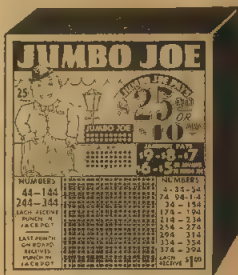

No. 559—Fast Play. Approximately every tenth punch a winner. Supplied in 120-jumbo hole size with slot style tickets at 25c per sale. Takes in \$30.00 and has an average payout of \$15.60.
Each **\$2.03**

No. 515—Jumbo Jackpot Charley. One of the fastest selling boards on the market. In popular thick style, it features newest super jumbo extra large holes. Supplied in 1000-hole size at 25c per sale. Takes in \$250.00 and has average payout of \$197.90.
Each **\$3.28**

No. 4400—E-Z Pickin' Junior. A super popular board. Features super giant holes and two jackpots that insure rapid sales. Supplied in 120-hole special thick size at 25c per sale. Takes in \$30.00 and has average payout of \$17.51.
Each **\$1.55**

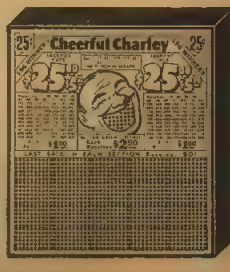

No. 519—Jumbo Joe. Brightly colored and humorously illustrated. Supplied in 400-hole size at 25c per sale. Takes in \$100.00 and has an average payout of \$47.00.
Each **\$2.25**

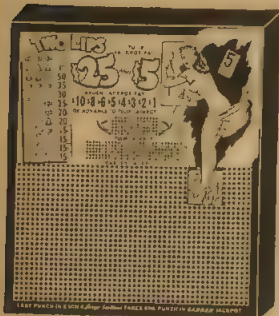

No. 542—Professor Charley. Plenty of \$10, \$5, and \$1 winners and protected numbers. Supplied in 1200-hole size at 25c per sale. Takes in \$250.00 and has a definite payout of \$200.00.
Each **\$1.75**

No. 4486—Cheerful Charley. Plenty of winners. Supplied in extra 1200-hole size at 25c per sale with protected winners. Takes in \$300.00 and has average payout of \$223.02.
Each **\$1.70**

LIONEL LOCOMOTIVES AND TENDERS

**NO. 622 G. M. DIESEL SWITCHER
WITH BUILT-IN HORN**

Scale model of the famous General Motors Switcher. Equipped with electro-magnetic couplers and electric lights at both ends, and illuminated running lights at the front end. Powerful worm drive precision-built electric motor permits most operation at slow speed without stalling or hesitating. The motor is controlled by three-way reversing unit. Runs on 0 gauge and 027 track. Richly enameled in two-tones and fitted with stainless steel hand-rails and stanchions.

No.	Weight each	Each
622	16 lbs.	(F) \$29.50
One in a carton		

Switching Engine with powerful four-wheel drive, (0-4-0), has a thermostatically-controlled Bell built into the Tender. Loco has pilot coupler and headlamp; Tender has back-up light.

No.	Weight each	Each
1650LT	9 lbs.	(F) \$25.00
One in a carton		

Six-wheel drive steam-type Locomotive that puffs Smoke. Tender has built-in Whistle.

No.	Weight each	Each
675LTS	9 lbs.	(F) \$28.00
One in a carton		

**NO. 2333 SANTA FE TWIN DIESEL LOCOMOTIVE
WITH BUILT-IN HORN**

Super-power twin motors with wide speed range are mounted in first locomotive section; second contains realistic, deep-throated Horn. Driver's compartment glassed-in. Rivets, panels, stanchions, windshield wiper, etc., approximately quarter-inch scale. Number Box on nose of loco is illuminated. Authentic and colorful Santa Fe markings. Length is 26 1/2 inches.

No.	Weight each	Each
2333	16 lbs.	(F) \$42.50
One in a carton		

Powerful steam-type Locomotive with 8 driving wheels. Loco puffs Smoke; Tender has built-in, two-toned Whistle.

No.	Weight each	Each
726LTS	9 lbs.	(F) \$42.50
One in a carton		

Scale-detailed replica of Pennsylvania Railroad GG-1 electric-type Locomotive, with built-in Horn. Pantographs can be raised and lowered.

No.	Weight each	Each
2382	9 lbs.	(F) \$37.50
One in a carton		

LIONEL TRAINMASTER TRANSFORMERS

**Type ZW, 250 Watt, 115 Volts A.C.,
50-60 Cycles.**

No.	Wt. each	Each
Type ZW	14 lbs.	(F) \$25.00
One in a carton, two in a case		

**Type VW, 150 Watt, 115 Volts A.C.,
50-60 Cycles.** Rated "Standard" by Underwriters' Laboratory. Can also be used on 125 Volt, 50 Cycle current without overheating.

No.	Wt. each	Each
Type VW	12 lbs.	(F) \$22.95
One in a carton, two in a case		

**Type RW, 110 Watt, 115 Volts A.C.,
60 Cycles.** A new Multi-Control "Trainmaster," featuring variable voltage Speed Control Throttle. Built-in Whistle and Reversing buttons. Two voltage ranges, one high and one low. Heavy welded steel case.

No.	Wt. each	Each
Type RW	6 lbs.	(F) \$13.95

One in a carton, six in a case
(F) Fair Traded

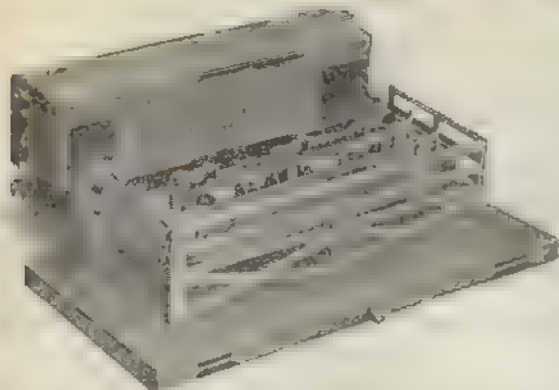

**Type 1033, 90 Watt, 115 Volts A.C.,
60 Cycles.** Has new easy-to-grip Speed Control Throttle for operation of train; Whistle can be blown or locomotive reversed by means of lever at left. Designed for cool running. Has built-in circuit breaker, four binding posts. Permanent finish case.

No.	Wt. each	Each
Type 1033	5 1/4 lbs.	(F) \$10.95

One in a carton, six in a case

One in a box. Twelve in a carton

LIONEL FULLY-AUTOMATIC ACCESSORIES

TRIPLE-ACTION MAGNET CRANE

Motor operates winch to raise and lower block and tackle. Another action swings derrick in 360-degree circle, either direction. Wheel at rear of cab raises or lowers boom. Energized magnet picks up steel scrap. Illuminated cab. Height, 10 inches.

No.	Wt. each	Each
162	7 lbs.	(F) \$19.95

One in a box. Four in a carton

ELECTRIC COAL ELEVATOR

Buckets on endless chain carry artificial coal to bunker, where contents are tipped into loft. At touch of button, gate opens and coal pours down chute into waiting car. Height, 12 inches.

No.	Wt. each	Each
97	6 lbs.	(F) \$15.75

One in a box. Four in a carton

AUTOMATIC WATER TOWER

Most ingenious action. When control button is pressed, spout lowers over waiting locomotive tender. Spout folds back to vertical position when button is released. Tank made of translucent polystyrene.

No.	Wt. per ctn.	Each
30	32 lbs.	(F) \$7.95

One in a box. Six in a carton

GATEMAN

When train nears, door opens and gateman rushes out, swinging lantern.

No.	Wt. each	Each
45	2 1/2 lbs.	(F) \$6.50

One in a box. Six in a carton

SEMAPHORE

Semaphore blade is in upright position and green bull's eye glows when train approaches. After last car passes, blade drops and red light winks on.

No.	Wt. each	Each
151	1 lb.	(F) \$4.95

One in a box. Twelve in a carton

(F) Fair Traded

BLOCK SIGNAL

An ingenious automatic accessory that enables two trains to operate simultaneously on same track. Contactor, bulbs, Lockon, fibre pins and connecting wires included.

No.	Wt. each	Each
153	1 lb.	(F) \$4.25

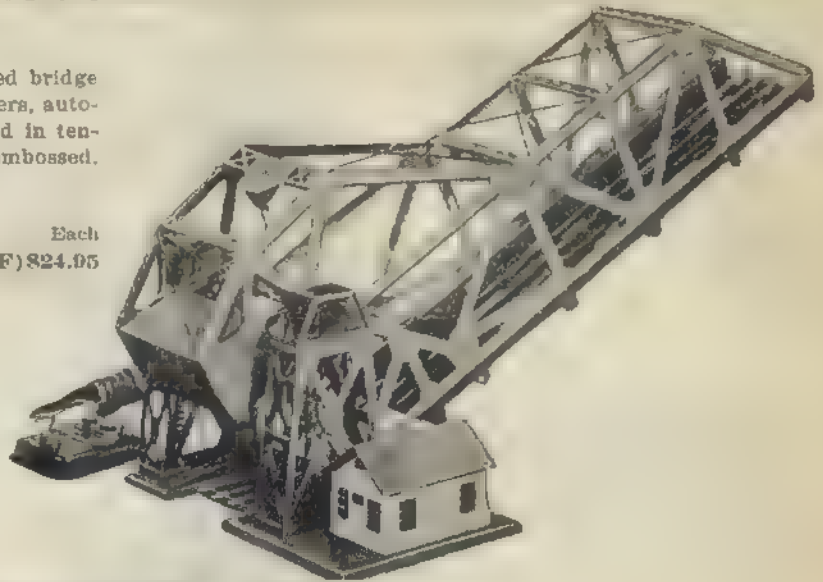

One in a box. Twelve in a carton

LIONEL FULLY-AUTOMATIC ACCESSORIES

AUTOMATIC BASCULE BRIDGE

Operated by remote control. When button is pressed bridge lifts open, halting approaching train. Then bridge lowers, automatically, and train continues its trip. Motor enclosed in tender's shack. Bridge made of heavy gauge steel, deeply embossed. Size when closed: 21 1/2 inches long, 9 1/4 inches high

No.	Weight each	Each
313	11 lbs	(F) \$24.95
One in a carton		

CONVEYOR LUMBER LOADER

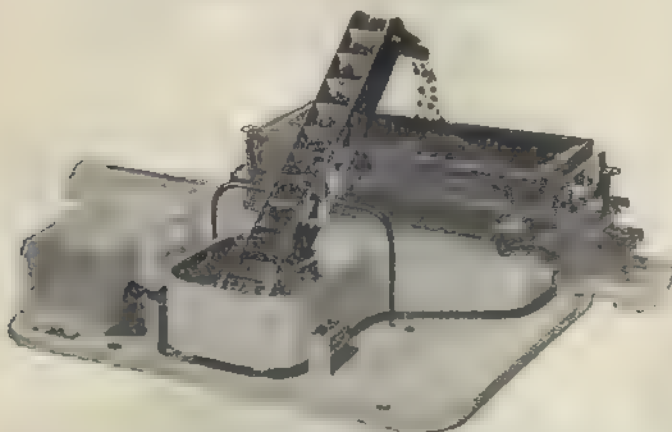

One of the finest Lionel accessories, completely automatic in operation. Logs are unloaded into bin and carried to upper platform on new-type endless belt, where they are emptied by remote control into the lumber car standing in readiness. Entire operation completed on same track—need for sidings eliminated. Conveyor belt has automatic take-up, keeping it taut at all times. Red-green signal lamp illuminated. An extra heavy, all-steel accessory.

No.	Wt. each	Each
364	6 lbs.	(F) \$12.50

One in a box, Six in a carton

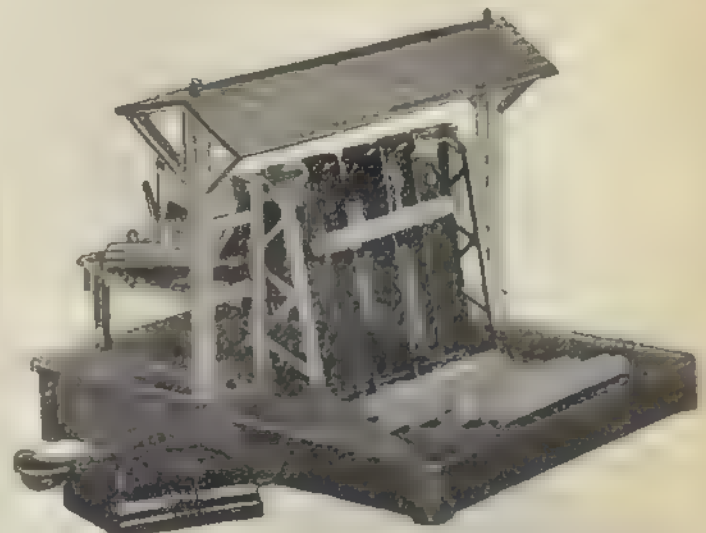

CONVEYOR COAL LOADER

Coal can be loaded and unloaded from the same track by remote control. Switches, sidings, extra track, etc., are unnecessary. When coal is dumped from car, it is fed to conveyor by means of an ingenious vibrating motion. Rubber buckets on an all-rubber endless belt pick up coal and carry it to the top, from which point it tips into the waiting car. Motor is encased in accurately-designed Diesel-type housing. Heavy cast base. A highly colorful accessory.

No.	Weight each	Each
397	6 lbs.	(F) \$11.95
One in a box, Six in a carton		

ELECTRIC LOG LOADER

Hooks on a revolving, endless chain lift logs from trough to the elevated loading platform. When control button is pressed, lumber tumbles into car on tracks below. Dimensions: 9 inches high, 11 1/4 inches wide, 10 1/4 inches long. Logs, controller, wires included.

No.	Weight each	Each
164	7 lbs.	(F) \$21.50
One in a box, Four in a carton		

(F) Fair Traded

DEPT. T

INFORMATION AND INSTRUCTIONS REGARDING ORDERING OF PROTO DISPLAY BOARDS

Display Boards are shipped from the factory F.O.B., Portland, Oregon. They are furnished free, less the tools, and are shipped with all the required mounting hardware, clear installation instructions, and also a Proto sign. No merchandise is shipped from the factory. All boards are same size, 24 inches square.

All Display Boards and tool mounting hardware remain the property of the Proto Tool Company, are to be used only for the display of Proto Tools, and must be returned to the factory on demand.

In order to qualify for these boards, the dealer must have a reasonable representative stock, either on hand or on order with us, to support the proper display of all items to be mounted. No board orders will be accepted from any one other than bona fide retailers and must be approved by us before shipment is made from the factory.

Boards may be ordered singly or in any group of numbers, the only restriction governing the selection is as follows:

Board Numbers 21, 22, 23, and 24 should not be ordered in combination with numbers 11, 12, 30, 52, 81, 96, or 97, because of duplication of items.

**WRITE ALL BOARD ORDERS ON
SEPARATE SHEETS TO BE SHIPPED

★PROTO SLUGGING WRENCHES

Nos. USN 221 to USN 256 — SHORT TYPE

Nos. USN 326 to USN 356 — LONG TYPE

Proto Industrial Slugging Wrenches are designed for all types of heavy industrial work where the working space is extremely limited or highly congested. The 12 point opening fits snugly upon the bolt or nut and will remain in position while being struck with heavy hammer or sledge.

Short Type No.	Each	12 Pt. Opening	U. S. S. Bolt Size	Amer. Std. Bolt Size	Overall Length	Weight Each	Long Type No.	Each	12 Pt. Opening	U. S. S. Bolt Size	Amer. Std. Bolt Size	Overall Length	Weight Each

★PROTO INDUSTRIAL WRENCHES

Nos. 2615 to 2650

For loosening frozen or corroded bolts or nuts. The spud end is very handy for aligning holes in flanges. The offset head overcomes the usual clearance problems. Finish is Industrial Blue. An ideal wrench for construction work, oil refineries, etc. Forged from alloy steel.

All above loose.

★All Proto Slugging Wrenches and Industrial Wrenches are INDUSTRIAL ITEMS.

DEPT. 2

PROTO FLARE NUT WRENCHES

The primary use of the flare nut wrenches is in the assembly and maintenance of all types of lines, including fluid, air, gas, etc. It has a wide variety of applications in aviation, automotive, air conditioning fields, and refrigeration, as well as on such equipment as compressors and various pressure instruments. As illustrated, the head is flat and based on a modified 12 point design, with an opening which allows access to the fitting around tubing.

ics in all lines of industry.

PROTO TOOLS

22-1/2° ANGLE ADJUSTABLE WRENCHES

Forged from alloy steel. Thin and light for stronger and faster work. Five sizes made in full polish and seven sizes in semi-polish. Special feature of the 2 largest sizes is the weight and capacity. The 16 inch size is almost as light in weight as a 15 inch wrench and will perform any job required of the usual 18 inch size. The 20 inch wrench weighs about as much as an ordinary 18 inch type but has an equal capacity of the usual 24 inch wrench.

Another feature on most sizes is the absence of a lip on the inner side of the lower jaw allowing a square nut to fit flat in the opening, providing greater leverage. In addition most sizes have a 12 point box opening in the end of the handle marked with size of opening.

SEMI POLISH FINISH (POLISHED HEADS)

No.	Length	Maximum Opening	Thickest Point of Head	Jaw Tip Thickness	Weight Each	Each
704S	4 in.	1/2 in.	5/16 in.	3/4 in.	1 1/2 oz.	\$1.02

THICKNESS GAUGES

Set of 9 blades, one each: Nos. 003, 004, 005, 006, 008, 010, 012, 015 and 018, in Holder. Blades 1/2 x 3 1/4 inch.

No.	Wt. Each	Each
000-A	1 oz.	\$1.64

Set of 4 Step-Cut blades: Nos. 004/6, 006/8, 008/10, 010/12, with Holder. Blades 1/2 x 3 1/4 inch. Each blade has two different thicknesses, carefully ground and exactly true.

No.	Wt. Each	Each
000-B	3/4 oz.	\$1.32

IGNITION GAUGE SET

Set consists of 10 blades, 1/2 in. wide by 1 1/2 inch long, in Holder. Thicknesses as follows: .011 in., .012 in., .014 in., .018 in., .020 in., .022 in., .025 in., .028 in., .032 in. and .035 in. Complete in Holder. Blades not sold separately.

No.	Wt. Each	Each
000-D	1 1/2 oz.	\$1.21

BRAKE GAUGE SET

Consists of 9 blades, 1/2 in. wide by 4 in. long, of the following thicknesses: .006 in., .008 in., .010 in., .012 in., .014 in., .016 in., .018 in., .020 in. and .025 in.

No.	Wt. Each	Each
000-E	5 oz.	\$1.21

All above six in a box.

9843	10 in.	14 $\frac{1}{2}$ in.	$\frac{1}{8}$ "	3 lbs.	1.12

PHILLIPS SCREW DRIVERS

The four sizes listed below drive the entire range of screw and bolt sizes.

PLASTIC HANDLE

No.	Phillips Point	Blade Length	Diam. Shank	Wt. Per Doz.	Each
9682	1-A	3 in.	$\frac{1}{8}$ in.	$\frac{1}{2}$ lb.	\$1.12
9684	2-A	4 in.	$\frac{1}{8}$ in.	1 lb.	1.25
9686	3-A	6 in.	$\frac{1}{8}$ in.	2 lbs.	1.45
9688	4-A	8 in.	$\frac{3}{8}$ in.	4 lbs.	1.78

WOOD HANDLE

No.	Phillips Point	Blade Length	Diam. Shank	Wt. Per Doz.	Each
9782	1-A	3 in.	$\frac{1}{8}$ in.	$\frac{1}{2}$ lb.	\$0.73
9784	2-A	4 in.	$\frac{1}{8}$ in.	1 $\frac{1}{2}$ lbs.	.79
9786	3-A	6 in.	$\frac{1}{8}$ in.	3 lbs.	.99
9788	4-A	8 in.	$\frac{3}{8}$ in.	4 lbs.	1.32

All above, six in a package

WOOD HANDLE, SQUARE BLADE

Blades forged from finest quality alloy steel fully heat treated passing entirely through the handle and capped at top. Octagon shape wood handles.

No.	Length Blade	Overall Length	Diam. Shank	Wt. Per Doz.	Each
9701	11 $\frac{1}{2}$ in.	4 $\frac{1}{4}$ in.	$\frac{1}{8}$ in.	$\frac{1}{4}$ lb.	\$0.53
9702	21 $\frac{1}{2}$ in.	6 $\frac{3}{8}$ in.	$\frac{1}{8}$ in.	$\frac{3}{4}$ lb.	.66
9704	4 in.	9 in.	$\frac{1}{4}$ in.	2 lbs.	.86
9706	6 in.	12 $\frac{1}{8}$ in.	$\frac{1}{4}$ in.	3 lbs.	1.19
9708	8 in.	14 $\frac{3}{4}$ in.	$\frac{1}{4}$ in.	7 lbs.	1.45
9710	10 in.	16 $\frac{1}{2}$ in.	$\frac{1}{4}$ in.	8 lbs.	1.58
9712	12 in.	18 in.	$\frac{1}{4}$ in.	12 lbs.	1.85
9714	14 in.	22 $\frac{1}{2}$ in.	$\frac{1}{4}$ in.	18 lbs.	2.44

Six in a pkg. except 8 to 14 in. one in a box

CABINET TYPE, SLIM BLADE WOOD HANDLE, CAPPED

No.	Length Blade	Diam. Shank	Wt. Per Doz.	Each
9741	9 in.	$\frac{1}{8}$ in.	2 $\frac{1}{2}$ lbs.	\$0.79
9742	9 $\frac{1}{2}$ in.	$\frac{1}{4}$ in.	4 lbs.	1.06
9743	10 in.	$\frac{1}{8}$ in.	6 lbs.	1.32
9744	24 in.	$\frac{1}{4}$ in.	10 lbs.	1.78

Six in a pkg. except 10 and 24 in. one in a box.

ELECTRICAL TYPE, NO CAP

No.	Length Blade	Diam. Shank	Wt. Per Doz.	Each
9722	2 $\frac{1}{2}$ in.	$\frac{1}{8}$ in.	$\frac{1}{2}$ lb.	\$0.46
9724	4 $\frac{1}{2}$ in.	$\frac{1}{8}$ in.	$\frac{3}{4}$ lb.	.53
9732	4 in.	$\frac{3}{8}$ in.	1 lb.	.66
9733	7 $\frac{1}{2}$ in.	$\frac{1}{2}$ in.	1 $\frac{1}{2}$ lbs.	.79

Six in a package

PHILLIPS SCREW DRIVERS STUB—PLASTIC HANDLE

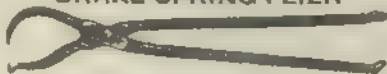

Overall length 2 $\frac{1}{8}$ in. with No. 2 Phillips Point.

No.	Wt. per Doz.	Each
9671	$\frac{1}{2}$ lb.	\$0.86

Six in a package

PLIERS

BRAKE SPRING PLIER

Curved jaw clears edge of brake shoe to bring it in close adjustment with center line of spring. Hook jaw is thin to easily enter under spring.

No.	Length	Wt. Each	Each
215	12 in.	11 oz.	\$2.06

Six in a box.

SHORT SCREW DRIVERS

Wood handle-Capped

No.	Length Blade	Overall Length	Diam. Shank	Wt. Per Doz.	Each
9752	1 $\frac{1}{2}$ in.	4 in.	$\frac{1}{8}$ in.	2 $\frac{1}{2}$ lbs.	\$1.12

PLASTIC HANDLE

No.	Length Blade	Overall Length	Diam. Shank	Wt. Per Doz.	Each
9651	1 in.	2 $\frac{1}{8}$ in.	$\frac{1}{8}$ in.	$\frac{1}{2}$ lb.	\$0.59
9652	1 $\frac{1}{2}$ in.	3 $\frac{1}{8}$ in.	$\frac{1}{8}$ in.	$\frac{3}{4}$ lb.	.73

KEY RING SCREW DRIVER

Hand-forged, individually heat-treated 2 $\frac{1}{4}$ in. long.

No.	Wt. per Doz.	Each
100	$\frac{1}{4}$ lb.	\$0.34

OFFSET SCREW DRIVERS

No.	Length	Diam. Shank	Wt. Per Doz.	Each
35 $\frac{1}{4}$	3 in.	$\frac{1}{4}$ in. Oct.	$\frac{3}{4}$ lb.	\$0.65
36 $\frac{1}{4}$	4 $\frac{1}{2}$ in.	$\frac{1}{4}$ in. Oct.	1 lb.	.70
36 $\frac{3}{4}$	5 in.	$\frac{1}{2}$ in. Oct.	1 $\frac{1}{2}$ lbs.	.87
36 $\frac{3}{8}$	6 $\frac{1}{2}$ in.	$\frac{3}{8}$ in. Oct.	2 $\frac{1}{2}$ lbs.	.92

All above six in a package

PLIERS

SLIP JOINT IGNITION PLIER

Designed for ignition work but has many other uses where narrow jaws are needed. Three jaw-opening adjustments allow parallel openings up to $\frac{3}{8}$ in.

No.	Length	Wt. Each	Each
235	4 $\frac{1}{2}$ in.	1 oz.	\$1.18

Six in a box.

ANGLENOSE BATTERY PLIER

Thin jaws at correct working angle for battery terminal nuts.

No.	Length	Wt. Each	Each
218	8 in.	6 oz.	\$1.27

Twelve in a box.

PROTO TOOLS PLIERS

Proto Pliers are made of fine high grade steels by skilled workmen in a modern plant using fine equipment. Handles are shaped to fit the hand, having correct leverage, proper balance and easy to handle. Teeth are properly cut and cutting edges honed sharp and perfectly matched. All have polished heads and gun metal handles.

COMBINATION SLIP JOINT PLIER

A well-designed, high-quality plier at a low price. Has a shear-type wire cutter. Made in four sizes.

No.	Length	Wt. Each	Each
275	5 in.	4 oz.	\$0.62
276	6 in.	6 oz.	.87
278	8 in.	10 oz.	.87
280	10 in.	1 lb.	1.23

THIN NOSE COMBINATION PLIER

Designed with a slim nose to reach into tight places. Has a shear-type wire cutter. Made in two popular sizes.

No.	Length	Wt. Each	Each
201	5 in.	4 oz.	\$0.72
202	6 in.	5 oz.	.72

THIN BENT NOSE COMBINATION PLIER

Made with a 30° offset thin nose which reaches into many places inaccessible with straight nose pliers. Has a wire cutter of the shear type.

No.	Length	Wt. Each	Each
203	7 in.	7 oz.	\$0.98

COMBINATION SLIP JOINT SIDE CUTTING PLIER

A well-made plier that cuts most wire and nails with ease. Has two jaw-opening adjustments.

No.	Length	Wt. Each	Each
240	6 in.	½ lb.	\$1.17

All above twelve in a box.

HEAVY-DUTY UNIVERSAL PLIER

A husky plier. One jaw is curved, giving a firm grip on objects of almost any shape. Other jaw is grooved for gripping wire or any round surface. Has a shear-type wire cutter.

No.	Length	Wt. Each	Each
257	7 in.	10 oz.	\$1.33

Twelve in a box.

LONG THIN NOSE TELEPHONE PLIER

Popular for telephone work and for radio installation and repair. The long thin nose gets into tight places. Has a powerful shear-type wire cutter.

No.	Length	Wt. Each	Each
260	6 in.	4 oz.	\$1.33

Twelve in a box.

NEEDLE NOSE SIDE CUTTING PLIER

The long thin nose and the side cutters make an ideal combination for radio, telephone and other electrical work.

No.	Length	Wt. Each	Each
226	6 in.	4 ½ oz.	\$1.80

One in a box.

DUCK BILL PLIER

A useful plier for carburetor, radio, refrigerator, electrical typewriter, office machine and many other types of work. Long handles provide powerful leverage.

No.	Length	Wt. Each	Each
227	8 in.	7 oz.	\$2.23

One in a box.

GAS PLIER

Exceptionally popular with refrigeration and diesel mechanics, and all others working with studs, tubing and small pipe.

No.	Length	Wt. Each	Each
258	8 in.	¾ lb.	\$1.37

One in a box.

HEAVY-DUTY SIDE CUTTING PLIER

Designed for utility lineman's work but used also for wiring, and for installation of electrical equipment.

No.	Length	Wt. Each	Each
264	6 in.	7 oz.	\$1.90
268	8 in.	13 oz.	2.72

DIAGONAL CUTTING PLIER BOX JOINT

Honed cutting edges are perfectly matched. A useful plier for switchboard, telephone, ignition and electrical work.

No.	Length	Wt. Each	Each
206	5 in.	6 oz.	\$1.90

DIAGONAL CUTTING PLIER HEAVY-DUTY

A powerful cutting plier, designed with the box joint close to the short jaws to provide great leverage. Cuts heavy wire with little effort. Honed cutting edges.

No.	Length	Wt. Each	Each
209	7 in.	½ lb.	\$1.80

All above one in a box.

PARROT NOSE WRENCH PLIER

A combination plier and pipe wrench with a 75° offset nose and four adjustments, adapting it to a multitude of uses.

No.	Length	Wt. Each	Each
236	6 in.	7 oz.	\$1.45
238	7 in.	10 oz.	1.65

No. 236 one, No. 238 twelve in a box.

WATER PUMP PLIER

An all-purpose plier, with six jaw-opening adjustments. Has a large radius in the movable jaw.

No.	Length	Wt. Each	Each
240	9 ½ in.	10 oz.	\$2.18

Six in a box.

No. 241

Similar to No. 240 but lighter and thinner and with five jaw opening adjustments.

No.	Length	Wt. Each	Each
241	9 ½ in.	9 oz.	\$1.40

Twelve in a box.

GASKET SCRAPERS

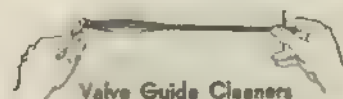

Has many uses, such as scraping carbon, cutting wood, removing shellacked gaskets. Blade 1 1/2 in. wide; overall length, 9 3/4 in.

No.	Wt. Each	Each
2336	6 1/2 oz.	\$1.48

Six in a box.

CLEANERS AND SCRAPERS

Valve Guide Cleaners

Flexible Carbon Scrapers

Nos. 2335 and 2337

No. 2335—An inexpensive new valve guide cleaner that is adjustable, by simply turning nut to all sizes of valve guides. Length, 9 3/4 in.

No. 2337—The 10 flexible blades round spring steel. Sliding band regulates flexibility of edge. 1 in. wide, 9 in. overall length.

No.	Wt. Each	Each
2335	2 oz.	\$1.17
2337	5 oz.	.50

Six in a box

VALVE ADJUSTER

For speed, ease and accuracy when adjusting overhead valves. Uses any standard socket. Loosen lock nut first, then operate driver for adjustment setting valve clearance with Feeler Gauges. This tool is also used with clutch adjusting machines.

No.	Wt. Each	Each
6734	1 lb.	\$2.28

Six in a box.

Finished product of the Art Puppet Creations, a puppet kit recently introduced

Introduced for the first time to the New York area trade at the National Hobby Show in Madison Square Garden, the marionette kits Flip the Pirate and Merry received a very favorable

MARIONETTE KITS

By Art Puppet Creations

response. Furthermore, the stores that carry these items have found them a fast moving number.

Puppetry is being recognized as part of the curriculum in the school systems throughout the country and these marionette kits are particularly adaptable to this kind of work for both education and entertainment value as they are completely jointed making it easy to change the costumes for different characters. In this and other ways these marionettes when completed are similar to large professional type ones.

Each kit includes Ponderosa pine pieces cut to shape, clothing finished and ready to use, hardware and airplane-type controller. The faces are distinctive, attractively painted, and

non-breakable. Instructions include step-by-step construction procedure as well as instructions for operating the puppets. The retail price of each kit is \$3.75.

The height of these marionettes (male is 15½"; female 14½") make them readily adaptable for giving plays especially in conjunction with the collapsible stage which is also available. This stage having a proscenium 42" wide by 28" high is made to fit on two bridge tables—61". Each stage retails for \$15.

The kits which can be made by adults and children alike in the school, home, camp or civic group is manufactured by Art Puppet Creations, 119 West 75 St., New York 23

TESTOR CHEMICAL CO.

OFFERS NEW PLANES

Two new model airplane kits, one free flight and one U-control, are now being introduced by Testor Chemical Co., Rockford, Illinois, manufacturers of a complete line of quality modeling supplies. The free flight model, designated as FG-1 is the result of two years of intensive research and engineering development. During the past year, the FG-1 has been flown in many national contests and has proved itself a consistent prize-winner. Its wide range of usability makes it an especially fine model for both novice and experienced enthusiasts. The FG-1 can be flown with Class A engines, or can be converted to Class B by installation of a Class B engine. In both instances, the FG-1 is an outstanding performer in free-flight competition. The FG-1 is made of a unique T-beam construction, and parts do not have to be laid on plans during

building. Adjustments are easy to make, and parts hold their positions firmly once they are set in place. This kit has the highest-quality balsa obtainable, and is complete with wheels, landing gear bent to shape with tabs attached, motor mounts, and all necessary small metal fittings.

Kit contains a 36 page booklet with legible, easy-to-follow plans, and clearly understandable illustrations. Overall length is 32", wing span is 50", Projected Wing area is 353 square inches.

The PC-1 (Precision Control-Line Model) is a novel U-control plane that has also undergone painstaking development and flight-test research at the Testor plant. Many sound engineering features have been employed to give this model the rigidity and stability necessary for stunt flying. The PC-1, like the FG-1, was contest-proved before pro-

duction-line construction of kits began. Building the PC-1 is relatively simple for the experienced model pilot, because the detailed set of plans are easy to read and grasp. This airplane is designed for Class B flight and will take engines of .23 to .36 cubic inches displacement. All parts are best-grade materials, and wheels, landing gear, and necessary fittings are included in the kit. Wing Span is 36", and the overall length is 30". The PC-1 is licensed under Jim Walker U-Control, U. S. Patent No. 2,292,416. Testor's model FG-1 retails for \$7.50, the PC-1 costs \$4.00.

TOY NEWS AND NEW TOYS

ANIMATED CLOWN DOLL BY JURO NOVELTY

A new novelty doll which made its appearance only a short while ago but is already giving indication of becoming a best seller, is the Animated Clown manufactured by Juro Novelty Co. A big eighteen inch toy of novel design, gay colors and a profusion of bells plus a patented feature which gives movement to the arms and legs, adds up to an impressive total which makes this doll fascinating to little girls.

"In designing our Animated Clown," explained George Jupiter who has recently joined the company, "we laid stress on the psychological soundness of the doll and on producing a quality item at a popular price. The quickest and most effective way to the interest point of the child," Mr. Jupiter continued, "is through sound, action and color—our Animated Clown has all of that. The fact that so many orders of such substantial quantities have already been placed with us, proves conclusively that Juro Novelty again has a hot seller that is quality merchandise at the right price." Mr. Jupiter is well qualified to speak authoritatively on both points holding a B.S. degree in Education (New York University) and coming to Juro Novelty Company with many years of publicity and promotion experience.

The gaily checked material used is red and blue with different colored ruffles. The many bells jingle happily when the patented attachment gives animation to the arms and legs. An extensive advertising and promotion campaign has been carefully planned and includes radio time on forty-eight stations throughout the country.

These animated clown dolls by Juro Novelty Company are trimmed with a profusion of bells.

TESTIMONIAL DINNER FOR SAMUEL LIPPOW

On the evening of Tuesday, March 16th, at the Central Plaza, 2nd Avenue and 7th Street, New York City, a testimonial dinner is being tendered to Samuel Lippow of S. Blechman & Sons, Inc., by a group of over 200 friends in the Notion, Belt, Suspender, Baby Accessories and Toy Industries.

This occasion is to honor Mr. Lippow after 35 years service as a progressive buyer for S. Blechman & Sons, Inc.

In addition to his business activities Mr. Lippow is an active member and trustee of Gotham Lodge No. 1569, B'nai B'rith and a member of Chancellor Kant Lodge No. 870 Masonic order of Free Masons

and is an active worker in many other charitable and welfare organizations.

HARMONICA PLAYED WITH FINGERS

Jolie Musical Instrument Corp. of 14, John Street, New York, manufacturers of Harmonichord, the harmonica that is played with the fingers instead of the tongue, will show this musical item during the Toy Fair in Room 717 at the Hotel McAlpin, as well as by Harry Heath in Room 356, 200 Fifth Avenue, New York. This interesting instrument contains 10 brass reeds, has a colorful plastic body and is hand-tuned. Notes are played by blowing or drawing through the mouthpiece and releasing the finger over the note played. The Harmonichord plays two full scales in the key of C. This item is attractively boxed and priced at \$1.25.

NEW FISHER-PRICE TOYS

Shown here are three brand new numbers indicative of the realism and play value offered in Fisher-Price toys for 1948. At top left is Musical Elephant who rolls along swinging his head and coil spring tail from side to side. His body is made of lined rubber and he plays a variety of musical notes on a piano wire giving off a merry tune as he is pushed along. At top right is Little Milk Truck with long publicized little milkman, the active driver. As he is pushed along, Beau's arms move up and down, banging away on the large nickel bell with his wooden hammers. The sides of the truck are 4-color linographs laminated to solid wood, with Beau in the one brilliant color. The lower illustration is Pony Chime. The drum, lithographed in 5 colors, portrays the theme of a swinging merry-go-round. As the toy is rolled along, three brilliantly-colored horses give the rotational movement of merry-go-round steeds. Patented on inside drum gives forth a tinnyful chime. For catalog showing the full new line write Fisher-Price Toys, Inc., East Aurora, Erie County, N. Y.

These three new musical toys have been added to the famous Fisher-Price musical toy family. Write for catalog showing full, new line.

TOY NEWS AND NEW TOYS

For the Jr. Detective

DICK TRACY FLASHLIGHT

Bantam-Lite, Inc., manufacturers of flashlights, have just launched a new and novel toy item . . . the only official Dick Tracy Flashlight. Dick Tracy, famous detective of comics, screen and radio is an old friend to close to a hundred million people in these United States . . . and No. 1 hero to millions of youngsters.

The Dick Tracy "secret-switch" flashlight (a flip of the finger . . . and it flashes) fits into the palm of the hand, throws a spotlight beam that gives the youthful imagination a spur to deeds of daring-do, a la America's top "crime doesn't pay" man-hunter. It's a toy with universal appeal . . . and it's more than that . . . it's a safe and useful, easy-to-pocket flashlight children can carry with them on hikes, to summer camp . . . and use right at home all year round, encouraging safety-first habits at night.

The Dick Tracy Flashlight has a bright red translucent top which glows excitingly when the flashlight is on. The flash itself throws a "super-powered" beam that "hits the spot" with Junior. The metal case is a deep blue . . . and on it, in shining silver is Dick Tracy's famous face, and an impressive Dick Tracy shield. Each one is individually boxed in a colorful "Dick Tracy" box. It's a toy department "natural" and complete with two penlite batteries and magnifying lens bulb, it's featured at the low price of only 79c.

BALLOONS BY BAYSHORE

It is the opinion of Bayshore Industries, Inc., Elkton, Maryland, that their announcement in this issue is even more dramatic than the one made about their penny balloons last July. Newcomers in the field, they manufacture a complete line of fine quality balloons of all shapes and sizes ranging from the penny balloon to the giant airship. Their decorated balloons are beautifully printed with clever and

original "Kids Pix" designs. They also make plastic covered bladder type play balls in four sizes for indoor and outdoor fun. The Tubby Toss-Up, which is illustrated here, is one of their first balloons of this kind. It retails at 5c. Included with the balloon figure is a paper hat and heavy feet all packaged in a diaphane envelope.

Steri-Clean balloons are made in two sizes, individually packed and especially treated to make them sanitary in every way. Party package balloons offer a modern method of selling a fine assortment at higher unit sales level with full intrinsic value. They produce a package of five cracker balloons which are noisy but safe. "Jolly Jingle Joys" are favorites of the manufacturer. They believe these are truly unique in many respects and point out the excellence of design, decoration and construction of these toys which give them the appearance of being original hand-made models. A musical bell has been permanently sealed in the toy with a special closure for which a patent application has been made. Bayshore states that from their early sales

although ambitious and creative, has adopted sales policies which have proven successful to the most experienced concerns. They place special emphasis upon their sales and distribution policy which is arranged to advance and protect the interests of their customers.

JACK SHAPIRO ADDS NEW LINES

The many friends of Jack Shapiro, well known Sales Representative, 208 North Wells Street, Chicago, Illinois, will find him on deck in Rooms 1161-63-65, Hotel McAlpin, during the Toy Fair. Long known for his ability in discovering unusual new toys and bringing them to the attention of buyers, Jack will display his regular line plus four brand new lines he has just discovered. These include the new blackboards manufactured by Barricks Manufacturing Company, "Tricky Ball," an unusual game that combines skill and chance, made by Sedghill Industries, a Child's Globe and Atlas, made by Replogle Globes, Inc. and a Life-Like Hay-Rack Wagon and Dump Cart in cast-metal, made by the Stanley Toy Company.

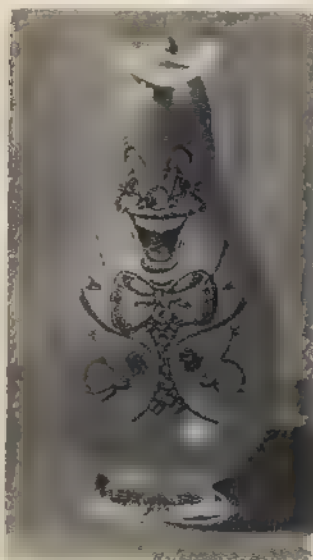

BRESEE TO STAGE CIRCUS PROMOTION

Bressee's Oneonta Department Store, Inc., Oneonta, N. Y., is planning a circus promotion for July 6th and will be glad to receive any descriptive circulars from manufacturers which could be used in connection with their circus.

REMOTROL MAGNETIC HOCKEY GAME INTRODUCED

Remotrol Company, 34 West 37th Street, New York 18, has just brought out a unique innovation in games known as the Magnetic Hockey Game, which is said by the manufacturer to simulate the play of a real hockey game. The players follow the puck as in real hockey and goals are scored when the puck is shot into opposing goal cages. Two or more players can play at one time and each player directs his team by magnetic action from under the elevated board. When the game is played by four players, one from each side control the "goalie," while the other two direct the rest of the men on the field of play.

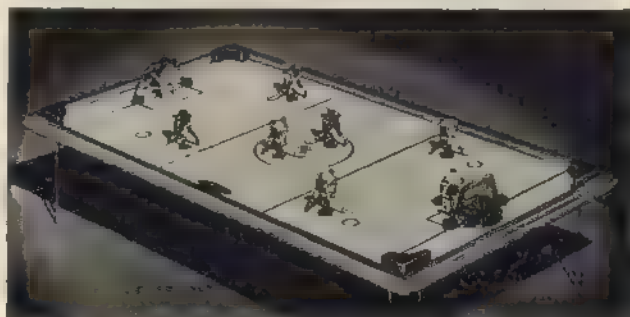

The playing field is 12" x 22" and is made of durable pressboard with a high gloss playing surface on which the hockey men speed as though on real ice.

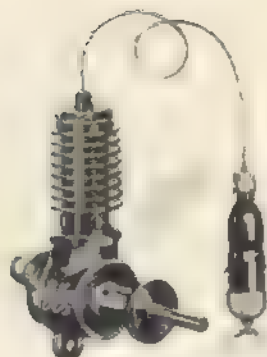

Toss-Up Balloon

records these toys will continue to outsell their production facilities. They add, however, that orders placed now will go a long way to assure early delivery. The management of this progressive company,

HERKIMER

TOOL AND MODEL WORKS, INC.
HERKIMER, NEW YORK

CANADA: Herkimer "OK" Engine Co., 511 Hermant Bldg., Toronto EXPORT: 120 Wall St., New York 5 (All Cables) Concordia, N.Y.

YOU'RE IN SOLID!

And how they sell! Your StromBecker Kits make customers holler for more, more, more, more!

Catch 'em young!

Wait a minute! We know it's dangerous to start off a potential model-builder with a kit too tough for him to finish. He gets discouraged, doesn't come back anymore.

Yep, it's a tactical error to load a big, juicy kit on a little kid. On the contrary, it's plenty smart to start him with a "StromBecker." He can finish it himself—and it's realistic enough to satisfy even professional model-builders.

And maybe you don't think the future of your biz doesn't depend on those beginners! Future customers all. If you start 'em right with a StromBecker solid model assembly kit. Age range: 7 to 70.

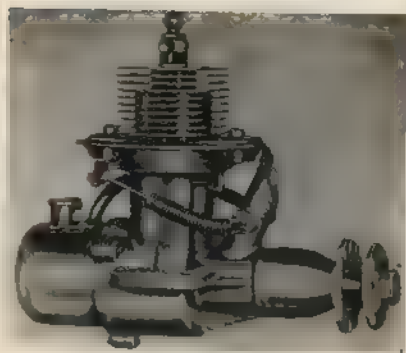

Convair Flagship

To keep out in front, feature the new models! Your customers know! "Convair" is an out-in-front plane, typical of StromBecker leadership. Kit to retail at 69c.

200 Fifth Avenue, New York City

New design by Herkimer Tool and Model Works

"O. K." Announces New Hot-Head Engine Especially Designed for Glow Plug Operation

Herkimer Tool and Model Works Inc. (Herkimer, N. Y.), has announced the new "O. K." Hot-Head, a class B miniature engine especially designed for Glow Plug operation. It was emphasized by the manufacturer that the new engine is not a conversion model but a completely new design engineered to take the stresses peculiar to Glow Plug operation.

Pre-ignition firing subjects the crank shaft and bearing surfaces to unusual stresses, it was stated. To counteract them the "O. K." Hot-Head features an extra heavy crankshaft, .406" in diameter and a bronze main bearing, 1 3/4" long. This results in a balanced engine that gives long life and high efficiency.

A warning was voiced by the manufacturer that it was hazardous to attempt to convert a conventional glow plug engine to Glow Plug. The "O. K." Hot-Head engine is not built strong enough nor will it perform satisfactorily.

Operation of the "O. K." Hot-Head was said to be extremely simple. It is only necessary to connect a 1.5 volt battery to the Glow Plug until the engine starts. The battery is then disconnected immediately and the engine will continue to run on pre-ignition firing.

A special fuel is needed and full information is included in the instruction sheet packed with every engine.

The "O. K." Hot-Head retails for \$12.50 less Glow Plug. The Glow Plug itself is available at hobby shops for 85c.

Specifications of the new engine are: Displacement—.299, B class, Bore—.760, Stroke—.660, R. P. M.—to 11,000. Weight with fuel tank—7 ounces.

Drone Diesel Engine Kit

NEW KIT BY DRONE

Drone Engineering, Inc., of 1163 East Broad St., Elizabeth, N. J., manufacturers of the Drone Diesel Engine, fuel, accessories and kits, have added a new Kit and Propeller to their growing line of products. The latest edition is the Secret Weapon Kit, which is designed by Leon Shulman. The Weapon is a Super Stunt Model of a semi-profile type with the Engine mounted on its side. This model resembles the latest fighter planes in its appearance. Selling at \$3.95, the Kit features the Drone type plans with step by step construction drawings and instructions which have proven so popular. All parts are prefabricated, and very little work has to be done by the modeller in its assembly.

The Drone-Prop, a propeller made especially for the Drone Diesel Engine and to go with the stunt models in general, is being delivered now. This propeller, which is of 11-inch diameter and having a 10-inch pitch, is made from hard wood and sanded smooth with two coats of clear lacquer as a finish, retails at 35c. Both the Drone-Prop and Secret Weapon bear regular discounts.

TOY NEWS AND NEW TOYS

Fred Harman, originator of the famous Red Ryder strip is shown here on his horse "Thunder."

"THE RED RYDER SALES STORY"

Stephen Slesinger, Inc., owners and producers of the famous comic strip Red Ryder, announce the completion of a twenty-minute sound and color motion picture

entitled The Red Ryder Sales Story. The purpose of this unusual motion picture is to graphically illustrate the advantages of toy manufacturers licensing the popular comic strip Red Ryder as an effective sales assistance and promotional advantage in the merchandising of their products. The Red Ryder Sales Story is the first motion picture of its kind to be made and John Howell, Sales Manager of Stephen Slesinger, Inc., has made arrangements to show this film to toy manufacturers during the Toy Fair.

The character Red Ryder and Little Beaver are now being used by thirteen manufacturers—Red Ryder air rifles, cowboy suits, belts, wallets, suspenders, sweat-shirts, polo shirts, books, spurs, ties, sport shirts, beach ensembles and hats are now being manufactured. The Red Ryder comic strip is the creation of colorful, cowboy artist Fred Harman—famous Colorado rancher and leading citizen.

The Red Ryder comic strip first appeared in newspapers in 1938 and now reaches over 123,000,000 people through its appearance in over 750 daily and Sunday newspapers distributed by NEA Service, Inc., through the monthly Red Ryder Comics Magazines distributed by the American News Company, through motion pictures which have been produced on the average of eight each year and through its popular and high Hooperated show which is now offered on a transcription basis by Louis G. Cowan, Incorporated.

Here is gun-totin' Red Ryder as he appears to his many comic strip readers.

W. B. Tischendorf

THOMPSON CORP. ELECTS TISCHENDORF

Election of W. B. Tischendorf, of New Albany, Ind., as vice-president of Thompson Corporation, Brownstown, Ind., is announced by M. O. Thompson, president. He will direct activities in Sales, Advertising, Merchandising and Public Relations. Tischendorf spent 15 years as owner-manager of newspapers in Indiana, and has served on the staffs of the Evansville (Ind.) Press and the Louisville Courier-Journal. During World War II he was Director of Public Relations for Curtiss-Wright Corp., Louisville. Later he handled Personnel, Public Relations and Sales for Laister-Kauffman Aircraft

Corp., Louisville and St. Louis. His advertising experience includes work as an account executive with Bozell & Jacobs Seattle; M. R. Kopmeyer Co. and Zimmer-McClaskey-Kintner, Louisville. The Thompson Corporation manufactures the "Thompson Safety Sled" for national distribution.

EXPANSION PROGRAM

An enlarged and remodeled toy department is on the books for Universal Furniture Co., 2372 St. Claude Ave., New Orleans, La. It will be part of an overall store expansion now underway.

NOMA ELECTRIC VOTES EXTRA DIVIDEND

Noma Electric Corporation on February 5th reported for the six months ended December 31, 1947 — the first half of the fiscal year — sales of \$28,579,509, and net profit, after taxes, of \$2,762,890, equal to \$4.33 a share on 637,997 common shares outstanding. For the full calendar year 1947 the company reported sales of \$45,819,037 and net profit of \$3,127,842, or \$4.90 a share, compared with sales of \$32,373,093 and net profit of \$1,684,706, or \$2.77 a share on 607,628 shares, for the 1946 calendar year. The company changed its fiscal year from a calendar basis during 1947. Directors declared a regular quarterly dividend of 30 cents and an extra disbursement of 20 cents per share on the common stock, payable March 31, 1948 to

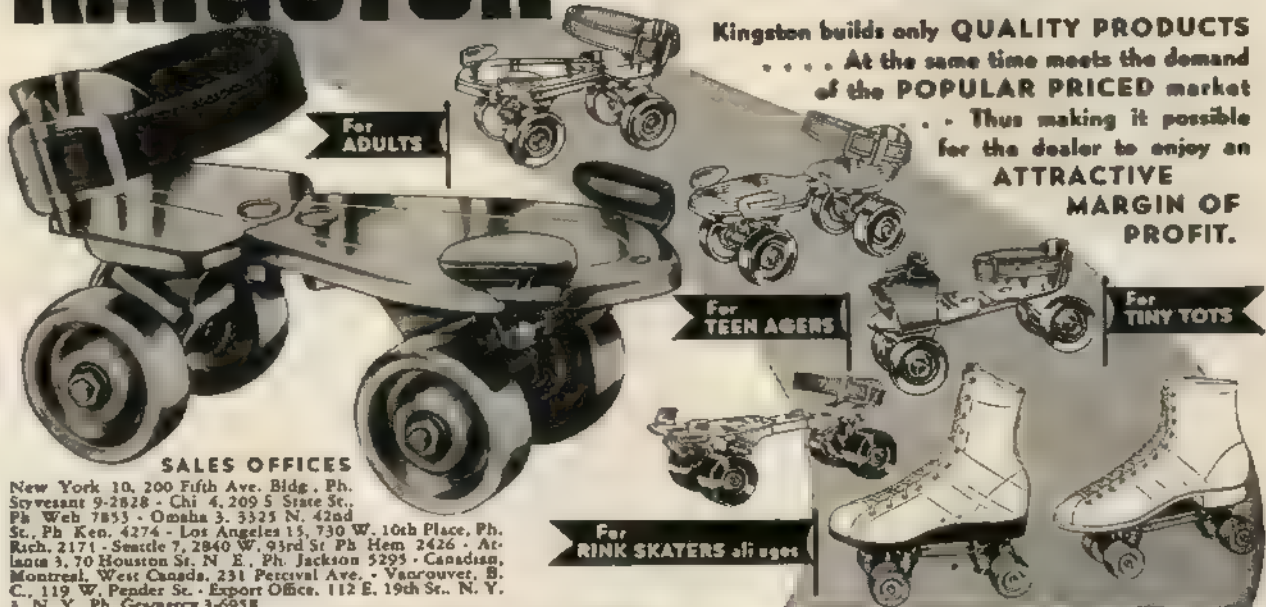

stockholders of record, March 15, 1948.

Henri Sadacca, president, disclosed that the company has entered into an agreement with a group of insurance companies, including Metropolitan Life Insurance Co., Connecticut General Life Insurance, and Connecticut Mutual Life Insurance, for the sale of an issue of 3½% debentures in the principal amount of \$4,000,000, due Feb. 1, 1958. Presently outstanding debentures and notes amounting to \$2,695,000 will be retired from the proceeds of this sale and the balance remaining will be added to working capital.

Commenting on the company's earnings, Mr. Sadacca pointed out that because of the highly seasonal nature of the company's decorative lighting and doll divisions the larger part of the profits are earned during the last six months of each calendar year. "Your management," Mr. Sadacca told stockholders, "is confident that, barring unforeseen conditions beyond our control, the profits for the next six months should be satisfactory." The net worth per share as figured from the unaudited December 31 balance sheet, Mr. Sadacca reported, is \$21.54 and compares with \$18.26 as calculated from the certified balance sheet as of December 31, 1946, previously sent to the stockholders. Net current assets as shown on the December 31, 1947 unaudited balance sheet are \$9,235,214 or a ratio of current assets to current liabilities of 2.60 to 1, as compared with \$8,110,029 net current assets on December 31, 1946 or a ratio of 2.19 to 1.

NEW**MILTON BRADLEY***psych-tested toys***PARADE AT 1948 TOY FAIR**

HERE'S a line of toys that's going to capture the hearts of children all over the country. Yes, and the hearts of their parents, too. That's because parents have the assurance of trained child psychologists that their children are getting maximum entertainment, education, and satisfaction with Milton Bradley playthings. They have the assurance that they are not buying toys that are mere "novelties" soon to be discarded because of lack of interest!

Actual tests involving children of various ages have *proved* Psych-Tested® toys for "playability." Psychologists noted children's actions and comments through one-way glass screens and hidden microphones, evaluated the toys according to their ability to satisfy *nine basic psychological functions* in different age and sex groups! Results are printed on every Psych-Tested® toy package.

Psych-Tested® toys represent another step in Milton Bradley's near-century of service to young America. Parents' appreciation for this service is going to show itself in an overwhelming demand for Psych-Tested® Toys. That's why the new Milton Bradley line of Psych-Tested® toys is a treat on your Toy Fair list. Stop in at Room 340, 200 Fifth Avenue, and we'll be glad to show you how Psych-Tested® toys will boost your toy sales. If you don't make the Toy Fair, write us and we'll send the Milton Bradley line to you via our representative.

TOY NEWS AND NEW TOYS

For the Jr. Detective

DICK TRACY FLASHLIGHT

Bantam-Lite, Inc., manufacturers of flashlights, have just launched a new and novel toy item . . . the only official Dick Tracy Flashlight. Dick Tracy, famous detective of comics, screen and radio is an old friend to close to a hundred million people in these United States . . . and No. 1 hero to millions of youngsters.

The Dick Tracy "secret-switch" flashlight (a flip of the finger . . . and it flashes) fits into the palm of the hand, throws a spotlight beam that gives the youthful imagination a spur to deeds of daring-do, a la America's top "crime doesn't pay" man-hunter. It's a toy with universal appeal . . . and it's more than that . . . It's a safe and useful, easy-to-pocket flashlight children can carry with them on hikes, to summer camp . . . and use right at home all year round, encouraging safety-first habits at night.

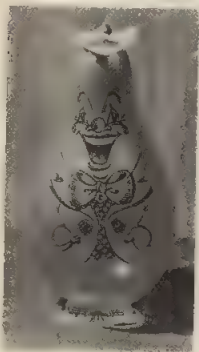

The Dick Tracy Flashlight has a bright red translucent top which glows excitingly when the flashlight is on. The flash itself throws a "super-powered" beam that "hits the spot" with Junior. The metal case is a deep blue . . . and on it, in shining silver, is Dick Tracy's famous face, and an impressive Dick Tracy shield. Each one is individually boxed in a colorful "Dick Tracy" box. It's a toy department "natural" and complete with two penlite batteries and magnifying lens bulb, it's featured at the low price of only 79c.

BALEONS BY BAYSHORE

It is the opinion of Bayshore Industries, Inc., Elkton, Maryland, that their announcement in this issue is even more dramatic than the one made about their penny balloons last July. Newcomers in the field, they manufacture a complete line of fine quality balloons of all shapes and sizes ranging from the penny balloon to the giant airship. Their decorated balloons are beautifully printed with clever and

original "Kids Pix" designs. They also make plastic covered bladder type play balls in four sizes for indoor and outdoor fun. The Tubby Toss-Up, which is illustrated here, is one of their first balloons of this kind. It retails at 5c. Included with the balloon figure is a paper hat and heavy feet all packaged in a diaphane envelope.

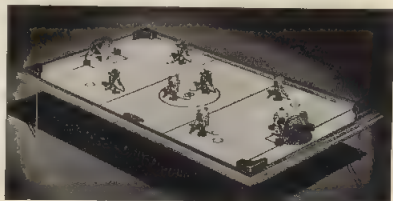

Steri-Clean balloons are made in two sizes, individually packed and especially treated to make them sanitary in every way. Party package balloons offer a modern method of selling a fine assortment at higher unit sales level with full intrinsic value. They produce a package of fire cracker balloons which are noisy but safe. "Jolly Jingle Joys" are favorites of the manufacturer. They believe these are truly unique in many respects and point out the excellence of design, decoration and construction of these toys which give them the appearance of being original hand-made models. A musical bell has been permanently sealed in the toy with a special closure for which a patent application has been made. Bayshore states that from their early sales

Toss-Up Balloon

records these toys will continue to outsell their production facilities. They add, however, that orders placed now will go a long way to assure early delivery. The management of this progressive company,

Magnetic
Hockey
Game
Introduced
by Remotol
Company of New
York

although ambitious and creative, has adopted sales policies which have proven successful to the most experienced concerns. They place special emphasis upon their sales and distribution policy which is arranged to advance and protect the interests of their customers.

JACK SHAPIRO ADDS NEW LINES

The many friends of Jack Shapiro, well known Sales Representative, 208 North Wells Street, Chicago, Illinois, will find him on deck in Rooms 1161-63-65, Hotel McAlpin, during the Toy Fair. Long known for his ability in discovering unusual new toys and bringing them to the attention of buyers, Jack will display his regular line plus four brand new lines he has just discovered. These include the new blackboards manufactured by Barricks Manufacturing Company, "Tricky Ball," an unusual game that combines skill and chance, made by Sedgill Industries, a Child's Globe and Atlas, made by Replogle Globes, Inc., and a Life-Like Hay-Rack Wagon and Dump Cart in cast-metal, made by the Stanley Toy Company.

BREESE TO STAGE CIRCUS PROMOTION

Breese's Oneonta Department Store, Inc., Oneonta, N. Y., is planning a circus promotion for July 6th and will be glad to receive any descriptive circulars from manufacturers which could be used in connection with their circus.

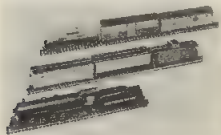

REMOTOL MAGNETIC HOCKEY GAME INTRODUCED

Remotol Company, 34 West 37th Street, New York 18, has just brought out a unique innovation in games known as the Magnetic Hockey Game, which is said by the manufacturer to simulate the play of a real hockey game. The players follow the puck as in real hockey and goals are scored when the puck is shot into opposing goal cages. Two or more players can play at one time and each player directs his team by magnetic action from under the elevated board. When the game is played by four players, one from each side control the "goalies," while the other two direct the rest of the men on the field of play.

The playing field is 12" x 22" and is made of durable pressboard with a high gloss playing surface on which the hockey men speed as though on real ice.

NEW STROMBECKER HO-GAUGE SOLID MODEL RAILROAD KITS

A new line of locomotive and train models, HO-gauge, has been announced by Strombecker Mfg. Co., Moline, Ill., maker of famous Strombecker solid model assembly kits.

The line includes the Mikado 2-8-2 locomotive and tender used by many railroads to draw heavy freight trains; two box cars, two refrigerator cars, a tank car and a caboose.

Realistically scaled at 3 1/4 mm. to 1 foot to fit standard HO-gauge model layouts these trains can be operated like regular HO equipment with the addition of scale couplers and metal trucks. To add to their realism, a set of panels of typical railroad markings used on the cars is included with each kit.

Advertised retail prices: locomotive and tender (11" long), \$1.00; caboose, 40c; tank car, 40c; box cars and refrigerator cars, 35c each.

All Strombecker models are simple enough for beginners to assemble, yet older fans like them for their authenticity of detail. Their ready-shaped, precision-machined parts make for quick assembly, and all the equipment necessary to complete the model is in each kit, including sandpaper, glue and illustrated step-by-step instructions. Only solid Western pine, not balsa, is used for the wood parts.

Window Display Contest

X-acto Crescent Products Co., Inc., manufacturers of X-acto knives and tools, recently announced the first quarterly X-acto Window Display Contest for dealers' windows during the months of April and May.

The contest was introduced in a smash three-color (25% x 11") broadside, offering cash prizes from \$50 to \$10 for the best entries. The broadside included sample windows combining merchandise, the well known X-acto black, yellow and red box, as well as new cardboard blocks of different sizes, shapes and colors. The broadside also featured the vital importance of smart attention-compelling window displays for bigger sales and profits.

The dealer was invited to mail any type of photo, including a simple snapshot, of his X-acto window during the months of the contest. The envelope has to be postmarked not later than midnight, May 31, 1948. Although several display deals are outlined in the broadside, it is not necessary for the dealer to purchase any merchandise or display deal in order to enter the contest.

This contest is the first of a number of energetic promotions planned by X-acto to enlist the cooperation of the dealer

Colored YMCA Opened

A grand display of models, model materials and hobbycrafts was exhibited by the X-L Model Shop of Cincinnati, Ohio, during the dedication week in February of the new Walnut Hill branch YMCA (colored). Some 5,000 people, both colored and white, attended and offered their congratulations. Many notable public and civic officials were

among those who took part in the ceremonies.

City Councilman, Jessie Lockert (colored) was master of ceremonies for the closing exercises on Friday evening, March 5. The discussions seemed to center around models and hobbies. A very interesting talk on the benefits and need of hobbies was presented, with demonstrations, by Carl Doll of the X-L Model Shop.

DOOLING BRINGS OUT NEW ARROW RACE CAR

THE brand new "Arrow" Prototype Race Car is the latest addition to the growing family of cars produced by Dooling Brothers, 5452 W. Adams Blvd., Los Angeles 16, California. Designed to operate with the Dooling "61" racing engine, the car is delivered complete with fuel tank, coil mount, battery container, ignition switch and all other necessary parts, but less engine, coil, condenser and batteries.

The Arrow is now well past the experimental stage and already has proven its merits in speed runs. Eight of the new cars took the first eight places in their introduction races at Fresno, California, February 1948. The winner established a new world's record of 123.78 miles per hour. Since then, another of these cars has re-broken the record with a speed of 123.98 MPH.

General descriptive specifications are as follows:

Wheelbase—10 1/4 inches.
Tread—5 1/2 inches.
Overall length—15 1/2 inches.
Overall height—5 1/2 inches.
Front Tire—3 1/2 inches diameter, solid.
Drive Tire—3 1/2 inches cored, with locking ring.

Rear Axle—Has tapers to fit wheels which eliminates wheel slippage.

Bottom pan—One piece aluminum casting machined to take all appurtenances. Rear axle bearings mount directly in this unit, thereby eliminating extraneous parts.
Top—Plastic, fibre glass impregnated. Top is furnished unpainted.

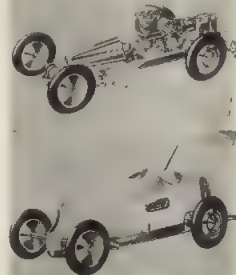

Fuel Tank—The engine is located far back in the car thereby providing room for an "L" shaped fuel tank, 4 1/2 inches long.

Bridle—Lugs are cast directly onto the bottom pan of the car and the bridle attached to the end through adapters. The cast lugs are long enough to take rail track adapters if the owner desires. Special driving tires for rail tracks will be 3 inches in diameter.

Bearings—The rear axle and front wheels are mounted on precision ground ball bearings.

Front Axle—The front axle is made from duraluminum tubing, joined at the center in neoprene cushion mounts.

Engine Support Bracket—The front end of the engine is supported to the pan of the car with a bracket which takes the gear thrust away from the engine frame and holds the gears in proper alignment.

TOY NEWS AND NEW TOYS

ANIMATED CLOWN DOLL BY JURO NOVELTY

A new novelty doll which made its appearance only a short while ago but is already giving indication of becoming a best seller, is the Animated Clown manufactured by Juro Novelty Co. A big eighteen inch toy of novel design, gay colors and a profusion of bells plus a patented feature which gives movement to the arms and legs, adds up to an impressive total which makes this doll fascinating to little girls.

"In designing our Animated Clown," explained George Jupiter who has recently joined the company, "we laid stress on the psychological soundness of the doll and on producing a quality item at a popular price. The quickest and most effective way to the interest point of the child," Mr. Jupiter continued, "is through sound, action and color—our Animated Clown has all of that. The fact that so many orders of such substantial quantities have already been placed with us, proves conclusively that Juro Novelty again has a hot seller that is quality merchandise at the right price." Mr. Jupiter is well qualified to speak authoritatively on both points holding a B.S. degree in Education (New York University) and coming to Juro Novelty Company with many years of publicity and promotion experience.

The gaily checked material used is red and blue with different colored ruffles. The many bells jingle happily when the patented attachment gives animation to the arms and legs. An extensive advertising and promotion campaign has been carefully planned and includes radio time on forty-eight stations throughout the country.

These animated clown dolls by Juro Novelty Company are trimmed with a profusion of bells

TESTIMONIAL DINNER FOR SAMUEL LIPPOW

On the evening of Tuesday, March 16th, at the Central Plaza, 2nd Avenue and 7th Street, New York City, a testimonial dinner is being tendered to Samuel Lippow of S. Blechman & Sons, Inc., by a group of over 200 friends in the Notion, Belt, Suspender, Baby Accessories and Toy Industries.

This occasion is to honor Mr. Lippow after 35 years service as a progressive buyer for S. Blechman & Sons, Inc.

In addition to his business activities, Mr. Lippow is an active member and trustee of Gotham Lodge No. 1569, B'nai B'rith and a member of Chancellor Kant Lodge No. 870 Masonic order of Free Masons

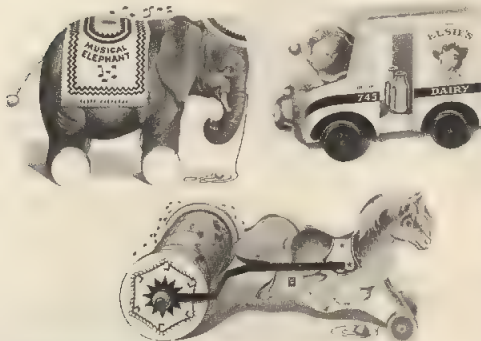

and is an active worker in many other charitable and welfare organizations

HARMONICA PLAYED WITH FINGERS

Jolie Musical Instrument Corp. of 140 John Street, New York, manufacturers of Harmonichord, the harmonica that is played with the fingers instead of the tongue, will show this musical item during the Toy Fair in Room 717 at the Hotel McAlpin, as well as by Harry Heath in Room 356, 200 Fifth Avenue, New York. This interesting instrument contains 16 brass reeds, has a colorful plastic body and is hand-tuned. Notes are played by blowing or drawing through the mouthpiece and releasing the finger over the note played. The Harmonichord plays two full scales in the key of C. This item is attractively boxed and retails at \$1.29

NEW FISHER-PRICE TOYS

Shown here are three brand new numbers indicative of the realism and play value offered in Fisher-Price toys for 1948. At the upper left is Musical Elephant who rolls along swinging his head and coil spring tail from side to side. His big floppy ears of suede lined rubber fabric move with his head. Concealed piano wires give forth a merry tune as he is pulled along. At upper right is Elsie's Milk Truck with highly-publicized little Beau-Regard, the active driver. As he is pulled along, Beau's arms move up and down, banging away on the large nickel bell with his wooden hammers. The sides of the truck are 4-color lithographs laminated to solid wood, with Beau in the same brilliant colors. The lower illustration is 'Pony Chime. The drum, lithographed in 5 colors, portrays the theme of a moving merry-go-round. As the toy is pulled along, three brilliantly-colored horses give the rotating, galloping movement of merry-go-round steeds. Patented action inside drum gives forth a tuneful chime. For catalog showing the full new line, write Fisher-Price Toys, Inc., East Aurora, Erie County, N. Y.

These three new musical toys have been added to the famous Fisher-Price musical toy family. Write for catalog showing full, new line

GUND PRESENTS WALT DISNEY STUFFED CHARACTERS WITH SHOWMANSHIP

The Gund Manufacturing Company—producers of stuffed toys—will present at the New York Toy Fair the two latest Disney personalities, Bongo and Lulubelle, who made their debut in the latest Disney smash-hit, "Fun and Fancy Free." Bongo and Lulubelle have jumped right on to the band wagon of stardom.

Gund, in creating and designing this new line, worked directly from master art taken from the Disney workshop. In discussing this addition to the Gund line, J. Swedlin, president of Gund, said, "Our own designing division was instructed to bear in mind that in recreating these Disney characters, the traditional Gund quality must always be uppermost in their efforts but above all to keep them within prices all families can afford. Disney characters belong to all children everywhere.

Since January 1st, when it became publicly known that Gund was licensed by Kay Kamen, Ltd., to manufacture the Disney character in the stuffed toy division, inquiries have poured in in tremendous volume. It is interesting to note that most of the inquiries strongly urged that the line be made available for this coming Easter season. This, however, was not possible according to Mr. Swedlin because "to do this would mean to rush this project and ultimately deliver a finished product not in accordance with Gund standards and we have therefore decided to launch this line at the Toy Fair."

Gund, who has reason to celebrate the addition of the Disney line, also celebrates

their own Golden Anniversary this year as well. Mr. A. Swedlin, executive head of the firm, stated: "Our fiftieth year should be one in which our many friends will find the Gund line better than ever. The tradition of the Disney line, by the way, will be tied in with the new Disney productions, to enable retailers to use the maximum promotional effect of this line.

"We—of Gund—feel that a child and its parent see more than just a stuffed toy in our Disney line. They see the hero of a story, like Mickey or Donald or Bongo... they see an illusion that comes from the magnificent Disney productions. And you cannot fool children. It is one market that appreciates a good toy, a playable toy. We've tried to keep in mind that we must ultimately—at the point of sale—depend upon the searching examination and approval of some little girl or boy. That child represents our market."

John Swedlin, Sales Manager for Gund, expressed his satisfaction with the results produced by the Designing division. He added: "Gund's new line has everything to merit the interest of the buyer. Our entire sales division extend their most cordial invitation to its many friends to view the new Disney line as well as our latest additions to the 'Famous Family of Gund.' As always, we will be in our permanent showroom in the 5th Avenue Building, Room 232, during the fair. In attendance will be Sam Kay, Jack Cloud, Ernie Kahn, Leo A. Scherrer, Norman Katz and Arthur Keller."

NEW TOYS ON PARADE

Bozo, the Clown

The story of Bozo the Clown is the amazing tale of how a voice and an idea grew into a successful business enterprise which has doubled and tripled itself in an incredibly short time. Starting with a character in a sensational popular Capitol record album, Revella De Marr of Revelco, Inc., created the clown doll with high hopes, but no idea, of how fast he would catch on.

From reports of dealers everywhere, it is estimated that today Bozo the Clown sells faster than any other comparable item in stock. Wherever Bozo has been placed on display, either in conjunction with the albums or alone, he's walked out the door in no time at all. Customers see him, fall for his special charm, and take him home. His appeal is not limited to any age group, and he seems equally popular with boys and girls. To an ever-increasing extent, grown-ups are buying Bozo for other adults. His roguishness seems to make him the ideal stooge. Flopping limbs, expressive eyes, and an amiable smile make him a real personality.

The Bozo tag is now a nationally-known trademark. The colorful circus parade box is a catchy item in itself. With his wild red yarn hair, and boldly dressed in polka dots,

stripes, or checks, Bozo sells himself at \$3.95. REVELCO, INC., 1204 South Grand Avenue, Los Angeles 15, is the manufacturer. Representative handling sales are: Al Bissel, 335 West Madison St., Chicago; Gordon W. Wolkenberg, 200 Fifth Avenue, New York; Jalc & Lewis Sales, 1110 Wilshire Boulevard, Los Angeles.

Kar King's Mate, the Maserati Racer

THE GLEN DIMENSION CO., INC., 2631 South 31st St., Milwaukee 7, Wisconsin, whose Kar King made a name for itself, now follows up with a scale model wind-up of the Maserati racer, shown here driven at the Indianapolis race course by Ted Horn, who was national champion race driver in 1947.

The scale model racer is fully detailed down to the last exhaust pipe and a painted aluminum radiator grill, windshield and two mirrors, and a steering wheel that turns. The heavy-duty motor has free wheeling. Size of the scale model is 10 1/4" in length, 4 1/4" in width, and 3 1/16" in height. The molded tenite car comes in three colors: red, blue, and white. Packed in assorted colors, the racers' cartons also serve as garages.

Manufacturer's representatives include: Sam C. Schmitt, Room 1412, The Merchandise Mart, Chicago 54, Ill.; J. W. Fuller, 1127 Liberty Bank Bldg., Dallas, Tex.; Karl F. Landgraf, 200 Fifth Ave., Room 415, New York 10, N. Y.; J. J. Frankl, 54 Drake Court, Omaha, Neb.; McClellan & Sidebottom, Western Merchandise Mart, 1355 Market St., San Francisco 3, Calif.; and the Atlanta Toy Mart, 1022 Juniper St., N. E., Atlanta, Ga.

Rubber Playballs for Baby

One of the more important toys for tiny tots' entertainment, in the opinion of some child psychologists, is an attractively designed, brightly colored rubber ball. It should have colors that catch the eye and color-patterns that will hold, rather than distract, the attention of the child.

Following the recommendations of experts in child care, the PENNSYLVANIA RUBBER COMPANY, Jeannette, Pa., has introduced a new line of rubber playballs that safeguard the child and at the same time provide the features that will keep baby occupied. The only danger, say the producers, is from baby's making a bull's-eye on the new table lamp and this will never be avoided.

Here, little Eddie Flanagan, age two, tries to put the ball in his mouth—illustrating another point to consider in buying toys for tiny tots. The toy must be large enough that baby cannot succeed and cannot swallow it. The toy must be light enough to handle easily and soft enough that baby will not be injured should he fall on it. Colors must be fast so that the child cannot chew off the coloring matter.

Thoughtful mothers agree with the child psychologists.

TOYS and NOVELTIES—March, 1948

New Huffman Bicycles

WITH the release in January of a full color catalog to jobbers, wholesalers and dealers all over the nation, the Huffman Manufacturing Company, Dayton, Ohio, announced the introduction of a complete new line of bicycles.

Preliminary steps toward the introduction of this first complete post-war line, which include 12 new adult and juvenile models, were taken by Horace M. Huffman, Jr., president of the company, as the last war contracts were being completed. Since V-J Day, nearly \$100,000 has been spent in making dies, retooling and preparing for production. To the best of Huffman's knowledge, this is the first time any bicycle manufacturer has introduced a complete, integrated, stylized line at one time.

Knut Wennestrom, noted automotive and industrial designer, is responsible for the sleek, flowing lines. Huffman engineers, chemists and research experts, and leading independent testing laboratories, have coop-

erated in research and development. Road and laboratory tests have proven superiority over all previous models.

Four adult styles now being produced by Huffman include the Champion, Deluxe Special, Special and Challenger. These are all available in the 26-inch size. In addition, two juvenile styles are available in 24-inch and 20-inch sizes.

During November and December, hand-made models of the new line were displayed at the Huffman factory. Factory sales representatives, Huffman salesmen, and jobbers who had scheduled visits to Dayton during these months, previewed the new line. They accorded it an enthusiastic reception.

Particular emphasis was placed upon the retention of Huffman's rear wheel adjustment feature, which permits the instantaneous replacement of threads holding the rear wheel assembly in place. No tapping, or oversize bolts are now required. Service and sales men are pleased with this fea-

ture which is individual to the Huffman line.

Outstanding in the new-decoration features is the automotive-type chrome trim, which is bonded flush to the surface of the bicycle. This is plated .015 zinc, chromed by a process especially resistant to rust and corrosion.

Focal point of the Wennestrom re-designing plan was the horn-tank, a multicontour, two-piece drawn metal, streamlined shape. It is said to be one of the most elaborate pieces of die work ever introduced into a bicycle manufacturing plant.

Surrounding this central unit, the new Huffman models have been adorned with longer, deeper, wider crescent balloon guards, completely restyled to give adequate protection and imply speed and rakishness of line. Newly-designed curved fender braces add strength and style to the appearance of the new line.

Two-toned finishes are the primary identifying characteristics of the Huffman bicycles. Colors have been blended to further enhance the modern lines of the new frames and accessories, and to provide a stunning effect when the complete line is displayed in the show room or on the sales floor.

Copies of catalog describing the new line in detail are available from the Huffman Manufacturing Company, 117 Gilbert St., Dayton 1, Ohio.

DEMAND FOR HOTEL ROOMS EASES

Further Drop Is Forecast: Requests for Accommodations Now Nearly Normal

The Chicago hotel situation is pretty much back to normal after years of having to turn away guests, Lewis B. Erdmeling, executive vice president of the Greater Chicago Hotel Association, said recently. He said that visitors to the city the last week in January had a choice of about 800 empty rooms in the "loop."

Waiting lines in lobbies are a thing of the past, he said. He predicted that 1948 would show a decrease in Chicago hotel business, compared with last year, which in turn was below 1946. He attributed the decline to the fact that fewer people are traveling, a situation noted in many winter vacation spots.

TOYS and NOVELTIES—March, 1948

ING CO. This manufacturer displayed model race cars and equipment of this type.

MEGOW CORP. presented continual operation of a scale model railroad. It also demonstrated atomic jet racer cars, and displayed airplane and boat kits and accessories.

IDEAL AIRPLANE & SUPPLY CO. displayed master models of ships to tie in with boat and railroad kits on sale in hobby shops.

CRAIG PRODUCTS. Model Weld—all purpose hobby cement was demonstrated.

INNOVATION CO. displayed kits and built-up models of 18th Century Navy cannon and demonstrated metal embossing kit.

AMERICAN HANDICRAFTS CO. featured leather work, metal work, (ash tray forming, bracelets), glass etching, and other general handicrafts not otherwise represented in show.

X-ACTO demonstrated the use of hobby-craft tools, (knives, saws, planes), and linoleum carving kit, wood carving kit, and stencil cutting.

HATCO ENTERPRISES demonstrated the making of shell jewelry.

C. V. H. LABORATORIES demonstrated plastic relief painting on all types of media (cloth, paper, glass, etc.).

UNITED SALES SERVICE demonstrated the use of Airchild Flexible Shaft tool for internal carving of plexiglass.

SANFORD INK CO. demonstrated the use of spatter craft kit on various media. This is a spray gun stencil technique used for decorating purposes.

AMERICAN ART CLAY demonstrated school line of clay, finger paints, and textile paints.

FLEXICRAFT INDUSTRIALS demonstrated the plastic workshop, including use of liquid plastic and wire to produce plastic flowers, butterflies, and decorative items.

A. C. GILBERT CO. operated an HO-gauge railroad layout.

LIONEL CORP. displayed Calvacade of Trains (an interesting exhibit of old-time electric trains).

MANTUA METAL PRODUCTS operated an intricate HO-gauge railroad layout and also displayed extensive line of railroad kits.

NEW YORK SOCIETY OF MODEL EN. GINEERS operated an HO-gauge model railroad layout. (This was a non-commercial exhibit.)

Display of O-gauge, HO-gauge, and OO-gauge railroad models supplied by various clubs.

B & O RAILROAD operated the nation's largest model railroad exhibit (50 ft. long x 20 ft. wide).

TOWN-LINE POTTERS demonstrated pottery work.

MacMillan with Megow Corporation

William L. MacMillan, Jr., formerly with the X-acto Crescent Products Co., is now in charge of sales for the Megow Corporation, Philadelphia, Pa., replacing Thomas L. Skinner, who has accepted another position.

TOYS and NOVELTIES—March, 1948

New Testor Kits

Two new model airplane kits, one free flight and one U-control, are now being introduced by Testor Chemical Co., Rockford, Illinois, manufacturers of a complete line of quality modeling supplies.

The free flight model, designated as FG-1 is the result of two years of intensive research and engineering development. During the past year, the FG-1 has been flown in many national contests and has proved itself a consistent prize-winner. Its wide range of usability makes it an especially fine model for both novice and experienced enthusiasts. The FG-1 can be flown with Class A engines, or can be converted to Class B by installation of a Class B engine. In both instances, the FG-1 is an outstanding performer in free-flight competition. The FG-1 is made of a unique T-beam construction, and parts do not have to be laid on plans during building. Adjustments are easy to make, and parts hold their positions firmly once they are set in place. This kit has the highest-quality balsa obtainable, and is complete with wheels, landing gear bent to shape with tabs attached, motor mounts, and all necessary small metal fittings.

Kit contains a 36-page booklet with legible, easy-to-follow plans, and clearly understandable illustrations. Overall length is 32", wing span is 30", projected wing area is 353 square inches.

Control-Line Model

The PC-1 (Precision Control-Line Model) is a novel U-control plane that has also undergone painstaking development and flight test research at the Testor plant. Many

sound engineering features have been employed to give this model the rigidity and stability necessary for stunt flying. The PC-1, like the FG-1, was contest-proved before production-line construction of kits began.

Building the PC-1 is relatively simple for the experienced model pilot, because the detailed set of plans are easy to read and grasp. This airplane is designed for Class B flight and will take engines of .23 to .36 cubic inches displacement. All parts are best-grade materials, and wheels, landing gear, and necessary fittings are included in the kit. Wing Span is 36", and the overall length is 30". The PC-1 is licensed under Jim Walcott U-Control, U. S. Patent No. 2,292,416.

Testor's model FG-1 retails for \$7.50, the PC-1 sells at \$4.00.

"O. K." ANNOUNCES NEW HOT-HEAD ENGINE

Especially Designed for Glow Plug Operation

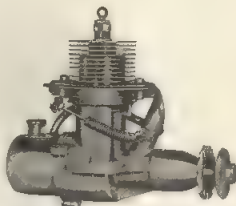

Herkimer Tool and Model Works, Inc., Herkimer, N. Y., has announced the new "O.K." Hot-Head, a class B miniature engine especially designed for Glow Plug operation. It was emphasized by the manufacturer that the new engine is not a conversion model but a completely new design engineered to take the stresses peculiar to Glow Plug operation.

Pre-ignition firing subjects the crankshaft and bearing surfaces to unusual stresses, it was stated. To counteract them, the "O.K." Hot Head features an extra heavy crankshaft, .406" in diameter, and a bronze main bearing, 1 1/4" long. This results in a balanced engine that gives long life and high efficiency.

A warning was voiced by the manufacturer that it was hazardous to attempt to convert a conventional ignition type engine to Glow Plug as a normal engine is not built strong enough nor will it perform satisfactorily.

Operation Is Simple

Operation of the "O.K." Hot-Head was

said to be extremely simple. It is only necessary to connect a 1 1/2 volt battery to the Glow Plug until the engine starts. The battery is then disconnected immediately and the engine will continue to run on pre-ignition firing.

A special fuel is needed and full information is included in the instruction sheet packed with every engine.

The "O.K." Hot-Head retails for \$12.50, less Glow Plug. The Glow Plug itself is available at hobby shops for 85c.

Specifications of the new engine are: Displacement—.299, B class, Bore—.760, Stroke—.660, R.P.M.—to 11,000. Weight with fuel tank—7 ounces.

NEW TOYS ON PARADE

New Farmall Tractor

An exact miniature plastic replica of the Farmall Cub tractor, popular model in the International Harvester line, is now being offered in an easily assembled, educational toy set by REVUEL PRODUCTS, INC. of Madison, Wisconsin.

Complete and accurate, even to gears and molded rubber tires, the little pint-size tractor has a world of appeal for youngsters, with the added interest created for boys of all ages as well as adults who like to assemble finished models from component parts.

Scaled down to 1/16 size, the Revue! model is 8 1/4 inches long and 4 1/4 inches high. It is packaged knocked-down in 21 separate pieces, and may easily be assembled in 10 minutes by following simple directions on the container. The tractor may be put together and knocked down at will, over and over again—a feature which adds to its educational and entertainment value.

The model's interlocking parts are made of Tennessee Eastman's Tenite No. 20, a butyrate plastic. This is a medium hard, durable substance, pliable enough to take the normal beating children give to toys. Construction features include real knee-action front wheels, movable power take off and reversible drawbar. All parts are interlocked: no glue is needed; and the assembly is firmly anchored by three clips. These are of molded rubber, with realistic cleat treads.

The Farmall Cub Tractor is a new addition to the line offered by Revue! Products, Inc., which also includes Bakelite hydroplane model racing boats, model race cars and model fittings. Plans are being completed for national marketing of the new model through retail toy and hobby channels at a price of wide popular appeal.

"Play Ball!"

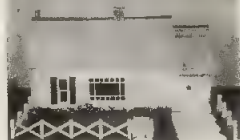

Warm weather months mean that baseball is in the air! This is resulting in a big demand for the juvenile baseball bat produced by SUPERIOR WOODCRAFTERS, 515 Foster Ave., Brooklyn 30, N. Y.

The bat is specially designed for the young ball player, is 24" long, and is smoothly finished. It weighs at only 48 cents.

Regulation table tennis sets in six different assortments, at popular prices, are also available for immediate delivery.

House and Furniture From Kits

With kits containing precut parts, model makers can build a miniature replica of a Cape Cod house, complete with Early American style furniture. These kits are made by FAMILYCRAFT, Oconomowoc, Wis.

Walls and roof of the four-room house are nailed together. With the inside partitions removed, the entire interior can be seen through the picture window and, with the garage attached, the house can be used as two birdhouses. Complete furniture for the living room, dining room, kitchen and bedroom is available in separate kits. The parts are glued together and stained or covered with fabric scraps. The scale of the models is 1/2-inch to one foot.

Swimming Vest for Kiddies

A newly-designed swimming vest for children has been introduced by THE AMERICAN FAD & TEXTILE CO., Greenfield, Ohio. Designated as Model 18 Stay-A-Float, the new product is designed specifically for children aged 2 to 5 years, and for that reason differs in several respects from the Model 18 Stay-A-Float, which was the original child's swim vest. The Model 18 is filled with new Java kapok, distributed in such a manner that the wearer is automatically placed in swimming position by the buoyancy of the vest.

In addition, the new model features kapok-filled shoulder straps as contrasted to the usual web straps. A patented feature is the crotch straps which prevent slipping of the

vest in the water. Cloth covering is so quilted that the filling cannot bunch or become lumpy.

The Model 18 Stay-A-Float is manufactured in one size, to fit children from 2 to 5 years of age. Blue and maize background colors are available, printed in red with an attractive "Old Swimmie" Hole" design which appeals to children as well as parents.

"Cone-it", a New, Fascinating Game

PARAMOUNT MFG. CO., Leominster, Mass., is introducing a new patented game (other patents pending) called "Cone-it", which provides fun and enjoyment for all and tests the skill of young and old alike. This new lively game has created a mild sensation wherever it has been shown. Buyers and dealers who have seen it assert it will have a phenomenal success.

The toy, made of durable plastic in several colors, consists of a cone-shaped cup mounted on a handle, with a small rubber ball attached to center of the cone by means of an elastic. The object of the game is to catch or "Cone" the ball as many times as possible without missing. Children will discover many different ways of accomplishing this feat. Keeping score adds to the enjoyment of the game. Considerable skill is required for a high score.

The company's New York and Chicago representatives are now showing this sensational game.

TOY NEWS AND NEW TOYS

Apache Air Pistol

NEW AIR PISTOL

With the success of the Apache Air Rifle behind them, National Cart Corporation, well-known Pasadena, California, manufacturers, began work on a new air pistol some six months ago with the result that today, with mass production lines humming, this new product of this up-and-coming company in the West is now a reality: off the drafting boards and into production in a little under half year! Using the same precision ball ammunition in the big .250 Cal. size, the new Apache Air Pistol parallels its big brother, the Apache Dual-Caliber Air Rifle in shooting ability although not in range, of course. Test firing from a fixed position, the new Apache Air Pistol makes a very neat pattern on the 50-foot target, penetrates $\frac{3}{4}$ " pine easily—and the big .250 Cal. pure lead ball shot lends itself to really "knocking them down" with uncanny accuracy. A great deal of this accuracy comes from the precision rifling employed, the beautiful balance of the gun itself, its easy "squeeze" trigger and the amount of air under pressure in its firing chamber.

Made entirely of brass and aluminum, the new Apache Air Pistol is completely rust-proof, a big factor in hand guns as well as rifles. Both the firing barrel and the air pump barrel are pure brass, with the stock of aluminum mset in tool steel. Of extreme interest to the sporting goods trade is the fact that this new pistol carries a six-shot, automatic loading device. This allows loading but once for six shots, each fed into the firing chamber singly by an inset plunger that is worked quickly by a loading gun in the breech housing. The .250 Cal. bullets in the loading chamber are kept under loading tension by means of a spring and all that is required to load is to pull back the plunger, the ball shot then rolling into position for seating in the rifling. Other important features of the new Apache Air Pistol are: Precision rifling, adjustable sights (for windage and elevation or for use in "sighting in"); all brass valve parts, duo-tone finish, easy pump action, air reservoir storage, automatic safety device (the pistol may be pumped only on safety although it may be carried loaded); lifetime service guarantee. The "lifetime service guarantee" parallels the guarantee which has worked out so successfully on the Apache Air Rifle and consists of a warranty in writing with each pistol which covers it completely. All materials and workman-

ship are unconditionally guaranteed; operation and use of the pistol are covered by a "return privilege" whereby any pistol which gets out of order will be repaired and reconditioned for \$1.50 if returned to the factory. Attractively packaged in a simulated walnut display box, the Apache Air Pistol is $11\frac{1}{4}$ " in length and weighs but 20 ounces. Made by the National Cart Corporation, 330 South Fair Oaks Avenue, Pasadena 2, California, an affiliate of Burhans & Associates.

JUVENILE STORES TO HOLD MEETING

Announcement is made by Juvenile Stores, Inc., that a meeting will be held at the Hotel Pennsylvania in New York on March 12th. Juvenile Stores, Inc., was formed by a group of stores from coast to coast specializing in children's furniture and toys. The purpose of the organization is to exchange merchandising ideas and other information. Those who are interested should write to I. M. Weiraub of the Darling Baby Carriage Company, 370 Gerard Avenue, New York City.

Scale Model by Doepke

THE "MODEL" ROAD GRADER

The Charles Wm. Doepke Mfg. Co., of Rossmyre, Ohio, has announced its 1948 addition to the Model Toys line . . . the Model Road Grader. As the name "Model Toys" implies, the toys are skillfully patterned after giant construction equipment; and the Doepke Company spares no time or expense in making their toys faithful replicas of the great trucks, concrete mixers, bucket loaders and road graders that are helping to build postwar America. Model Toys even carry trade mark decals—copies of their prototypes in addition to the model insignia. The new Doepke toy carries on the tradition of "realism in miniature." It's a faithful copy of the Adams Diesel Motor Grader—even down to the front wheels, the jointed front axle, and the tandem rear wheels. The scraper blade turns in a 90° arc, and adjusts both vertically and diagonally. Even the color is the same—Adams brilliant orange! Actually, the only big difference between the original and the copy is the size. One weighs over ten tons; the other, just 10 lbs. 2 oz. Another new Doepke development is a special packaging deal, including the three other Doepke numbers. One Earth Hauler, two Bucket Loaders, and two Concrete Mixers are packed with a special counter card, making a complete window display. The Charles Wm. Doepke

Mfg. Co. is a member of the Toy Guidance Council, and the American Toy Manufacturers Association and holds the Seal of Commendation issued by Parents Magazine.

HERBERT GEORGE'S NEW TOOT-MON

Among the various new items which the Herbert George Company, Chicago, will display at the Toy Show is their latest creation, the Toot-Mon Scottish Bagpipe. Officials of the company state it is their belief that the Toot-Mon is one of the most unique, universally appealing and saleable items they have ever produced in their long history as manufacturers of precision-built toys and optical specialties. Victor Israel, speaking for his company, predicted that this new item would sweep the country, particularly since it is purposely priced to appeal to the mass market, retailing for 49c.

The new Toot-Mon is modeled to look and sound like a genuine Scotch bagpipe. It has a brilliantly colored balloon bag of Lee-tex gum rubber and a highly lustrous two-toned plastic pipe upon which any tune may be played. In principle, too, the Toot-Mon is constructed after its Scottish model.

An automatic valve built into the pipe controls the release of air from the inflated balloon so that it flows out through stops in the pipe and produces the scirling notes typical of the Scotch bagpipe. The Toot-Mon will be sold on individual display cards, complete with instructions and a tune book.

Another new item being shown for the first time by the Herbert George Company is their 4 Power De Luxe Herco Binocular, which will retail for \$5.95 complete with an ever-ready carrying case of simulated leather. Mr. Israel says that no effort has been spared to make this binocular an extraordinary value. It embodies many features found in the most expensive binoculars—having optically ground and pitch polished lenses, extra wide field of vision, center break for inter-pupillary adjustment, quality aluminum fittings, etc.

The company announces that due to record-breaking sales of their 3-piece Snow White Dresser Set they have stepped up production to the extent that they are now in a position to offer it at a new low price. The set can now be retailed for \$2.50. The Snow White Dresser Set, consisting of brush, comb and mirror, is decorated with Walt Disney's appealing Snow White and the Seven Dwarfs figures and is sold in a Disney designed gift box.

CIRCULAR SAWS

ATKINS SOLID TOOTH

Rip or Cross Cut

Made of genuine silver steel which is the finest and most expensive material that has ever been used in saw blades.

Ground and tempered, filed and set ready for use

Directions for Ordering—State diameter, if right or left hand, gauge at center and rim, number of teeth, size of mandrel hole, center to center of pin holes, kind of timber to be sawed, spring or swage set and whether to be used for ripping or cross cutting.

Diam., in.	Thick-ness ga	Size of hole, in	Each	Extra for each gauge	Approx. net wt., lbs.
6	18	3/8	\$ 3.30	\$ 0.07	3/8
7	18	3/8	4.40	10	35
8	18	7/8	4.40	10	35
10	16	1	5.60	.20	45
12	15	1	7.00	.30	55
14	14	1 1/8	8.50	.40	65
16	14	1 1/8	10.50	.50	75
18	13	1 1/4	12.50	.60	90
20	13	1 1/2	15.00	.75	1.05
24	11	1 3/4	20.50	1.05	1.35
26	11	1 3/4	24.00	1.25	1.55
28	10	1 1/2	28.00	1.50	1.75
30	10	1 1/2	32.00	1.75	1.95
32	10	1 5/8	36.50	2.00	2.15
34	9	1 5/8	41.00	2.25	2.35
36	9	1 5/8	47.00	2.60	2.55

All saws under 6 inches in diameter take list of 6-inch saw.

All saws of odd diameters take list of next larger size.

No extra charge for saws one gauge thicker than list. No extra charge for saws one to three gauges thinner than list; when more than three gauges thinner, add 5% for each gauge.

Saws more than two gauges thinner than list above not warranted.

Saws beveled one gauge without extra charge. Saws hollow or concave ground add for each additional gauge hollow or concave ground double the list for beveling.

Saws for cutting Bone, Horn or Ivory, add 50% to the above list. When these saws are hollow or bevel ground, the 50% advance is to apply only on the list of straight gauge saw, and not on extras for hollow or bevel grinding.

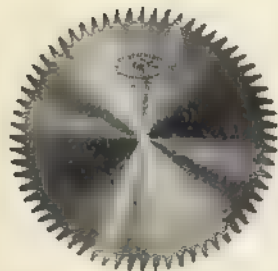

Note—If Log Saws are to be driven by gas engines, please state full particulars as to horsepower, speed and feed.

CORDWOOD SAWS

"SUPERMARKET SYSTEM" WORKS OUT WELL FOR FLORIDA TOY DEALER

By ROBERT A. LATIMER

SOMETHING of an innovation in toy store management was recently introduced by E. H. Schroder, head of Schroder's Toy Shop, at 330 S. Olive street, West Palm Beach, Florida, in the form of store-sectionalizing which is an adaptation of "supermarket merchandising."

The Schroder store, which has expanded almost continuously for the past five years, has taken over adjoining shop after shop, so that the building now consists of separate toy showrooms on many levels, with short flights of stairs leading the customer from one to another. Due to extreme diversification of its merchandise, Mr. Schroder often had difficulty in finding requested merchandise

himself, and customers were frequently at loss where to look.

The solution proved to be setting up a section-number system, whereby all merchandise on display in the store is divided into 10 individual areas, all identified by signs suspended from the ceiling which read "aisle No. 1", etc.

Under this plan, there have been many remarkable improvements. First, it is possible to operate with inexperienced help, by simply assigning each to a particular section, and training them to look by section number for specific items, according to Mr. Schroder. Second, customers coming in to "browse" may be easily directed to the proper department. Third, Self-Service has been

greatly encouraged, many customers looking up the proper aisle number, selecting their toys, and bringing them to a cashier at the front of the store to make payment.

Merchandise is classified in this way, by aisle numbers.

Aisle No. 1—Small knick-knacks and 10-cent toys.

Aisle No. 2—Airplane kits

Aisle No. 3—Pastime toys for girls.

Aisle No. 4—Pre-school toys

Aisle No. 5—Pastime toys for boys.

Aisle No. 6—Stuffed animals

Aisle No. 7—Baby toys for layette sets.

Aisle No. 8—Dolls

Aisle No. 9—Games.

Aisle No. 10—Books.

Each new toy item as received in the receiving room at Schroder's is assigned a specific aisle number, and the person in charge of that section further assigns it a display spot. The only exceptions are "hot" seasonal items, which are displayed on flat tables in the main showroom, near the cashier's desk, or those which require careful demonstration and explanation to sell, such as electric trains, construction sets, science-training kits, etc.

Developing the sectionalization idea farther, Mr. Schroder has assigned a separate display window to each of the 10 sections, which has proven helpful in getting customers to go to the right section of the store. Thus, customers interested in dolls find a comprehensive window display in the center front of the store, and the doll department directly behind, while the farthest window to the left shows books and games, for Section No. 10, which is devoted entirely to children's books. "We have found that we can get along with far less help, find merchandise more quickly, and take inventory with less difficulty under this system," the toy dealer summed up.

E. H. Schroder, head of Schroder's Toy Shop, in front of a merchandise section, which is part of his novel "Supermarket System"

LET YOUR SELLING SPACE SELL

(Continued from page 102)

other words, are you taking advantage in full measure the selling space you now have? Study your situation carefully to determine whether any merchandise or merchandise display is taking up more space than it reasonably should.

Generally speaking, it is good business to allow the greatest amount of display space to those items having a wide profit margin and a rapid turnover. For it is these items on which one makes the best profit. Naturally, however, this rule does not hold true in all cases. The type of display, for instance, will to some extent determine the amount of space necessary. Too, the dealer will want to display some of his smaller

profit-making items from time to time. The important thing to remember, though, is to try and allot an appropriate amount of space to every display in the store so that maximum profit will be realized in the long run.

3. Let no selling space within the store go unused. Make every effort to see that counters, merchandise displays, tables, and so forth, are always well stocked. To let a table on the sales floor remain bare, or a merchandise display to dwindle, is a sinful waste of selling space—and a real profit loser. Keep such spaces constantly stocked with merchandise and realize maximum returns from them.

Similarly, keep bins, drawers, etc., which are adjacent to the sales floor always filled. Keep merchandise handy—where clerks or customers can readily get at it. That's the way to use selling space to the fullest.

4. Never allow your selling space to become cluttered with merchandise, waste, and so forth. Don't permit selling space to become so cluttered, for instance, that clerks (and customers) are falling over things. Permitting such a condition makes selling difficult for personnel—and once again causes profit loss. Arrange your selling space so that merchandise can be shown attractively to the customer. Arrange space, too, so that sales personnel may work efficiently within it.

Authenticast TOY SOLDIERS

There are toy soldiers and toy soldiers but none like the "Authenticast" Toy Soldier. Though "Authenticast" Toy Soldiers are playthings yet they are precision-cast, hand-painted and exact in every detail. Year in and year out they outsell all toy soldiers. So, when at the fair, don't pass up the opportunity, IN PROFITS, that's in every box of "Authenticast" Toy Soldiers.

NATION CLAMORS FOR SUZY-BELLE

THE MECHANICAL CHICKEN THAT . . . WALKS, PECKS,
CACKLES, AND LAYS EGGS!

NO other toy in the history of the "FAIR" has ever made such an illustrious debut as SUZY-BELLE — BALDWIN'S sensational new fraction mechanical chicken. Radio and television have carried her delightful cackle and winsome charm to so many millions, the demand sky-rocketed far beyond expectations months before SUZY-BELLE was ready to go into production.

If you're not one of those who has already contributed to the recent flood of mail re: SUZY-BELLE, please . . . PLEASE do so now before we have to supplement our reply with: "Sorry, no more orders being taken."

BANNER CIRCUS TRAIN SETS

No. 1

on the PLASTIC HIT PARADE

Indoor weather means additional sales and profits with truly popular indoor activity toys. Banner's two circus train sets have captured top-rating honors in store after store throughout the entire country. During winter months these two sets will continue to roll up increasing sales records. Stock them, show them, sell them!

No. 95—For the junior Barnum and Baileys a complete set of miniature circus cars, made of sturdy plastic in bright, toy-tested colors. Set consists of: 1 tractor with movable wheels, 1 box car, 1 animal cage car, 1 callopo, 1 carousel. Boxed in "longie" two-color 11½" x 2" x 2" carton. To retail for 39 cents

No. 97—It's under the big top for the kiddies this winter when indoor toys are so important and so popular. The king size Banner Circus Train consists of: 1 tractor in multi-color plastic, two box cars, 2 animal cage cars, 2 callopos, 2 carousels. Novel, easy-to-display longie box in two-colors. To retail for 59 cents

TOY NEWS AND NEW TOYS

A Trophy assortment

POPULAR TROPHY MUSICAL TOYS

Shown in the accompanying illustration are four popular musical toys featured by Trophy Products Co., Cleveland, Ohio. Made of colorful, sanitary plastic, they include "Hezzie," the "Eutophone," a "Sax-O-Fun," and "Soussafun."

Junior can drop them or pound the furniture with them and they will still play accurately, as with all Trophy musical toys, they have scientifically designed acoustical chambers and replaceable vibrators. The "Sax-O-Fun" is featured by Spike Jones' band of "City Slickers," while "Hezzie," the slide whistle, takes its name from the famous leader of the "Hoosier Hot Shots."

RIG-A-JIG'S NATION-WIDE COLORING CONTEST

An ingenious advertising and sales promotion thru Children's Activities, in their March, April, May, and June issues, features a coloring competition.

According to Wm. Roth, vice-president of Rig-A-Jig Toy Company, one of these Rig-A-Jig construction ideas, such as the Woman with Doll Buggy, will be featured monthly in large outline picture. Children are instructed to color with crayons or colored pencils. They color the circles, red, the triangles, yellow, etc.—all the 7 different geometric shapes in their correct colors so that the finished picture looks like the real toy. 37 prizes from \$10.00 down are being awarded on the basis of neatness.

Rig-A-Jig is highly commended by educational authorities for the way it entertains, while helping to develop a whole battery of basic personality factors, such as muscular coordination, creative imagination, finger dexterity, color discrimination, space visualization, and a general speeding up of thinking and reasoning faculties. Doctors also have found that Rig-A-Jig has substantial therapeutic value for children confined to hospitals because it fosters

good emotional drives in a child and eases the hardship of inactivity.

Dealers recognize in Rig-A-Jig a sound year 'round promotional toy, especially desirable during seasonal lags. Further details on the Contest and the ups with it are obtainable by writing Rig-A-Jig Toy Company, 32 W. Washington, Chicago 2, Ill.

EUGENIA BOOKING HEAVY ORDERS ON BABEE WEE

The latest word from Eugenia Doll Co., New York, is that their new wetting doll is proving "a ball of fire." "Orders have been pouring in at such a pace, there is a likelihood that these dolls will have to be allocated for the balance of the year," said the firm spokesman.

One of the features that have won for Babee Wee this tremendous popularity is its remarkably light weight. Eugenia dolls sell in the popular price range. For example, Babee Wee in the 20-inch size retails for \$9.98.

Babee Wee and other new numbers in the Eugenia line are now on display in the 200 Fifth Avenue Building, New York, Room 534, with popular Benj Portugal in charge.

Babee Wee and layette

LEADER MERCHANDISE CO. GETS LARGER QUARTERS

The Leader Merchandise Company has moved to new and larger quarters at 45 East 20th Street, where they will continue to feature their low priced merchandise in addition to many new lines. They are now handling a complete line of toys, novelties, plastic specialties and many other items in the 5c to \$1.00 field.

Leader has a constant stock on hand of all their items with many new products being supplemented to their line from time to time. Their Fall line this year will contain mechanical toys made of metal and plastic, decorations of every type and style for the tree and home, and other interesting items. Samples of their entire line are on display at their new show room.

TOY TOWN CORP. INTRODUCES THE BABE RUTH OFFICIAL BASEBALL GAME

Toy Town Corp., manufacturers of "Squealie" and "Tee-Off," are introducing Babe Ruth's Official Baseball Game to the trade during the American Toy Fair, March 8th through 20th.

This baseball game simulates all the features of professional Big League Baseball.

George Geller and Jack Otis of Toy Town showed the baseball game in its crude stages to the "Sultan of Swat." This game, in a sense, is an offshoot of Toy Town's "Tee-Off" golf game, which had been on the market many months before.

The "Bambino" took a gander at this new-gangled game; took an immediate liking to it; offered some suggestions for improvements . . . and lo and behold . . . Babe Ruth's Official Baseball Game was born.

Toy Town is also introducing "Winkie," the Big Brother of "Squealie," the plastic piggy bank. "Winkie" is a big fellow approximately 14" long, 9" high and 8" wide. He's made of shatterproof plastic in pastel colors and holds over \$1,000 in coins.

The complete line of Toy Town toys will be on display for the visiting buyers during the Toy Fair and throughout the year in Room 507, 200 Fifth Avenue, New York 10.

MELDON BROTHERS MARKET NEW TOY GUN

The Meldon Brothers Company, Cleveland 3, Ohio, manufacturers of the well known super automatic tom gun, are introducing a new toy gun to the market. It's the new Play Police Automatic Cap Pistol! This all metal cap pistol, made of 22 gauge steel that will not break when dropped, has a fine blue black baked infrared enamel finish. It shoots with a loud report and can be loaded very easily. It is a 50 shot repeater, using any brand of caps. For complete safety and harmlessness, this gun is constructed with a safety trigger and all moving parts are enclosed. The gun comes complete with a play police badge, policeman's whistle, and Play Police permit. The complete four piece set is packaged in an attractive multi-color box. Packed four dozen to a shipping carton, weighing 35 pounds. Suggested retail price is 79c.

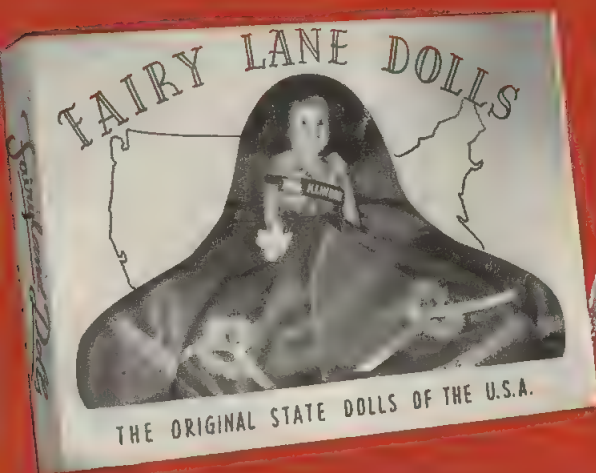

All metal cap pistol

TOY NEWS AND NEW TOYS

Story Lamp by Pearson

REVOLVING NURSERY LAMP

Something dramatically different in a lamp designed to captivate a child is the new Story-Go-Round "the lamp that twirls and tells a tale." Switch it on . . . like magic, inner story shade revolves and full color fairy tale pictures pass in an enchanting panorama before two viewing windows in outer shade. Heat radiated by the bulb makes the magic—there are no mechanical parts to get out of order. Genuine sapphire jewel bearing supports rotating inner shade. The manufacturer stresses its safety feature—six foot cord, Underwriters' Approved.

The new Story-Go-Round has a decorative outer shade of leatherette-embossed parchment—11 inches in diameter. Lamp stands 15 inches high, and has a colorful candy stripe base. Story-Go-Round retails for \$5.95, complete with four easily interchangeable, full color, fairy story strips—Goldie Locks and the Three Bears, Little Red Riding Hood, Jack and the Beanstalk and Puss in Boots.

Pearson Industries, 1 N. La Salle Street, Chicago 2, manufactures the Story-Go-Round.

PLAYTOWN MARKETS PLAY STORES!

Using the slogan "Let's Play Store," Playtown Products Co. of Yardville, N. J.; is marketing a complete line of miniature play stores complete with miniature grocers, meat, bakery and fruit items, and store fixtures. The miniatures feature exact reproductions of labels of well-known products, realistically reproduced in full color. Playtown's complete line consists of Bakery, Grocery, Fruit and Meat Stores, a completely equipped Super Market and refills for the entire line.

Among the many features that have been

well-received by buyers all over the country, is the fact that the items themselves are of solid construction and unbreakable, and this feature is being used as one of the outstanding selling points by many prominent stores. Remarkably low priced, the suggested retail prices run from 25c to \$5.00, giving a wide range for department stores, chain stores, toy stores, variety stores, etc., to choose from. Circulars and full information is immediately available from the New York representative, Sam Weisman, Room 209, 200 Fifth Ave., or the Chicago representative, Jack Shapiro, Room 411, 208 N. Wells Street.

BARCLAY CREATIONS FEATURE STATE DOLLS OF THE U. S. A.

Barclay Creations, Inc., 36 South State Street, Chicago 3, report that their distinctive line of State Dolls of the U. S. A. are proving to be one of the most popular specialties they have yet brought out. In a recent interview, S. L. Bottenwiser said,

Miss Texas by Barclay.

"Our new State Dolls are being enthusiastically acclaimed in every State in the Union. The artist's concept has been beautifully developed and each doll is finished with attention to the most minute detail. Stores can display them with the assurance that here is a line of dolls that offers a real incentive to character doll collectors. Each doll comes with a dress that is a complete costume and is remov-

able. A white satin ribbon with the State's name in gold letters designates the State's represents. As to the actual doll itself, nothing has been forgotten to make for real quality. The 7" bodies are of unbreakable plastic in full keeping with the dainty costumes." Mr. Bottenwiser went on to stress that these dolls come packed in window display boxes that offer a full view of the doll under the transparent cellophane opening. The entire box top is laminated, thus insuring protection against soiled containers.

EXECUTIVE SECRETARY APPOINTED

A. S. E. Barnett, formerly an insurance executive, has been appointed executive secretary of the Louisiana Retailers Association, according to an announcement made by Sam Zerkowsky, president of the association and merchandise manager of Godchaux's, New Orleans. New offices for the association are at 528 Florida Avenue in Baton Rouge.

PLAYSKOOL 1948-1949 NATIONAL ADVERTISING PLANS MOST EXTENSIVE IN COMPANY'S HISTORY

Bigger, more complete in its coverage, making a greater impact than ever before, the new National Advertising Program to be released on Playskool Educational Toys will reach a "pre-selected" audience of over 63 million toy producers. A larger line-up of publications, tested national magazines with important "directed readership" will make up the greatly accelerated national advertising schedule. Emphasizing the appealing "Learning While Playing" theme that is the basis of all Playskool Educational Toys . . . attractive dramatic list of widely read national magazines and their circulation:

Children's Activities, 508,034; Good Housekeeping, 3,014,413; Hygeia, 196,420; McCall's, 3,569,268; My Baby, 125,133; Woman's Day, 2,999,837; Today's Woman, 769,138; Instructor, 121,323; House & Garden, 367,586; House Beautiful, 442,001; American Baby, 162,800; Better Homes & Gardens, 3,255,304; Ladies Home Journal, 4,621,060; Modern Baby, 143,000; Parents, 1,082,908; Woman's Home Companion, 3,699,793; Grade Teacher, 116,995; American Home, 2,495,332; Saturday Eve. Post, 3,953,220; Baby's Own Story, 200,000.

In addition to the hard selling advertisements appearing in this great group of national magazines, Playskool will have "plugs" on leading top-notch national radio shows . . . daytime housewife shows which will reach the best possible prospects for Playskool Educational Toys. Hollywood will also be aiding in the extensive Playskool publicity program. Children of leading motion picture stars will be photographed playing with Playskool Toys. They will be shown on sets of such well known picture studios as Eagle-Lion, Columbia, etc.

Backed by such an ambitious national advertising and publicity program, Playskool dealers all over the country are looking forward to one of the most profitable educational toy seasons since the war.

Miss Missouri by Barclay.

Toy Playthings*

**BARR
CREATIONS**

Buyers appreciate two advantages when ordering Barr products: 1. Barr toys are quick-moving money makers. 2. All rubber toy needs can be taken care of in ONE shipment, thanks to Barr's diversified line. That's Barr "Centralized Service." It means one invoice, one freight bill of a time when freight costs are increasing, one checking-in. Time and money saved in that way means more profit in the end.

TOY NEWS AND NEW TOYS

BOB HOPE MEETS MANASSA MAULER IN AIR FORCE SHOW

Madison Square Garden was packed with 18,000 cheering fans as Bob Hope rushed out to the center of the ring at the sound of the bell and threw a long left jab to Dempsey's chin. It was wide of the mark and the Manassa Mauler countered with a right cross that grazed Hope's chin. Dempsey followed with two long lefts to the mid-section and as Hope backed away Jack scored with another series of rights to the head and body.

The onslaught angered Hope and he swung wildly with rights and lefts, finally landing a bolo right to Dempsey's chin that sent the former heavyweight champion down. Referee Adolph Menjou started the count, but stopped in the middle to wave Hope to a neutral corner. Dempsey was up at nine, but ring-side experts including General Dwight D. Eisenhower, General Hoyt S. Vandenberg, Bernard Baruch, and General Carl Spaatz estimated it as the longest count in history.

At the end of the first round, Hope appeared tired but was refreshed in his corner by chief second Jinx Falkenberg, who applied some sweet smelling perfume. Meanwhile, over in Dempsey's corner, his chief second, Jack Golomb, president of Everlast Sporting Goods, and screen actor Frank McHugh were busy applying liniment to Dempsey's bruised nose and chin.

The second round ended with Hope running away to keep the advantage he had piled up and Dempsey missed repeatedly with rights and lefts. The 18,000 Air Force veterans gave the unanimous decision to Hope.

All this didn't happen during a wild

figment of the author's imagination. Last month, (Saturday, September 25), in New York's huge Madison Square Garden, the Air Force Association presented its first annual revue. The event, featuring prominent stars of stage, screen and radio, with Bob Hope and Jimmy Stewart sharing emcee honors, was called Operation Wing-Ding.

No small part of its success went to Jack Golomb of the Everlast Company. The day prior to the event, the producers of the Air Force Association's Operation Wing-Ding, Tex McCrary and Joshua Logan, called Jack Golomb, of Everlast, and asked if he couldn't supply Bob Hope with a pair of polka-dot trunks, over-sized gloves and shoes. They needed gloves for Dempsey, odd looking fighting togs and shoes also.

Everything had to be made up special and the producers asked Golomb if the equipment could be available at 12 the next afternoon. It was three P.M. when the call reached the Everlast offices at 26 East 14th Street, in New York.

Around the clock the factory worked to produce the needed equipment for the Air Force Association. Special polka-dot material was bought in a New York department store and immediately was cut and stitched to Hope's size. The 46-ounce gloves Hope wore, were filled and sewed in almost record time and Saturday morning, the Everlast truck rolled up to a side entrance of Madison Square Garden with the equipment.

All overtime pay was paid by Everlast and the equipment and services were donated to the Air Force Association.

It appeared then that Golomb's job was

through. But as main event time rolled around, Dempsey didn't have a second. All eyes turned to Golomb and he immediately was rushed into a second's uniform and stepped through the ropes with Dempsey.

Everlast Sporting Goods Co. played its part. In fact, so well, that the plaudits of the press and public through wires and phone calls swamped the Everlast switch board Monday morning. It was a job well done... a job that 2,000,000 Air Force veterans will never forget. Everlast Sporting Goods and Jack Golomb has won a spot in their hearts.

STEINKAMP OPENS NO. 2 TOYLAND

Steinkamp's, "Friendly Service You'll Like," 1120 West Seventh Street, Little Rock, Ark. announced October 3, 1948, the opening of their Downtown Toyland, conveniently located at the Hal Smith Service Company at East Capitol and Scott Streets. This is the company's No. 2 Toyland, and will feature "Many, many wonderful new toys for kiddies six to sixty..."

Adolph Wein

A TOY VETERAN PASSES 3/4 OF A CENTURY MARK

The many friends of Adolph Wein, well-known toy man, will be interested to learn that this veteran of the toy business celebrated his 75th birthday in his usual hale and hearty manner on October 27th. One of the real old-timers in the toy business himself, Mr. Wein needs no introduction to many other old toy-timers throughout the country. It can be said that he literally grew up with the toy business in America, having seen it expand from a tiny infant to the lusty full-grown industry it is today. Together with his brother, Max Wein, he established The American Toy Works back in 1895. The first location of the newborn firm was at 51 Bowery, where the Manhattan Bridge now stands. Expanding volume made necessary a move to 56 Allen Street, and shortly thereafter to 7-8 Chatham Square, where the firm prospered and grew for over 30 years.

As he began to approach the 75-year mark, Mr. Wein felt that it was time to begin to enjoy some of the other pleasures of life that over 54 years of activity in the toy business had denied him. He accordingly sold out his interest in The American Toy Works on July 1st 1944, and has been leading a life of active retirement.

Jack Dempsey and Bob Hope receiving instructions in the center of the ring from Referee Adolph Menjou. The historic boxing match which took place before 18,000 cheering fans at New York's huge Madison Square Garden was a part of the Air Force Association's Operation Wing-Ding. Standing off the side is Jack Golomb, president of Everlast, who supplied all equipment and acted as chief second during the match. Dusting off Killer Hope is screen actor Frank McHugh.

PLUMB BOBS

FISHING REELS
BRONSON LASHLESS

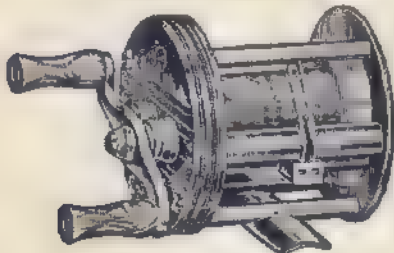

**Level Winding, Anti-Back-Lash,
Quadruple Multiplying**

Heavily chromium plated brass; new aluminum spool, 28% lighter, fitted with cork arbor; adjustable click on tail plate; duo-pawl mechanism; "S" crank with comfortable shaped colored handles.

A newly devised spool bearing mechanism provides a highly sensitive anti-back-lash feature. Accurately adjusted to all variation in lure weight style of anglers cast, by turning tail plate spool bearing on left end of reel.

Each
No. 1700—Cap. 100 yds., diam. of
spool 1½ in., length of pillars
1½ in. wt. each 9 oz. \$.

BRONSON MERCURY

**Level Winding, Anti-Back-Lash,
Quadruple Multiplying**

Chromium plated brass frame; head cap and tail plate decorated. Aluminum spool fitted with cork arbor. Jeweled, adjustable spool caps; duo-pawl; adjustable click; hardened steel ratchet and pawl; chromium plated level winding screw; pillar rod clip; balanced crank with black and white grips.

Each
No. 2550—Cap. 100 yds., diam. of
spool 1½ in., length of pillars
1½ in. wt. each 8¼ oz. \$.

BRONSON ALTOONA

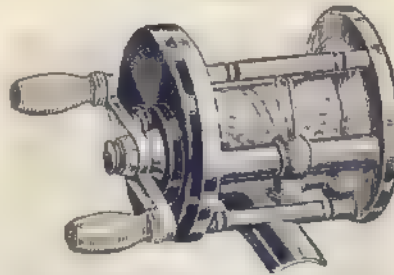

Level Winding, Quadruple Multiplying

Bright nickel plated brass; walnut bakelite head and tail plates, with tapered crank handle grips to match; three piece take down construction. Improved click metal bridge molded into bakelite head cap serves as bearing surface for points of wear and affords perfect alignment of reel.

Each
No. 4250—Cap. 100 yds., diam. of
spool 1½ in., length of pillars
1½ in. wt. each 7 oz. \$.

All above, one in a box.

FISHING REELS
J. A. COXE

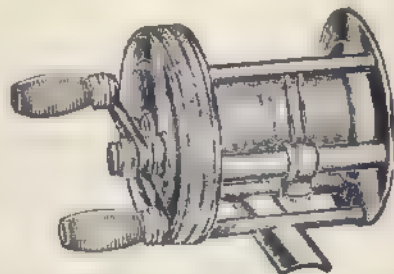

**Level Winding, Free Spool Mechanism,
Quadruple Multiplying**

Nickel silver throughout, with end plates of highest grade, black, molded plastic obtainable; cross bolt, gear shaft and level winding pawl of monel metal which is hard and rust proof.

The free spool mechanism eliminates the spinning handle when cast is made.

Coxe cross-bolt take-down construction, one piece frame, no screws. Cork arbor.

Each
No. 250—Cap. 100 yds., 16 lb. test
silk line, diam. of spool 1½ in.,
length of pillars 1½ in., wt.
each 8 oz. \$.

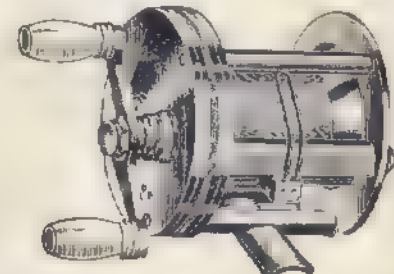

**Level Winding, Cross-Bolt Construction,
Quadruple Multiplying**

Constructed throughout of high grade brass, chromium plated, gear shaft oiling feature; feather touch thumb drag; new type level winding mechanism; featherweight spool; cross bolt take down construction; monel metal gear shaft, level winding pawl and cross bolt adjustable click on tail plate. Cork arbor.

Remarkable in its simplicity, durability, unique design and smooth, free casting qualities.

Each
No. 100—Capacity 100 yds., 16 lb.
test silk line, diam. of spool 1½
in., length of pillars 1½ in.,
wt. each 8¼ oz. \$.

**Level Winding, Cross-Bolt Construction,
Quadruple Multiplying**

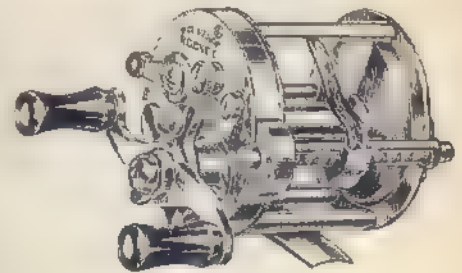

Heavily chromium plated brass throughout; feather weight aluminum spool; smooth action thumb drag, ivory colored handle grips; adjustable click.

Each
No. 600—Cap. 100 yds., 16 lb. test
silk line, diam. of spool 1½ in.,
length of pillars 1½ in.; wt.
each 8 oz. \$.

All above, one in a box.

FISHING REELS

**PFLUEGER ROCKET, SALT WATER
OR TROLLING**

**Level Winding, Anti-Back-Lash,
Gear Ratio 3.62 to 1**

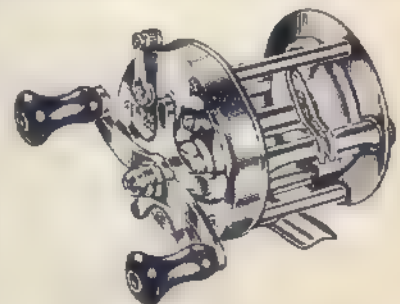

Polished diamolite finish; highest quality level wind mechanism with extra pawl of half nut in a receptacle built into the reel; adjustable star wheel drag may be thrown on or off by lever conveniently located on upper edge of front plate; tension oil cups permit adjustment of end play of spool; all parts easily oiled; large diamalloy pivots; bronze bearings; balanced crank with double handles.

Compact, convenient in size, built for hard usage and long service.

Each
No. 1335—Standard spool, cap. 110
to 288 yds., diam. of plates 2½
in., length of pillars 1½ in.;
wt. each 14 oz. \$.

One in a box.

SHAKESPEARE SERVICE, TROLLING

Bernard H. Baum (right), president of the Effanbee Doll Co., Inc. presents the first Howdy Doody doll to Bob Smith, who is master of ceremonies and supplies the voice of the puppet. Howdy Doody on television's popular children's show, Effanbee, a subsidiary of Noma Electric Corporation, is making the Howdy Doody doll exclusively.

EFFANBEE DOLL CO. ANNOUNCES NEW "HOWDY DOODY" DOLL

The Effanbee Doll Company, Inc., known for 38 years for its line of "Golden Heart" dolls, is introducing the "Howdy Doody Doll," an almost exact replica of the popular television puppet, according to Bernard H. Baum, president. The Effanbee company recently signed an exclusive contract for manufacture of the doll with Bob Smith, master of ceremonies of "The Howdy Doody Show" and creator and voice of the children's popular television character. Effanbee is a subsidiary of Noma Electric Corporation, makers of Christmas tree lights and decorations.

Standing 21½ inches in height, the new Howdy Doody doll is dressed in the same Western costume worn by its puppet namesake—from "ten-gallon" hat down to miniature Western boots. Introduction of the Howdy Doody doll nationally marks another successful step forward in the relatively short life of the star of one of television's most popular programs. Bob Smith, who got his start in radio in his native Buffalo in 1933, first introduced the Howdy Doody puppet to a television audience in February of this year.

Howdy's following of "little people" quickly grew and soon the "Howdy Doody Show" was lifted from a one-station, once-a-week status to the full NBC Eastern television network, five afternoons a week. A campaign promoting Howdy for president has made the puppet "the kids' only choice." Of course, Howdy's platform would be inviting to any youngster with such planks as: three Christmases a year; bigger allowances; 5-cent banana splits with four balls of ice cream, no homework; six months' vacations; and free admission to all circuses, rodeos and movies. Commenting on Effanbee's newest product, Mr. Baum said that the Howdy Doody doll will meet the "demands" of children for a popular Western character doll.

NEW GOLDBLATT STORE

Marking the completion of their sixteenth store, Goldblatt's department store chain has announced that it is planning a grand opening shortly. Located at Grand and Harlem Avenues, Chicago, the new store is drawing wide attention from retailers because of its unique design and modern innovations planned for new merchandising methods and utilization of space. Civic officials and celebrities will spark the opening in special street ceremonies.

Every type of merchandise offered in major retail outlets will be featured in the sixty thousand square feet of selling space. Strategically located to the company's large warehouse, at Ashland and Archer Avenues, the Grand and Harlem store will have an easy flow of merchandise to its doors and will be able to speedily handle customer's demands and delivery.

Air conditioning and effective modern lighting are among the store's many features. Natural outdoor light streams in through the building's revolutionary visual

NEWS

Bob Smith, popular NBC radio and television star, officially introduces the "Howdy Doody doll," newest product of the Effanbee Doll Co., Inc., at an impromptu show for children in Macy's, New York, on Saturday morning, October 23.

SELCHOW & RIGHTER PRESIDENT HONORED AT 25TH ANNIVERSARY DINNER

Miss Harriet T. Righter, President of Selchow & Righter Company, was guest of honor at a formal dinner, tendered by the Company's Board of Directors, on the occasion of Miss Righter's 25th anniversary as President of the firm. The dinner was held on Thursday, October 21st at Louis Sherry's in New York City. Following cocktails in the lounge, the assemblage gathered around a festive board that was unanimously voted by all present to be just about the last word in epicurean delight. The seating arrangement contributed a home-like atmosphere and served to emphasize just what the occasion really was—a Selchow & Righter family party. With the serving of after dinner coffee, Treasurer Frank W. Stone, after a few introductory remarks, presented a

beautiful wrist watch and gold watch bracelet to Miss Righter as a token of appreciation from the Board of Directors. This was followed by a brief talk from Vice President L. K. Anderson, who, on behalf of the firm's Executive Committee, presented Miss Righter with a sterling silver choker necklace and matching earrings. Following the talks evidencing such a high display of esteem by her business associates, Miss Righter responded to the tributes in her usual charming and gracious manner with words of thanks for their good wishes and the loyal cooperation that has been accorded to her during her twenty-five years as President of the company.

LET'S MAKE A DATE -- FOR '48

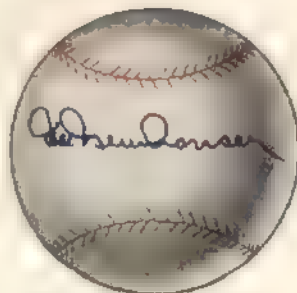

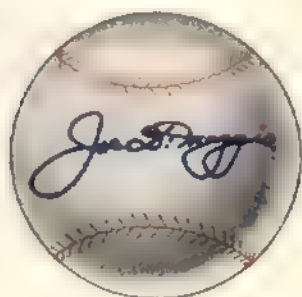

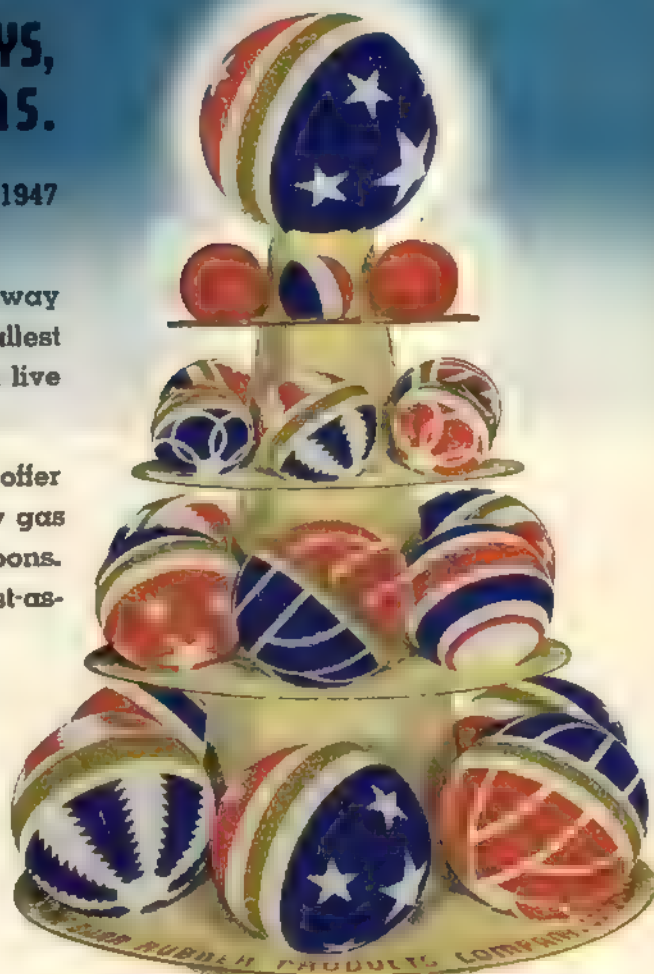

GAS INFLATED BALLS, PET TOYS, SPONGE BALLS, BALLOONS.

Here's the line that surged off counters in 1947 to set a new sales record for the last half.

Here's the line of prewar standards—all the way from the largest gas inflated ball to the smallest sponge ball and lightest balloon. For it's all live rubber and latex for '48.

Your customers know this line. When you offer it they know you are offering highest quality gas inflated balls, sponge balls, pet toys, and balloons. They know you are NOT offering an "almost-as-good" to take a longer margin.

Last year many customers were disappointed because we were completely booked by late summer. Play safe. Get your order in the hopper now, so we can keep that date for '48.

YOU'LL SEE IT ALL -- IN JUST ONE CALL

Toy Fair visitors are invited to see our full line on display in our permanent New York show room: Suite 373, Metropolitan Tower (37th floor), 1 Madison Avenue, 24th St. entrance, across the park from the Fifth Avenue Building. Mr. William J. Canary and Mr. Fred Sichel in charge. Phone: Murray Hill 6-3286.

Other
display
offices are

J. H. Eyerly & Associates, 1442 Merchandise Mart, Chicago.
A. O. Boyce, 1154 Plymouth Bldg., Minneapolis.
J. W. Fuller, 1127 Liberty Bank Bldg., Dallas.
M. Fisher, 104 Hanover St., Boston.
F. Y. McDonald, 3838 Piedmont Ave., Oakland.

THIS WON'T WAIT --- IN '48

Here are three items you should be offering your customers right now and all through the summer. These sponge baseballs are the exact size of a real baseball—2 7/8" diameter. They bear the autograph reproductions of three American League All-Stars — Joe DiMaggio, George Kell, and Hal Newhouser. Put them to bat for you this season.

THE BARR RUBBER PRODUCTS CO. SANDUSKY, OHIO

BE SMART! BE WISE!

BUY BARR

*One Source for Every
Rubber Toy Need!*

All rubber toy requirements can be taken care of in ONE shipment, thanks to Barr's diversified line. That's Barr "Centralized Service." It means one invoice, one freight bill at a time when freight costs are increasing, one checking-in. Time and money saved in that way means more profit in the end.

Today—as always—the name BARR leads all the rest in rubber balloons. Why? Because Barr Balloons are expertly made, carefully inspected, smartly designed, beautifully colored. Years of experience have given Barr the inside on how to make the rubber playthings that children want . . . that grownups want to buy. Merchandisers and consumers who buy BARR, buy best!

Tops in entertainment! Fun for everyone! CROSBY DERBY, a brand new, grand new game based on Horse Racing, the King of Sports—Four Fast and Fascinating Games in One! CROSBY DERBY has everything! Thrills—Action—Sport! World-Famous Horses! Playing Money, Mutuel Tickets, Odds. Any age, any number of persons can play CROSBY DERBY . . . at home, at the club, at parties! Get on the right track with CROSBY DERBY!

4 GREAT GAMES IN ONE

***"ODDS"**—Game operates like a real track! Odds determined before betting begins.

***"ODDS BLIND"**—Similar to above, but bets are made before odds are determined.

***"PLAYERS POOL"**—No Odds! Bets pooled and split between winners.

***"JOCKEY'S CHOICE"**—Each player "rides" a horse. It's fast and exciting.

TAKE YOUR CHOICE of FOUR different games with CROSBY DERBY! Any number of persons can play. It's all based on rules and principles of actual horse races, all scientifically and mathematically correct. No two races alike! Actual track time less than two minutes a game. In "Odds" and "Odds Blind," the odds change in each race. Fair for All! Fun for All! Play CROSBY DERBY!

THE FAVORITE of millions. Bing Crosby symbolizes the best in entertainment . . . in the movies, on the radio, on phonograph records—and now you have the Crosby Derby! For CROSBY DERBY is a Champion Among Games! Packed with all the thrills, excitement and chance of a real horse race, CROSBY DERBY offers the fast-paced lively entertainment

Americans love! Everyone can play it, everyone enjoys playing CROSBY DERBY—grownups and children alike. The rules are simple, easy to follow. Equipment consists of a game board with the "odds" board at lower end, a deck of special playing cards, horses, playing money, mutuel tickets, and instructions. Get the gang together, play CROSBY DERBY!

"Built to Live in the Water"

- Designed and engineered exclusively for marine use, Chrysler Marine Engines are truly Built to Live in The Water. They are not converted or assembled, not rebored or rebuilt.

This means so much to boat owners in safety, all-weather performance and economy. Built by Chrysler as a complete "power package" engine, reverse and reduction gears they provide proper power to fit the hull. No wonder today, Chrysler is

America's No. 1 Marine Engine... choice of more boat builders and owners than any other make.

SEE THE CHRYSLER ACE, CROWN, ROYAL MARINE ENGINE EXHIBIT AT THE MOTOR BOAT SHOWS—NEW YORK CITY, JAN. 9-17; CHICAGO, JAN. 31-FEB. 8.

*Factory Engineered and Built Parts With Expert Service—Wherever You Go—Through a Nation-wide Chrysler Marine Engine Dealer Organization

A MODEL ... AND A PRICE

to suit every boy!

Kilgore cap pistols are so appealing that every youngster wants one. The complete line affords a wide choice of models . . . conveniently priced to cover every sales possibility. Insures more sales — as well as the economies of securing a full line from a single source.

The American, Long Tom and Big Horn are the only cap pistols produced featuring a revolving cylinder and using a realistic 6-shot Disc Cap. The Mountie, a 50-shot repeater, is die cast . . . with fine detail in design and "engraving." The Ranger, Presto and Captain are also 50-shot repeaters. All are outstanding performers due to patented feeding mechanism which insures positive firing. The Buck-A-Roo is a single-shot model. All are cast iron with bright nickel finish, except the Mountie.

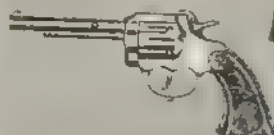

Kilgore pistols are individually packaged in colorful boxes. All are double action models.

SOMETHING

BIG!!!

1948 Fisher-Price Line

A whole family of lively, lovable pull toys . . . famous for ingenious sound and action. Every one a quality product, modestly priced for outstanding value. They mean real business for your toy department.

Illustrated is No. 145 Musical Elephant, a brand new Fisher-Price Toy that's a natural for volume selling. Suggested retail price, \$2.25. Swings his head from side to side, as he's pulled along, while concealed piano wires give forth a merry tune.

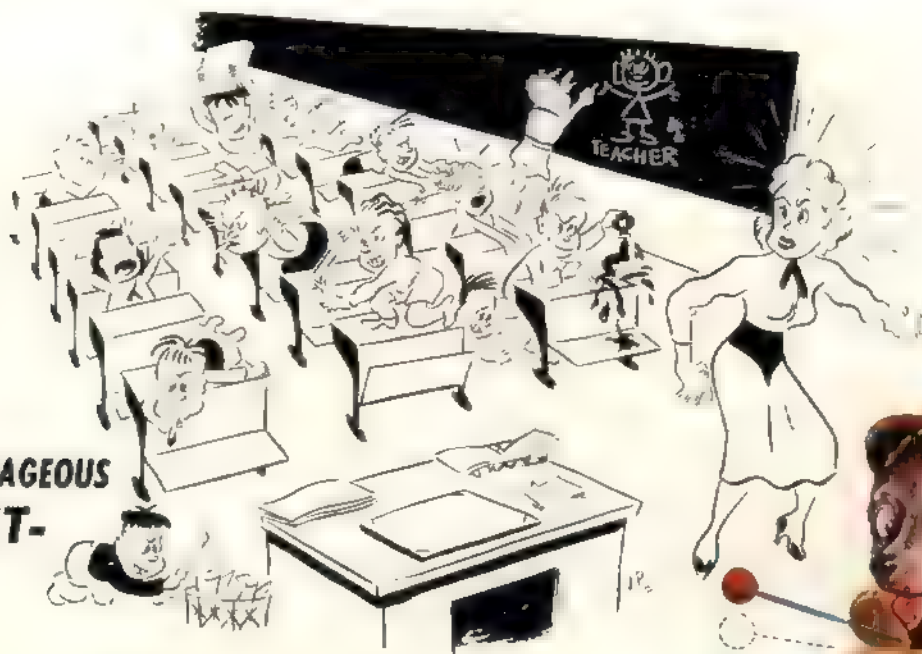

His coil spring tail even keeps wagging after he stops. Looks real enough to eat peanuts. See him at the Toy Fair!

AT TOY FAIR**

Sunruco has some surprises for you at the New York Toy Fair ★ ★ ★ ★

Yes, we'll see you there — and you'll see us, too. You'll see me an' my sisters an' Donald Duck, an' Mickey Mouse, an' all the rest of our big family from Sun Rubber. There'll be a lot of trucks and automobiles an' airplanes along with us — *safe* rubber toys with real wheels on 'em. An' then there's our Latex cousins. Dogs, pigs, cats, chicks,

rabbits. An' every one of 'em cries with the new patented Sunruco All Rubber whistle! An' if you could peek into our big home in Barberton and see the new creations . . . if you could hear the new, fresh merchandising ideas . . . well, you'll see at the Toy Fair.

DISNEY TOYS by Sunruco

MICKEY MOUSE AEROPLANE — Zoom! It's Mickey Mouse in his flashy aeroplane! Mickey's movable head and the plane's revolving propeller make this an "action" toy.

DONALD DUCK ROADSTER — Here's a speedy, sporty roadster with a lot of boy appeal. Donald Duck is at the wheel, while Pluto crouches in the rumble seat. Donald's head is movable.

MICKEY MOUSE TRACTOR — Here's Mickey Mouse chugging along on a big realistic tractor! Large moulded rubber wheels turn on Sunruco's patented nickle-plated steel axles. Mickey's head is movable.

MICKEY MOUSE FIRE TRUCK — Mickey Mouse drives this racy fire truck at breakneck speed, while Donald Duck braces himself at the back and grabs his hat. Real appeal that parents and children can't resist.

© WALT DISNEY PRODUCTIONS

SUNRUCO LATEX CRIB-CRADLE TOYS

Sunruco "toddler" age toys provide endless entertainment for the child in his crib, tub, or play-pen. Sunruco toys are SAFE. They can be chewed, squeezed, or thrown. The realistic dyes

used are harmless, fast colors that are washable without fading. The new Sunruco squeeze whistle is firmly "built to stay" in the toy. Packaged in cellophane bags for easy display.

*We'll see you
at the toy fair*

Cambridge "CADET" for 1948—

Designed expressly for us by the famous naval architect, Winthrop L. Warner, "Cadet" offers full headroom, unbelievable storage and locker space, auxiliary power. Construction throughout follows best accepted practices. Selected seasoned materials only are used. Keel and framing are white oak; planking cedar; Everdur fastenings. Teak decks, laid ship-style and caulked. Mast: hollow box spar of Sitka spruce.

Cadet is a boat of refreshingly new character for 1948 and the future. Now in the water and ready for demonstration. Write or wire for delivery information and other details today.

Meanwhile, assembly-line production of our famous Hampton One-Design continues. We also specialize in custom-built boats, power and sail.

We have facilities for repairing, servicing and storing (wet and dry) vessels up to 125' in length. The yard is complete with two launching ways, one 20-ton hoist for smaller boats, machine shop, pipe shop, electric shop, welding and complete joiner shop.

Cambridge Shipbuilders, Inc.

Telephone 1100

MACK DIESEL ENGINES. Two marine diesel engines are manufactured by the Mack International Motor Truck Co., Empire State Building, N. Y. City. Both are 6-cylinder engines of the same over-all dimensions but one develops 100 hp. at 1500 r.p.m. and the other 125 hp. at 1800 r.p.m. The weight of each is 3200 pounds.

PAULSEN-WEBBER'S SPLICING VISE. A new yachtsman's splicing vise has been developed by Paulsen-Webber Luggage Corp., of 170 John St., N. Y. City. It consists of a bronze casting with calcium plated steel clamping parts and will handle wire rope up to and including 3/8" diameter. It is designed to serve yachtsmen, fishermen and small yards.

CASEY TO BUILD AUXILIARIES. The Casey Boat Building Co., of Fairhaven, Mass., plans to build for the 1948 season a limited quantity of Casey standardized auxiliaries, in lengths of 31', 39', 45' and 50' o.a. All boats are of the seagoing type with spacious accommodations. Sloop, cutter, ketch and yawl rigs are used in the various models.

GULF CRAFT HAS DIVERSIFIED FLEET. Inboard runabouts in lengths of 15' and 18' and several cruiser models in lengths of 24' and 32' comprise the 1948 fleet of Gulf Craft, P. O. Box 488, New Port Richey, Fla. All models are mahogany planked, with batten seam construction fastened with Everdur screws. Keel, stem, and chine are white oak. Optional power installations drive the 18-footer as high as 50 m.p.h. and the 24-footer up to 39 m.p.h.

Gulf Craft's 24' Sport Fisherman has speeds up to 39 m.p.h.

SPEEDLINERS BY GENERAL MARINE. Several models of 12', 13' and 14' outboard runabouts, all bearing the name of Speedliner, are built by the General Marine Co., St. Joseph 25 Mich. All models will be available for spring delivery.

General Marine's 14' mahogany plywood Trophy Runabout

SAYBROOK'S sailerETTE AND LIGHTNING. The Saybrook Yacht Yard, of Saybrook, Conn., specializes in building the sailerette and the Lightning. The former is a keel sloop 37' 2" o.a., 19' 4" l.w.l., 7' 6" beam and 4' 2" draft. She is basically a smart day sailer but comes also with complete cruising accommodations and an engine. Both models sail well, are nicely finished and built to the highest specifications. The Saybrook Lightning has built up an enviable racing record in this popular class. She has cedar planking, spruce frames, Everdur fastenings, stainless steel rigging and Merriman hardware.

CAMPBELL BUILDS OF STEEL AND WOOD. Sail and power yachts, both steel and wood, are built by the Campbell Boat Co., custom builders, Holland, Mich. Recently completed was a 42' o.a., Luders-designed auxiliary cutter, planked with mahogany and framed and timbered of white oak. The company also built an Alden-designed Malabar Jr. auxiliary and delivered her last summer.

THE LANGE BOAT LIFT. A hydraulically operated boat lift is manufactured by Lange Aviation Corp., of Milwaukee, Wis. Designed to accommodate boats from 12' to 30' in length, excluding keel sail boats, it comes in four models, the largest being capable of lifting boats up to 6000 pounds. The lift is submerged below the surface on the beach. The boat is then floated over the lift and the pump raises it high and dry in a matter of seconds.

BALDWIN joins in urging Toy Buyers to bridge the gap between season sales with earlier and more intensive Spring and Easter sales promotion, in a campaign centered around these three Easter-Spring "naturals,"

First . . . SUZY-BELLE . . . the mechanical chicken that walks . . . pecks . . . cackles . . . and lays eggs, the young lady who—in case you haven't heard—bombed the '48 FAIR. Besides setting the customers out in the aisles, she was photographed, and televised, and publicized, and even had her cackle broadcast over the air!

For the nation's Sidewalk Set, the MUSIC-CLIK Jump Rope, with the patented RYTHMASTER that clicks musically in time with the jumper as the rope revolves. First innovation in the jump rope since the clothes line was fitted with handles.

Then, of course, there's the LITTLE RED HEN, need we say more? She's as much a part of Easter as the bunny or colored eggs. Little sister to SUZY-BELLE, she has cackled and laid eggs to the delight of youngsters the world over for almost a decade.

Let BALDWIN help you plan that Big Spring Promotion by writing to us NOW!

BALDWIN MFG. CO.

Brooklyn 6, New York

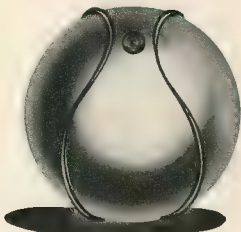

**ONLY 6 MONTHS
TILL SPRING**

The three autographed sponge balls shown above were the best sellers in Barr's entire fast selling line of gas inflated balls, sponge balls, and balloons. They were the best sellers all through the first nine months of this year. So good in fact that deliveries ran up to 45 days behind during the early spring. It will pay you to order your spring requirements now, so that when the 1949 baseball season gets started you can cash in on Joe DiMaggio, Hal Newhouse, and George Kell.

BAYSHORE'S "JITTER BALL"

A real hot item that moves off the counters fast. The biggest value in Vinyl playballs on the market. Measures 11" in diameter and retails for about 49c. Assorted two tone color combinations in red, yellow and blue. Ball efficiently designed with a heavy rubber replaceable bladder.

BAYSHORE INDUSTRIES, INC., ELKTON, MARYLAND, has found the demand just as great in winter as in summer for this indoor and outdoor playball.

BEER NOVELTIES & RAPID EVERYDAY SELLERS

No. 1272—Miniature Beer Bottle Carrier. An appealing miniature novelty that is ideal for display on table or shelf decorations. Exact in every detail to the regulation size bottle carrier. Carrier is constructed of colorful strong durable cardboard with appropriate wordings. Fitted with six miniature four inch brown glass beer bottles with assorted famous labels and filled with liquid that amazingly resembles real beer. Width, 5 inches; height, 6 1/2 inches, depth, 2 1/4 inches.

Per dozen **\$4.00**
Each **45¢**

No. 1287—Novelty Cigarette Dispenser and Ash Tray. The newest novelty smoker item now on the market. All made of selected smooth grained pine wood. This popular item looks like a real toilet. Has back and base of red with realistic tile design. Roll of toilet paper in a smooth round pool of wood slanted to wall with metal frame. Water chamber on top has removable lid which will hold a full pack of regular cigarettes. First pull the chain and a cigarette pops out ready to be lighted. Hinged wood toilet seat rests on a deep ash tray of white opaque glass. For added realism it has a round wood pipe connecting the toilet with the water chamber on top. Height, 10 inches, width, 4 inches, depth, 5 inches. Each in box.

Per dozen **\$9.00**
Each **85¢**

No. 1288—Fire Extinguisher Bottle Novelty. A sure fire fast selling novelty with a multitude of laugh producing qualities. Made of solid wood to resemble a fire extinguisher case. Has glass front with words "In Case of Emergency Break Glass" in large white letters. Case contains a 4-inch miniature brown glass bottle a 7 1/2 x 5 1/2 inches.

Per dozen **\$2.00**

No. 1246—Outhouse Beer and Whiskey Novelty. Similar to above but resembles an outhouse with 15-inch glass that is apparently filled. Structure is 3 1/2 inches tall.

Per dozen **\$2.00**

No. 1253—Miniature Beer Glass Ash Tray. A delightful novelty that features a 1 1/2-inch tall miniature mug made of glass. Filled to resemble beer—it even has a crown of creamy foam. Large ash tray and base are of beautiful baked ceramic.

Per dozen **\$3.00**
Each **30¢**

No. 1256—Whiskey Glass Ash Tray. Similar to above but features full size filled whiskey glass—no realistic in appearance that it looks every way.

Per dozen **\$3.00**
Each **30¢**

No. 1254—Miniature Beer Bottle. Features miniature 3-inch tall stoneware bottle, complete in every detail with metal cap, label and resembles beer. Famous labels. Large sized ash tray and base made of superior ceramic material.

Per dozen **\$3.00**
Each **30¢**

No. 1258—Miniature Steam Beer Bottles. Stoneware beer bottles same size as above but without ash tray.

Per dozen **\$80¢**

IN EMERGENCY BREAK GLASS

FIRST USE A RED COIL. THEN USE THE WHITE ONE TO SEE IF YOU NEED THE OTHER RED ONE.

No. 1244M08—Koolha Koh Kit. A real laugh provoker. Box made of smooth sanded wood has acetate front with small mallet attached. Ready to hang on wall. The kit contains two corn cobs. Ideal for parties. A red coil and white one. Red letters say "In Emergency Break Glass." Instructions on how to use the marvelously funny equipment also included on box.

Per dozen **\$1.60** Per gross **\$18.00**

No. 1254—Miniature Steinie Ash Tray. Features miniature 3-inch tall stoneware bottle, complete in every detail with metal cap, label and resembles beer. Famous labels. Large sized ash tray and base made of superior ceramic material.

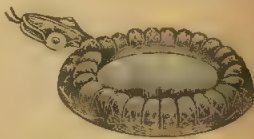

Per dozen **\$3.00**
Each **30¢**

No. 1254—Miniature Beer Bottle. Features miniature 4 1/2-inch beer bottle made of brown glass and filled with liquid that resembles beer. Famous labels. Large sized ash tray and base made of superior ceramic material.

Per dozen **\$3.00**
Each **30¢**

No. 1258—Miniature Beer Bottles. Beer bottles same size as above but without ash tray.

Per dozen **\$80¢**

No. 1278—Lucky Charmer Ash Tray. A rattlesnake coiled ready to strike—ready to sink its fangs into some unsuspecting victim. Realistic in every detail with a cunning fiery red glint in its eyes. The sharp scorching fangs and camouflaged color of its body. A new ash tray that combines usefulness with novelties. Made of strong molded composition. It has a 2 1/2-inch glass ash tray base of rainbow colored glass.

Per dozen **\$2.00**

Per dozen **\$3.00**

CARROM Announces... A SENSATIONAL NEW TOY!

COZZONE

CONSTRUCTION SET

Here is an entirely new idea in an all-metal construction toy — and a brand new departure for Carrom Industries! It will receive its official introduction to the Toy Trade at the American Toy Fair so don't fail to see it!

The COZZONE CONSTRUCTION SET employs round aluminum rods, with integrally mounted patented threaded brass swivel screws at each end of the rod — used in connection with 6-hole square couplings, 8-hole hexagonal couplings, studs in various lengths, flat pieces in three sizes, track holders for use in combination with electric trains, and swivel axle wheels. There are NO BOLTS, NUTS OR WASHERS!

The COZZONE SET provides practically an unlimited building range and completed models have a clean-cut, professional look that is outstandingly different!

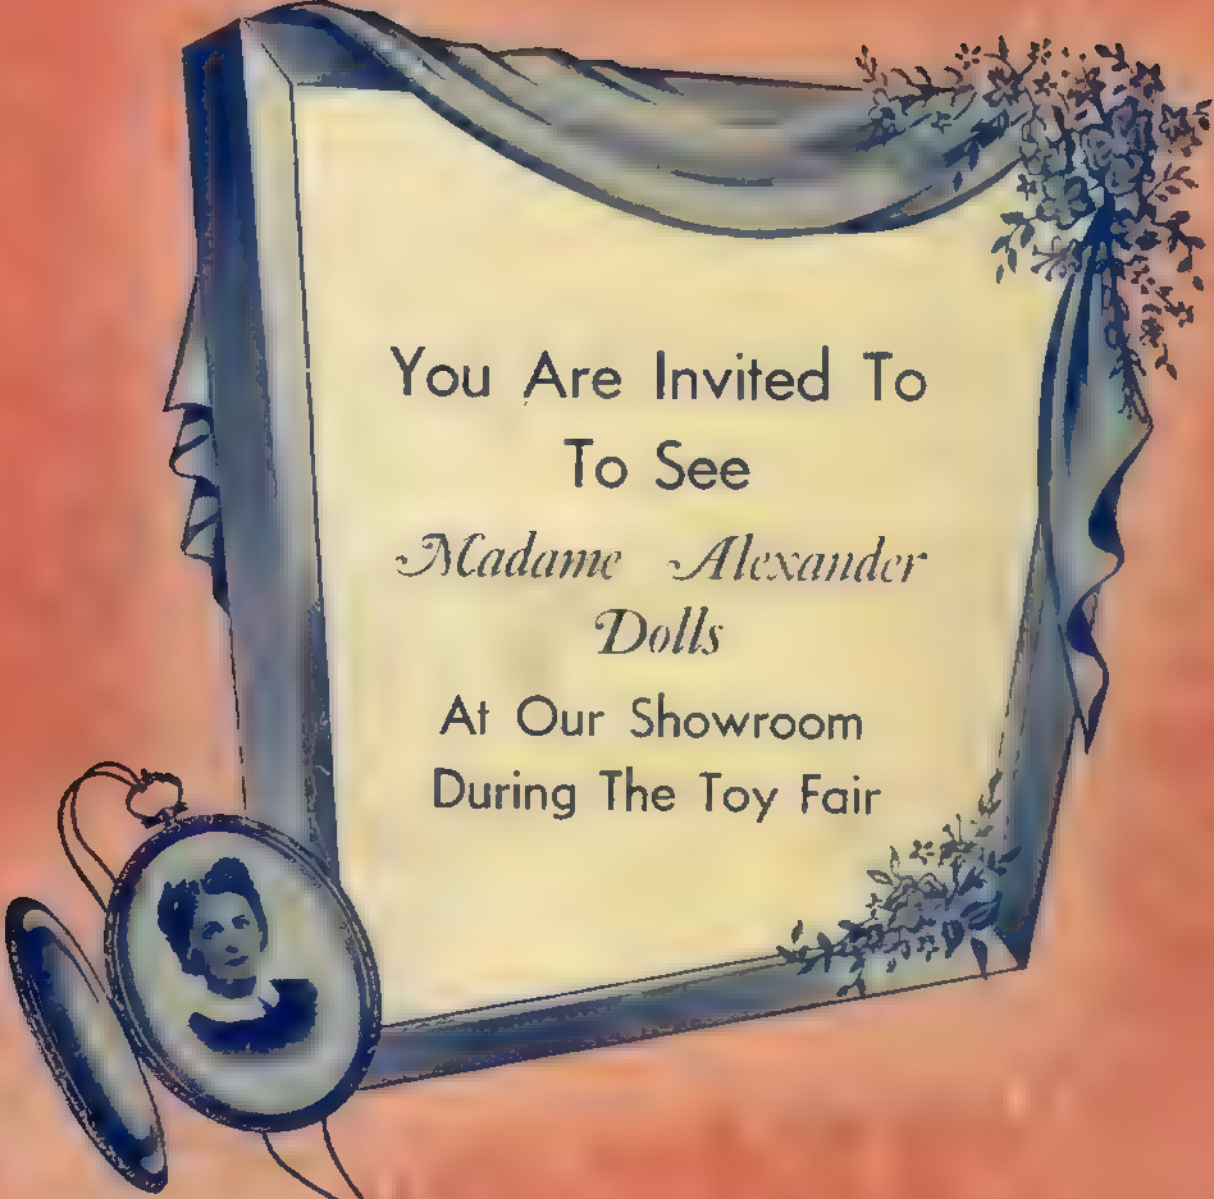

This toy received its initial introduction to the public at the December Toy Show held at the Museum of Science and Industry, at Radio City, New York and was received most enthusiastically. Don't fail to include this sensational new toy in your 1948 line! It's a natural for large volume sales. Beautifully packaged. Available in two sizes.

Carrom Industries, Inc.

1100 AVENUE C, NEW YORK 17, N.Y.

You can't beat **CARROM** **FOR** *Family* **GAMES**

NOK-HOCKEY . . . a real indoor hockey game! Fast, exciting. Puts a premium on skill.

KIKIT Combines the skill, teamwork and scoring principles of hockey, soccer, and basketball. Can be played by 2, 4 or 6 persons. Two sizes.

FOX HUNT. Combines skill and chance . . . with plenty of fast action! Appeals to all age groups from 6 to 60.

SPIN BOWL. A new, fast, exciting table model bowling game, scored like regular bowling. Fun for everybody!

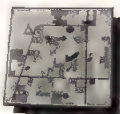

CARROM BAGATELLE Fun for the "pin ball" experts! Can be played "solitaire" or by a crowd. Made of selected hardwood plywood; size: 15" x 30".

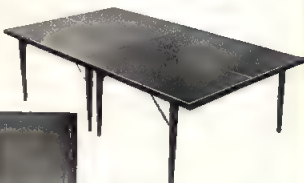

DRIVE 'N' PUTT. A brand new, floor model golf game . . . the newest addition to the Carrom line. Plays like the real thing!

CARROM-CROKINOLE . . . the oldest and still one of the most popular items in the line. The game of games. Play up to 101 games on one board! Three numbers.

GUSHER! The "win a million or lose your shirt" Oil Boom Game for older children and adults. An excellent family or party game.

OFFICIAL TABLE-TENNIS TABLE. Made in 2 sections; folds flat; 8 legs with special steel locking braces. Top fitted to hardwood frame, rugged, locked-corner construction. A top-bracket sales unit.

White sidewall tires, as illustrated available at extra cost

You're in Clover all the way

START with the looks of it, if you will. You know certain-sure that here you sit mighty pretty — with styling fresh as a field at sunup, and with lines boud to stay lovely and new-looking for seasons to come.

But set this big Buick in motion. There's where you really find yourself in clover — way ahead on every count that measures a car's worth.

You boss the miles with mighty Fireball power — from a straight-eight engine of valve-in-head design, so basically efficient, so frugal with fuel.

You take highways and side lanes with the jar-free cushioning of coil springs on *all four* wheels — practically break-proof under the toughest travel, and never needing service.

You drive protected by the massive strength of an X-braced frame, the sure-footed stride of extra wide Safety-Ride rims, the softness of larger, lower-pressure tires, the solid steadiness of a two-ton car and a rigid torque tube that takes all driving thrust, shields moving parts against dust, dirt and damage.

And here, in this distinctively styled beauty, you have two new engineering triumphs no other car knows.

One is Vibra-Shielding, which banishes vibration build-up, frees you from motoring fatigue, brings you a new concept of smoothness and quiet and restful ease.

The other is Dynaflo Drive* where gears never shift — the power plant

itself does the work of gears. Driving becomes simple and smooth as never before.

There's no clutch pedal, yet you have positive control at all times. And in sand, mud or deep snow, you can "rock" the car out with surprising ease.

Surely, your smartest move is to measure Buick against *your* specifications.

Do that — at your Buick dealer's. Check it for style, size, sound building. See for yourself why this handsome traveler, richer by some 30-odd new advances, is your best buy. Then get your order in early.

*Optional at extra cost on Roadmaster models only.

A FINE AMERICAN FARM AND A FINE AMERICAN CAR

A view of the 900-acre Nesemeier farm near Camellon in North Dakota's Red River valley

GEORGE H. NESEMEIER, JR.
Respected North Dakota grain
grower considers Studebaker cars
and trucks outstanding.

George Nesemeier is mighty proud of his farm and his new Studebaker

"PEOPLE often tell me we have one of the nicest farm homes in our part of the state," says George H. Nesemeier, Jr. "Now, we're beginning to get almost as many compliments about our car.

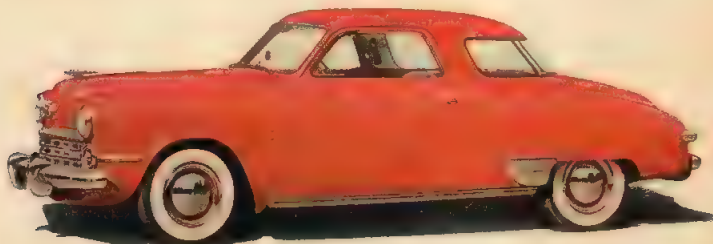

"All that extra glass in our Studebaker gives a marvelous view of everything—in back, at the sides, in front.

"It's a knockout of a car in good looks, but we make it work for its keep on our 900-acre place. It's a wonderful performer—easy on gas and oil—rugged and reliable as our Studebaker truck!"

Yes, thousands of Americans feel like George H. Nesemeier, Jr. about the new Studebakers they drive. Studebaker's far-advanced styling and engineering add up to a delightful new kind of motoring.

See the Starlight Coupe pictured here and all the other latest versions of the distinctive Studebaker new look. It's the new goal of all modern car design.

Stop in at a dealer's and see the sensational 1949 Studebaker trucks, too. They're America's newest and finest!

TOYS and NOVELTIES—March, 1948

ELECTRIC BLOWERS CHAMPION

With Universal Motor

Variable speed. Totally enclosed regulator for either alternating or direct current, phosphor bronze bearings.

No. 50—15 in. high, 3 in. outlet, 3 in. inlet, 1100 to 2350 R.P.M., complete with 10 ft. cord and attachment plug, totally enclosed 6-speed regulator; wt. each 60 lbs. \$.....
One in a crate.

TUYERE IRONS CHAMPION WHIRLWIND

Anti-Clinker Heavy Nest

Produces a circular, rotary blast which will not let heat or hot air up and out of the chimney. Concentrates the blast and heat in the tuyere nest, thus making a hotter fire and heating the iron one-third quicker.

No. 400—5 in. deep, 8 $\frac{3}{4}$ in. wide, 10 $\frac{1}{2}$ in. long, over all 12 $\frac{3}{4}$ x 14 $\frac{3}{4}$ in.; wt. each 55 lbs. \$.....

CHAMPION ADJUSTABLE NOZZLE

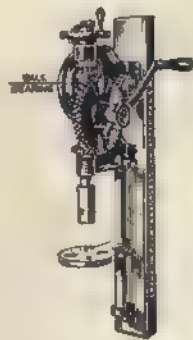

No. 40—10 in. high, 7 $\frac{1}{2}$ in. diam.; wt. each 15 lbs. \$.....

CHAMPION BALL PATTERN

No. 140—10 in. high, 7 in. diam.; wt. each 12 lbs. \$.....

POST DRILLS CHAMPION

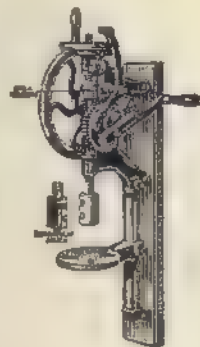

Self-Feed, Ball Bearing

A low priced, light-weight drill with moderate capacity.

Adjustable slotted table with 7 in. run; 6 $\frac{1}{4}$ in. flywheel for use with V-belt; adjustable crank.

No. 106—26 in. high, drills to center of 3 in. circle, drills from 0 to 1 $\frac{1}{2}$ in. holes, diameter of spindle $\frac{3}{8}$ in., up and down run 1 $\frac{1}{2}$ in., greatest distance from table to spindle 8 in., takes $\frac{1}{2}$ in. straight shank drills; wt. each 29 lbs. \$.....

Self-Feed, Ball Bearing

A low priced self-feed post drill with back gears and slotted lathe-turned table. Lathe-turned steel spindle with end thrust ball bearings. This drill is machine-jigged, therefore all parts are standard and interchangeable and noted for their strength and accuracy.

No. 103—31 in. high, drills to center of 12 in. circle, drills from 0 to $\frac{3}{8}$ in. holes, diameter of spindle $\frac{3}{8}$ in., up and down run 3 in., greatest distance from table to spindle 8 $\frac{3}{4}$ in., takes $\frac{1}{2}$ in. straight shank drills; wt. each 65 lbs. \$.....

Ball Bearing Automatic Self-Feed

A first class back geared drill, all bearings ground out of solid metal. All parts lathe turned.

It has lathe-turned and slotted table. End thrust ball bearings save 50 per cent in power.

No. 98—40 in. high, drills to center of 14 in. circle, drills from 0 to 1 $\frac{1}{4}$ in. holes, diameter of spindle 1 in., up and down run 3 in., greatest distance from table to spindle 10 in., takes $\frac{1}{2}$ in. straight shank drills; wt. each 90 lbs. \$.....

POST DRILLS CHAMPION

Ball Bearing Automatic Self-Feed Three-Gear

The three gears give the second speed same turning direction of crank as the first speed; it has two speeds that turn in the same direction; end thrust ball bearings; automatic self-feed; lathe-turned and slotted table.

No. 95—46 in. high, drills to center of 16 in. circle, drills from 0 to 1 $\frac{1}{4}$ in. holes, diameter of spindle 1 $\frac{1}{4}$ in., up and down run 3 in., greatest distance from table to spindle 10 in., takes $\frac{1}{2}$ in. straight shank drills; wt. each 110 lbs. \$.....

SCREW PLATES

LITTLE GIANT SINGLE STOCK

The die proper is in 2 pieces, each half having 2 cutting edges. It is easily removable from the cap for sharpening on a thin emery wheel.

The die is held in a cap. The edges are beveled to the same angle as the edges of the slot in the cap. A small screw at each end of the slot adjusts the halves to the exact size.

The die is beveled on both sides to prevent reversing the die so that work may be threaded either through the guide or from the face.

After the die is laid in the slot in the cap, a screw guide wedges it tight. The die is thus held in a three angle grip and cannot tilt out of alignment. When the screw guide is tightened the die becomes practically one solid piece, yet is easily taken apart for sharpening.

National Coarse (U.S.S.) Threads

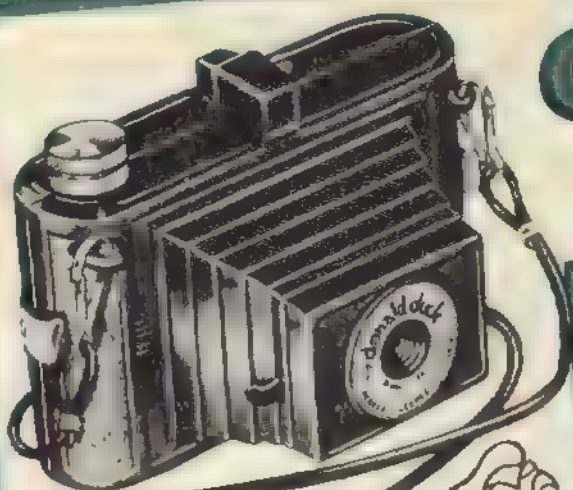

No. 2—5 sizes taps and dies, cutting $\frac{1}{4}$ -20, $\frac{3}{8}$ -16, $\frac{1}{2}$ -13, $\frac{3}{4}$ -11 and $\frac{1}{2}$ -10 threads, 2 $\frac{1}{2}$ in. diameter collets, one 23 in. stock and one 15 in. adjustable tap wrench; wt. per set 17 lbs. ..\$.....

One set in a box.

FOUR-LEGGED FURY!

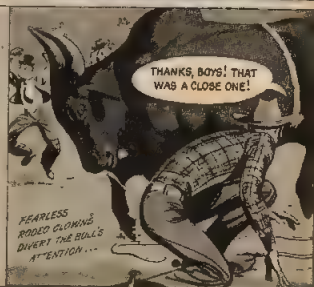

Rodeo champion
KEN ROBERTS
agrees that in
rodeo—and in
cigarettes too—
*Experience is
the Best Teacher*

THE MOST DANGEROUS
PART OF THE RIDE IS WHEN
IT'S OVER! THE RIDER MUST
JUMP FREE—GET OUT OF
THE WAY FAST!!! IT
TAKES AGILITY—AND
LONG EXPERIENCE!

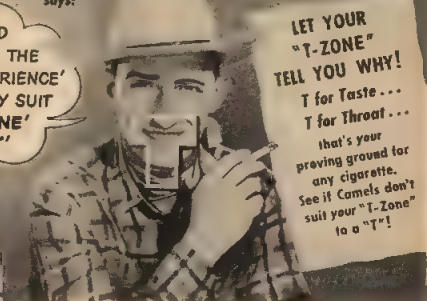

EXPERIENCE COUNTS IN
CHOOSING A CIGARETTE,
TOO. WITH MILLIONS WHO
HAVE COMPARED DIFFERENT
BRANDS, CAMELS ARE
THE **'CHOICE OF
EXPERIENCE.'**

Rodeo champ *Ken Roberts*

says:

COOL, MILD
**CAMELS ARE THE
'CHOICE OF EXPERIENCE'
WITH ME! THEY SUIT
MY 'T-ZONE'
TO A 'T'!**

LET YOUR
"T-ZONE"
TELL YOU WHY!
T for Taste...
T for Throat...
that's your
proving ground for
any cigarette.
See it Camels don't
suit your "T-Zone"
to a "T"!

According to a nationwide survey:
**MORE DOCTORS SMOKE
CAMELS THAN ANY OTHER
CIGARETTE**

When 113,597 doctors were asked
by three leading independent re-
search organizations to name the
cigarette they smoked, more doc-
tors named Camel than any other
brand!

**MORE PEOPLE ARE SMOKING
CAMELS THAN EVER BEFORE**

Typical example: farmer's experience with B. F. Goodrich tires

MR. RUSSELL V. FALK is shown above on his 320-acre grain and livestock farm in Red Oak, Iowa. He is another farmer who uses B. F. Goodrich tires on his car, truck and tractor.

When the photographer took these pictures, Mr. Falk told him: "I have used B. F. Goodrich tires for the past seven or eight years and have always gotten good mileage. I now have 24,000 miles on my second set of passenger car tires which are still good for another 24,000."

B. F. Goodrich Silvertowns outwear other tires, including prewar tires. They

resisting breaker strips. A broader, flatter tread that grips the road, wears slower and more evenly.

On his pick-up, Mr. Falk uses B. F. Goodrich *All-Purpose* truck tires. They're ideal for rugged farm work, on or off the highway. They carry him "through all kinds of poor driving conditions like snow and muddy roads."

As for tractor tires, Mr. Falk agrees with other farmers who voted 2 to 1 for the B. F. Goodrich type tread. "The Hi-Cleat tractor tires with the open type tread," he says, "get me through the

that they are self-cleaning."

Mr. Falk also likes the way friendly B. F. Goodrich dealers do business.

"B. F. Goodrich service has always been good," he states, "and the trade-in allowances have been very liberal."

For every wheel on the farm, B. F. Goodrich tires are best in the long run. Before you buy new tires, see your B. F. Goodrich dealer. The B. F. Goodrich Company, Akron, Ohio.

LAWN MOWERS

CLEMSON SUPER

Heat treated bed knife and reel blades. Zinc alloy castings. Single wing screw provides self-locking, fingertip adjustment of cutting height from $\frac{1}{4}$ to 2 inches. Setting indicated on dial.

Two wing screws give micro-meter-like finger tip adjustment of reel in relation to rigid, fixed bed-knife. Retains alignment.

Three-piece roller of molded Tenite cannot warp or split. Makes turning easier, prevents scuffing on turns.

New handle suspension, well back of wheel axis, prevents bobbing on bumpy ground. Angle of handle-thrust always the same in relation to main frame, regardless of cutting height adjustment. Handle features comfort-molded plastic grips; on cross-bar that's placed right for easy carrying, there is a convenient bracket for hand clipper.

TABLE STOVES

COLEMAN SPEEDMASTER, GASOLINE

Its many uses and speedy economical operation make this a popular one-burner stove. Lights instantly and regulates to any heat desired. Has wind-proof, quiet, odorless Band-A-Blue burner. Boils a pint of water in 2¼ minutes and produces more than 7,500 B.T.U.'s. per hour.

Large generator; automatic tip-cleaning needle; built-in pump; positive shut-off valve. Rust-resisting brass fuel fount.

No. 500—Cap. fuel fount 2 pts., 7 in. high, 10½ in. wide; wt. each 5½ lbs.\$....

One in a carton.

HANDY GAS PLANTS

COLEMAN

A complete, one-burner gas-heating plant that can be used whenever or wherever efficient, clean, fast heat is needed. Makes and burns its own gas from any common motor gasoline. Lights instantly—flame is quickly adjusted to any height desired.

Strongly constructed, dependable in use; made for heavy duty use. Heavy gauge steel fuel tank is heavily lead coated to resist rust. Has instant-gas carburetor valve, air gauge and hand operated filler plug. Equipped with 8½ inch grate and 7 inch burner. Will produce up to 55,000 B.T.U.'s per hour.

No. 460G—Cap. fuel tank 3 gals., 16 in. high, 12 in. diam. tank; wt. each 21 lbs.\$....

DOLLAR PROFITS IN STOVES

Every time you sell a stove your profits run into Dollars. In selling smaller articles of hardware, a great many sales must be made before you have the amount of profit you can make by selling just one stove. Push the sale of stoves for profit. Our line is well known in this territory and makes sales easy for you.

PRESSURE MANTLE LANTERNS

COLEMAN, GASOLINE

Provides a clear, steady shining, dependable, economical light for any use. Not affected by wind, rain, or storm; durably made of brass and steel. Make and burn their own gas from any good grade of clean gasoline, free from anti-knock compounds. Simple and safe to operate. Can't spill fuel even if tipped over; can't be filled while lighted. Gives more than 40 hours of service per gallon of fuel.

Double Mantle

Lights instantly; two mantles give high candle-power air pressure light. No. T-44G generator has more carbon space, lasts longer, fewer changes, more economical. Green porcelain ventilator top with underside white enameled to throw light downward.

Built-in pump, genuine pyrex glass globe, hand operated filler-plug, lacquered finished fount. Burns 10 to 12 hours on one filling. Complete with two Silk-Lite mantles and wrenches.

Each
No. 228C—14½ in. high; wt. each
6 lbs. \$

Double Mantle

Lights instantly; two mantles give high candle-power air pressure light. No. T-44G generator has more carbon space, lasts longer, fewer changes, more economical. Green porcelain enameled ventilator top.

GLASS VACUUM COFFEE MAKERS

CORY

Brews the finest of coffee. No metal to give taste to coffee. Genuine hand blown Pyrex heat resisting glass bowls. Equipped with upper bowl holder, lower bowl decanter cover and measuring cup. Serving unit has pouring lip to prevent spilling or splattering. Wide neck allows free access to vessels for easy cleaning. The Cory glass filter rod is simple in design—all glass—no hooks, wires, springs, chains or cloth.

May be used on gas, electric, oil, gasoline burner or any other type range. Can be converted to an electric model by the addition of a Cory electric stove.

PETITE RUBBERLESS

Domestic Model

A small size brewer especially created for use where only 2 to 4 cups of coffee are to be brewed.

Unusually attractive with crystal clear, platinum striped heat resistant glass bowls. With Cory glass-to-glass vacuum seal.

Comes complete with all accessories in rich ebony black plastic.

Each

No. DNG—2 to 4 cup cap.; wt. each 2½ lbs. \$. . .
One in a box, eight in a carton.

ROYAL RUBBERLESS

Domestic Model

An attractively designed family size brewer which brings the utmost in utility and beauty to every table.

Has Cory glass-to-glass seal, and the distinctive triple platinum strips on the crystal clear glass bowls.

Comes complete with rich ebony black plastic accessories.

Each

No. DCG—4 to 8 cup cap.; wt. each 3 lbs. \$. . .
One in a box, eight in a carton.

STANDARD ROYAL

Domestic Model

A striking medium size brewer complete with ivory plastic accessories and highly polished chrome metal decanter cover. Crystal clear glass with platinum hand striping.

Vacuum seal is obtained through the use of a new process rubber bushing.

Each

No. DRG—4 to 8 cup cap.; wt. each 3 lbs. \$. . .
One in a box, eight in a carton.

FAMILY CIRCLE

Domestic Model

A large size brewer which finds a welcome in every home. Platinum striping on sparkling heat resisting glass bowls; accessories in rich ebony black plastic.

Vacuum seal is obtained by use of a new process rubber bushing.

Each

No. DVG—8 to 12 cup cap.; wt. each 8½ lbs. \$. . .
One in a carton.

TRAY SET

Domestic Model

A beautiful addition to any home service. The tray is of heavy brass finished in high lustre chromium plating. The base is decorated with scroll-type engraving which lends beauty and makes tray virtually scratch proof.

The complete service consists of the tray, a Cory Regent brewer complete with ebony black plastic accessories, and an attractive sugar and creamer set decorated with the platinum striping to match the coffee maker.

Per set

No. DMTS—Weight per set 9½ lbs. \$. . .
One set in a carton.

BUFFET QUEEN

Electric Model

An ideal serving set which brings charm and convenience to any table setting.

Equipped with a complete Regent model Cory coffee brewer and one extra decanter to provide a serving capacity of 16 cups. The Cory two-burner electric stove offers the extra utility of a high heat for quick brewing and a low heat to keep the

coffee at just the right serving temperature. Stove is finished in a highly polished chromium plating which adds contrast to the rich ebony black plastic coffee maker accessories.

Per set

No. DQE—Weight per set 11 lbs. \$. . .
One set in a carton.

COFFEE MAKER STOVES

CORY, ELECTRIC

Two-Heat

For use with any standard vacuum type coffee makers. Permits coffee to be brewed at the table with ease and speed.

Light and portable, can be plugged in anywhere. Two heats; high (660 watts), for quick brewing and cooking; low (80 watts), for simmering and maintaining correct serving temperature.

Chrome plated finish with black or ivory bakelite handles. No cord furnished but any standard appliance cord set can be used 110 volts, A.C. or D.C.

No. DEO—Black handle Each

No. DEO-I—Ivory handle

Weight each 1½ pounds.

One in a box, twelve in a carton.

ELECTRIC COFFEE GRINDERS

CORY

A new domestic type coffee grinder which automatically grinds coffee to a perfect grind for use in any standard vacuum type coffee maker.

Regrinds already ground coffee so as to make it perfect for use in the glass coffee makers; or grinds the whole coffee bean into a flavor-fresh grind, as you need it.

Complete with graduated measuring glass.

110 volts, A. C. or D. C.

Each

No. DEG—Cap 1 lb.; wt. each 6½

lb.

One in a box, six in a carton

FILTER RODS

CORY

Patented. Cory all glass filter rods. Does away with all cloth, metal or paper filter parts. Can be used in all standard makes of glass coffee brewers.

Display card furnished with every package of 12 rods.

Per carton

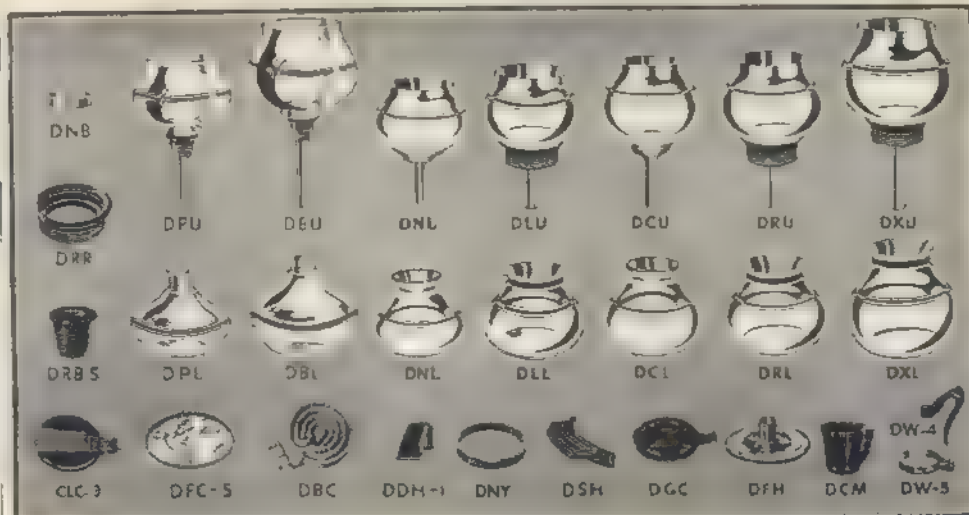

No. DRA—12 rods in a carton with

display card; wt. per carton

3¼ lbs. \$.....

GLASS COFFEE MAKER REPAIR PARTS

CORY

Order replacement parts by model letters shown on glass. Upper bowls are identified by letter "U" in model designation while lower bowls are identified by letter "L." Thus DXU indicates upper bowl while DXL indicates lower bowl of the brewer. All glassware packed in standard packages as designated.

One in a box, one dozen in a carton.

CREEK CHUB WIGGLE FISH

Fluted nickeled tail. Patented mouth piece. Fast flexible swimming movement, floats, dives and wiggles its way along just below the surface or deeper if pulled faster. Double jointed

3¾ in. Jointed Wood Body, Two Treble Hooks

	Per dozen
No. 2401—Natural perch scale . . . \$. . .	
No. 2402—White and red	
No. 2418—Silver flash	

Weight each ¾ ounce.

One in a box, one dozen in a carton.

CREEK CHUB DARTER

A slim lure that darts about near the surface in a life-like manner. An exceptional killer of all game fish.

3¾ in. Wood Body, Three Treble Hooks

	Per dozen
No. 2000—Natural pike scale . . . \$. . .	
No. 2002—White with red head	
No. 2014—Yellow spotted	
No. 2018—Silver flash	

Weight each ½ ounce.

One in a box, one dozen in a carton.

ARTIFICIAL BAITS**CREEK CHUB MIDGET DARTER**

A small edition of the regular No. 2000 and suited to the person who likes a light lure and a whippy rod. Has the same action as the No. 2000 which is probably the greatest near surface popping bait made.

3 in. Wood Body, Two Treble Hooks

	Per dozen
No. 8000—Natural pike scale . . . \$. . .	
No. 8002—White with red head	
No. 8014—Yellow spotted	
No. 8018—Silver flash	

Weight each ¾ ounce.

One in a box, one dozen in a carton.

CREEK CHUB PLUNKER

Twitch it enough to keep it bobbing, dancing, fussing and "kerplunking"—the noise it makes in action—will prove a great lure for lazy bass

3 in. Wood Body, Two Treble Hooks

	Per dozen
No. 3200—Natural pike scale . . . \$. . .	
No. 3201—Natural perch scale

No. 5218—Silver flash, red legs	

Weight each ½ ounce.

One in a box, one dozen in a carton.

ARTIFICIAL BAITS**CREEK CHUB DING BAT**

Developed in response to a demand for a moderately small sized, medium weight lure that would cast easily and travel deeper than the average semi-surface plug.

The fluttering hair legs are an entirely new idea in plug lures. They produce an erratic motion entirely different from a lure not equipped with them. It is a deep running, fast wiggling, fish-fooling masterpiece. An attractive bait for all game fish, especially during the warm weather.

2 in. Wood Body, Two Treble Hooks

	Per dozen
No. 5100—Natural pike scale, brown legs \$. . .	
No. 5101—Natural perch scale, green legs

CRESCENT SPECIAL DISPLAYS MADE TO MATCH STORE FIXTURES

For a number of years the Crescent Tool Company has specialized in making display panels to order. They are available in almost any shape and size and can be finished in a wide variety of colors.

The illustrations above are typical of some of the displays furnished the hardware dealer. Sizes can be made to fit in with the shelving or can be built to suit the dealer to tie in with other arrangements in his particular store. Color can be supplied to match or blend with shelving or cases, and become a permanent part of the store fixtures.

There is no charge for the panel, the only cost is for the goods themselves. In ordering all we need to know is the size of the panel, how it is to be mounted, selection of the items wanted and the color arrangements. Tools are mounted either with wing nuts or spring clips, and are easily removed for demonstration and sale.

CRESTOLOY TOOLS

"Crestoloy" is the trade-marked name of special steels developed by the Crescent Tool Company working in conjunction with metallurgists of the leading steel companies. The analyses of these steels vary somewhat according to the purpose for which the finished tools are designed. In other words, the steel used in each tool is of the grade best suited to that particular tool.

Testing—Special production testing machines have been developed and every "Crestoloy" plier which comes through the factory is subjected to rigid strength tests before it is boxed and placed in stock. Cutting pliers are also given an actual cutting test, in which they are required to cut off a piece of hardened plow steel wire of a size used in U.S. Government specifications as well as the leading testing laboratories.

KRAEUTER PLIERS

THE CHOICE OF SKILLED MECHANICS

Krauter pliers are drop-forged from the highest grade alloy steel, heat-treated and hardened in automatic electric furnaces. Using the highest quality steel possible maintaining uniformity in hardness, making Krauter unequalled for durability, gripping, and cutting power. The teeth do not mash down and the edges will not dent or nick.—Blue Temper Finish. The plier is made of the same steel, and is supplied at a slightly lower cost, by eliminating certain polishing operations.

"We're a SEA GOING family"

says ***CruisAlong***

"And we know you'll be proud of whichever one of us suits your particular needs. The 21 footer is a comfortable cabin cruiser built for 'life on the water.' She gives you 20 to 25 miles per hour depending on the motor you select (45 H.P. Gray or 61 H.P. Kermath Sea Jeep). My glamorous Deluxe 23' Big Sister offers more spaciousness and

gives you better than 26 miles per hour from her 95 H.P. Chrysler or Gray 104 H.P.

"Both of us have two soft bunks for you to sleep on and such other conveniences as clothes closet, sink, ice box, stove and extra storage space."

Prices from \$2440. to \$3395.

CruisAlong

M. M. DAVIS and SON, Inc. SOLOMONS, MARYLAND

Hutchinson Fairfarm Flyer "Fairfa" sets a pretty pace with her matched pair of GM 6-71 Diesels.

Allumette, a 52-footer, built by Consolidated, powered with three 6-cylinder 2-cycle GM Diesels driving triple screws.

for every kind of craft

DO you think Diesel power has to be big and bulky? Do you think it must weigh tons—or that it is slow, sluggish and cumbersome?

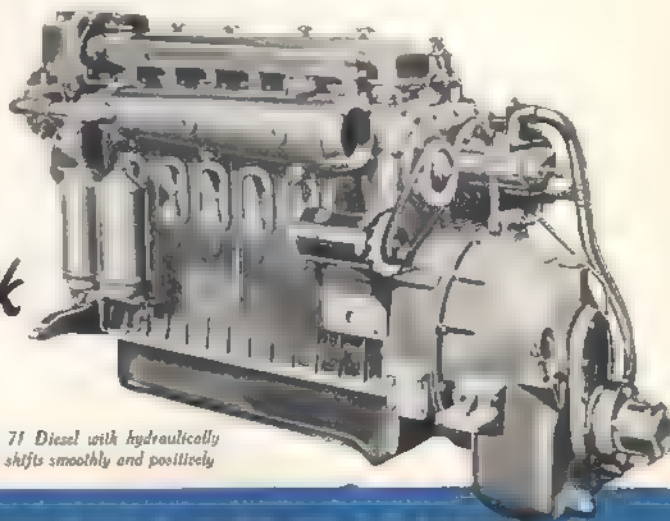

Not today, Skipper.

General Motors "71" Diesels changed all that. With these Diesels every downstroke's a power stroke—a "Four" runs like an "Eight," a "Six" like a "Twelve." They're smooth as a calm sea, yet full of pep and power. As to bulk, they're down to a size and weight that make them nice sailing companions even on moderate-size boats.

That's the story. You can have the economy of Diesel power, its long life, its dependability, its extra safety, in the clean, responsive kind of engine you like.

Better be sure you know all about GM "71" Diesels. See them at the show, or drop us a line.

free from broken kernels and dirt as possible when you store.

4. Inspect stored grain at least once a month. If bugs are working, fumigate. Use a ready-mixed ethylene dichloride-carbon tetrachloride preparation. It won't hurt the grain, but watch out for the fumes! (See *Farm Journal* February 1948, page 171.)

Nematodes On The Run

Farmers in the tobacco shade areas of the Southeast are looking forward hopefully to nematode relief this year. The nematode, responsible for both root knot and a disease known as "coarse root," has been damaging both quality and yield.

Soil fumigation is the answer, according to many tests. Last fall and early winter, custom operators were busy applying fumigants to tobacco soils in Florida and southern Georgia. DD and Dowlume W-40 were the treatments most commonly used.

Treats are also being made in other shade tobacco areas, such as the Connecticut Valley. So far they look good.

Aphids Cost You Alfalfa

As an alfalfa grower, how many pounds of pea aphids are you feeding per acre?

Robert S. Filmer figured it out on an alfalfa field on the Walker-Gordon farm in Middlesex County, N. J. He found that the alfalfa was supporting more than $3\frac{1}{2}$ tons of those little green plant lice to the acre! And it was costing plenty of hay.

You may wonder why pea aphids feed on alfalfa. It happens that they winter on it, feed on the first cutting, then migrate to pea fields, if handy.

Filmer, an entomologist for the New Jersey Experiment Station, knew that aphids were reducing alfalfa

De Laval Better Milking Has Never Been Equaled!

DE LAVAL—the milker that first "sold" dairymen on the advantages of machine milking—has never been successfully matched in all around top milking performance.

Always the leader, the De Laval Magnetic Speedway Milker today is the only milker that can give you all these necessary advantages:

- ✓ UNIFORM MAGNETIC MILKING
- ✓ HIGHEST YIELD PER COW
- ✓ CLEANEST, LOW COUNT MILK
- ✓ EASIEST, QUICKEST TO WASH
- ✓ SOUND, HEALTHIER UDDERS
- ✓ SIMPLE, DEPENDABLE OPERATION
- ✓ LOWEST YEARLY OPERATING COST
- ✓ GREATEST TIME AND LABOR SAVING
- ✓ BIGGER MILK CHECKS

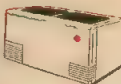

**NOW'S THE TIME FOR YOU TO CHANGE TO
THE NEW DE LAVAL!**

De Laval Junior Separators

Built especially for the smaller herd owner. Provide De Laval clean skimming and long service at lowest price. Produce high quality butterfat. Four sizes.

**Now De Laval
Speedway Food Freezers**
For better food preservation and better farm living. Improved table fare at lower cost. Beautiful in appearance—dependable and economical in operation. Two popular sizes.

Cultivation Comfort

There's little front-wheel bounce with this ridge buster, built experimentally by Iowa State College engineers. It smooths the ridges made by previous cultivation. The device is attached so that it can be raised or lowered with shovels.

ONLY DE LAVAL

Only the De Laval Magnetic Speedway Milker gives you the "Magnetic Heart" which assures uniform milking and which means the highest milk yield per cow and lowest cost.

Naturalube
D.H.D. Oil**

*Naturally
Better!*

Better by Nature...

Unusual natural qualities of the crude oil give Naturalube D.H.D. its ability to remove hard carbon. D.H.D. naturally clings longer, penetrates faster and farther. Saves wear.

Reinforced by Lion

Lion carefully safeguards all the natural engine-protecting qualities of the crude during refining... Then adds special reinforcing to help keep sludge and lacquer from stealing power. D.H.D. is non-corrosive, safe!

GUARANTEED

If you don't believe D.H.D. is the best oil you've ever used, Lion Oil Company will refund your money. Buy it in the 5-gallon spout pail or 50-gallon drum from your Naturalube distributor.

CROPS

yields. That's why he weighed the aphids. In some cases alfalfa that should have yielded 10 tons (green weight) of first-cutting hay, was making only 3½ tons. Those fields were "growing" as big a tonnage of aphids as alfalfa.

Until someone discovers a market for aphids, entomologists are still trying to find some good way of getting rid of 'em. Rotenone doesn't work so well because of the cool spring weather. DDT and benzene hexachloride kill the aphids, but make the hay unusable for livestock. Bug experts are now testing the new killer, parathion, to see what it will do.

New Varieties

Potatoes. Kennebec, recently announced by USDA, is very resistant to late blight, and is a high yielder. This large, white, shallow-cyed potato also resists certain virus diseases, including net necrosis and mild mosaic.

Tests in 20 co-operating states show Kennebec adapted to many regions. Some seed will be available to growers this fall.

Russet Sebago, developed at the University of Wisconsin, has the high quality and blight resistance of Sebago, plus scab resistance equal to Russet Rural. It is a late potato, with a fairly tough skin that stands handling well. There'll be some seed this fall.

Grasses. Lincoln and Achenbach, new strains of smooth brome grass, out-yielded common brome by more than 50% in Wyoming the last two years. There was little difference in hay yield between the new strains. Achenbach came from Kansas, and Lincoln from Nebraska.

Electric Impact Tool

Removing studs, even when frozen, is easy work with the socket attachment for this electric impact tool. Among other operations claimed by the manufacturer, Ingersoll-Rand, are drilling (metal, wood, or masonry), and reaming.

BOWES

**As a Bowes Dealer He
has the "Know-How"
on Tire-Repairing**

● Whenever you have a tire or tube repaired, you entrust the lives of your loved ones to the repairman. Therefore his ability, equipment, and the quality of materials he uses are of tremendous importance.

The dealer who displays the Bowes "Seal Fast" Trade Mark has been trained in our method of tire and tube repairing. He has the "know-how." He is supplied with the most modern equipment and materials, tested and improved through 30 years' experience. That's how we protect our good name and your safety. Your Bowes dealer can give you lasting, dependable tire repair service.

TOY NEWS AND NEW TOYS

A Trophy assortment

POPULAR TROPHY MUSICAL TOYS

Shown in the accompanying illustration are four popular musical toys featured by Trophy Products Co., Cleveland, Ohio. Made of colorful, sanitary plastic, they include "Hezzie," the "Flutophone," a "Sax-O-Fun," and "Sousafun."

Junior can drop them or pound the furniture with them and they will still play accurately, as with all Trophy musical toys, they have scientifically designed acoustical chambers and replaceable vibrators. The "Sax-O-Fun" is featured by Spike Jones' band of "City Slickers," while "Hezzie," the slide whistle, takes its name from the famous leader of the "Hoosier Hot Shots."

RIG-A-JIG'S NATION-WIDE COLORING CONTEST

An ingenious advertising and sales promotion thru Children's Activities, in their March, April, May, and June issues, features a coloring competition.

According to Wm. Roth, vice-president of Rig-A-Jig Toy Company, one of these Rig-A-Jig construction ideas, such as the Woman with Doll Buggy, will be featured monthly in large outline picture. Children are instructed to color with crayons or colored pencils. They color the circles, red, the triangles, yellow, etc.—all the 7 different geometric shapes in their correct colors so that the finished picture looks like the real toy. 37 prizes from \$10.00 down are being awarded on the basis of neatness.

Rig-A-Jig is highly commended by educational authorities for the way it entertains, while helping to develop a whole battery of basic personality factors, such as muscular coordination, creative imagination, finger dexterity, color discrimination, space visualization, and a general speeding up of thinking and reasoning faculties. Doctors, also have found that Rig-A-Jig has substantial therapeutic value for children confined to hospitals because it fosters

good emotional drives in a child and eases the hardship of inactivity.

Dealers recognize in Rig-A-Jig a sound year 'round promotional toy, especially desirable during seasonal lags. Further details on the Contest and tie ups with it are obtainable by writing Rig-A-Jig Toy Company, 32 W. Washington, Chicago 2, Ill.

EUGENIA BOOKING HEAVY ORDERS ON BABEE WEE

The latest word from Eugenia Doll Co., New York, is that their new wetting doll is proving "a ball of fire." "Orders have been pouring in at such a pace, there is a likelihood that these dolls will have to be allocated for the balance of the year," said the firm spokesman.

One of the features that have won for Babee Wee this tremendous popularity is its remarkably light weight. Eugenia dolls sell in the popular price range. For example, Babee Wee in the 20-inch size retails for \$9.98.

Babee Wee and other new numbers in the Eugenia line are now on display in the 200 Fifth Avenue Building, New York, Room 534, with popular Benj Portugal in charge.

Babee Wee and layette

LEADER MERCHANDISE CO. GETS LARGER QUARTERS

The Leader Merchandise Company has moved to new and larger quarters at 45 East 20th Street, where they will continue to feature their low priced merchandise in addition to many new lines. They are now handling a complete line of toys, notions, novelties, plastic specialties and many other items in the 5c to \$1.00 field.

Leader has a constant stock on hand of all their items with many new products being supplemented to their line from time to time. Their Fall line this year will contain mechanical toys made of metal and plastic, decorations of every type and style for the tree and home, and other interesting items. Samples of their entire line are on display at their new show room.

TOY TOWN CORP. INTRODUCES THE BABE RUTH OFFICIAL BASEBALL GAME

Toy Town Corp., manufacturers of "Squealie" and "Tee-Off," are introducing Babe Ruth's Official Baseball Game to the trade during the American Toy Fair, March 8th through 20th.

This baseball game simulates all the features of professional Big League Baseball.

George Geller and Jack Otis of Toy Town showed the baseball game in its crude stages to the "Sultan of Swat." This game, in a sense, is an offshoot of Toy Town's "Tee-Off" golf game, which had been on the market many months before.

The "Bambino" took a gander at this new gangled game; took an immediate liking to it; offered some suggestions for improvements . . . and lo and behold . . . Babe Ruth's Official Baseball Game was born.

Toy Town is also introducing "Winkie," the Big Brother of "Squealie," the plastic piggy bank. "Winkie" is a big fellow approximately 14" long, 9" high and 8" wide. He's made of shatterproof plastic in pastel colors and holds over \$1,000 in coins.

The complete line of Toy Town toys will be on display for the visiting buyers during the Toy Fair and throughout the year in Room 507, 200 Fifth Avenue, New York 10.

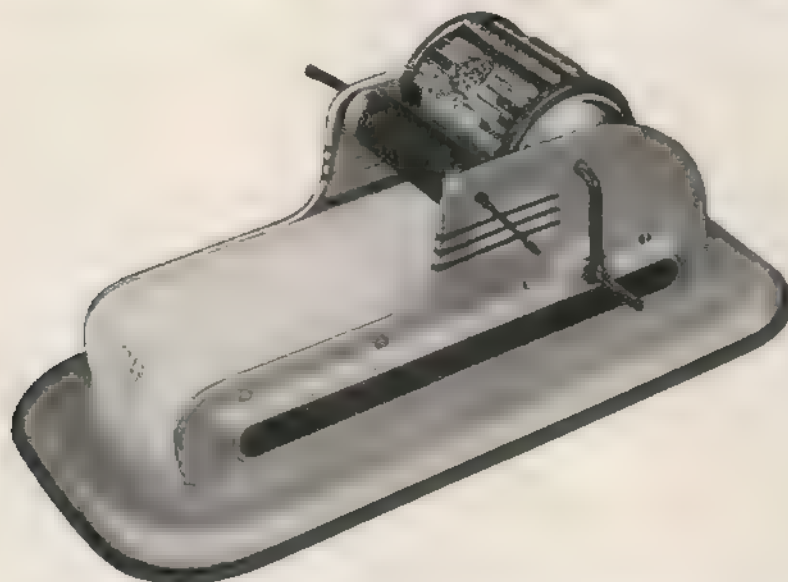

MELDON BROTHERS MARKET NEW TOY GUN

The Meldon Brothers Company, Cleveland 3, Ohio, manufacturers of the well known super automatic tom gun, are introducing a new toy gun to the market. It's the new Play Police Automatic Cap Pistol! This all metal cap pistol, made of 22 gauge steel that will not break when dropped, has a fine blue black baked infrared enamel finish. It shoots with a loud report and can be loaded very easily. It is a 50 shot repeater, using any brand of caps. For complete safety and harmlessness, this gun is constructed with a safety trigger and all moving parts are enclosed. The gun comes complete with a play police badge, policeman's whistle, and Play Police permit. The complete four piece set is packaged in an attractive multi-color box. Packed four dozen to a shipping carton, weighing 35 pounds. Suggested retail price is 79c.

All metal cap pistol

"WHAT DO THEY WANT TO STUFF MY BABY FOR?"
growled ELMER the bull

"No, no dear, said ELSIE the cow, hastily. They aren't thinking of stuffing little BEAUREGARD. It's to be a doll, a toy, a plaything for millions of little boys and girls everywhere. A cuddly BEAUREGARD doll with cute little ears and nose and his color all over to blend with his baby brown eyes.

"Don't you let them make him stuffy," roared ELMER. "My baby is born to a tradition, his father's

tradition, from a long line of fine bull craftsmen, that's what we were—"

"Know how, that's what I want," bellowed ELMER. "I want to see if those people know how to make my baby look like me. That, woman, will give him sales appeal the like of which you have never—Yes, dear, sales appeal, I said. **SALES!** Ask them how soon they'll be in production.

TOY NEWS AND NEW TOYS

Model Adams Grader

NEW DOEPKE SCALE MODEL

This 2 ft.—10 lb. authorized reproduction of Adams Diesel Motor Grader is the latest of the small scale replicas of heavy construction equipment put out by the Chas. William Doepke Mfg. Co. Doepke's Model Road Grader is made entirely of electrically welded heavy gauge steel with jointed front axle, 6 Goodyear rubber tires on tandem wheels and a scraper blade that turns in a 90° arc, adjustable both vertically and horizontally. The color of the toy is the same as the original Adams machine—brilliant red orange. The Model Road Grader is being sold throughout the country as are the

toy can be used as a football practice device as well as a punching bag. The toy can also be ridden in the water. Made of Vinylite plastic by Marty Gilman, Inc., Gilman, Conn., Comeback, Jr., is available at leading department, sporting goods and toy stores at the approximate retail price of \$18.00.

REAL-O HORSE

Quel Products, Inc., Cleveland, Ohio, announces the introduction of the Real O Horse. Here's a horse that will give the youngsters imagination, the ride of a lifetime. In a neighborhood where these toys were tested for child acceptance it proved popular. Boys and girls from four years to eight years showed enthusiasm that brought the parents out to see where they might be purchased. The Real-O Horse slips over the child's body and is suspended by a harness allowing the rider to grasp the reins just as you do on a real horse. It is a western horse in strong brown, black and white colors. The Real-O Horse is priced to retail at approximately \$2.50. The horse is made of 200 lb. test, specially treated corrugated board, exceptionally

Real-O Horse by Quel

sturdy, yet weighs only 25 ounces. Over all size of body is 26"x14"x6" when assembled. Shipped flat, it is designed for quick and easy assembly. On the inside of shipping carton there are attractive western cutouts, six-shooter, holster, gauntlets, desperado signs, etc.

NEW PIN UP BOARDS

The Pin Up craze amongst the high school and college crowd is being catered to with a new line of Pin Up boards. The 24"x32" and 24"x24" boards, which will retail for \$2.00 and \$1.75, respectively, will accommodate pennants, pictures and other souvenirs and are also excellent for children's drawings. Two smaller sizes, 12"x16" and 16"x24", priced at 75c and \$1.00 retail, are popular for home memos. Boards are smoothly surfaced, take thumb tacks very well, and with red borders are all ready to hang. All sizes are available in individual shipping corrugated cartons or packed six in carton. Manufactured by Link Manufacturing and Sales, Pamplynn Rd., R.D. 3, Stamford, Conn.

This pin-up board by Link Manufacturing Company has many useful purposes for adults and juveniles.

Model Bucket Loader, Dump Truck, and Concrete Mixer

Holding the Seal of Approval issued by *Parents Magazine*, these Model Toys are on display in Room 559 and 553, 200 Fifth Avenue, New York City. Address of manufacturer—Chas. William Doepke Mfg Co., Rossmyrne, Ohio.

FOR JUNIOR ATHLETES

This toy will pick itself up, regardless of how it is used. Made of heat-sealed Vinylite plastic sheeting, this new Comeback, Jr., is devised by Marty Gilman, famed designer of football practice equipment for leading college and professional grid teams, to promote Junior's physical condition and to cultivate his interest in football, boxing and swimming. Weighing less than ten pounds, the toy is inflated and deflated like a tire tube and stands two feet high. The

Comeback, Jr., has been designed by Marty Gilman, Inc. for the junior athlete; whether he is a paper-weight boxer or backyard quarterback.

the most sensational news is
the magic-voice, rubber-skin dolly

"BABY COOS"

Pressure applied to legs or body
produces babylike cries which
you can control

And if you nod her head, or press
her arms against her body, she
answers with a coo

- She coos if you cuddle her!
- She sobs if you paddle her!
- She complains if you pinch her!
- And she wakes and sleeps!

\$6.79
14-inch

Surely you've heard about BABY COOS—newspapers and magazines all over the country have shouted her story; and BABY COOS herself has cried and cooed on the radio and over television! She looks, feels and even makes sounds like a real, live baby—and, what's more exciting and realistic, you can control the volume and pitch of her voice! The way she responds depends on the way you treat her. Caresse her gently, and she'll coo affectionately. Fusch her, and she'll give a plaintive sob. And if you squeeze her roughly she'll scream to let you know it hurts!

BABY COOS inspires a world of motherly tenderness and care. Her smooth Magic Skin rubber body is stuffed with soft foam rubber—she's warm and snugly and almost human to the touch. Like any infant, she has to be bathed, powdered and dressed. Her head is practically unbreakable plastic; the eager, happy expression on her face is irremovable. BABY COOS wakes and sleeps, just as you'd expect. Her lucite eyes have a bright sparkle, and her lashes are wonderfully long and silky.

BABY COOS wears a rib-knit cotton shirt and pants. She comes with a complete outfit: a sheer, prettily trimmed organdy dress and bonnet, cotton slip, rayon socks and imitation leather shoes. And she even has a miniature plastic tea set!

49 N 2873—14-inch size. Shipping weight 2 pounds. \$6.79

Drinking-Wetting and Rubber Skin Dolls

"Pretty eyes that close up tight
When she goes to bed at night"

Now! **HAPPY TIME** Drinking-wetting Baby with pretty layette and carrying case

\$6.79
11½ in.

- Flesh like body with chubby, jointed arms and legs of washable molded rubber
- Practically unbreakable plastic head turns; almost human features; sleep
- Canvas-effect fiber board case has 2 snap locks, handle, (smallest case has 1 set)

Now this beloved doll comes with her own layette in a handsome carrying case . . . so convenient to take along when your little girl goes visiting (for once she owns this sweet baby, she'll not want to part with her for any length of time!). At home, case will be used for storing dolly's belongings.

And what fun it'll be to care for this baby! Drinks and wets, just like a real one, and diapers have to be changed . . . can be bathed, powdered, dressed and undressed. She brings her own nursing bottle

Wears diaper and knit shirt. Layette consists of: sheet cotton dress, bonnet, slip, 2 diapers, ray imitation leather shoes, 4 safety pins, 3 powder clothes pins, plastic plate and spoon. Choose the gift set for your little girl!

Layette consists of sheer cotton dress and bonnet, slip, 2 flannel diapers, 4 safety pins, 4 powder puffs, wash cloth, rubber sponge, real soap, 4 pins, rayon socks, dainty shoes and plastic plate and spoon trend menu. Doll about 11½ inches tall, wears diaper.

79 N 02831—Doll, bath and layette. Shpg. wt. 4 lbs. Make their dreams come true this Christmas! It's easy to gift by mail at Sears on Easy Terms; see page 243.

Petal smooth rubber skin feels and looks real

Plastic head; sparkling go-to-sleep eyes

Sponge her off with soap and water; powder her

This Magic Skin Baby is made for cuddling

She feels real—and her plastic head has fine features

She's perfectly adorable! Caring for her is a special pleasure, because her soft skin feels almost human to the touch. Just like a real baby, she should be sponged off and powdered, so she'll stay clean and fresh; she has to be dressed and undressed; and at bedtime she'll need to be sung to sleep. (Her lashes are noticeably thick and long when her sparkling eyes are closed.) Every part of the Magic-Skin baby—from tip to toe—shows quality workmanship. Her body, arms and legs have smooth rubber Magic Skin, and they're stuffed with soft cotton. Her head has molded, tinted hair and sweet babylike features—and, being plastic, it's practically unbreakable. (All sizes of the Magic Skin baby have heads which can be tilted and turned.)

Dolly wears knit cotton panties and shirt, and her big layette is pretty as can be. Consists of daintily trimmed organdy dress and frilly bonnet (assorted styles and colors); cotton slip, rayon socks and imitation leather shoes. Also included are three soft powder puffs, two safety pins (on cotton cloth), six wooden clothes pins and a set of tiny plastic dishes!

14-inch

Rubber Baby with go-to-sleep eyes

She drinks from her bottle, then wets her diaper

To a real mother, this infant's behavior might prove trying... but to a little girl it's most endearing! Besides being able to drink and wet, the Honeyuckle baby is pretty to look at and pleasant to hold. Her flesh-like body, arms and legs are unbreakable rubber; can be sponged off. Her practically unbreakable plastic molded, tinted hair; and she has sparkling go-to-sleep eyes with lashes made with great care for a long, happy life with your little girl. Comes with a flannel diaper and nursing bottle. For layette, see separate listing.

Ideal

De luxe Magic Skin Baby Outfit

With complete layette in smart, sturdy suitcase

Perhaps your little girl has dreamed of owning a doll with a complete wardrobe... but to actually get this one, this Christmas, is beyond her rosiest expectations. Why, she'll go into raptures when she opens the suitcase and sees the lovable doll with all her lovely clothes! The lifelike Magic Skin baby has all the features of the one above. Her layette is made of fine cotton and rayon in pastel colors or white (no choice); trimmed with lace, embroidery and ribbons. Includes: fleecy snowsuit and bonnet, sheer dress and bonnet, slip, knitted shirt and panties, housecoat, jacket, socks, imitation leather shoes, a soft blanket, 3 powder puffs, 6 wooden clothes pins, wash cloth—and a plastic doll-size tea set. Suitcase is cardboard over wood frame, canvas-effect paper covering, snap locks, handle.

Flash Gordon Air Ray Gun

"America's most amazing action toy." That's how Robert F. Driver, president of the Budson Company, describes the Flash Gordon Air Ray Gun currently being manufactured by his company in Chula Vista, California.

According to Driver, this futuristic toy has set sensational sales records since it was first placed on the market last October. As an example of its popularity, Driver cited the experience of Hale's Department Store of San Francisco. This store sold 4,400 guns in less than 10 days last December.

The Air Ray Gun shoots an amazingly accurate blast of air as far as 30 feet. Its cocking mechanism is a simple lever that draws back a heavy rubber diaphragm. When the trigger is pulled, the rubber diaphragm snaps taut, ramming air through a wide, venturi-shaped nozzle with a resounding "whoosh," and with enough force to knock over cardboard targets from across the room.

Driver stressed the fact that despite the gun's warlike appearance and action, it is absolutely safe and harmless, even when fired at point-blank range.

Painted bright red, the gun is sturdily constructed of heavy gauge sheet aluminum. "All moving parts are precision machined to insure smooth, simple operations," Driver stated.

Flash Gordon Tie-In

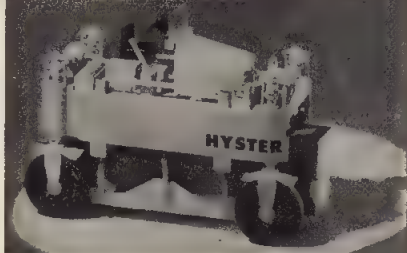

The Budson Company recently completed arrangements with King Features Syndicate for the Flash Gordon tie-in, and the gun will be promoted, in part, by the cartoon adventures of the comic strip hero.

In order to take maximum advantage of the Flash Gordon promotion, the company has completely redesigned packaging and other promotional material around the Flash Gordon theme. The new package, an attractive, four-color box, is illustrated with pictures of Flash Gordon, and Dale Arden, Flash's female playmate in his interplane story escapades.

814	2 ozs.....	★\$6.00

One dozen in a box.

► Points Claire Y.C. held a meeting last month to revise their by-laws and constitution, an excellent idea which might well be copied by other clubs with archaic constitutions. Among the best of the changes was a new nominating set-up in which a nominating committee is chosen representative of the various groups in the club. The names of this committee are published by letter to each member so that he, if interested, may offer suggested name or names. In addition, any five members may nominate a part or full slate as they see fit. The official slate must be given to the membership well in advance of the close of nominations so that the members still have a chance to disagree if they so choose. The new nominating committee consists of Allan Currey, Aylmer Hamlet, Hugh McIntosh, Tom Morrison and Jack Sears.

► Boats have been ordered or have changed hands recently as follows: Jim Coote bought *Zephyr* from Carlyle Miller and John Symonds *Grayling* from Alec Poe. Dragon Boatbuilding Co. is building a Y for Claude Hill of Beauharnois and three more Ys are being built in Vaudreuil for members of VBYC. Six cat dinghies have been ordered for members of the Royal St. Lawrence Y.C. We shall have the owners' names for the next issue.

► Earl Gaston has left the St. Lawrence Boatbuilding Co. and is now with George Pengally who has started up recently. These chaps are good workmen and should produce a fine boat.

SOUTHERN MASSACHUSETTS NOTES

By Jake Hornor

► Season's standings in the various classes at The Buzzards are Herreshoff 12-footers Sunday series, won by Walter Weld, in *Muffin*. Thursday series (Juniors), Stuart Chase, in the *Hilly Poo*. *Gray Ghost*, sailed by John Carter, had the highest season's standing in the Arrowhead Class.

► The Cotuit Mosquito Y.C. held series races on Wednesdays, Saturdays and Sundays. Helen Sinclair won the Junior Wednesday series, Faith Mattison the Senior Saturday series and Don Bramley the informal Sunday series. Bramley also won the Challenge Cup, the Long Distance Race and the Exchange Race, while Edith M. Henderson took the trophies in the Treasure Hunt and Dead Neck Race.

None of the officers of this club may be over 21 years of age and the dues are a dollar a year, having at one time been 25 cents a year. Officers for next season are: Commodore, Lawrence O. Denve; secretary, Tootie Sinclair; treasurer, Sam Baldwin; fleet captain, Geoff Jackson; and race committee chairman, Everett Jackson.

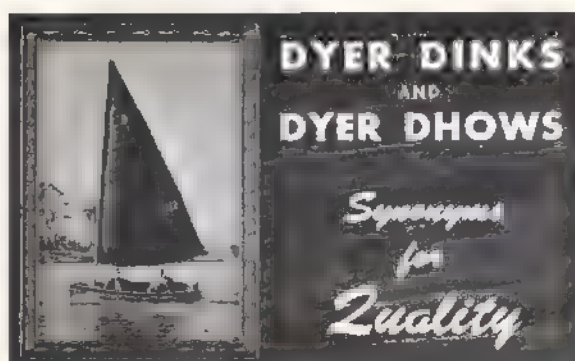

► C. McG. Wells, of the Wianno Y.C., has been elected president of the International 210 Association, to succeed Phil Benson for the ensuing year.

► The Stone Horse Y.C. elected for 1948: Commodore, Marcus Hall; vice commodore, Robert Nordblom; treasurer, Herbert Clapp; secretary, Ralph Snow; chairman of the race committee, William Lee.

► Gardiner Schirmer, of the Hyannis Port Y.C., has recently bought another Wianno Senior One-Design which he is having refitted this year at the Crosby Yacht Building and Storage Co. She is one of the older boats and will require a new rig.

► The officers of the Wianno Y.C. elected at the annual meeting are: Palmer Letchford, commodore; C. McG. Wells, vice commodore; James G. Hinkle, rear commodore; James A. Waller, treasurer; Miss Jean Bodell, secretary.

► A committee, with Allan Priddy as chairman and James G. Hinkle, of Wianno, Dr. Paul Henson, of Hyannis, and Marcus W. Hall, of the Stone Horse Y.C., was appointed by the Southern Massachusetts Y.R.A. to look into the tender subject of keep-

Why we are "Leading the Tender World"—

Just returned from a 500 mile trip and am delighted with the Dhow. Firstly, feel that I could abandon ship, if necessary, with four or five adults. Secondly, she rows admirably, sails well and rows easily and only yesterday carried eight from Denmark to anchorage in a chop and with a 2-4 hp. outboard in perfect safety. L. L. H.

Being a Dyer devotee, I cannot be otherwise than enthusiastic about the two ten footers that have owned. They are very seaworthy, light, easily handled and sail exceedingly well. W. L. T.

"My Dyer Dhow almost paid for herself before the end of the season in fuel saved. A old and young were more anxious to pass about sailing, than cruise. My nine year old sails alone in safety and in all weather, that is when he can sit away before the outboard who pile in four at a time." L. L. S.

In addition, I furnished us all a great deal of pleasure in sailing every harbor we visit. In fact we sailed the Dhow almost as much in total hours as we sailed the sloop." I. A. S.

At the San Diego Y.C. there are many who will only allow their youngsters to go out in the Dhows. No one here has ever upset in a Dyer Dhow." E. H. D.

"I have never sailed a sloop boat that handles so well. We are delighted with it and so is everybody else in this part." A. W. G.

ing the Wianno One-Design Fleet "in line." With over 100 boats built, a few minor changes and modifications have crept in from time to time, the legality of which is questioned by some who find themselves viewing a rival yacht from the broad end. Everyone feels that with a fleet as large as the Wiannos, there should be more inter-club regulations inasmuch as over 50 percent of the Wianno fleet meet in races at least three times a year at the Edgartown, Nantucket and Hyannis regattas. This committee will report its recommendations at the next meeting of the S.M.Y.R.A.

► Bill Crosby, of the Crosby Yacht Building and Storage Co., has his new boat *Sapphire* down from Maine. The cabin and deckhouse are not yet finished but she is in the water for trial runs.

► Chester A. Crosby Co. reports the sale of Nathan Talbot's Casco Bay *Nipkin* to Arthur Hulbeck, who plans to race her off Wianno next summer in the long hoped for Cruising Class.

► The 1948 officers of the Nantucket Y.C. are commodore, Rayne Herzog; vice commodore, Jules Thetard, rear commodore, Lawrence Miller; race committee chairman, Philip Nash.

N.A.Y.R.U. TO VOTE ON NEW RULES

► A vote on whether the new Right of Way Rules, tried out by many North American Yacht Racing Union member clubs and regattas last season, will be accepted as the official rules of the Union or continued on a trial basis for another season is expected at the annual meeting of the Union, to be held at the New York Yacht Club on January 14th.

The Union's special committee, which drafted the new rules a year ago, has held several meetings this past fall and has now settled on an improved version of the code which it is prepared to recommend for permanent adoption at the coming meeting. The new rules have been reworded in a few instances in the interests of clarity, but basically are the same rules provisionally approved a year ago. The enthusiastic reactions of practically all yachting organizations that have tried out the rules makes it seem likely that they will be adopted, in the new and reworded version.

TOY NEWS AND NEW TOYS

Plated horses by Bergen

BERGEN TOY FEATURES PLATED FIGURES

Bergen Toy and Novelty Company, Hackettstown, N. J., have recently brought out an entirely new line of gold and silver plated plastic horses and figures.

A short time after the horses appeared on the market the demand developed for additional items with the result that the line was expanded to include a wide range of other plated figures, such as Indian Chief, Indian Bowman and an Indian Warrior. Then there are Cowboys, some of which are throwing lariats, others sport holster and pistol sets. There is also a businesslike-looking bandit and a troop of West Point Cadets, making the line very complete. In addition to the play value which these items provide for the youngsters, adults find them well adapted to party favors, door prizes, gift package decorations and as ornaments on knick-knack shelves. The entire Bergen toy line, which is on display in Room 1023, Gift and Art Center 225 Fifth Avenue, New York, is represented by H. T. Williams, who needs no introduction to toy buyers. Mr. Williams has had a wide experience in the merchandising of soldier sets and is particularly enthusiastic regarding the new Bergen items for 1948. He extends a cordial invitation to the trade to drop in at his conveniently located showroom.

CHAMPION APPOINTS ROTHFIELD

Sam Ervais, President of the Champion Sporting Goods Manufacturing Co. of Philadelphia, Pa., takes pleasure in announcing the appointment of Leonard E. Rothfield as General Sales Manager. The entire line which consists of Baseball Gloves, Boxing Gloves, Football, Basketball, Playballs, Home Goal Sets will be on display in Booth 32-33 and 40 at the National Sporting Goods Dealer Convention Show at the New Yorker Hotel the week of February 1, 1948. In addition to Mr. Rothfield, Champion has Don Gottlieb, 437 Ontario Street, Chicago, Illinois, Don Morrell and Co., 2037 N. Broadway,

Fresno, California, H. Ross Wees, Claysburg, Pa., and Pacific Brokerage Co. Honolulu, Hawaii.

EUGENIA DOLL BRINGING OUT SERIES OF BOXED SETS

As a result of the great success enjoyed by their boxed items introduced last year, the Eugenia Doll Co., N. Y., has announced that a series of these sets will be available during 1948.

The first, out in plenty time for Spring selling, is the novel number called "Alice

Alice and the White Rabbit

and the White Rabbit." This dramatization of the lovable characters known to children and adults alike throughout the world, is expected to be a "natural" for store promotions.

Other boxed sets are in preparation and according to Fred Gardel, president of Eugenia, they may set a new trend in doll merchandising. All the latest Eugenia doll numbers can be seen at their new showrooms, 200 Fifth Ave., Room 534, in charge of Benj. Portugal.

HALSAM PLANS PRODUCTION EXPANSION FOR '48

The Halsam Products Company and its affiliate, Elgo Plastics, Inc., Cuyahoga Falls, Ohio, recently announced that production capacity is being substantially increased for the coming year. According to Paul H. Schollenberg, executive vice-president in charge of sales and advertising, 1947 demand for Halsam and Elgo toys far exceeded expectations. He said, "Even with the lumber shortage and limitations on plastic materials, both companies were geared to adequately meet the demand forecast for 1947. However, as the months passed, Halsam and Elgo products hit new peaks of popularity with the nation's toy buyers and consequently our

production lagged. This was particularly prevalent in our block lines." Continuing, Mr. Schollenberg said, "At the first indication of this unforeseen swing to blocks, we opened all stops. Gradually production made noticeable unroads and supply rose."

In conclusion, he said, "Halsam and Elgo have set up a definite program for expansion of facilities. New and improved equipment is speeding production to the highest rate in our history. Our research and engineering departments are concentrating on new product development and manufacturing methods. These factors, combined with traditional Halsam-Elgo service will make 1948 a most satisfactory year for our customers."

HENRY KATZ SELLS FOR AUTOMATIC TOY COMPANY

The Automatic Toy Company, Staten Island, New York, announces that they have appointed Henry Katz, 200 Fifth Avenue, as their sales representative. They feel that their choice of Mr. Katz to act as their sales agent is particularly fitting in view of the fact that he has long been regarded in the toy industry as one of the original pioneers in the merchandising of mechanical toys.

The Automatic Toy Company is ready to enter the new year with substantially increased manufacturing facilities, and they will be ready for the Toy Fair with several outstanding new items. Considerable elaborate new equipment has been installed in their model plant including another battery of presses which will make for still speedier and more efficient production.

Auto Speedway, Automatic's 1947 headliner, will be back again in 1948 reinforced by a number of entirely new ideas in wind-up toys which B. N. Cantor, president of Automatic, predicts will soon find their way to the top of the best seller list.

QUALITY ART'S 1948 CHRISTMAS LINE

Quality Art Novelty Co., Inc., announce their new Christmas Card Line for 1948. For twenty-eight years Quality has been a leading manufacturer of greeting cards for all seasons and occasions, to the wholesale distributors. Their new line is beautifully styled and designed. Box assortments, display rack assortments, and cabinet assortments are featured. They also have a complete line of wooden floor cabinets for birthday and everyday cards, in addition to complete lines for all seasons and occasions. General office and factory are located at 787 Elcav. North Avenue, New York 19, N. Y.

a thrilling new Sportwin

YEARS AHEAD IN DESIGN • PERFORMANCE •

One glance tells you there's a brilliant new leader in the light motor field . . . one run, and you know it's true! You thrill to power that is incredibly smooth, flexible, quiet! You enjoy sparkling new features that give you an entirely new conception of light motor performance, convenience, handling ease! Here is the fuel gauge you've always wanted . . . and a score of other advancements including the amazing *Weedless Drive* that lets you highball through waters closed to other motors . . . gives you the all-clear through thick weeds and over rocks, snags, reefs . . . drives anywhere there is water to float your boat!

See Your Evinrude Dealer! Examine the new Sportwin and the complete Evinrude line for '48. Six great Evinrudes to choose from — three famed four-cylinder models — the right motor for every boat. Look for your dealer's name in your phone book under "Outboard Motors." Write for free catalog — address, EVINRUDE MOTORS, 5680 N. 27th Street, Milwaukee 9, Wis.

In Canada: Evinrude Motors, Peterboro, Ontario.

FEATURES —

YOUNG IN THE NEW SPORTWIN

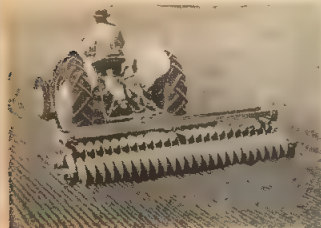

— these advancements, and many more • New alternate firing motor with basic new developments in carburation for new flexibility and smoothness — 4.5 O.B.C. certified brake H.P. at 4000 R.P.M. • New type Simplex Starter flushed into hood • "Full View" fuel gauge • Finger tip control panel with push button primer; carburetor lever; automatic heavy opens and closes fuel shut-off and fuel vent • New type Fuel Filter Closure for faster, easier fueling — lever locked and leak-proof • New Transom Trigger for instant vertical adjustment • New type "Fore and Aft" carrying handles • Weedless Drive with rubber shock cushioned propeller • 360° steering with full reverse.

FIRST IN OUTBOARDS
... 39th YEAR

EVINRUDE

DISCING—Dearborn Disc Harrows are popular fall implements in working corn stubble or plowed land for small grain seed beds. Gangs of this tandem disc are angled or straightened by Hydraulic Touch Control.

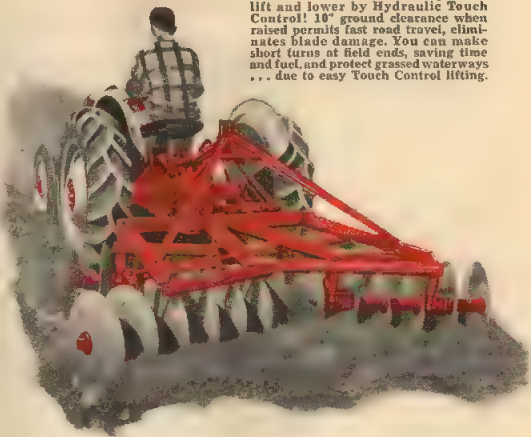

SOIL PULVERIZING—Dearborn Soil Pulverizers are designed for crushing troublesome clods and giving that finished look to your seed beds. Easy draft for fast work. "Differential" action of rollers permits easy turns without mounding dirt.

See Your Dealer. Ask your nearby Ford Tractor dealer to show you these implements. He can tell you a lot more about them and the work they do with the Ford Tractor. See him also for genuine Ford Tractor parts and for implement and tractor service second to none.

Announcing the NEW DEARBORN LIFT TYPE TANDEM DISC!

Now . . . a tandem disc that you can lift and lower by Hydraulic Touch Control! 10" ground clearance when raised permits fast road travel, eliminates blade damage. You can make short turns at field ends, saving time and fuel, and protect grassed waterways . . . due to easy Touch Control lifting.

STURDY, QUICK-ATTACHING DEARBORN IMPLEMENTS

Save Time in the Fall Rush

Working with the Ford Tractor, Dearborn Implements help you to speed your fall tillage in many important ways. Their rugged construction saves you many bothersome stoppages and costly repairs.

Quick-attaching saves time in changing from one implement to another. Ford Hydraulic Touch Control and the compact nature of tractor and implement give you fast easy maneuvering, even in tight quarters. And, furthermore, Implement Position Control gives you a new and improved way of maintaining the implement depth you want.

The Ford Tractor and Dearborn Implements *get the work done . . . the way you like it . . . and on time.*

DEARBORN MOTORS CORPORATION • DETROIT 3, MICHIGAN

Ford Farming MEANS LESS WORK . . .
MORE INCOME PER ACRE

DEARBORN CULTIVATORS

for every
ROW-CROP NEED

Take a good look at the Dearborn Rigid Shank Cultivator shown on the opposite page. It's hard to imagine a simpler design... just a strong steel frame onto which the rigid shanks are attached. There's practically nothing to go wrong. And, except for ground engaging parts there's nothing to wear out!

The Dearborn Spring Shank Cultivator shown on the right is built to precisely the same design except that it has spring instead of rigid shanks attached to the steel frame. This cultivator is especially adapted to stony or root-filled land.

But no matter which of these two types you prefer, the shanks can be easily and quickly spaced for all the row widths in which corn, cotton or tobacco are planted, as well as potatoes and many other vegetables. There are many types of shovels, sweeps or hoes to choose from.

For those farmers who may prefer front-end cultivators, Dearborn front-end attachments in either spring or rigid shank design are available. These are shown at the right.

DEARBORN MOTORS CORPORATION • DETROIT 3, MICH.

The simple design of this Dearborn Spring Shank Cultivator and its rigid shank companion on the opposite page is readily apparent. They are both built so that there's nothing for you to "assemble" when you attach them to the Ford Tractor or "take apart" when you finish cultivating. Only 60 seconds or less for either job!

Front end attachments are available in spring or rigid shank design. These units are mounted in a few minutes. They are

controlled hydraulically with the rear units which cultivate behind the rear tires and in the area between the rows.

THESE 3 BIG ADVANTAGES

1. It lifts and lowers implements at a touch
This feature will save you time and work a dozen times a day. When going to and from the field... when turning at row ends... when crossing grassed waterways, or backing into tight corners. No stiff awkward levers to set, no rope controls to pull!

2. It gives you Automatic draft control
In a field with uniform soil conditions, even though ridged or uneven, you simply set the Touch Control Lever and the Ford constant draft feature automatically assures uniform depth of plowing. When the soil changes, from light to medium or heavy, you simply reset the touch control lever to maintain depth you want.

3. It gives you Automatic depth control
On land that is fairly smooth, whether flat or on hillsides, you use a great new Ford feature called "Implement Position Control." Just set the Touch Control Lever once and you get uniform depth automatically, even when the soil varies greatly. Helps you save time and work—and do a better job in the bargain.

See Your Dealer. Ask your nearby Ford Tractor dealer to demonstrate the Ford Tractor and its matching Dearborn Implements. See for yourself what this equipment could mean on your farm. Ask him to show you his parts and service set-up. You'll see he is a good man to know better... a good man to do business with.

See him your next time in town.

MEANS LESS WORK...
MORE INCOME PER ACRE

Modern Engineering brings a revolutionary FARM ELEVATOR that is AN ALL-SEASON TOOL

HANDLES ANYTHING

from Small Grain to Solid Hay . . . 4-Position Sides can be folded or unfolded in 1 minute to fit any farm elevating job—taking out of as well as putting into storage. Cross-section views at right show how elevator sides are adjusted to handle bags as well as grain and bales.

MOVES EASILY—ANYWHERE

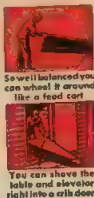

. . . useless weight eliminated by welded construction and use of modern rust, weather and abrasive resistant high tensile alloy steel—the same progressive engineering which produces such modern miracles as streamlined trains. For example, welded tubes are used for frame members instead of the much heavier but no stronger structural steel commonly used. When the Harvey is in folded position, it balances on two wheels so accurately that you can move it around with amazing ease by hand.

1 CHAIN DOES WORK OF 2

with new bind-proof cleats and welded trough. Modern engineering has produced for the Harvey an elevator chain that is as simple as a hay-rope. Never any problem of keeping two chains even. Cleats automatically remain square. New bindproof design prevents sticking and straining. Chain is made of strip steel of special analysis for toughness and strength.

FOLDS UP FOR STORAGE

in 20 ft. shed . . . can be done by one man in 3 minutes. Yes, at last, an elevator that can be stored away as easily as a wagon. Takes only 6 by 20 feet of floor space.

Seewell balanced you can wheel it around like a feed cart

You can shove the table and elevator right into a silo door.

SIDES CAN BE SET TO 4 POSITIONS

Full-open for solid hay, bales, bundles of grain or fodder, and similar bulky material

3/4-open for bags of grain, tankage, seed, feed, fertilizer

1/2-open for ear corn, vegetables, coarsely chopped forage

Closed for small grain, shelled corn, beans, peas, ground feed, etc. finely chopped forage, etc.

BUILT BY THE MAKERS OF FAMOUS HARVEY HAYRAGE MILLS AND CORN SHELLERS

Illustrated is special bin table in place of trough, free-pivoting grain feed tube.

LIVESTOCK

silage total was three tons for the limited-grain steers—about twice as much as the others.

Perhaps these figures will help you decide how you want to handle the cattle you have in the lot.

Anaplasmosis Treatment

New hope for controlling anaplasmosis, the blood disease in cattle, comes from laboratories of the Oklahoma Veterinary Research Institute.

Here scientists have found two drugs (both, incidentally, developed to fight human malaria) which look like bad news for anaplasmosis. One, quinoline diphosphate, cured 85% of the cattle treated. The other, paludrine, also shows much promise.

Institute Director Herman Farley emphasizes that all cured animals retained a "carrier" infection. However, anaplasmosis is not known to affect humans, and recovered animals are perfectly safe for meat.

Both quinoline diphosphate and paludrine are now being made in small quantities, and should be available to veterinarians in a few months.

Mixed Supplement Better

Is it cheaper to feed tankage straight, or to mix it with a vegetable protein supplement for hogs?

An answer comes from the Pennsylvania Experiment Station, where two-year comparisons have been made of a low-protein tankage-soybean oil meal mixture and tankage alone. In both tests the mixture (equal parts) was better. Gains were faster and cheaper.

The first year the pigs were fed in-

Take Your Pick

How much older is the pig on the right? Well, they are litter mates, and received the same feed and care at the Michigan Experiment Station. However, the 100-pounder (right) was treated with sodium fluoride for internal worms, and sprayed with hexachloride for mange. The little fellow on the left weighed 32 pounds. Both pigs ran on worm-infested ground.

VARIETY

FEW PEOPLE realize how many different kinds of taxes they pay and how many different branches of the government take part in collecting and spending these taxes. In New York City there is a sales tax of 2% and of course the retailer must pay taxes on profits, franchises, and all sorts of things. The wholesaler does the same. Transportation companies contribute their share. The manufacturer pays his taxes and this goes right back to the time when the ore was dug out of the ground and the tree was cut down.

RELIEF?

IT IS THE most wishful kind of thinking to believe that any number of these taxes are to be discontinued or even reduced in the near future. Our entire method of government and of living will make such a thing impossible for many years to come. We must readjust ourselves to present conditions and we must do it quickly. We cannot live now or in the future in the way we did during the Gay Nineties or the Roaring Twenties. The world is going through a stupendous change and that change affects every man, woman and child in every country on the globe. There is no escaping it and there is no way in which we can go back to what we call "the good old days" either for ourselves or for those about us. We must adjust our lives and our ways of doing business to conditions as they exist today or to the conditions that may exist tomorrow.

CONDITIONS TODAY

IN ALL THIS talk about costs, wages and taxes I am leading up to what I think is one of the most important messages I can give you today. And this message is that never before in your life have you been faced with a more serious situation or lived in a time when you must exercise every faculty you have and as much time as you possibly can to studying and adapting yourself to conditions of today rather than trying to go over a lot of tables or scrap books and try to bring about the conditions you had to face a few years ago. This situation calls for a thorough house-cleaning. We must, all of us, get rid of many old-fashioned notions, many old-fashioned methods and many prejudices. We must look at things as they are and not as we would like them to be. Basically our market in toys, dolls and games is far greater than it ever has been. Increase in births is phenomenal and the increase in purchasing power is tremendous. There are many more children to be satisfied and it takes much more money to satisfy each individual child. We must have the merchandise to fulfill this greatly increased demand and we must have it at the point where the demand exists. If old-fashioned methods fail to accomplish this effect, then new methods will do so, new stores will replace the old.

FISHER-PRICE TOYS

Mr. TOY BUYER:
would you give me a home
for a few months?

I'll repay
you with
**EXTRA
PROFITS!**

Teddy Zilo (Fisher-Price No. 752) a year 'round, staple-selling toy, retails for \$1.50

● MY NAME is Teddy Zilo, but I'm speaking for all the other toys in our Fisher-Price family. I'm speaking particularly to the thousands of toy buyers who were disappointed last year in being allotted only about 2/3 of the Fisher-Price toys they wanted. My boss, Mr. Herm Fisher, says the only way he can get more toys to you is by getting Christmas production going full blast right now in January. But he doesn't have the warehouse space to store us long. However, if you would accept shipment of even 1/2 of your Christmas toys in February, March, April or May, he would be better able to satisfy your needs. This would certainly up your profits. Having us, you'd show us . . . and surprise even yourself by your early sales!

POPULAR CHILDREN'S FAVORITES

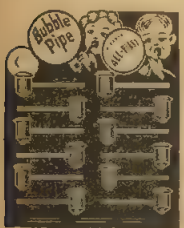

No. 11281—Mystery Stories. Here is a bargain that just can't be passed by. Consists of all the blood-curdling spine-chilling mystery stories you've seen on the magazine and novel stands retailing for 25c each. We are now offering them to you so they can be sold for less than half the previous retail price. Books are in popular pocket size with dimes such as in violation to Murder, Death in The Sun, You'll Die Laughing, etc. Remarkable new bargain that now can retail for 10c each. Put up one dozen assorted stories in each carton.

Per dozen

85¢

No. 2023—Squarer-A-Squirt. Kids really go for this entirely new squirt gun novelty. No metal parts—no moving parts. Fill the transparent plastic tube with water. Insert the cork in place and fire away. A slight pressure on the tube emits a powerful jet of water for an amazing distance. Supplied in assorted bright colors to get the eye of young customers. Length 4 inches. Diameter, 1/2 inch. Mounted one dozen on an attractive sales-display card.

Per dozen

40¢
\$4.50

No. 898—Plastic Bubble Pipes. All the children like to blow the iridescent bubbles with these fine bubble pipes. Made entirely of safe sanitary plastic in assorted two-tone colors. Blow to clean promise cleanliness. Put up one dozen on flashy attention-getting display card.

Per dozen

40¢Kites Books
Airplanes

No. 11282439—Flash Gordon Chaparron Kite. Three great sales features combined in one kite. "Jet propelled," it has much gliding fore and aft. Built like an airplane—ties like an airplane. Made of heavy processed Bratco paper that will not last ordinary kite by far. A four piece kite, but flies in the slightest breeze. Requires no running and can be made to loop, dive, maneuver with just a slight manipulation of the kite string. Width, 21 1/2 inches. Features large picture of Flash Gordon well known to every American boy. Put up one kite unassembled in sleeve type container. Quickly and easily assembled with enclosed instructions.

Per dozen

\$1.20

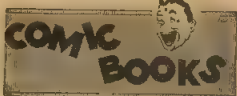

No. 11282437—Buck Rogers Strato-Kite. The one and only four season kite. Will soar, loop, dive, maneuver with just a slight manipulation of the string. The kite that flies like a jet-propelled plane. The least breeze launches the "jet-propelled" Strato-Kite to unbelievable heights. Made of heavy processed Bratco paper that will stand a great deal for abuse. Features picture of Buck Rogers a famous comic strip character admired by every red-blooded American boy. Put up one kite, 18 inches wide, unassembled in attractive flashy sleeve type display container. Quickly and easily assembled with enclosed instructions.

Per dozen

\$2.00

No. 11282490—Rocket Ship Kite. An item that acts as a magnet to draw in the juvenile trade. Made of extra heavy tissue paper in assorted eye-catching colors. Has flashy illustration of rocket ship in full flight on front. Very easily assembled. It comes complete with two thick cross pieces of smoothly polished wood notched for convenience in attaching to corner struts. Will fly high and dip, swoop, dive, turn and do many amazing maneuvers by just a simple manipulation of the string. Size, 22 x 29 inches.

Per dozen

80¢Per gross **\$9.60**

No. 11282—Comic Books. Largest bargain assortment in record! Formerly for these books have been reduced to retail at the new price of 7c. Young and old will clamor for these fun, full pages featuring such favorites as Blondie, Mandrake, The Magician, Tigger and Cat Stubs, The Lone Ranger, Bus Sawyer, Popeye, Sotrel Agent X-9, and scores of others we see in the daily funnies. Regular 10 by 7 inch sized 62 to 80 page comics with laughs on every page. Packed 24 to a box, with at least 12 different numbers in each carton.

Per box

\$1.10

No. 11282448—Jet-O-Plane. Throw it! Watch it zoom! Jet propelled effect, glider Jet Propulsion Plane Streamer attached to stabilizer gives effect of the real P-51 Shooting Star in the sky. Made of quality lightweight balsam that will not damage walls or furniture in case of a crash landing. Packed in bright colored cardboard box are the 12 1/2-inch fuselage, 16-inch wings, stabilizer and rubber with complete instructions for easy assembly. This number can't miss!

Per dozen

\$1.95

No. 1128215—Sure Shot. A dandy item for school stores, novelty shops, etc. Safe and accurate, it shoots 100 feet with remarkable accuracy. Made of smooth birchwood in assorted colors. Supplied with one shooting bar, two thick stretchy rubber bands and two 8-inch rubber tipped arrows, all on colorful point-of-sale display card.

Per dozen

80¢

You see the Seth Thomas Ship's Bell on just about every type of ship afloat... large and small. And in homes, too.

It's a beautiful clock... precision-built by craftsmen. See this and other fine models at your dealer's. Write for illustrated brochure. Seth Thomas Clocks, Thomaston, Conn.

Seth Thomas Marine Clocks

A product of GENERAL TIME Instruments Corporation

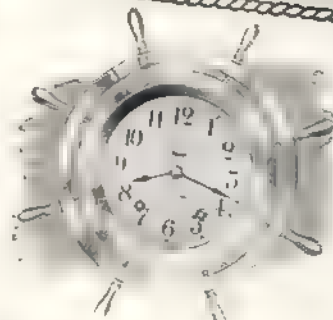

LAKE MICHIGAN BREEZES

By Harold F. Wood

► The lonely cry of gulls is now the only sound in all our harbors from Calumet to Mackinac, save perhaps for the chugging of a hardy fish tug here and there. Even the shipyards are deserted, for the balm of October gave way sharply to a cold November which ended under the zero mark.

► The Age of Sail is about to collide with the Air Age at Burnham Park, Chicago, where the new airfield is nearing completion. For safety's sake, an area 500' wide and extending 500' south of the southern end of the runway is to be forbidden to all boats having any structure over 15' above the water and a similar area extending another 500' southward must be avoided by all boats with spars 30' or higher. While this harbor can still be entered by any craft after this regulation is in effect, it will be less convenient for larger sail boats. However, Burnham should continue to be popular for power boats and the smaller sailing craft. It is understood the Park District has offered the Burnham Park Y.C. a new location just south of the dock on the west side for a clubhouse as the present building will soon require extensive rebuilding. The choice remains with the Club but many appear to favor the proposed site.

► On November 12th around 200 yachtsmen attended the meeting of the Chicago Park Commissioners to argue against the stiff increases of from 20 per cent to 200 per cent proposed in mooring fees in all Park District harbors. The principal objection is the allocation of certain heavy expenses, deemed by yachtsmen to be properly borne by taxes, to special services for yachtsmen. The claim is that actual costs incurred by reason of mooring facilities approximates \$15,000 per year while mooring fees have recently approximated \$42,000 per year. While no action has yet been taken, it is believed at this writing that the

SHIP'S BELL-4 in polished cast brass case. Has 8-day, 11,000,000 movement. Strikes ship's bell. Temperature-compensated escapement; non-magnetic Breguet-type hairspring. Moisture-proof wheel and 50,000,000 extra. Below, same model without wheel base, \$90.00, tax extra. Both clocks have drilled flange for attaching to bulkhead, panel or wall.

Prices subject to change

*Reg. U. S. Pat. Off.

arguments were well received and that the proposed increases may be abandoned or modified. The yachtsmen who most ably presented these facts, including H. F. MacNeil, Herman V. Mell, L. A. Wheeler, and Robert Whalen of the Central Marine Chamber of Commerce, deserve great credit.

► Willard M. Hock, of the Gary B.C., was elected commodore of the L.M.Y.A. at Racine on November 1st; vice commodores elected were Eddie Schnabel (sail), and James A. Hudson (power), and rear commodores, Dr. James Blackwood (sail), T. M. Blackwood (power). James H. Fahey was elected secretary, Leslie E. Schaeffer, treasurer, and Louis Quarles, judge advocate. Ted Dunlap, Jackson Park Y.C., was made delegate to the NAYRU, while Dr. James Blackwood, L. L. Karas and Edward Schnabel were made delegates to the YRU of the Great Lakes. The L.M.Y.A. Regatta, traditionally held the weekend of July 4th, will be held at Macatawa Bay every year henceforth instead of at a different club each year as has been the practice. In 1945 the new charter rule of the Cruising Club of America will be used instead of the present L.M.Y.A. rule, to conform with other parts of the country.

Revitalized Tumblaren racing is promised by the newly formed Tumblaren Association of Lake Michigan which has elected Charles Krug, of Chicago, commodore; Charles Heckert, of Kenosha, vice commodore; and Walter Bauer, of Michigan City, governor.

► Last month we reported the winning of the R Class championship by Herman Van Mell in *Ardelle*, intimating it was quite a personal triumph for Van. It seems this was the only thing right about the item. We are now informed that Walter Bitter is co-owner of *Ardelle* and hence entitled to a share of the honor but that there is not too much to share as *Ardelle* is such a boat as even Mortimer Snerd should sail to victory. It also seems that Lew Gilbert in *Safara* was finally given second place which first reports had given Eddie Schnabel in *Yankee*. We hope this straightens things out.

Jay Phillips' new lap writing board

JAY PHILLIPS, INC. INTRODUCES "LITTLE SCRIBBA"

Jay Phillips, Inc., Box 148, Naperville Illinois, is introducing a unique lap writing board known as "Little Scribba." It was originally conceived during the war for use by convalescing veterans. An outstanding feature is the specially designed curve that fits the body perfectly and makes the board efficient for use in standing, sitting or reclining positions. It has a sturdy lightweight surface for writing, drawing or reading while swinging rubber tipped metal fingers hold the writing material firmly in position. The dark center shown in the accompanying illustration is described as a new type of chalk board surface and is obtainable in a variety of colors. "Little Scribba" comes attractively packaged with chalk, chalk eraser, stencils, pencil and tablet.

LOUISIANA DEPT. STORES

Department store sales in Louisiana for November, 1947, rose 12.1% over November, 1946, and were 13.2% higher than in October, 1947, according to figures released by the Bureau of Business Research of Louisiana State University. A year ago, the increase in November over October was 19%. The Louisiana seasonal index shows a decline of 1.6% in November from October.

In Baton Rouge, November, 1947, sales increased 11.5% over November, 1946, and 44.8% over October, 1947. A year ago, sales in Baton Rouge gained 3% over those of October. The same three comparisons for New Orleans were increases of 1.7%, 14.5%, and 3%; and for Shreveport, increases of 7.5%, 7.6%, and 2.9%.

EXPANSION PLANS

A completely remodeled and greatly enlarged Carrollton branch store will be accomplished during 1948, according to Herbert Schwartz, president of Maison Blanche Co., New Orleans department store.

The Carrollton Branch—called Maison Blanche Carrollton—has been in existence for several years, but it will now be made larger, and will have completely redesigned merchandise displays, Mr. Schwartz indicated.

In addition, new up-and-down escalators serving all five floors will be installed in the main Maison Blanche store on Canal street during 1948.

"GIRDERS OF STEEL—TO BUILD LIKE REAL"

*There is
Only One*

ERECTOR

MEET the Mysterious WALKING GIANT

He's Made
of METAL!

He Has
ELECTRIC EYES!

He Walks By
REMOTE CONTROL!

Built with the Colossal New No. 12½ ERECTOR

FEATURES THAT MAKE ERECTOR THE WORLD'S GREATEST TOY

- ★ Builds the square girder with interlocking edges
- ★ Erector girder is a structural girder—not just a perforated strip
- ★ Curved, straight and giant structural girders for realism
- ★ Metal base plates with every set
- ★ Tooth gears, crown gears, mitre gears, worm gears and pinion gears—many made of solid brass
- ★ Equi-distant holes in base plates and girders for fast, precision building
- ★ Boiler shells and giant flywheel parts for building realistic engines
- ★ Firm-fitting nuts and bolts that teach real engineering
- ★ Wheels, radiator, axles and other automotive parts
- ★ Engineer's shack
- ★ Electric lights

- ★ Electro magnet
- ★ 110 volt reversing electric engine with gear shift
- ★ 135 different precision engineering parts
- ★ Parts made of steel or brass where strength is needed—aluminum where light weight is an advantage

★ ★ ★

IMPORTANT—The U. S. Patent Office has issued over 100 patents covering special Erector features.

See the new Erectors, Gilbert Chemistry Laboratories and other Gilbert Scientific Toys at the Gilbert Hall of Science, Fifth Avenue at 25th Street, New York City.

NEW DEALER HELP FOR BERSTED'S HOBBY CRAFT

Bersted's Hobby Craft, Inc., Monmouth, Illinois, have designed a new dealer aid to help broaden the market for their products by demonstrating new uses. Originally produced to be used by children as a toy and for handicraft work, they report that their molds are being monopolized by parents, older sisters and brothers for other purposes; one of the most popular of which is the use of models for table place favors at parties. Like an electric train, mother and father turn it over to the children after having had their fun. Believing all dealers handling Bersted's Hobby Craft are interested in suggestions to increase their sales, they recently sent a special bulletin to all of their customers, telling them about this new idea.

To help dealers explain this use of models, they have created a colorful display for point of sale demonstration showing attractive party favors made from their molds. The display has a made-up group of models of novelty dressed rabbits and a nibble basket for candy and nuts. A user can make these from a Bersted's Hobby Craft Party Box Kit No. 49. It is a timely number for Easter sales. There is also a specially designed model of a base with a well in it for the insertion of a candle. The combination base cast, candle and a selected model from one of the many available in the Bersted line help a dealer in making sales suggestions to prospective customers. By recommending the use of

This attractive counter display is offered by Bersted's Hobby Craft as an aid to dealers of their merchandise. Other material is available for promotions

several models for party favors, dealers very often increase their dollar sale by selling several individual molds and powder.

Other point of sale demonstration displays are available showing an assortment of many styles of models that can be made with Bersted's Hobby Craft Rubber Molds

JUNIOR-PRO OPENS NEW YORK SHOWROOM

Junior-Pro Products Co., St. Louis, Mo., manufacturers of Juvenile Golf Sets, Lightweight Horseshoes Games, All-Steel Jeeps and other games and sporting goods, has opened an Eastern Sales Office and Showroom in the Breslin Hotel Building, 1186 Broadway, New York City. Charles Man-

ning will be in charge of the New York office.

NEW GLOLITE DECORATIONS

Two new and unique items in their well-known line of Yule decorations will be shown at the Toy Fair this year by the Glolite Corporation, according to B. F. Falkow, vice president in charge of sales. The first is a Musical Street Scene with Carolers—three urchins singing under a street lamp before a decorated doorway. The little figures are plastic molded and hand colored. There are lights behind the singing group as well as in the street lamp, and the entire item is an appropriate decoration in the traditional spirit of Christmas.

The second Glolite item being featured

GRamercy 7-6725

The photo above plans Glolite's newest Yuletide offering to the trade

for the first time at the Fair is an improvement on the musical Christmas Tree which the manufacturer has offered for several years. This popular 22-inch tree is now enhanced by the addition of musical chimes, a wind-up music box playing appropriate Christmas tunes. Glolite's display at the Toy Fair will feature a Treasure Chest of new items for 1948, besides the two described and illustrated herewith. They may be viewed in Room 963 at the Hotel McAlpin.

5. Blue-eyed Cockatoo. (*Cacatua ophthalmica*)

It's GREBE for the "New Look" in yachts

● Advanced styling ...
inside and out!

● Sturdy construction
ALWAYS!

Obviously, these smart, modern 60 and 65 foot GREBE beauties are no ordinary pleasure craft. Custom built on staunch hulls of proved design, with spacious interiors arranged and furnished to the owner's individual taste, they are the ultimate in truly fine cruising yachts. Ownership of such a boat is a source of constant pride and pleasure—and very tangible evidence of standing in any community. Write for plans, full information, on the size of cruiser you prefer.

HENRY C. GREBE & CO., INC.
3750 N. WASHTEWAVE AVE., CHICAGO 18, ILL.

HOWARD ANCHORS AND OAR LOCKS. Anchors and oar locks in various types are available from the James H. Howard Industries, Detroit, Mich. Their Navy type anchors have a swivel handle removable shank and a semi-steel body with the eye end of the shank designed to take $\frac{1}{2}$ " to $\frac{3}{4}$ " rope or cable. Sizes are from 10 to 15 pounds. The mushroom or fisherman's type anchor comes in 10 and 12 lb. sizes.

Howard oar locks are of the North River type.

THREE MODELS OF NOR'WEST CRUISERS AVAILABLE. Three different models of a compact 24' 9" cruiser are under construction by Nor'west Cruisers of 1331 Northlake, Seattle, Wash. Cedar planked (bottoms are double planked) and screw fastened, they have a beam of 8' 6" and a draft of but 20". A settee which converts into an upper and lower berth and a dinette which can be transformed into a full width double bunk provide accommodations for four. The standard and utility models are powered by a Chrysler Ace, while the Deluxe comes with a Chrysler Crown. Both the Deluxe and Utility models have numerous extras which will contribute to both comfort and pleasure afloat.

ESSANDEE MARINE RUNABOUTS AND CRUISERS. A 19' utility runabout and cruisers in lengths of 28' and 32' are offered by the Essandee Marine Co., of Santa Monica, Calif. The utility is a V-bottom model with $\frac{1}{2}$ " plywood topsides and a double planked bottom, with $\frac{1}{2}$ " cedar planking over $\frac{1}{4}$ " plywood panels. Chines and keel are oak and fastenings are monel nails. With a 90 hp. flagship engine she is priced at \$2975. Optional power installations up to 160 hp. may be had at additional cost, affording speeds up to 40 m.p.h. The cruiser is constructed throughout with $\frac{1}{2}$ " marine plywood over oak longitudinals. One double berth and an upper and lower berth provide accommodations for a maximum of 4 persons. With standard power of a 90 hp. Flagship engine she is priced at \$4790. The 32-footer may be had with either single or twin screw power installations. She has plywood topsides and a double planked bottom.

THE SUPERSHIP "30". An all-welded steel cruiser known as the Supership "30" is offered by The Eastern Marine Construction Co., Inc., of Niantic, Conn. Principal dimensions are: 29' o.a., 9' 10" beam, 3' draft. She has accommodations for four persons in two cabins. Standard power is a Lathrop 6 cyl. engine which

develops 107 hp. driving through a 2:1 Paragon reduction gear. The forward cabin is completely insulated with 1" sheet cork cemented to the hull. Tempered Masonite is then applied over the cork and the frames, making a smooth surfaced interior. The deck house cabin is insulated overhead with cork or Fiberglas. Electrolysis is carefully guarded against through careful insulation of dissimilar metals and the use of zinc. She was designed by H. M. Smith.

THE DRAKE CRAFT 36. The Drake Craft Boat Co., of Wilmington, Calif., well known as builders of the Drake Craft 24 auxiliary sloop, has added a stock cruiser—the Drake Craft 36—to its fleet. With sleeping accommodations for six, she features a large galley, dinette and a roomy pilot house and cockpit. She is powered with twin Chrysler Crowns driving through 2:1 reduction gears which give her a top speed of over 20 m.p.h. The Drake Craft 36 is available in both a Deluxe and Standard model.

JONES MOTOROLA INSTRUMENT PANELS. The Jones Motorola Corp., Stamford, Conn., has announced extensive additions to its line of marine instrument panels. They include every practicable combination of tachometers, gauges, ignition locks and panel light switches for gasoline engine installations as well as the somewhat more elaborate gauge requirements for the most efficient and safe operation of diesel power plants. Both single and multiple screw installations are available. All panels are furnished with or without indirect lighting.

The manufacturer also announces additions to its line of driving accessories. Right angle adapters or drive sections, ball and plain bearing types with cast housings, dual tachometer drives of ball bearing types for the double control station installations, and adapters for providing tachometer drives on engines not so equipped by the manufacturer are standard items in the Jones line.

AERO ALUMINUM SKIFF & DINGHY. The Aero Welding & Manufacturing Co., Chicago, Ill., which introduced a 12' aluminum skiff a year ago, has recently added an 8' dinghy to its line. Known as the Aero Dink, it carries from three to four persons yet weighs but 60 lbs. It has two buoyancy compartments and is designed to take outboard motors up to 5 hp.

The manufacturer's aluminum skiff seats three to four persons and weighs 85 lbs. It is also fitted with buoyancy tanks.

The New MINNEFORD 'HOLIDAY'

THE ALL-PURPOSE AUXILIARY
Henry A. Scheel, Designer

Fast Hugs, day-sailing cockpit. Cruising accommodations for three. Complete, or available as a stripped day sailer, so you can finish her as you sail. Quality Minneford construction: mahogany, everdur, stainless rigging, etc.

Write for Circular and Prices

L. W. L. 23'
Beam 8'6"
Draft 3'4"
(centerboard in keel)
Sail Area 390 sq. ft.

MINNEFORD YACHT YARD AND MARINA
City Island 130 City Island Avenue
Bronx 66, N. Y.

THE IMPORTED FLEET OF NORGE BOATS Norge Boats, Inc., of Stamford, Conn., in addition to designing yachts, both sail and power, are importers of new Scandinavian-built sail boats. Included in the line are 19' Norwegian-built double-ended, steel skippers, the Dragon, 29' 2" racing sloop which is so popular abroad and which will race in the 1948 Olympics, Mink, 25 square-meter sloop, the Oslo class, an 18' centerboard sloop and a 22' 4" sport power cruiser which is built in this country by Barban & Savanto.

THE GALLEY SLAVE FREES GALLEY SLAVES. An all-purpose cooker called the Galley Slave, is sure to make a hit with all sailing cooks. It is made of heavy cast aluminum by the Flat-Top Cooking Utensil Co., of Norwalk, Conn., and consists of 5 pieces, which nest together into one unit. Not only does it stew nicely, but it can cook two foods at once and lends itself to boiling, double boiling, baking, draining and frying.

FOX RIVER FEATURES MOLDED PLYWOOD. The Fox River Boat Works of W. De Pere, Wis., uses molded plywood construction in all of its boats which include an 8' sailer, dinghy, a 12' outboard runabout, a 14' outboard runabout and a 14' inboard Mahogany is specified in the dinghy and the 14-footer.

The Egg Harbor Boat Co., of Egg Harbor City, N. J., builds this handsome, round bottom, 28' Jersey Sea Skiff.

SARD BINOCULARS. The well-known Sardin binoculars are manufactured by the Kollsman Instrument Division of Square D Co., 80-08 45th Ave., Elmhurst, N. Y. Featured for marine use is their 7x50 glass. Its field of view is 7° 10' giving a field 370 ft. in diameter at 1000 yards. They are particularly useful for night use due to this wide field and to the fact that the optics are coated. They are attractively finished, weigh 47 ounces and come complete with a leather carrying case.

TEXTILELEATHER'S TOLEX. Tolex, a plastic leathercloth manufactured by the Textile Leather Corp. of Toledo, Ohio, is widely used for upholstery in yachts. It comes in a wide range of fast colors, resists milk, fire, salt water and abrasion and is easily cleaned.

TAYLOR DISTRIBUTES THE FIREFLY. The 12' sloop rigged dinghy Firefly which is to race in the 1948 Olympic games is distributed in this country by R. P. Taylor, 11 W. Seventh St., Los Angeles 14, Calif. Designed by Luff & Co. and built by Henry Marine Ltd., of Britain, she is made of 9 ply birch veneer, weighs only 250 lbs., fully equipped and carries 90 square feet of sail. She is intended for racing and cruising and differs from a conventional sailing dinghy in having forward and side decks.

A STAINLESS STEEL OUTBOARD RUNABOUT. Stainless steel outboard runabouts in lengths of 12' and 14' are manufactured by the Star Tank and Boat Co., of Goshen, Indiana. The 14-footer weighs only 200 lbs., will take outboards up to 9 hp. and has stamped in tal. length spray rails. She is said to be suitable for either fresh or salt water.

STERLING ENGINES FOR 1948. The Sterling Engine Co., of Buffalo, N. Y., is in full production of its complete series of marine diesel engines rated from 75 to 660 hp. and speeds of from 900 to 1500 r.p.m. Gasoline models deliver from 400 to 600 hp. at speeds of 800 to 1200 r.p.m. The plant's production lines and schedules have been revamped and resumed to be operating at close to capacity.

SETH THOMAS CLOCKS. Marine Clocks, barometers and clock-barometer combinations are manufactured by Seth Thomas Clocks, Thomaston, Conn. The clocks come in a wide range of sizes, types and prices. Some have plain cases, others are framed in a ship's wheel. They come with or without ship's bells. Cases are polished brass and the dials are etched silver plate.

AHOY! THE STAY-TITE CREW

KEEPS BOATS AT PEAK EFFICIENCY

- **STAY-TITE CAULKING COMPOUND**—25% greater coverage per pound. Mahogany, gray or black.

JOYS BROS. CO.
129 N. WATER STREET, MILWAUKEE 2, WISCONSIN

Cy Gillette took honors among the Lightnings with his Shamrock-built craft. New officers of the club include Cy Gillette, commodore; William Horv, vice commodore; and Pete Hagens, rear commodore. At Waikiki, the fall series winners were Roy May's *PC Mistress*, Frank Rothwell's *Star Pupule*, Dick Soelberg's *210 Kuo*, Milly McIntosh's *110 354* and Buck Anderson's *Mercury Hike No.*

► Late arrivals in port include Clarence Ackerman's *Island Girl*, up from Tahiti after a 15-month cruise; Gordon Curtis' *Karlchris* in from the same area; and a well-known figure in Honolulu, Sam Emmes, in from San Pedro in his schooner *Rendezvous*.

LAKE ONTARIO NEWS

By Lee Shore

► The annual meeting of the Lake Y.R.A. was held at the Buffalo C.C. on November 9th with representatives present from Royal Canadian, Royal Hamilton, Rochester, Clayton, Sodus, Queen City, Youngstown, Crescent, National, and Buffalo clubs. Two new clubs were voted into membership, Pultneyville Y.C. and Oshawa Y.C. Last year's slate of officers was reelected: President, Chuck Spaulding, Youngstown Y.C.; vice president, Wes Gamble, Crescent Y.C.; 2nd vice president, Cliff Lunt, Royal Hamilton Y.C.; secretary-treasurer, Newt Castle, Rochester Y.C. Clayton Y.C. will be host club for the L.Y.R.A. Regatta next July. This year the Freeman classic will again precede the usual three days of class racing. Sodus will be the starting point of the Freeman and boats will sail west to a buoy off the Rochester piers and then swing east up the lake to Clayton located in the heart of the 1000 Islands. The proposed Rochester Race, the 400 mile "longest fresh water race," was discussed informally at the meeting and was enthusiastically received by the other clubs. This race coming approximately a month after the Freeman (Monday, August 30th) will not conflict in any way with the tradition around L.Y.R.A. events.

► Youngstown Y.C. members have elected the following officers for 1948: Commodore, Henry Yale; vice commodore, Wes Montgomery; rear commodore, Walter Yates; fleet captain, James Seonce. An innovation in *Ripples*, Youngstown Y.C.'s monthly bulletin to members, is a brief biography in each issue of a boat (not skipper, boat).

► The annual Sailors' Dinner and presentation of cups was held at Royal Hamilton Y.C. on November 14th. Gordon Reid, commodore of the International Skeeter Association gave a talk and showed action pictures of ice boating which greatly increased the enthusiasm for the Skeeter regatta to be held at Royal Hamilton January 16th to 18th. The Joe Berry Memorial Trophy for outstanding performance was awarded to John Robertson who also took honors in both Lightning series. The William Judd Memorial Trophy was won by Doug Barwell while the Bill McDonald Memorial Trophy went to W. R. White. Round the Bay series was won by W. R. Morrison and the Snipes and Rainbows both split their series. Tim Nelson and Dor Green in the former and Cliff Lunt and Bill Stokers in the latter class.

► Bill Calkins and Phil Hoffman, co-owners of the *Chandy* took Louie Wehle's 73' power cruiser *Jenny III* from here to N. Y. as the first lap of her trip to Florida waters. Another R.Y.C. boat to winter in the south is Phelps Langworthy's *Ke-We-Me III* which Phelps and Elizabeth took south early in October. Arriving just in time for a couple of sails before winter set in was Eric Moore's *Cheemaun II*, a trim Rhodes 27 which Eric brought into the club from Mentor Harbor Y.C.

► At the helm of Queen City Y.C. for 1948: Commodore, James Mitchell; vice commodore, A. Wilson; rear commodore, W. K. Purchase; secretary, A. Halroyd; treasurer, D. Kimpton. Al Rae was appointed to head up a five year club improvement planning committee.

FOR BRIDE-TO-BE PARTIES

SILVER BRITE ICICLES

ARTIFICIAL SNOW

Genuine lead foil icicles, crinkled for extra luster; and sparkling, clean mica flake snow. Market leaders! More weight, lowest price per box.

AMERICAN BEAUTY

SPARKLERS

The quality sparkler—always accepted as the standard of excellence . . . Safe for joyful holidays . . . Steady burning—lots of stars. Sizes: 8, 10, 14, 20 and 36 inches.

HALCO'S SUPERB BRAND ROLL CAPS

50 shots per roll, 5 rolls per box. Extra loud—extra fine. Long recognized as the country's best roll caps. The caps the kids always ask for!

J. HALPERN COMPANY

510 PENN AVENUE
PITTSBURGH 32, PA.

300 FIFTH AVENUE
5TH AVE. BLDG., NEW YORK CITY

HALCO Baby Huffer Dolls for 1948

Skillfully designed with emphasis on highest quality materials and craftsmanship. Artfully fashioned into lovely, eye-catching, sales-producing creations. As always, the finest quality and styling at attractive popular prices.

HALCO'S TEXAN HOLSTER SETS

1948's Outstanding Values

... Rich all-leather holsters complete with the best-made metal pistols, representing more eye appeal, more ornamentation, and more value than ever before to thrill your neighborhood bronco busters. Tops in materials, craftsmanship. Priced to Sell!

ELECTRIC FOOD MIXERS

HAMILTON BEACH

Easily portable — mixes in any bowl or pan—over the stove or on the table. One hand slides the beater unit off or on the stand and the same hand starts or stops the motor or controls the mixing speeds.

Non-radio interfering, multi-speed motor has more power than is ever needed. Maintains constant controlled speed of beaters in heavy or light mixtures. Not limited to a definite number of speeds. Slightest change of control switch changes the speed of the beaters.

Motor tips back for removing bowls or beaters. Bowls revolve automatically insuring thorough mixing.

Beautiful white opaque glass bowls. Chromium plated double beaters are double guarded and are detachable in one unit having a single agitator. Baked white and black enameled finish; chromium plated exposed working parts. Bakelite handle; non-marring rubber feet.

Complete with juicer, 1 and 3 quart bowls, cord and plug 110 volt, A.C. or D.C.; up to 75 cycles.

No. E—Weight each 25 lbs. Each
One in a carton. \$....

EXTRA GLASS MIXING BOWLS

EXTRA JUICE EXTRACTOR BOWLS

Juice Extractor Bowl -Wt. each 3 lbs.	Each
One in a carton.	\$....

ELECTRIC FOOD MIXER ATTACHMENTS

HAMILTON BEACH

Juice Extractor

Operates on top of motor as illustrated. Removes all juice from oranges, lemons and small grapefruit. Sanitary—no metal parts connected to bowl. Removable strainer inside of opaque glass bowl, detachable guide spout.

Juice Extractor—With white opaque glass bowl; wt. each 4 lbs. Each

One in a carton

Coffee Grinder

Sets on motor housing as illustrated

Adjustable; grinds coarse for boiling, medium for percolating and very fine for vacuum coffee makers. Top glass holds one pound.

Coffee Grinder—Wt. each 5½ lbs. Each

One in a carton.

ELECTRIC FOOD MIXER ATTACHMENTS

HAMILTON BEACH

Meat Grinder and Chopper

Has inside cutter for grinding meat without crushing it. Also a coarse plate and cutter are furnished for chopping vegetables. To be used with power unit which is not included. Cast housing and feeder screw; hardened steel cutter knives and meat plate with machine ground cutting surfaces.

Complete with plate, knives and wood pestle. Tinned finish.

Meat Grinder and Chopper—Wt. each 4 lbs. Each
One in a carton. \$....

Pea Huller and Bean Slicer

Attached to motor in place of beaters.

Hulls peas and lima beans quickly and easily. Slices string beans into long thin strips. Cooking time is greatly reduced and flavor improved.

Pea Huller and Bean Slicer—Wt. each 1½ lbs. Each
One in a carton. \$....

Slicer and Shredder

Slicer cone with six knives revolves in housing and quickly slices fruits and vegetables. Slicer cone is easily replaced by shredder cone which shreds practically all vegetables and fruits.

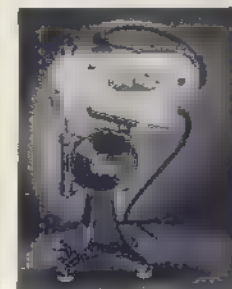

Die-cast housing. Hardened metal cones for clean cutting and long life. To be used with power unit which is not included.

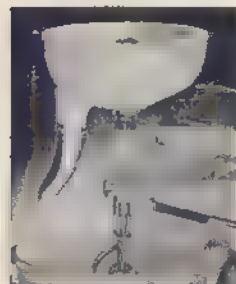

Slicer and Shredder—Wt. each 2¾ lbs. Each
One in a carton \$....

Power Unit

Motor of mixer is attached to the power unit which is required to operate the Meat Grinder and Slicer-Shredder attachments.

Power Unit—Wt. each 6½ lbs. Each
One in a carton. \$....

ELECTRIC COFFEE MAKERS CORY. AUTOMATIC

Automatically brews coffee without having any switches or complicated mechanism to set. Water is brought to correct brewing temperature, brew is agitated in upper bowl for proper time, and the high heat is then turned off to allow coffee to be drawn into lower container. Low heat automatically turns on when brewing is completed to retain the coffee at correct serving temperature.

110 volts, A.C. only; 800 watts.

Each

No. DEA-68—6 1/2 cup cap.; complete with upper bowl cover, lower bowl cover, upper bowl stand and coffee measure; wt. each 7 lbs. \$

ELECTRIC COFFEE PERCOLATORS UNIVERSAL

Puritan Pattern

An electric percolator with a gleaming chrome finish combines simple beauty with utility.

Patented "cold water" pump starts percolation quickly. Makes coffee completely without boiling.

Should current be left "on" when percolator is empty, a safety fuse plug breaks the circuit before damage can result.

Complete with cord.

110 volts, A.C.; 400 watts.

Each

No. EA4276—7 cup cap.; wt. each 4 lbs. \$

All above, one in a carton

ELECTRIC COFFEE PERCOLATORS UNIVERSAL. COFFEEMATIC

Automatic

Chromium plated finish with mottled mahogany plastic handle and trim.

Automatically makes coffee to the desired strength by setting control dial to strong, medium or mild. Percolation stops when coffee is done and current is then reduced to keep coffee at serving temperature. Signal light above dial indicates when coffee is ready to serve.

Patented "cold water" pump starts percolation quickly so that coffee is completely made without boiling. Finely perforated filter cup insures clear beverage. Complete with cord.

110 volts, A.C. only; 400 watts.

Each

No. EA4401—7 cup cap.; wt. each 4 lbs. \$

One in a carton

Non-Automatic

Patented "Cold Water" pump starts percolation quickly. Coffee is completely made without boiling. Water is evenly distributed over ground coffee to extract its full flavor. Finely perforated filter cup insures clear beverage. Body and handle balanced to eliminate wrist strain. Non-drip, easy pouring spout.

Chrome finish; mottled mahogany plastic handle and trim.

110 volts, A.C. or D.C.; 400 watts.

Each

No. EA4208—7 cup cap.; wt. each 4 lbs. \$

One in a carton.

ELECTRIC FOOD BLENDERS WARING

An all-purpose blender, improved in appearance, performance and convenience.

New automatic speed regulation makes changes of speed by hand unnecessary for the motor automatically adapts its speed for the perfect blending of the ingredients of each recipe.

Specially designed universal motor is of widely increased efficiency and provided with fan-governed, induced ventilation.

Pressed steel motor housing with new lifetime lubrication. All lubrication is sealed and permanent; no oiling or greasing is ever necessary.

The powerful motor is cushioned in rubber. This minimizes vibration and noise and actually adds to the life of the power unit.

New, beautifully designed, one-piece zinc, die-cast base. Clover-leaf designed, tempered, ribbed glass container accents modern streamlined appearance. Molded bakelite container cover.

Creams, mixes, frappets, liquifies and blends any fruits, vegetables or foods adaptable to this type of preparation. Ideal for mixing drinks; blending soups, omelets, salad dressings, etc.; and mixing cakes, muffins or pie. Also suitable for preparing special food diets for babies, invalids and convalescents.

Complete with Underwriters' Approved rubber covered cord and molded rubber plug.

110 volts, A.C. or D.C.; 2540 cycles, 11000 R.P.M.'s at 1 pt. water load.

Each

Waring—37 1/2 oz. cap. container, 16 in. high with container, 8 1/2 in. high without container, 5 1/2 in. diam base; wt. each 14 3/4 lbs. \$

ELECTRIC VACUUM CLEANERS

HAMILTON BEACH

**Cylinder Type, with Complete Set of Cleaning Tools**

A cylinder type vacuum cleaner with a complete set of cleaning tools designed for every "on-the-floor" and "above-the-floor" cleaning job

Oversize, precision built motor, rubber mounted for quiet, smooth operation. Precision ball bearings, grease packed at the factory, need no additional lubrication. Forced draft insures cool running. Two stage, six blade fan, an eight blade baffle and the Vacuumotor, motor driven, create high velocity cleaning suction.

Dust bag has ample filtering surface and is made of durable material, selected to allow the escape of air yet retain the dust. Held in place by an airtight rubber gasket built into the flange of the bag. Special rubber sealed dust deflector on cleaner end cap directs all the dust to the inside of the bag and prevents the spilling of dust and dirt when end cap is removed. Easily removable and washable filter.

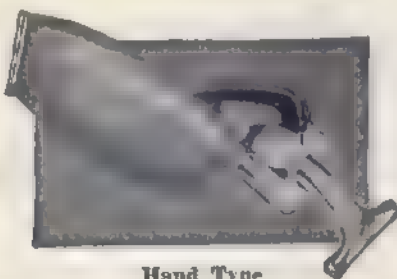

Rolled sheet steel housing with durable platinum gray baked enamel finish. Other metal parts finished in gray enamel or heavily plated. Moulded rubber handle; sturdily constructed toe-operated plunger type switch. 20 foot approved cord with unbreakable rubber plug and rubber strain relief.

110 volts A.C. or D.C.; up to 75 cycles

Furnished with the Following Cleaning Tool Attachments

7 ft. highest grade hose, two 23 1/4 in. extension tubes, double acting floor nozzle, floor and wall brush, upholstery nozzle, utility brush, radiator tool; moth proofing tool, moth repellent crystals and sprayer

No. 26—Wt. each 15 lbs. Each
One in a carton.

**Hand Type**

A wonderful convenience for removing dirt and lint. Cast aluminum nozzle and motor casing; powerful Hamilton Beach motor; black composition handle; finger-tip control switch; stationary nozzle brush; dust-proof bag. Equipped with 20 ft. rubber covered cord and moulded rubber plug.

110 volts, A.C. or D.C.; up to 75 cycles.

Hand—Weight each 4 1/4 lbs. Each
One in a carton.

Attachments for Hand Vacuum Cleaner

Enlarges the range of usefulness of the Hand vacuum cleaners

Set Consists of the Following Tools

Extension hose, nozzle adapter, flat suction or blower tool, moth-proofing unit and can of moth-repellent crystals.

Hand Attachments—For use with the Hamilton Beach
Hand vacuum cleaner Per set
One set in a carton

**Upright Type**

A conventional type cleaner, light in weight yet with a full size nozzle

Powerful, oversized, horizontal type motor; precision made ball-bearings are factory packed in grease and need no additional lubrication. High carbon steel motor shaft; cast aluminum fan.

Full width, motor driven brush, adjustable for bristle wear. Toe pedal adjusts nozzle to any one of 5 positions for cleaning short or long nap rugs

New accordion type bag; allows the escape of air yet retains the dust. Wide, balloon type wheels with soft-tread for noiseless operation. Chrome plated insulated handle with finger-tip switch control.

Has built-in headlight for cleaning under furniture and in dark corners. Uses special 25 watt lamp made especially for vacuum cleaners

Complete with 20 ft. approved cord with moulded rubber plug.

110 volts, A.C. or D.C.; up to 75 cycles

No. 14—Wt. each 14 lbs. Each
One in a carton.

**Attachments for No. 14 Vacuum Cleaner**

An assortment of attachments which convert the vacuum cleaner into a complete home cleaning unit.

Set Consists of Following Tools

Extension hose, extension tube, nozzle, brush, radiator tool, moth-proofing unit and moth-repellent crystals.

No. 14A—For use with No. 14 vacuum cleaner Per set
One set in a carton.

ELECTRIC IRONS
UNIVERSAL, BEAM-O-LITE

Automatic

A new type electric sad iron with a head-light built into the handle. Light is protected by a metal grill-work.

"Hand-i-set" fabric dial is correctly placed at the rear of handle, out of the way of fingers and knuckles. Easily set to any fabric heat desired.

Extra large sole plate of hard aluminum alloy with cast-in heating elements. Sole plate is beveled for easier ironing around and under buttons, pleats, and ruffles. Wrinkle-proof heel is especially designed to keep fabric from bunching and wrinkling on the back stroke. Heel rest provides convenient stand-up support for iron when not in use.

Ventilating air ports placed between handle and iron base protects the hand from rising heat. Air-cooled plastic handle.

Complete with permanently attached cord.

110 volts, A.C. only; 1000 watts.

No. EA1203—Wt. each 3 lbs.; shipping wt. each 3½ lbs. . . . \$..

One in a carton, six in a case

UNIVERSAL, COOL-GRIP

Automatic

Streamlined, air-cooled iron. Exclusive air ports between handle and iron base protects the hand from rising heat.

Finger-tip control dial gives accurate heat for any fabric setting. Beveled sole plate allows ironing around buttons and ruffles. Solid heel rest forms convenient stand-up foundation.

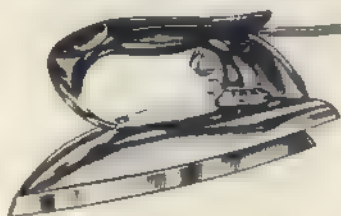

Highly polished chrome plate; cool, smooth bakelite handle fits the hand naturally.

110 volts, A.C. only; 1000 watts.

No. EA1284—Wt. each 4 lbs.; shipping wt. each 5½ lbs. . . . \$..

One in a carton.

ELECTRIC IRONS
UNIVERSAL, LIGHTWEIGHT

Automatic

Fully automatic with "Hand-i-set" fabric dial. Large, cast alloy sole plate, beveled for easier ironing. Wrinkle-proof heel; gives convenient stand-up foundation.

Chrome plated iron with cool plastic handle that does not get hot. Designed for effortless grip. Complete with attached cord set in side of handle out of the way.

110 volts, A.C. only; 1000 watts.

No. EA1220—Wt. each 4 lbs.; shipping wt. each 4½ lbs. . . . \$..

One in a carton, six in a case.

UNIVERSAL, TRAVELIRON

Non-Automatic

An economical, compact, light iron ideal for traveling, vacation or college use. Takes only 3 minutes to heat for rayon or silk fabrics.

Full size sole plate with easily detachable handle. Exclusive non-skid heel rest prevents sliding off table or dresser.

Beautifully finished in non-tarnishing chromium plate. Complete with green suede carrying bag and six foot cord.

110 volts, A.C. or D.C.; 400 watts.

No. EA1620—Wt. each 2 lbs.; shipping wt. each 2½ lbs. . . . \$..

One in a carton

IRON REPAIR KITS
RODALE

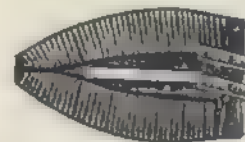

A handy kit of assorted terminals and insulators for making repairs to many popular flat irons and other appliances.

No. 100—Wt. per kit 1½ lbs. . . . \$..

One kit in a box, twelve in a carton.

ELECTRICAL APPLIANCE
ELEMENTS
RODALE, FITSALL

For Electric Sad Irons

Genuine India mken, wired with nichrome ribbon wire.

Fits over 90 per cent of irons including Hot Point, G. E., Sunbeam, etc. 110 volts, A.C. or D.C.; 600 watts.

No. E-76—Wt. std. pkg. 6 lbs. . . . \$..

10 in a carton, 100 in a standard package.

RODALE

For Electric Heaters, Nichrome Cone Type

Standard cone type element; fits Edison base heaters.

100 volts, 1000 watts.

No. E-77S—Wt. per 100, 24 lbs. . . . \$..

10 in a carton, 100 in a standard package.

"Harco
excels..."

Bob Burns
NBC STUDIOS
HOLLYWOOD CALIFORNIA

Harbor Boat Building Company
Terminal Island, California

Gentlemen:

I have had my Harco-40 for one year now, during which time I have tested her under about every condition to be found in these waters, and I often wonder if you people didn't go through seven or eight generations of ship-building just to give me the boat I wanted.

About the only points one can look for in a boat are seaworthiness, comfort, speed and beauty. And in my judgment, the Harco 40 excels in all these four points.

Not long ago I left the Lido at Catalina Island during one of the worst storms we've had this season, and forty-five minutes later I was passing the San Pedro light with a dry windshield. That may sound far-fetched to some other boat owners, but when I tell it to other "Harco" owners, they don't even raise an eyebrow.

Well, that's all I have to say, gentlemen. It's a wonderful thing to own a boat that you have so much pride and confidence in, and I just thought you would like to know how much I appreciate it.

Very cordially yours

Bob Burns

Have you seen the
Harco "40" for '48?

EVEN MORE BEAUTIFUL... more comfortable... more luxurious. Seaworthy as only generations of boat building can achieve... the finest stock cruiser built today... for those who want the best at no greater cost.

HARBOR BOAT BUILDING CO.

Builders of Fine Craft

LOS ANGELES HARBOR • TERMINAL ISLAND, CALIFORNIA

► We've been reading a lot lately about how you can go down to Nova Scotia and get a boat for about half what it would cost to build here. Let's not kid ourselves. A boatbuilder friend of ours recently asked one of the more publicized Navy yards for a bid on a cruising sloop of which he has built several duplicates.

not a gold-plater, just a run-of-the-yard, solidly but economically built boat, which the New England builder could sell for around \$8,200 and make a small profit. The answer was that to the same specifications, except that she'd have a 3000-lb. iron instead of a 5000 lb. lead keel, and provided the Navy yard could get the engine at the same price the New England builder would pay for it, the Navy boat would cost \$7,820, including the 15 per cent duty. The difference in the cost of metal for the keel would run to over \$600. So we're regretfully forced to the conclusion that there's no pie in the sky, even across the border. You get what you pay for, and vice versa.

► A motor boat skipper who ran down a rowboat and drowned two men near City Island last summer got off in the courts with a \$1,000 fine and a suspended one-year jail sentence, plus \$35,000 in civil damage judgments, most of which his insurance company got stuck for. If we'd been the judge, he'd have been lucky to get off with a straight five years in prison for manslaughter.

► It's time somebody pointed out to designers, builders and class officials that the word "international" has a definite meaning; "common to or affecting two or more nations," as Mr. Webster so succinctly puts it. There are the International Star Class, the International Six-Metre Class and sundry others which legitimately and proudly use the adjective, but unfortunately for them it's rapidly becoming about as overworked as the words "fine old" in whisky advertising. Nowadays when you hear about the "International This or That Class" you don't know whether it's really an international class or just one that its promoters hope may some day be international. The all-time low has been struck by a few designers who have clapped the resounding handle onto proposed classes, the first boat of which has yet to be launched and the building of Number Two in the class is still in the realm of future uncertainties. How about laying off some of the bilgewater and reserving the use of the word for classes that actually do engage in international competition?

► A bunch of sailors were reminiscing recently about a hard-chance trip home from Bermuda, in which they had run for several hours under bare poles. At the first chance a sweet young thing inquired of the sailor's wife, "Don't they even wear pyjamas at sea?"

► This department finds it necessary to take issue with our respected colleague, Mr. S. Yarn, who while skulking in the lee of his longboat last month made certain statements we regard as misleading. We do not question his statement that Mr. Yarn might be (indeed he is) a Dr. Jekyll and Mr. Hyde, but we note that he is confused as to which of his phases does what. It is obviously Mr. Hyde (the scurvy villain) who writes The Longboat and not, as Mr. Yarn intimates, that nice Dr. Jekyll. Come to think of it, we can't recall ever having met Mr. Yarn when he was in one of his Dr. Jekyll moments, if any.

THE BOATSTEERER

That Feeling of Confidence

Principal Dimensions: Length 39' 10", Beam 11' 3", Draft 3' 0". Single or twin engine installations

Probably one of the qualities of the HATTERAS "40" that best characterizes her is the feeling of confidence she instills the moment you step aboard. Come what may, you KNOW that you have a real boat under you that will stay under you and take you where you are going. Every detail of her design and construction is carried out with the purpose of safe, seagoing operation in mind.

Consider then what this blessed peace of mind in the integrity of your ship will mean in the way of added yachting enjoyment and more time afloat GOING PLACES. But better act promptly if you want to be sure of your HATTERAS "40" for '48. We don't build them in bunches like bananas!

another at the Pawtuxet A.C. Except for the few lucky guys who score with the first dip into the bag, the turkey generally costs plenty more than if the winner had bought it at a market, but there's a whole lot more fun getting it at the raffle and the club treasury can always use the loot to advantage.

► We had a bit of a blow November 9th, a sou'wester, but most of the damage was up at the head of the Providence River, most of the other anchorages being pretty well sheltered. The 350 walk from the shore to the Rhode Island Y.C. lost some of its planking and one boat parted her mooring and went up the river, picked the only sandy spot on the opposite shore and beached herself with no damage except to a little paint. Another sank at her mooring but was raised without difficulty. At the Edgewood Y.C., four of the club floats went adrift but were recovered and only one of them was damaged to any extent. At the Edgewood Marina, several boats went adrift and piled up on the shore. One was badly stove and several small craft were sunk.

► Vice Commodore Alden R. Walls was elected commodore of the Rhode Island Y.C., succeeding Prof. Leighton T. Bohl who had held the office four consecutive terms, and was elected chairman of the ways and means committee. Robert F. Abell, secretary for four terms, declined to run again and Harold A. Brown was elected his successor. Abell remains on the executive board, however, as chairman of the junior activities committee. Other results of the election were: Vice Commodore, Blair F. LeFevre; rear commodore, Frank W. Hodges; treasurer, Howard S. Hopkins.

► *Short ends* — The Tiverton Y.C. has increased the board of directors from nine to 15 members, and given them the power to appoint the club officers and committee chairmen. . . . Verner Z. Reed's unnamed International 210 has been sold to Grace Emmons, of New York. Howard H. Sweet, owner of the "S" boat *Spray*, has bought the 42' auxiliary cutter *Aloha* from Parker

W. Richardson, of Boston. . . . Milton Johnson, owner of the *Indian Warrior*, has bought the 1947 champion *Shavnee* from Read Shaw and Shaw has bought the *Flying Amazon* from Tom Boyd, of Swansea. *Flying Amazon* is the old *Peggy*, the first Indian brought into the Bay nearly 10 years ago. . . . Going to have another swarm of Beetles, seven of them at Cedar Tree Point next season. . . . Yards in all parts of the Bay are about full, so much so that the owner who put off engaging space, is having a hard time finding it and there are more boats in wet storage than usual. . . . Meanwhile, Frostbiters are gathering every Sunday for a few drifting matches and praying for some weather that will justify the name of the sport.

WEST COAST BUBBLES

By AJ A. Adams

► Intercollegiate sailing is rapidly gaining popularity. Dick Besse, vice president of the International 14 Association and former national president of the ICYRA, is developing plans for national standardization of intercollegiate racing programs and the promotion of inter-sectional events.

The Pacific Coast Intercollegiate Y.R.A. Championships were held at Newport Harbor, December 20th-22nd, sailed in International 14's and Dyer Dinghies.

► In wind registering up to 20 knots the U. of California's sailing team defeated the "Tars" of UCLA 24½ to 16 on November 2nd, at Balboa, Calif., sailing International 14s. The boats were loaned by the Newport Harbor fleet of the International 14 Association. This was one of a series of dual meets which will consummate in the third annual PCIYRA Championships. Two races were sailed and team captain Peter Komor sparked the California victory with two firsts. Second in individual scoring went to Ray Hanger, captain of the UCLA team. Peter Schoonmaker, of the U. of California, took third.

INLAND MARINE BOAT CO., Williams Bay, Wis., Now Building GLOBE OUTBOARD BOATS

WRITE TODAY for illustrated folder which describes in detail these beautiful outboard boats. There's one to fit your taste and pocketbook. Certain protected dealer franchises are still open. Inquiries are invited.

Brand New Factory — Modern Production Methods

Mean A Better Boat — A Better Buy!

Illustrated above is the award-winning GLOBE *Aristocrat*, called "America's Most Beautiful Outboard Boat," which heads the popular GLOBE flotilla now being manufactured by the Inland Marine Boat Co. at Williams Bay on beautiful Lake Geneva, Wis.

This new, modern, streamlined factory, staffed by skilled craftsmen, equipped with the latest in precision tools and machinery, is expressly designed for the efficient manufacture of the

popular line of GLOBE Outboard Boats.

In addition to the 14-foot custom-designed GLOBE *Aristocrat*, Inland Marine will continue production of the popular 13½-foot GLOBE *Mariner* and GLOBE *Maie*, two outstanding outboard boats in their price class. New to the line will be a sturdy, economical 13½ foot general purpose rowboat.

Miniature Timbers SENSATIONAL CONSTRUCTION TOY OF 1948!

Wide age range—from simplest structures for the 4-year old to the more complicated projects up to and beyond the toy graduate. . . . Made to same scale as that used by most architects— $1\frac{1}{4}$ " to the foot. Can be used realistically with electric trains for small villages. Easy to build, and when assembled will "stay put." Sets provide hours of interesting entertainment. A "must" for your toy department!

Beautiful Individual Carton

Carton measures $12\frac{1}{8}$ " wide by $9\frac{1}{8}$ " deep by $1\frac{1}{4}$ " high—handsomely illustrated in four bright colors. Includes instruction folder with suggested designs.

AMERICA'S LEADING MINIATURE ENGINES

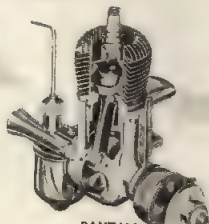

CO₂ IGNITIONLESS
\$4.95 with holder

OVER 10 YEARS OF LEADERSHIP.

"O. K." has taken on a new meaning for hobbyists since Herkimer Tool and Model Works introduced their first miniature engine. During the last decade "O.K." has indeed set a mark for other builders to shoot at. Undisputed leadership was only won by setting a new high in quality, performance and service. Now, "O. K." offers a complete line that you can buy with full confidence they will never compromise with the high standards they have set.

A few quotes from our fan mail, and other facts about the StromBecker Kits you sell, sell, sell!

Shhh! Confidential!

Keep it dark, and don't tell anybody! If the news gets around, there's apt to be a mob at Booth 60-61 at the M. I. A. Show. In Chicago, that is, in January.

* * *

But if you will just keep it under your hat, you can tip-toe over to the StromBecker booth (before the crowd gets there) and see what's cooking in solid models for '48! Such as:

NEW COMMERCIAL TRANSPORT
American Airlines Convair Flagship; also the DC-3 and DC-6.

HO-GAUGE RAILROAD CARS
New solid model assembly kits of famous railroads, geared to fit into standard HO-gauge model layouts; also modern streamliners

LOW-WING PRIVATE PLANE
Popular private plane, the Swift; also famous Cubs, prominently in the headlines.

HISTORIC TRAINS
Authentic solid models of DeWitt Clinton and Wm. Galloway trains

FAMOUS SHIPS
Fun to build, educational to own. Even a submarine in the series!

See You at the Show!

STROMBECKER MFG. CO., MOLINE, ILL.
200 Fifth Avenue, New York City

NEW CLEVELAND STORE'S BUSINESS OF MANY MODELS FOR CRAFTERS

Hobby House, Incorporated, 610 Huron, in downtown Cleveland, Ohio opened just before Christmas, late 1946 and now offers more than 5000 items. It has a following which includes newspaper folk who give it columns of free and helpful publicity, clubs of youngsters, psychiatrists who endorse the therapeutic value of play to patients, veterans, and their friends, numerous personal friends of Mr. Leonard Blum, owner, a Cleveland attorney for 20 years, and an ardent and widely known model train builder, whose basement has been a sort of open house for hobbyists for years just as the store has now become.

There is always something new. A boatbuilding friend lets all his loving cups be displayed in the show window, while the public goes for model boat sets which tie in. Or Mr. Blum with chicken wire, wet and wadded paper, and paint and poster scenery rigs up mountains and panoramas which train building youngsters and friends study to copy. Trains, boats, and planes that are really models are provided without number for building which is becoming so important in many places, but which in Cleveland has a builder hobbyist to procure the stuff, and fast, for little and big clients. There is a magazine rack of books and magazines and dealer helps for the hobby trade. Available wall space shows enlarged photographs of trains to be built. A blackboard, similar to airplane or train schedules, shows under arrows the names of models expected and a check for on time or date expected if late.

A picturesque house with outslanting walls and a much shingled roof was the sign painter's happy idea of overhanging street sign.

HOLLYWOOD HOBBY SHOP

(Continued from page 184)

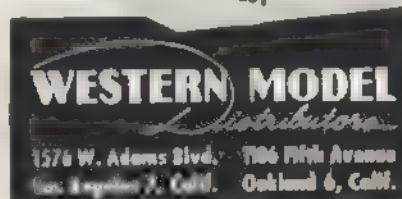

roading problems," Mr. Taggart said "for I have found that nothing builds business so markedly as demonstrating to customers how much enjoyment they can get from miniature railroad systems built to resemble actual yard operations."

The Hollywood Hobby and Electric Shop is a franchised Lionel repair station, and features a complete electrical shop completely equipped for these complex miniature electrical engineering problems. Last year, Mr. Taggart did a volume upwards of \$40,000 in model railroading and much of which was traceable to the ability to provide specialty electrical engineering as the customer wished.

The Kiddies' Toy For TRIPLE Joy

- It's a Lumber Truck
- It's a Stake Truck
- It's a Flat-Bed Truck

THE "THREE-IN-ONE" is the latest member of the Hubley fleet of profit-making trucks. Its versatility catches the fancy of the small fry. With sides attached, it is a stake truck. Remove the sides and the toy becomes a flat-bottom truck. Put the logs, chains and springs into place and the vehicle is transformed into a lumber truck. The Three-in-one is red with aluminum trimming. 17½ inches long. Comes complete with removable aluminum painted sides, load of logs and chains, knee action rear wheels, 14 black rubber tires and retractable trailer support with two red rubber wheels. Order now for early fall delivery.

★ SURE-FIRE HITS IN NEW TOYS ★

No. 112N1246—Dippy Dilly. Famous for his antics all over the country is fascinating Dippy Dilly. Just place him next to a glass of water and he jerps alive dips his long red beak into it. It's a painful watching him! All metal. Only back body sports a fluffy blue feather tail and absorbent red head is fitted with bulging movable plastic eyes. The adoring marvel of the age that tops everything in sales.

Each **70¢** Per dozen **\$7.50**

No. 112N1232 — "Daffy-Billy" Novelty. Comical figure of an inebriated man completely dressed in formal attire with detachable shoes and bow tie. Daffy-Billy's bright red nose is dipped into cold water. The cany back and forth on his perch with his furry red hair waving in the air. Solidly mounted on heavy wire stand Daffy stands $7\frac{1}{2}$ " high.

Each **80¢** Per dozen **\$8.75**

No. 112N1238—Glib-Glib. The Drink-Up Duck. Full sized 7", each drink in duck with one is practical fun on. Mounted on attractive stumped in a legs, a supporting base. Will create a thousand for at least one hour. For a time. Metal pivot clip on bright yellow body is adjustable to any desired action. Separately packed in display carton with complete instructions.

Each **\$1.30** Per dozen **\$14.56**

No. 112N1215—Swing Dancers. The newest amazing toy of its kind on the market. A really remarkable little novelty that is sure to win many friends. Entirely made of quality wood, it consists of two dancers, a boy and a girl. Strung on pure nylon, they have movable joints for greater animation. They can be made to Rhumba, Conga, jitterbug, etc. Just by manipulating the round block concealed underneath. Come in assorted bright colors. Gift has silk and kerchief of felt material. Height, 6 inches diameter, $2\frac{1}{2}$ inches.

Each **70¢** Per dozen **\$7.80**

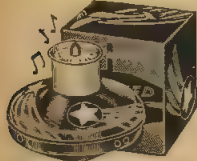

No. 112N1237 — "Tie-Toe" Drinking Bird. One of America's fastest selling novelties—profitable ~ self-demonstrating ~ quick-selling! Made of brightly colored glass. Tie-Toe actually appears to drink from a glass or cup. Comes complete with two supports—a bracket and small cup for hanging, and a set of clips for perching bird on rim of ordinary drinking glass, etc. Two-color 12" x 19" action display card with each order of two dozen or more. Individually boxed.

Each **70¢** Per dozen **\$7.20**

No. 2286—Baby Poly Clown. It bobs from side to side-back and forth but never upsets. The kiddies will squeal with delight when they see this roly poly jovial twinking clown rocking. Molded of sturdy fire-proof composition in a screamingly funny rendition of a circus clown. Washable. It is hand painted with black, white and red. Has shiny enamel finish. Height, $7\frac{1}{2}$ inches.

Each **70¢** Per dozen **\$8.00**

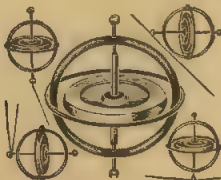

No. 112F1605—Mechanical Fly-Speed Top. A sensational new spinning top that will enchant any youngster. Spins anywhere and is easy to operate. Mechanical spider eliminates the use of a string. Made of heavy stamped metal with no sharp edges to cut hands and fingers. Brightly colored enamel finish with beautiful shooting star design. Will spin nearly away for a long period. So simple to operate even tiny tots can damage it. Diameter, $3\frac{1}{2}$ inches; height, 3 inches.

Per dozen **\$1.90**

No. 112F1601—Hammer Top. Similar to above model. In handsome bright two-tone enamel colors. Size, diameter, 3 inches, height, 4 inches.

Per dozen **\$1.90**

No. 3900—Gyro Top. The scientific wonder toy of the century. Exceptionally well made of first quality metal. It has an attractive frame finished in red with the spinner made of die-cast metal in a silver color. Can be made to perform a multitude of gravity defying stunts and amazing performances. Has one slotted and one cupped end for convenience in performing tricks. Diameter, $3\frac{1}{2}$ inches, height, $4\frac{1}{4}$ inches.

Each **30¢** Per dozen **\$3.35**

No. 112F1636—Hammer Top. In any season, in any city a top is the most desired possession of young boys. Always in demand, always a big seller, this top really is "tops". Sturdily constructed of shiny durable metal with wood handle. When handle is pressed down, top spins & sings. Beautifully lithographed in bright design. Size, $5\frac{1}{2}$ inches in diameter.

Per dozen **\$2.10**

No. 112F1637—Musical Top. Larger top, made of same high quality metal, that emits cheerful musical tones when spinning. Size, $6\frac{1}{2}$ inches in diameter.

Per dozen **\$4.25**

Popular Kiddie Banks

No. 112M240 - Stumpy Days Barrel Bank. A convenient standard bank that brings hours of fun. Features: large space and wide opening for coin deposits. Metal construction in shape of barrel with black and yellow paint remarkably imitating grain of wood. Money can be removed with attached key through small door on the underside of bank. Highly popular with everyone. A profit maker. Height, 4 1/2 inches.

Per dozen **\$1.60**

No. 112M246 - Globe Bank. A double duty item that doubles sales. A specious bank in the form of a globe. Entire world map is brightly and attractively colored and names are clearly printed for easy identification. Placed securely on a steady base. Children love this bank makes saving fun. Stands 4 1/2 inches high.

Per dozen **\$1.75**

No. 112M245 - Clown Bank. A novel bank that consumers can't resist. Colorful, shiny metal cover included to resemble a clown's face. When a lever on the base is pressed down, the happy clown automatically sticks out his tongue upon which coin is deposited, and pulls it back into the rosy cavity. Bank can be opened on the bottom with attached key. Size, 4 1/2 inches high.

Per dozen **\$1.60**

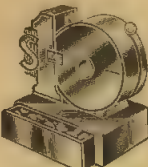

No. 8998 - Chimney Savings Bank. Here is a way to save some money! Very well made of extra heavy cardboard in a tall chimney shape. Top and bottom are made of quality metal in a khaki color. Is covered with an attractive brick pattern design in red and white with the words "Chimney Savings Bank" in large blue letters printed across the front. Height, 8 1/2 inches, diameter 2 1/2 inches.

Per dozen **\$7.50**
Per gross **\$8.50**

No. 112M242 - Lucky Dime Bank. Registers dimes as you put them into the bank until \$5.00 capacity is reached. Another special feature is the automatic lock on this pocket-size bank. Clicks shut when you insert the first dime and does not release again until \$5.00 has been deposited. Saves smothering the bank to extract the money. Approximately 2 1/2 inches square and 3/4 inches high. This bank is made of lightweight metal with a nickel finish top, complete with instructions for opening on the reverse side.

Per dozen **\$1.50**

No. 3N2850 - Three-Coin Register Bank. A new, exciting bank that's a natural for boys and girls. Stimulates saving. More than just a toy—an education in thrift. Actually adds up with each deposit. Takes 5c, 10c and 25c coins—provides a thrill when the total reaches \$10.00. Automatic drawer flies open for every \$10.00. Bank holds over \$50.00. Beautifully styled in durable, colorful, maroon or black duro plastic.

Each **\$2.10**
Per dozen **\$24.00**

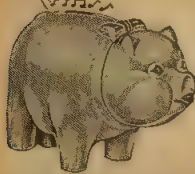

No. 3J21 - Pay Station Telephone Bank. This durable 4 1/2 inch pay station telephone bank makes a practical gift welcomed by young and old. Provides hours of fun and play for boys and girls. A replica of the latest design cradle pay phone, the bank has a miniature receiver, coiled dial add-on with each bank comes a key for opening the little bottom drawer where coins collect. Available in red or blue. Individually packaged in attractive, illustrated cartons.

Each **90¢**
Per dozen **\$10.00**

No. 112M241 - Mail Box Bank. Trap door in the base of the bank opens with the key provided. A miniature resolution mail box in every detail down to the tiny rivets and a pick-up time schedule which advises "Save Early." This unusual novelty bank is securely constructed of light sheet metal, painted government green. Size, 5 1/2 inches high, width 2 1/2 inches depth 3 1/2 inches. Packed in illustrated cartons.

Each **35¢**
Per dozen **\$3.85**

No. 112M247 - Squellette Piggy Bank. Saving to music is exciting fun with this bank. When a coin is inserted, an appealing musical sound is produced which surprises and delights everyone. Squellette is molded from plastic. Durable and has a smooth, lustrous finish in pink, baby blue and other pastel colors. The ears, nose and mouth are hand-carved in beautiful, contrasting hues. A special lock device on the bottom permits money to be removed without breaking bank. Length, 8 inches, height, 4 1/2 inches.

Each **75¢** Per dozen **\$8.00**

No. 112M2413 - "Pork Chops" Piggy Bank. Its chubby turn-out holds and safeguards your savings. Well made of the new improved plastic it is supplied in assorted bright appealing colors. Smoothly rounded, safe and sanitary, they are also sold to a sticky little can be used over and over again because of the handy metal releasing tab on the inside. Length, 5 1/2 inches. Each in box **55¢**

Each **55¢** Per dozen **\$6.25**

Glass Savings Banks. Made of top quality clear glass that withstands any amount of rough handling with flat even area on bottom that provides standing surface. Artistically molded in 3 favorite styles—Lovely lily vase, cute chick, and detailed glass—each one tops in popularity. Really tops on the market. Everybody wants 'em. Packed 4 dozen of a style to a carton. (No less sold).

Number	Style	Height	Per carton
112M2541	Pig	3 in.	\$3.20
112M2542	Bell	4 in.	
112M2543	Globe	4 1/2 in.	

FISHING REELS

*it's amazing-
it's exciting- it's electronic*

The new Franklin "Electric Eye" Shooting Gallery is an interesting example of the unusual playthings you can design inexpensively around RCA Electron Tubes.

Aim the rifle—pull the trigger—and if you're good, a narrow beam of light strikes the bull's-eye of the moving target. Instantly and automatically an RCA Phototube flashes a light and sounds a buzzer, indicating a direct hit. More fun than a barrel of monkeys . . . yet the whole outfit retails for less than \$15.00!

Maybe you would like to cook up an electronic game

that works on *invisible* light . . . or an educational toy that creates its own brand of music. But whatever your ideas, the chances are that you can solve your design problems—simply and inexpensively—by using RCA Electron Tubes. It will pay you to investigate their possibilities.

RCA Application Engineers will be pleased to consult with you and advise on the adaptation of RCA Electron Tubes to your designs—or place you in touch with competent engineering organizations which can translate your ideas into practical working form. Just write RCA, Commercial Engineering, Section CS73, Harrison, N. J.

**THIS TUBE CAN DO
WONDERS FOR YOU**
This inexpensive phototube will respond instantly to a beam of light to perform a limitless number of small "miracles."

RADIO CORPORATION of AMERICA

HARRISON, N. J.

ture. (Vetch grows well in mild climates—in the South and Pacific Coast regions. Balbo rye is a favorite farther north. Sudan is a good bet for summer pasture.)

He Feeds No Grain; Makes More Money

No grain—but lots of corn silage—is John Svisend's answer to the high cost of living for dairy cows.

Svisend belongs to the Dairy Herd Improvement Association in Allamakee County, Iowa, so it is easy for him to compare his costs with those of other members. Last year he produced butterfat for less than 31 cents a pound—exactly 11 cents a pound cheaper than the Association average. His 24 cows averaged 390 pounds of butterfat for the year.

Here's how Svisend got his low costs: he fed 9,480 pounds of corn silage (more than twice the average rate in the Association), but no grain. This wiped out expensive grain costs, and reduced his hay bill a third below the Association average.

He uses alfalfa-brome for both pasture and hay. The average pasture cost for the Association was \$15; his cost was only \$10.

For protein, Svisend fed a 32% commercial mixture with soybean meal, half and half. His cows ate 1,072 pounds apiece; the Association average was 1,750.

When it came to feed cost per cow, his average was \$119.14. The Association average was \$13.36 more than that, or \$132.50.

Maybe it would be even clearer to compare Svisend's feed costs with another Allamakee County herd that was producing about the same as his. This other herd got less than half as much silage, 60% more hay, and nearly 2½ times as much concentrates. That's where the other man poured out the

Folding Feed Troughs

These hinged feed troughs fold out of the way after grain feeding to let Earl Deardorff, Livingston County, Mo., throw in baled hay for the cows. (See trough in background). Troughs built to fit manger, are all

Lee Voted Nation's Leader

In a national survey by a prominent publishing company among men in all types of jobs, Lee Work Clothes were voted the leading brand by an overwhelming margin. Because of their many superior features, Lee Work Clothes give you *longer wear . . . greater comfort . . . better appearance . . . more washings per garment*. They're Sanforized Shrunk for permanent fit.

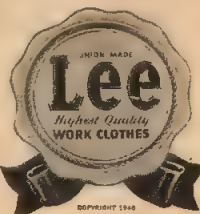

There's a Lee for Every Job . . . Overalls . . . Union-Alls . . . Matched Shirts and Pants . . . Dungarees . . . Riders (cowboy pants) . . . Overall Jackets.

Buy Lee Work Clothes at Leading Stores Coast to Coast

THE H. D. LEE CO., INC.

WORLD'S LARGEST MANUFACTURER OF UNION-MADE WORK CLOTHES

The 'Jeep' Works the Year 'Round

The Universal 'Jeep' is busy every season of the year—helping you get work done on time—spreading its cost over more kinds of jobs.

LEFT— The sure-footed 4-wheel-drive 'Jeep' gets you to any part of your place in a hurry—climbs steep grades, pulls its load through deep mud and sand, over ice and snow.

ABOVE— The Universal 'Jeep' is a 4-wheel-drive tractor for all kinds of field work, operating pull-type implements or, with hydraulic lift, standard lift-type farm equipment.

ABOVE— The 'Jeep' easily pulls loads like this 2100-lb. baler and loaded wagon. With its wide speed range, the 'Jeep' will tow your trailer to town in a hurry at normal road speed.

RIGHT— With power take-off, the 'Jeep' delivers up to 30 hp through pulley or shaft drive for operating hammer mills, buzz saws, silo blowers, sprayers and power mowers.

ONLY THE 'JEEP' HAS ALL THESE FEATURES:

Selective 2- or 4-wheel drive—6 speeds forward, 2 reverse.
Operating range from 2 mph in the field to 60 on the road.
More driver comfort—full-back, upholstered seat, shock absorbers, folding windshield.

Car-size 7-in. headlights for night field work.
Power take-off points at rear, center and front.
Steel bed for hauling.
Optional metal top for winter.
Optional hydraulic lift.

4-Wheel-Drive
UNIVERSAL,
Jeep

MAKERS OF AMERICA'S MOST USEFUL VEHICLES

MINNOWS AND BAITS

JITTERBUG

A double lobed spoon attachment on this minnow makes it wobble and also creates a load paddling sound. Fitted with two treble hooks. Weight, $\frac{1}{2}$ ounce.

TOY NEWS AND NEW TOYS

NEW WAREHOUSE

Titche-Goettinger Co., Dallas department store, has moved into its new warehouse in Airlawn Industrial Park and all services outside of the big store at Main, Elm and St. Paul streets are now being carried on from the new building.

In this new building, Titche-Goettinger has pioneered the newest time and labor-saving devices and methods. Mechanical means throughout eliminate all heavy lifting and "flow-control" of merchandise makes the movement of stocks possible with maximum efficiency. Aisles and storage spaces are carefully marked and standardized for quick storage delivery.

THE "SQUIRT" WATER PISTOL

The Kilgore Manufacturing Company of Westerville, Ohio, report that their "Squirt" water pistol is on the road to being one of the hottest items they have ever brought out. The "Squirt" is a precision made water pistol with working parts that are much more elaborate and positive in action than is usual in this type of pistol. All of the working parts are made of non-rusting materials to insure a long, trouble-free life. The pistol develops remarkable pressure, the shots being accurate and with an equal volume of water. It is moulded of colorful, light-weight, durable plastic with a brass nozzle screw which can be removed for cleaning. Pump springs have valve bearings of stainless steel.

ROSEBUD ART CO. AT THE McALPIN

I. S. Rosen, President, Rosebud Art Company, Inc., 204 East 118th Street, New York 35, states that one of the feature attractions in their line for the coming year will be their Jingly Nested Blocks. This item proved a best seller for the Rosebud line last year and has already given indications of being even more popular in 1948. It consists of a set of Nested Blocks, built of heavy cardboard and each block has a jingle that attracts the child. The blocks are illustrated with the complete alphabet and designs to correspond. The retail price is \$1.00.

Rosebud will also display a new line of Poster Color Paints in addition to their well known Robin Hood Painting Sets, Slate Sets and popular priced games. Mr. Rosen will be on the job in Room 825, Hotel McAlpin during the Toy Fair.

"SUPER ROYALTY" NOW READY WITH NEW DOLL CARRIAGE MODELS

The Super Royalty Manufacturing Company, makers of the Super Royalty Doll Carriages, is now showing its 1948 line, including seven new folding models and two all-metal and reed constructed carriages. These new models represent the company's bid to solidify its present position among the field's top manufacturers, which it has gained within a short three year period.

"Whatever success we have found," says Henry Winston, president of the company, "can be traced to our basic selling policy. We set out to make a competitively priced, high-quality product and followed through with a soundly planned sales effort. We

also determined to fulfill all commitments at a maintained price and instant buyer approval confirmed our belief in this method of operating."

Super Royalty believes it is the first company to offer an important innovation in the field—introduction of all-metal and reed constructed carriages in the low price range. On the two models being brought out this year, bonderized metal parts replace the parts formerly made of wood.

Anticipating an even greater volume of sales than last year, they have endeavored to add many selling features to its 1948 line. Some of the features are: The newly designed, Pro-Tekt hood spreader that protects against pinched fingers and a continuous steel ring inside the solid, rubber tires. Some models feature an automatic spring action, locking device and both the two wheel, hand brake and the two wheel, spring action, foot brake have been improved on a few models of the line.

The Empress model uses a two toned, Spanish grained leatherette and the other models utilize washable, Spanish grained leatherette in a variety of color combinations. Tubular, chrome plated handles are featured on the more expensive models and most models include storm covers, bottom pads, sun visor and toe extensions.

The company's policy of high quality at low cost is realized through its utilization of extensive tooling and application of modern mass production techniques. By eliminating many hand operations, production costs are reduced and their savings are reflected in lower prices all along the line.

The *Parent Magazine* award symbol, affixed to every carriage, has proven to be an important factor in influencing consumer acceptance, company officials stated. Advertising mats and electros will be available for further merchandising assistance.

"We managed to deliver every order placed with us last year," says Mr. Winston, "which we feel has done much to strengthen our buyer-manufacturer rela-

tionships. We are very proud of this buyer friendship and intend to keep it, come what may."

All the friends of Super Royalty are invited to visit their Toy Fair display in Room 793, Hotel McAlpin and their permanent New York showroom at Bert Scheur, Inc., Hotel Breslin, 1186 Broadway, New York 1.

EFFANBEE SALESMAN FOR NEW ENGLAND

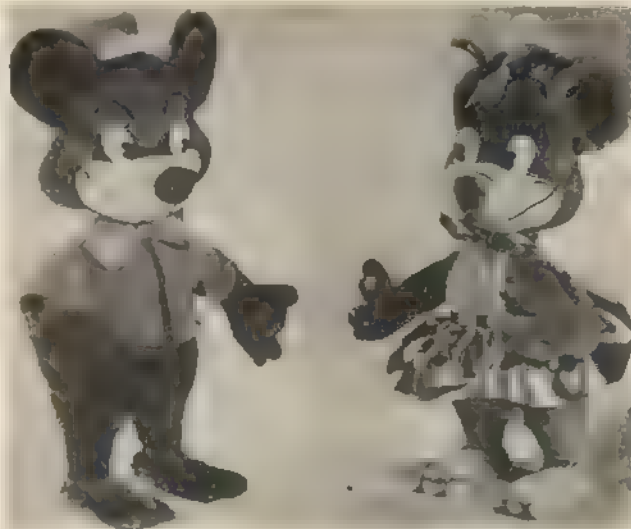

Henry Weisser has been added to the Effanbee sales staff and will cover the New England territory formerly handled by Julius Hackel. Mr. Weisser is a recent graduate of Brown University.

COLEMAN & MORRIS MAKES ADDITIONS TO LINE

Upon visiting Coleman & Morris' new metal toy plant in Port Chester, N. Y., we find that they now manufacture a first line collection of metal toys featuring drums, music and choral tops, music boxes and other items ranging in price from thirty-nine cents to twelve dollars retail. To take care of the increased demand for this type of merchandise, Coleman & Morris moved to their new plant last year and have installed modern equipment and machinery.

In addition to their metal line, they are still continuing the manufacture of five, ten and twenty-five cent syndicate items and are one of the few firms carrying a complete line not only of better department store merchandise, but low end syndicate goods as well. We were particularly impressed with a preview of two of their newest items, namely "Mr. Bubbles," an ingenious bubble-blowing toy, and their "Tuffskin Trap Set" that comes complete with cymbals, triangle, foot pedal, and all the trimmings. It is a very healthy sign for the continued prosperity of the Toy Industry when one can continually see how the various manufacturers are improving and extending their lines.

Walt Disney's Bongo and Lulubells are now manufactured by the Gund Manufacturing Company. The entire sales force will be on hand to greet visitors to the Toy Fair in the permanent showroom, Room 232, Fifth Avenue Building

NEW TOYS ON PARADE

Kar King

Latest example of children's toys so realistic they are hard to discern from "the real thing" is this three-unit highway and speedway toy produced by the GLEN DIMENSION COMPANY, INC., 2631 South 31st Street, Milwaukee 7, Wisconsin. It consists of scale-built models of a modern convertible, racer, and trailer—all molded from Bakelite styrene plastic. The convertible has a two-tone body in blue and white, while the racer and trailer are styled in red and yellow. Their sturdy plastic construction, speedy lines, and eye-appealing features bring hours of enjoyment to automobile bringing conscious youngsters.

Irwin's Plastic Rattle And Musical Doll

From pert curls to oh-la-la eyes, the saucy appearance of this new plastic doll is as attractive to children as the tinkling notes which

facture that is possible with plastics. The toys illustrated are among many in the attractive line of playthings created of Celanese Lumarith by IRWIN CORP., 27 West 20th St., New York, N. Y.

New Toy Gun

The MELDON BROTHERS COMPANY, 4748 Hough Ave., Cleveland, manufacturers of the well known super-automatic tom gun, are introducing a sensational new toy gun to the market. It's the new "Play Police Automatic Cap Pistol." This all-metal cap pistol, made of 22-gauge steel that will not break when dropped, has a fine blue-black, baked infra-red enamel finish. It shoots with a loud report and can be loaded very easily. It is a 50-shot repeater, using any brand of caps. For complete safety and harmlessness, this gun is constructed with a safety trigger and all moving parts are enclosed.

The gun comes complete with a play police badge, policeman's whistle, and play police permit. The complete four-piece set is packaged in an attractive multicolor box. Packed four dozen to a shipping car-

ton, weighing 35 pounds. Suggested retail price is 79 cents.

come from its "insides." Arms and legs are jointed for easy flexing in the very young child's hands.

The transparency possible in plastics is utilized to add new interest to this 1948 version of the old-fashioned rattle. With half of the ball being transparent, the other half opaque, baby not only can hear but watch the rattling noise.

These are but two of many ingenious plastic toy creations which abound at toy and infant counters everywhere. Both their abundance and their low price are attributed to the speed and economy of manu-

Pictorial Films' Display Rack

Pictorial Films' striking new display rack in blond birch tones brings a selection of stunning home movie packages to the top of the retail counter where they command customer interest. The modern display rack is designed to show a large selection of the 16 millimeter (100 foot) and 8 millimeter (50 foot) "Streamliner" cartoons, recently released in the Pictoreel line. Specially designed for this promotion are the fifteen individual subject boxes, printed in four-color cartoon design. "Streamliners" are selling at \$2.75 and \$1.75, for the 16mm and 8mm editions, respectively. They are released by PICTORIAL FILMS, INC., 625 Madison Ave., New York 22, N. Y.

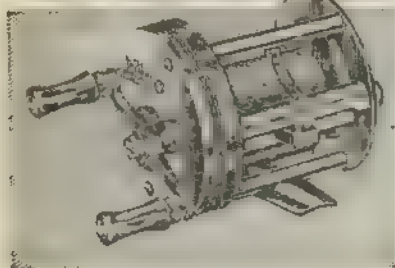

TOYS and NOVELTIES—March, 1948

DEPT. 6

FISHING REELS

LEVEL WINDING CASTING

No. 750 *Perfectorama* Reel

Frame is hard-chrome plated bearings and bushings, phosphor bronze; spiral, quadruple multiplying phosphor bronze gears; level-winding screw, nickel silver, chrome plated; crank mottled brown and white; spool, aluminum with cork arbor. Spool diameter, 1 1/2 inches.

No.	Capacity	Wt. each	Each
750	100 yds.	7 3/4 ozs.	★\$10.00

SOUTH BEND

Chromium plated brass reel. Level winding, anti-backlash phosphor bronze bearings and hard brass spiral gears. Mottled cream and brown handles, patented tension grip adjustment screw. Quadruple multiplying.

No.	Capacity	Wt. each	Each
450	100 yds.	7 1/2 ozs.	★\$10.00

SOUTH BEND

Chromium plated brass reel. Level winding anti-backlash. Phosphor bronze bearings and hard brass spiral gears. Patented tension grip adjustment screw. Nickel plated spool caps, mottled red and white handles. Quadruple multiplying.

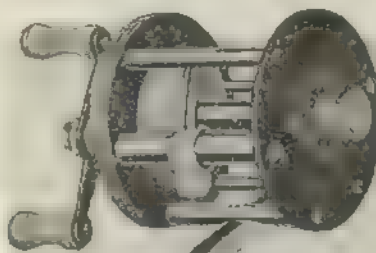

No.	Capacity	Wt. each	Each
400	100 yds.	7 3/4 ozs.	★\$9.00

Chromium plated steel frame. Level winding, anti-backlash. Hard brass bearings and spiral gears. Patented tension grip adjustment screw. White handles. Quadruple multiplying.

No.	Capacity	Wt. each	Each
800	125 yds.	7 1/2 ozs.	★\$6.75

COXE

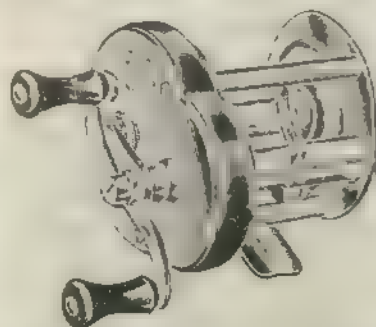

Model 95C

Featherweight level winding anti-backlash reel. Made of anodized aluminum with new snap-on plastic arbor. Special spring tension spool bearing, adjustable to any weight lure.

No.	Capacity	Wt. each	Each
95C	100 yds.	5 ozs.	★\$9.75

KALAMAZOO BALCLI SPECIAL

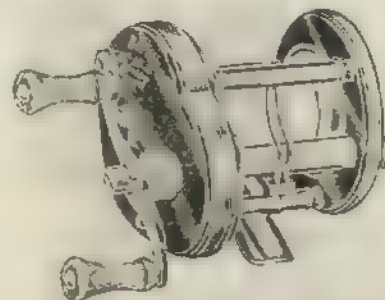

A level winding reel with two gears instead of the usual four. Crank is mounted on carriage screw, thus giving a direct drive for the carriage screw. Controlled spool speed side plates, chrome plated over nickel brass. Phosphor bronze bearings. Black plastic, bell shaped handles. Adjusted jeweled spool caps with adjustable drag on tail plate. Cork arbor supplied.

No.	Capacity	Wt. each	Each
20	100 yds.	9 1/2 ozs.	★\$9.70

All above, one in a carton

★ Factory Suggested Resale Price

KALAMAZOO BALCLI DELUXE

A direct drive level winding reel. The drive gear is anchored to the extended line carriage screw and meshes directly with spool pinion. Made of strong aluminum alloy, circle finished and black anodized and stainless steel spool. New head end adjustable casting drag, patented oiling spool caps. Supplied with snap-on plastic arbor.

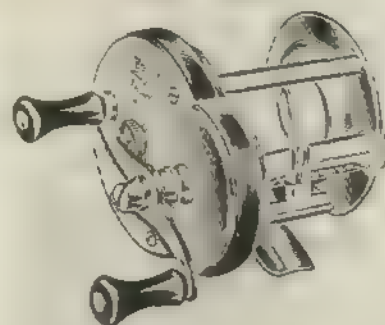

No.	Capacity	Wt. each	Each
30	100 yds.	7 1/2 ozs.	★\$20.00

No. 30A

Same as No. 30, except with aluminum spool in place of stainless steel spool

No.	Capacity	Wt. each	Each
30A	100 yds.	7 ozs.	★\$17.80

KALAMAZOO BALCLI THUMBLESS

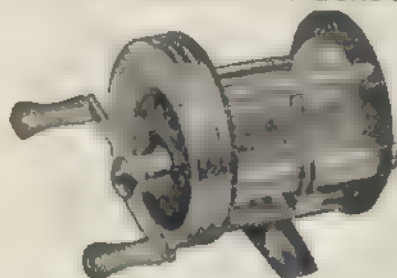

A direct drive level winding reel with controlled spool speed, thereby offering a "Thumbless" model. Large oversize tail bearing and adjustable head and spool cap controls the speed. Nickel plated, chrome plated brass with black plastic head ring and black bell shaped handles to match. Phosphor bronze bearings. Removable plastic arbor

No.	Capacity	Wt. each	Each
23	100 yds.	8 1/2 ozs.	★\$10.00

FISHING REELS

LEVEL WINDING CASTING

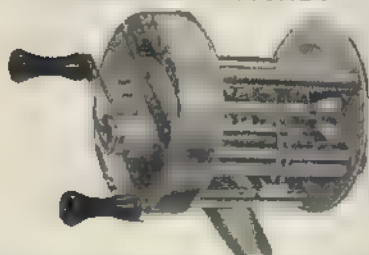

LANGLEY DELUXE LAKECAST

A medium priced level winding reel with $\frac{3}{4}$ -inch featherweight Anti-Inertia spool that controls the cast, preventing drag and backlash. Gear box control for oiling and adjustments. Made of aluminum alloy with polished chrome finish on housing.

No.	Capacity	Wt. each	Each
870	100 yds.	6 ozs... (F)	\$10.50

LANGLEY LAKECAST

A strong lightweight, level winding reel with $\frac{3}{4}$ -inch featherweight Anti-Inertia spool that controls the cast, preventing drag and backlash. Gear box control for oiling and adjustments. Made of aluminum alloy, with gray alumilite finish.

No.	Capacity	Wt. each	Each
850	100 yds.	6 ozs... (F)	\$8.75

No. 852

Same as No. 350, but with $\frac{1}{2}$ -inch featherweight Anti-Inertia spool.

No.	Capacity	Wt. each	Each
352	100 yds.	6 ozs... (F)	\$8.75

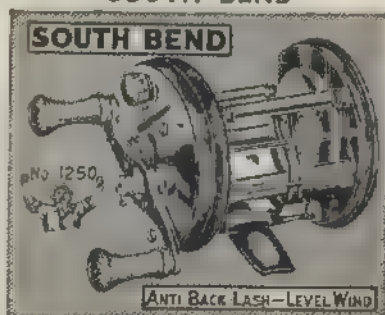

LANGLEY CASTRITE

Level winding reel with the new $\frac{3}{4}$ -inch featherweight Anti-Inertia spool that controls the start and stop of the cast preventing drag and backlash. Gear box control allows easy access to gears. Made of aluminum alloy.

No.	Capacity	Wt. each	Each
880	100 yds.	5 ozs... (F)	\$6.75

SOUTH BEND

A superbly built, level wind, anti-backlash reel. Stainless steel end plates. Brown pearl plastic head ring. Three piece take down design. Hardened phosphor bronze gears. Nickel silver spool. Complete with cork arbor in a leather reel bag.

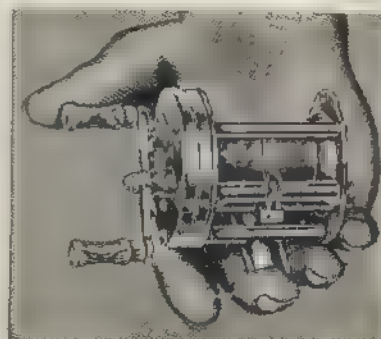

No.	Capacity	Wt. each	Each
1230	100 yds.	7 $\frac{1}{2}$ ozs....	\$25.00

Chrome plated brass frame, phosphor bronze bearings, quadruple multiplying gears. Easy to take down. Nickel silver ball wire, chrome plated. Thumbing and spooling are entirely eliminated. Satin finish with double grip

No.	Capacity	Wt. each	Each
1000	100 yds.	9 ozs....	\$15.00

KILGORE ANNOUNCES THE BOBCAT and HAWKEYE

50-SHOT REPEATERS

The Bobcat and Hawkeye are designed to help fulfill young dreams of action and adventure. Beautiful fine-line "engraving" and action-stirring names make a sales appeal combination youngsters can't resist. Pocket-size — both models are 4 3/4" long. No. 5 Bobcat has plastic grips, No. 4 Hawkeye checked metal grips. Feeding mechanism features a 6-point star wheel geared to mesh perfectly with perforations in Kilgore No. 150 Roll Caps. Hammer hits dead center on every cap. Quick, easy loading . . . smooth action . . . trigger pulls as easy as a pup wags his tail. Individually packed in 2-color boxes.

WRITE FOR NAME OF NEAREST JOBBER

Hawkeye is same size as Bobcat — has same mechanism. Grips are checked metal.

CASH IN ON THE WORLD-WIDE FAME OF DICK TRACY, AMERICA'S FAVORITE DETECTIVE!

Here are two sure-fire toys that every boy in America wants, and every adult is more than willing to buy! Because these are real "law and order" toys, their popularity is universal. Here's a gun that looks and sounds like the real thing, but is absolutely harmless. And the Wrist Radio *actually works!* A child can actually transmit his voice over short distances and receive regular broadcasts up to 50 miles away! Both nationally advertised, thousands and thousands of these Tommy Guns and Wrist Radios have been sold. Here's your chance to clean up selling thousands more.

TOYS and NOVELTIES—March, 1948

ELMER the Bull

ELSIE the Cow

"WHAT DO THEY WANT TO STUFF MY BABY FOR?" growled ELMER the bull

"No, no dear," said ELSIE the cow, hastily. "They aren't thinking of stuffing little BEAUREGARD. It's to be a doll, a toy, a plaything for millions of little boys and girls everywhere. A cuddly BEAUREGARD doll with cute little ears and nose and his color all over to blend with his baby brown eyes."

"Don't you let them make him stuffy," roared ELMER. "My baby is born to a tradition, his father's

tradition, from a long line of fine bull craftsmen, that's what we were . . ."

"Know how, that's what I want," bellowed ELMER. "I want to see if those people know how to make my baby look like me. That, woman, will give him sales appeal the like of which you have never—Yes, dear, *sales* appeal, I said. *SALES!* Ask them how soon they'll be in production."

CHEM-PAK • MICRO-PAK

Names that Mean
PROFESSIONAL QUALITY in

SCIENCE TOYS

SELL THIS COMPLETE, PROFITABLE TOY LINE

These attractive, high quality Science Toys answer a growing demand for sets that combine exciting fun with practical education. They are simple and SAFE ...no poisonous or explosive material used. The equipment and materials are standard, professional quality, products of a company that has manufactured precision laboratory equipment for 40 years. The Chem-Pak and Micro-Pak cases make handsome displays that have eye and sales appeal.

No. 18 CHEM-PAK contains 42 bottles of chemicals, necessary beakers, flasks, test tubes, other accessories and 100-page illustrated instruction manual, all in a handsome 3-shelf metal case. Retail price \$15.00. Other smaller Chem-Paks: No. 10—\$10.00, No. 6—\$6.95, No. 3½—\$3.95, No. 1½—\$1.95.

No. 310 MEVey MICRO-PAK is a De Luxe set; contains generous assortment of equipment for many experiments, including modern, well-designed microscope and in-

struction manual. Sturdy metal cabinet. Retail price \$10.95. No. 508 Mulvey Micro-Pak, slightly smaller than No. 310, contains the same precision-built microscope. Sturdy metal cabinet. Price \$8.50.

No. 4 SCIENCE SET contains materials and equipment for performing 35 interesting, thrilling experiments based on the principles of magnetism and electricity. Price \$4.00.

Complete illustrated bulletin describing all sets mailed on request.

WATCHES FOR THE SPORTSMAN

For more than half a century Lemania has met the most rigid requirements for accuracy and dependability. During the war, tens of thousands of Lemania precision instruments were used by the allied Navies, Armies and Air Forces under all conditions

in every climate. And in peacetime the Lemania Chronograph and the Lemania Stop Watch have been recruited for split second timing in international sports events and for precise time-study analysis

LEMANIA Chronographs and Stop Watches are World Famous For Accuracy

LEMANIA CHRONOGRAPH

This stop watch has a 30 second dial with 1/10 second divisions and a second set of numbers from 31 to 60, with 15 minute recorder crown starts, stops, and resumes motion of hands. Time out, with crown. Button permanently resets hands to zero when they are halted. Fly back action when hands are in motion. Jewels. Nickel chrome plated case, unbreakable crystal. Ideal for foot ball, basketball, racing and industry.

charge him, and if you can out-run him, put the ball on him. If you can't catch him, bluff once before you throw—sometimes it will slow him down enough so that you can tag him.

No matter what the play, if there's no chance to get your man it's better to hang onto the ball. Dressen tells about a play that emphasizes this.

In this case there were runners on first and second, and one out. The second baseman and shortstop were doing a little teamwork. The batter was a left-field hitter, so the second baseman was guarding second base, and the shortstop was well over to his left.

Sure enough, the batter banded out a hot grounder to short, and the second baseman raced for second. But his speed carried him over the bag as he took the throw, and he stumbled as he put on the brakes to pivot and throw.

By that time the batter was steaming right up to first—no use to throw. The second baseman would be better off to throw to third, as he was facing that way. But he had that original play fixed in his mind. So he made a hurried throw to first—the ball went wild, and the runner rounding third scored. Had the second baseman simply hung onto that ball, he would have saved a score.

Yankee infielders play for every emergency you can think of. If it's the ninth inning, two out and a man on first, you'll see both the first and third basemen practically on the foul lines. They know that the worst thing that could happen would be one of those hard baseline drives that can score a man from first. So they crowd the foul lines. If the ball goes inside, they know it won't likely go for more than a single.

It's one of baseball's greatest thrills to see a good infield in action. That smooth work comes from practice. Hours of fielding the ball, in practicing footwork, throwing, thinking out plays.

Play the infield Yankee-style, and watch your own team begin to win.

He doesn't take time to straighten up; just whips the ball hard across his shoe laces to the first baseman. But you have to be good to do this.

tion to make a quick pivot and throw. Practice these three points until you do them without thinking, and you'll soon see how you've improved.

Now here are Dressen's rules on footwork: If a grounder is to your right, slide to meet it. *Don't run, don't cross your legs.* By sliding you're in position to throw, and it keeps you from tripping.

If the ball is hit to your left, run to meet it—*don't slide.* Why run? Instead of slide? Running to the left helps you bend over to reach the ball, and it faces you toward first where you throw most.

If the grounder is head on, come in to meet it. The infielder who waits gives the runner a chance to beat the throw.

And how about throwing? There are some tricks to that, too. The second a grounder plunks into Dressen's glove, he's turning it around to get his fingers across a seam. And as you watch him, he seems to field the ball and bring his arms back across his right side in one motion.

All Yankee infielders have that same time-saving rhythmic gracefulness. They carry their arms back and whip that ball to first in one sweep—underhand if there's no time to spare, overhand if there's time.

For the third baseman the hardest throw of all is fielding a bunt. He must scoop the ball up with his bare hand and whip it across his shoe-taps to first. A throw like this is bound to curve, so Dressen allows for it. He aims about six feet to the left of first base. With practice you can find your own aiming spot.

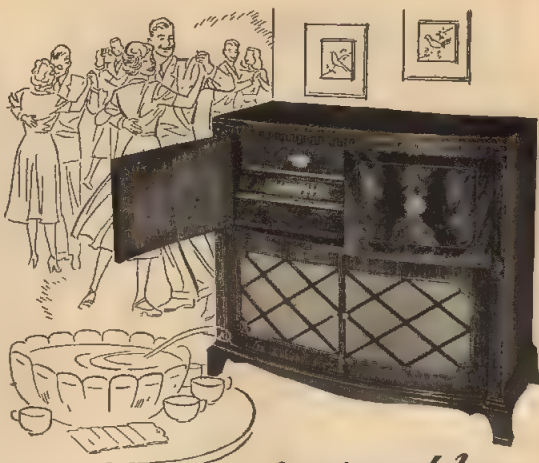

Another type of throw, the snap throw, is used when you have a runner trapped between bases. In this throw your hand goes back no further than your shoulder. It's the same peg a catcher uses.

Dressen says the big thing about going after a trapped runner is to hang onto the ball. The more throws you make, the greater the chance of a fumble.

If you're closest to the runner,

Dressen shows how a third baseman picks up a bunt with his bare hand. He's all ready to throw. No time wasted in shifting ball.

"Master Models on Parade."

CLEVELAND ANNOUNCES NEW SERIES MODELS

For well over a quarter of a century, the Cleveland Model & Supply Company of 4305 Lorain Avenue, Cleveland 2, Ohio, has built up a reputation for super detailed, authenticity and quality in model airplane kits second to none anywhere. Directly in line with this reputation and with visions of a new day dawning on the model-building horizon in this air age with the thirteen million youngsters added to our population in recent years, they are presenting a series of $\frac{3}{8}$ " scale flying Master or "M" models which they state combines their best efforts in designing with a new low in price, as judged by today's price standards. These kits are a direct outgrowth of their well

known $\frac{3}{8}$ " scale flying "SF" series, which has always been their finest line. The "M" continue undiminished in the tradition of the finest designs, the most complete plans and the best of select materials. They claim they have done this without sacrificing one iota of the former high standing their "SF" models established throughout the model-building world. The manufacturer's claim one great feature of this new line of "M" models is the variety of planes to be introduced constantly by keeping a current analysis of what the modeling public specifically wants. They will then manufacture the very models that are the most popular. These consequently prove "best sellers." The first six models making their debut in this series will attest this.

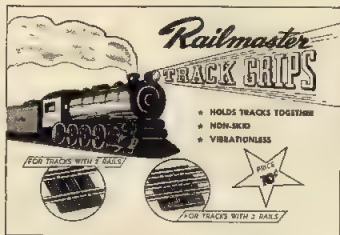

These new models are: Bayle's Gee-Bee—the 1931 Thompson Trophy winning race plane of "flying milk bottle" shape, the race plane which perhaps excited more curiosity and stimulated more interest in airplane racing than any other single craft (\$1.75); the Fokker D-7—the staple biplane fighter of the German Imperial Air Service during the first World War, the craft that is the traditional "enemy" plane of a generation of modelers (\$1.75); the Ryan Navion, a modern sleek low-

wing executive plane (\$1.75) the Lockheed P-80 "Shooting Star"—the ultra-modern jet wonder that is a standard U. S. Force fighter today, inheriting the grand tradition of United States leadership in air power (\$2.75); the Republic "Sea Bee"—a unique but very popular amphibian multi purpose private and executive aircraft (\$2.25); and the Beechcraft "Bonanza"—the low-wing private plane that pioneered the use of the "V" or "Butterfly" tail, which is now increasingly common among many types of aircraft (\$1.50).

Jet models are equally versatile when it comes to flying, as they will be suitable for whip-control, "Jetex" power (the brand-new non-combustion ultra small English made model jet motor, to be available soon) C-O-2 jet power and for tow line glider flying.

The Cleveland Model & Supply Company state their emphasis has always been on quality, but that they are continually striving for simplicity in building—not the "simplicity" that marks a hurry-up job of designing, but the simplicity that results from sound engineering and the knowledge and continuous experience in designing a product—the oldest "same management" model airplane kit manufacturers in the world—for they've been at it "Since 1919"

SUCCESS WITHOUT A PLAN

"DON'T ASK ME HOW I increase my business," said W. R. Eastman, genial proprietor of a successful hobby shop within the shadow of a big motion picture theatre in Fresno, Calif. "I have no plans. I don't advertise—I don't find it necessary. I don't even have a sign over my shop. That isn't necessary either. I just like people—adults and youngsters both—and try to be friendly with them. I try to have whatever they want in the way of parts and accessories for any kind of models they are building. If I don't have it, I get it for them. But they don't have to wait a second time, as I see to it that that particular item is added to my stock."

A look around the little shop bears out his statement, for its shelves are crammed from floor to ceiling with hundreds of items demanded by the various

hobbyists. But while Mr. Eastman may have no "plan", certain things have contributed to his outstanding success. Location has much to do with it, as do his window displays. These displays are not spectacular, but in the windows are shown all the accessories needed to complete a model of any description. Sometimes an aeroplane will be featured; at others a train; while boats and other models receive their due need of window publicity. Thus all people, both men and boys, passing the shop on the way to the theatre in the afternoon or evening see anything they may need for their favorite hobby. Youngsters in particular, waiting for parents or companions while away the time watching the trains and planes; and men waiting for a mother to make her appearance (was there ever a woman who was on

time?) see all the accessories for the trains system in which they are interested.

The store is open all day and every evening, so it is easy for people to drop in to consult him regarding their model-building problems. And he is so genuinely interested in helping them that they come again and again. And they nearly always buy something. It is this constant procession of model builders that has upped his stock to the \$5,000 level, with at least a three-times turnover.

No toys are handled, but a wide selection of magazines is carried, as well as gum and candy bars, and it is these lines that often induce the first visit to the store. When he sees the big stock of models—parts and accessories—carried, notes the lofty shelves filled with them, he gets the idea that this is a pretty good place at which to trade.

"I don't want to get rich," said Mr. Eastman. "The shop gives me a good living. I like to help people in building their trains and boats and planes because it is something in which I myself am interested. And they seem to like me, for they keep coming again and again and bringing other hobbyists with them. So we have a good time together and the business shows an increase each year."

LIONEL ELECTRIC TRAINS

"027" GAUGE

The letter "O" in "027" designates the gauge of track on which these trains run; "27" indicates that the smallest possible circle made with curved track sections measure 27 inches from the outer extremities of the ties. One section of "027" gauge curved track is $9\frac{1}{2}$ inches. Height of track, including rails and ties is $\frac{1}{2}$ inches.

Passenger Train with Smoke and Whistle; "027" Gauge

A perfectly created train hailed by real railroad men as one of the finest models in the world. The steam type locomotive puffs clean, white smoke and blows a two-toned, built-in whistle. Fast, powerful and realistic.

LIONEL ELECTRIC TRAINS

"O" GAUGE

"O" gauge track measures $1\frac{1}{4}$ inches between running rails—the diameter of a loop of such track is 31 inches, measured from the outer extremities of the ties. Since the gauge of real railroad track in America is $56\frac{1}{2}$ inches, "O" gauge is hence approximately one forty-eighth actual size. Height of the rail and ties are $\frac{1}{16}$ inch.

**Passenger Train with Smoke and Whistle; "O" Gauge**

Completely authentic and perfectly scale detailed, this three car passenger train includes a Pennsylvania Railroad steam type locomotive that puffs real smoke and blows a life-like two-toned whistle. Illuminated Pullman cars are masterpieces of realism.

Outfit consists of No. 726 steam type Locomotive with smoke, No. 2426W Tender with whistle, No. 2625 'Irvington' Pullman, No. 2627 'Madison' Pullman, No. 2628 'Manhattan' Pullman, eight sections OC Curved track, seven sections OS Straight track, one RCS remote control track section, one CTC Lockon, one package of SP smoke pellets, one tube of Lionel Lubricant and instruction booklet.

Fli-Back Paddle.

the paddle by a natural rubber thread. These paddles are sanded top and bottom and edges are smooth to play with. One of the better low priced action toys it has — universal appeal to young and old — year round play value. Used exclusively by Randy Brown, the world's champion paddle ball player. Retail price 25c. Each $\frac{1}{2}$ dozen tied and wrapped in heavy paper prompt shipment. Paddle length $1\frac{1}{4}$ " — width $5\frac{1}{4}$ " — thickness $\frac{1}{8}$ ". Manufactured by the Fli Back Company, High Point, N. C.

L. A. RAMS FOOTBALL GAME

Zondine's new L. A. Rams Football, named after and sponsored by the famous professional team of the same name, already has proved a big hit both with kids and adults because it takes them from the grandstand right down to the strategy of the playing field. They call the signals—both offensively and defensively—and smart quarterbacking wins or loses the game. There's no dial spinning or dice throwing to determine the plays—they pick them. According to Zondine, this new game is the closest approach yet to the thrills and excitement of America's great gridiron sport.

Proof of the game's realistic entertainment value lies in its sponsorship and promotion by the Los Angeles Rams, one of the Nation's leading professional teams. This nationally famous team, boasting such gridiron greats as "Bullet Bob" Waterfield and "Kingfish" Kenney Washington, will feature Zondine's L. A. Rams Football in their radio and season's promotion activity. Recently, at a gettogether of some of football's highest paid professional stars, the game was given the "acid test" by "Slinging Sammy" Baugh, Bill Dudley, Charlie Trippi, Jack Jacobs, Paul Governali and other men who really know football best.

Because it is not a game of chance, the skill and strategy of the rival quarterbacks determines the outcome of every play and measures the final score of the game. When running the offense, the player can send his fullback crashing through the line, call for a jump pass over the line, shoot for a long, fifty yard touchdown pass, or run any of the regular plays which are part of a quarterback's bag of tricks. On the other hand, there are hundreds of defensive combinations he can use in his set-up to stop his opponent. His selection of plays determines the result of each play,

and consumes a prescribed amount of game time. The number of minutes remaining in the game is recorded on a time clock dial. The game board consists of a colorful playing field, $11\frac{1}{2}$ " x 20", football marker, yard marker, time clock dial, and pointers for recording the progress of

downs. Special playing cards are used to set up offensive and defensive plays. L. A. Rams Football retails at \$2.00 and is attractively packaged in a striking four-color display box. Manufactured and distributed by the Zondine Game Company, 1041 Mansfield, Hollywood 38, California.

Zondine's new football game is put to the test by some men who really know football best. Front row, left to right: Bob Waterfield, L. A. Rams; Bill Dudley, Detroit Lions; Johnny Clements, Pittsburgh Steelers; Sammy Baugh, Washington Redskins. Back row: Boley Danciewicz, Boston; Jack Jacobs, Green Bay Packers; Paul Christman, Chicago Cards; Paul Governali, New York Giants; and Charlie Trippi, Chicago Cards. Representing a half million dollars' worth of football talent, these stars are participating in Columbia's pigskin epic, "Triple Threat."

HOW TO FIGURE HAY TOOL JOBS LOUDEN

HAY TOOLS REQUIRED FOR AN END HOIST BARN

BARN 250' LONG

End Hoist Barn

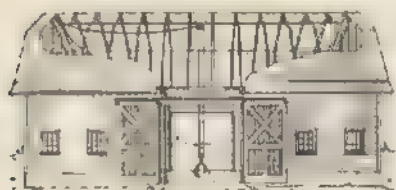

Equipment needed—One fork-car or sling-car; one hay fork or hay sling; No. 571 track to run within 2 ft. from closed end of mow to 4 or 6 ft. beyond hay door.

Space rafter brackets No. 424 every two feet and ridge pole brackets No. 495 or No. 1308 as needed. Use track hanger No. 498 except where longer hangers are needed; link hangers No. 1006 available in odd lengths from 5 to 37 inches

Other Equipment needed—One rafter hook No. 390; one floor hook No. 298; one bracket pulley No. 3034 and two knot passing pulleys

Rope required—1 times length of barn plus $\frac{1}{2}$ width plus 10 ft. for hitch. If draft rope is to extend from hay door end of barn add additional length of barn to rope.

HAY TOOLS REQUIRED FOR CENTER HOIST BARN

BARN 100' LONG

Center Hoist Barn

Equipment needed—One fork-car or sling-car; one hay fork or sling; No. 571 track to run within 2 ft. from each end of barn. Space rafter brackets No. 424 and track hangers No. 498 every two feet. Two rafter hooks No. 390; two floor hooks No. 389; two bracket pulleys No. 3034; two knot passing pulleys.

Rope required— $\frac{1}{2}$ width of barn plus 1 times length of barn plus 3 times height of barn plus 10 ft. for hitch.

HAY CARRIERS LOUDEN SENIOR

Rope Draft

Recommended for use with iron claw fork.

Reversible car that can be turned around without removing from track.

Certified malleable iron frame. Large 7 in. roller bearing gray iron rope wheels. Long wheel base evenly distributes the weight on track making it easy to return carrier. Swivel prevents rope from kinking and twisting. Carrier hay fork within 20 in. of track.

$\frac{3}{4}$ or $\frac{1}{2}$ in. manila draft rope is recommended

One fork pulley, one trip block, 2 end stops and one built-in rope swivel is furnished with each carrier.

Each

No. 1100—3 in. diameter track wheels; axles 15 in. apart on center; wt. each 35 lbs.\$20.95

Each of these 6 ball sets includes a substantial rack in natural wood finish, requested for durability. Each set packed in a sturdy shipping carton.

\$10.25

No. 34M338—Rademaker "Special" Croquet Set. Compact 4 ball croquet set, in portable fiber carrying case. Ideal for parties, the beach and other summer outings. All wood parts are varnished and have vivid colored stripes, distinguishing each pair of mallets and balls. Rock maple balls with 3½" diameter, 8" mallet heads, 24" handles, hardwood stakes and durable wire wickets are included in this Rademaker set.

\$4.15

Sales Boosters In Joke Novelties

No. 124M41—Tooth Black Anyone can have fun with this clever joke novelty. An easily applied wax, it is used for blacking out teeth. If applied on the whole tooth it gives the appearance of a missing tooth, or it can be applied to part of the tooth to make it appear broken. Safe, sanitary and harmless. Put up in round tin boxes with simple directions.

Per dozen

70¢

No. 124M42—Whoopie Cushion Greatest funmaker and laugh producer ever offered. Made of fine quality, fresh latex rubber, in assorted colors, with suitable inscription. When slightly inflated and placed beneath a cushion, pillow or chair pad, it makes that embarrassing "funny sound" when someone sits upon it. Diameter, 11 inches. Put up one dozen in an envelope.

Per dozen . . .

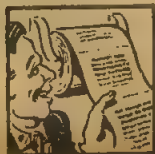

\$3.00

No. 124M43—Miss Lola. A snappy new novelty with a lot of zip and bang. Consists of a strong durable card-board envelope with alluring teasing bubble dancer illustration. Protruding from the envelope is a pair of curvy shapely legs. Get some victim to pull the legs out of the envelope and he'll get his fingers whacked by a powerful little spring.

Per dozen

90¢

No. 124M44—Laugh Tissue. Consists of a regular roll of Toilet Tissue but is printed with a series of the most comical reading matter. Supplied with assorted printing.

Per dozen

\$1.15

Harmless Pranks

Pee-Wee VIEW FINDER

No. 124M44—Pee Wee Viewer. A new terrific laugh novelty. Presents a gorgeous, full color display of femininity to the victim, then a sudden spray of water squirts with one easy flicking. Mechanically perfect—contains powerful magnifying lens. Made of red plastic body and plated metal fittings. Fits in vest pocket. Size 1 1/2 x 1 1/4 inches.

Each

50¢

Per dozen **\$5.00**

No. 124M45—Laughing Mirror. Here's a trick gadget that is positive to keep the folks amused. Hand size, it is convex in design. Turn it one way, and the image is elongated high-domed. Then switch it around and the reflection broadens out, becomes pumpkin shaped. A bonus to any gathering where mirth and merriment is the keynote.

Per dozen

\$2.75

No. 124M46—Vibrating Cigarette Package. This is a new joke in the trick gadget line. Looks just like a real pack of cigarettes, but the inside contains a mechanism that you wind up with the key furnished with each pack. Hand it to the person who asks for a cigarette, or leave on a table or shelf for someone to pick up, and the mechanism immediately begins to vibrate, causing the package to shake and quiver and emit a whirring noise.

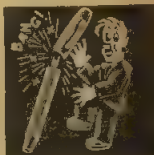

Per dozen

\$5.00

No. 124M47—Vibrating Match Box. Similar to above, but simulated box of matches rather than cigarette pack.

Per dozen

\$4.50

No. 124M48—Exploding Pen. Everyone will want to carry one of these intriguing novelty pens in the same pocket with his regular writing utensils. Looks like the real thing, but when cap is unscrewed, a concealed mechanism causes off an explosive cap. The resilient Bang! is assured of achieving results that are both hilarious and unexpected.

Per dozen

\$5.50

No. 124M49—Trick Gum. Looks just like a package of Spearmint gum. Offer it to a friend and watch the expression on his face when he selects a stick. Snappy spring placed on the one piece that is removable, immediately clamps down on his finger. The surprise is unexpected and hilarious.

Per dozen

\$1.50

DOEPKE WINS ANOTHER AWARD

One of the most "awarded" companies in the toy industry is The Charles Wm. Doepke Manufacturing Company of Ross-movne (Cincinnati), Ohio. Recently this company's line of Model Toys received a Certificate of Award from Parents Magazine as well as one of the coveted "A" medals of Merit from the Consumer Toy Show, sponsored by the Museum of Science and Industry at Radio City New York. They are very proud of another kind of "award," received when New York's famed S. V. O. Schwartz turned over its window space to Doepke Model Toys. A recent entrant into the toy manufacturing field, and a member of the Toy Manufacturer's Association, the Doepke line is painstakingly modeled from full size trucks and heavy machinery. Current numbers in the line enjoying immense popularity are a Model Earth Hauler, a Model Bucket Loader, and a Model Concrete Mixer. A new number is scheduled to appear early in 1948. Merchandising plans of the Doepke Company will make provision for a combination package consisting of two bucket loaders, two concrete mixers, and one dump truck. Each introductory package will contain an attractive display card for point of impact. Not only will this package be of use at the retailer's counter and dealer, but more attractive trade discounts are also planned. To assure delivery on all models by February the trade is urged to order now.

OLYMPIC SPORTING GOODS' FOOTBALL OUTFIT

Hy Ullman, Olympic Sporting Goods Company, 598 Broadway, New York 12, says that their three-piece football outfit has been proving to be a highly successful promotional item. Says Mr. Ullman, "We believe that every buyer is today looking for the utmost in quality and price. With this in mind we designed a special three-piece football outfit consisting of football pants, jersey and set of emblems that will be retailed at \$3.98. This 'Olympic' special lost no time in taking hold and thousands were sold throughout the country by leading department stores." Mr. Ullman, son of Hy, who is in charge of sales, states that their firm is now displaying a new football prices professional and juvenile baseball line at their permanent showroom. He describes it as an outstanding value consisting of a junior baseball suit combination including baseball suit and bat and glove individually boxed at an attractive price.

PLAYSKOOL FACTORY ENLARGED

A new addition of 10,000 sq. ft. to the second since the war is announced by the Playskool Manufacturing Company of Chicago, makers of the nationally advertised line of Playskool Educational Toys. This gives the large, modern factory of Playskool a total of 85,000 sq. ft. In addition in the past few months over \$50,000 worth of new equipment have been added to the manufacturing facilities of Playskool so that this company is now in a position to turn out the largest volume of educational toys in its history.

YOU BET! It's one of the new Lyman Outboard Runabouts, Clinker-built for better performance and longer life. Balanced design for greater seaworthiness — exceptional beam and depth for extra safety and roominess, priced to make them the outstanding values in the outboard field.

Outboard Runabouts available in 13- and 18-ft. sizes. Also the "Ideal," a dual purpose combination rowing and outboard boat; and a new 13-footer designed for use with motors up to 10 h.p.

The 18-ft. "Islander"

A medium speed inboard, designed primarily for fishing and trolling and for family use where high speed is not essential. A husky able, sea boat, perfect for open water use.

Write for literature and the name of your nearest Lyman dealer.

LYMAN BOAT WORKS 1615 FIRST STREET SANDUSKY, OHIO

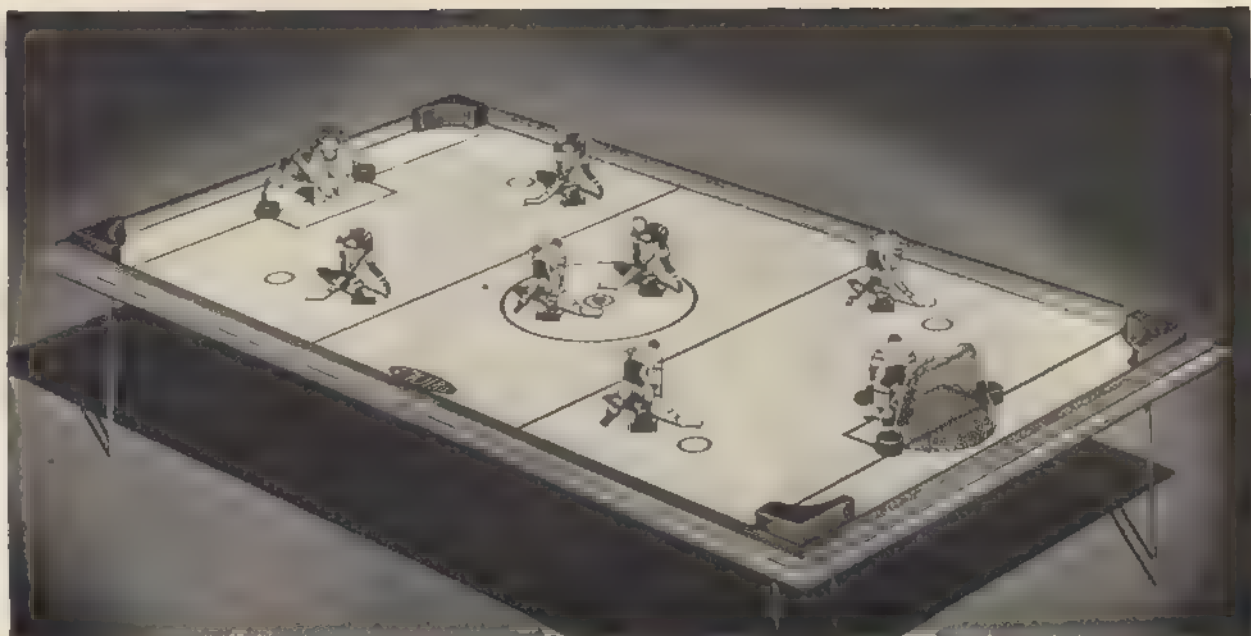

Among the newer predicted log races in the East is the one sponsored by the Bayside Squadron for the Dreher Trophy, presented by Walter F. Dreher and placed in competition for the first time this year. A feature of this race was the participation of four sailormen who gave up sails for their gasoline auxiliaries for the contest. First place went to Arthur Johnson's *Deon III*, closely followed by Walter Juettnier with his new flush-decked 30' auxiliary sloop *Norseman*.

Turning to the Pacific Coast, where predicted log races were popular for years before the USPS had any local squadrons out there, we find that the 150-mile ocean race for the coveted James Crag Trophy, which was donated by the A.P.B.A. for this event sponsored by the Long Beach and the Coronado Yacht Clubs, was won again this year by Frank C. Ruppert of the Los Angeles Squadron. The word "again" is used advisedly because Ruppert won the trophy in 1941 only to be disqualified when it was found that his *Reveller* measured two feet less than the minimum established by the deed of gift. *Reveller II* is two feet over the 30' minimum. However, "again" is still correct in the letter as well as the spirit because the Los Angeles Squadron won last year through the navigation of Don A. Allison. N. Los Angeles Squadron was "again" in the news when member Paul R. Williams, AP, won the Isham Perpetual Trophy Race with his 33' cruiser *Lazy Daze* in the race from Los Angeles Harbor to Port Hueneme to Santa Barbara.

Farther up the coast, Past Commander Clarence A. Gilmer, of Portland (Ore.), donated a beautiful trophy which was placed in competition for the first time this year as the prize in a predicted log race held on October 12th. Winner of this first contest was *Crystal R*, owned and piloted by Bill Ruepell. Another new trophy on the Pacific Coast is the one provided by the Seattle Squadron in memory of its beloved Commander Leonard P. Heath. Put in competition for the second time at the Labor Day rendezvous of the Seattle Squadron, it was won this year by Allen Alair aboard his cruiser *Sea Gypsy*.

Conditions in the immediate area of many a local squadron have been found unfavorable for the predicted log type of competition. Such was the case at Rochester where several attempts to hold such a race brought only one or two entries, largely because of the lack of interesting and available check points. But a new type of competition peculiar to and typical of the Power Squadrons was devised. It was called Navigational Manoeuvres and involved various problems whose solution depended upon ability to take accurate bearings, run accurate courses for accurate distances. The Rochester Trophy for such contests was put up by the Rochester Squadron in 1940 and since then has been won by Rochester on a team basis in 1940 and 1941. Revived again after the war, for the last two years competition has been won by Lockport. About the same time the same ideas occurred to some of the Squadrons of the 5th District with the result that the Patapsco River Squadron established a trophy for an annual Navigators' Cruise. Last year the contest was held on June 7th, Phil Gooding winning the main event and Marvin Stang winning in the novice group. Incidentally, in the crew of the latter's new *Little Bob* was Marvin's wife Iena and Miss Frances Kretsinger, both of whom are USPS certificate holders with the rating of "N." A similar contest is held each year in Detroit for the Chief Commander's Trophy presented by Past Chief Commander William K. Anderson. Winner of this event last August 9th was Richard C. Mertz in his 35' *Lady Jane*.

The log book of the USPS for 1947 cannot be closed without calling attention to one last entry of which we are justly proud. Last autumn southern Florida was hit not by one but by three severe tropical hurricanes. During the first one on September 17th, Commander Chester Bentley of the Fort Lauderdale Squadron kept an accurate log and has written a helpful description of a hurricane and what to do about it as he rode out the storm safely aboard his cruiser *Southward Ho* which he had taken up to the narrow headwaters of New River for the purpose. On October 11th, the Fort Lauderdale area was hit

MAGNETIC ACTION ICE HOCKEY GAME

Introducing a fast-action magnetic hockey game for two or four players. The men of opposing red and blue teams, moved by Magnetic Remote Control, skate rapidly over the ice, following the moveable puck to score goals as in real hockey.

We also manufacture these Magnetic Action Toys, patented in U. S. A. and Canada

"A JURO PRODUCT . . .

A JOY FOR CHILDREN!"

THEY'VE
AMAZED
EVEN US!

. . . the overwhelming acceptance this colorful pair of ANIMATED CLOWNS, the newest additions to the popular "PLAY-MATE" line, has found in buying offices throughout the country.

THESE GREAT, BIG (18"), BEAUTIFUL DOLLS are dressed gaily in the finest materials, and have bells that jingle-jangle when the arms and legs are activated with the PATENTED pull-string, which makes them the delight of young and old.

Our pair of clowns are but two of the PROFIT-MAKING TEAM you are invited to inspect in Room 923 of the HOTEL McALPIN. An extensive promotion and advertising campaign, including radio publicity on 38 stations, helps sell these dolls to your customers before they reach your counters.

JURO NOVELTY COMPANY

12 West 18th Street, New York City - SHOWROOM: Room 354, 200 Fifth Avenue

**MECHNER & CAMINITI REPRESENT
BARCLAY CREATIONS**

Barclay Creations, 36 South State Street, Chicago, the home of Fairy Lane and Arcadia Dolls, announce that Mechner & Caminiti, 200 Fifth Avenue, New York, have been appointed Eastern Sales Representatives. Buyers visiting the Fifth Avenue Building will find Fairy Lane and Arcadia Dolls on permanent display in Room 455.

For 1948, Barclay Creations have succeeded in designing an entirely new series of character dolls and have boxed them in an unusual manner. The dolls which will make their debut at the Toy Fair will be known as "The Original State Dolls of

the U. S. A." Each doll is dressed in its authentic state colors. The bodies are of plastic, insuring sturdy construction and life-like qualities.

In addition to the creation of the entirely new characters in this line, the Barclay Creations firm feel that they have introduced a refreshing touch of originality in doll packaging, and it is unnecessary for the dealer to remove the doll from the box in order to display it, as each container has a window top.

It is anticipated that doll collectors throughout the country will not only want a doll representing the state in which she was born but dolls from those states she visits.

Old favorites in new dress.

Loader Model 47 LM

SUPER SIX Junior Mechanical TOY TRACTOR and LOADER

An ideal summer toy for the sandbox or at the beach, Super Six Junior performs a variety of play tasks outdoors and in. Fully mechanical—operates with push-pull windup. Scoops up, carries and dumps all kinds of small toys—three distinct operations. Super Six Junior is an actual working scale model of the big tractor-mounted Super Six Loader used on the farm. Helps to develop child's mechanical skill and understanding.

Super Six Junior is built to withstand hard play. Heavy duty all metal construction, mounted on sturdy rubber tires. Size with loader at carry level: 13 inches long, 6 inches high, 5½ inches wide. Tractor length: 8¾ inches. Available in two models as shown. Standard packaging—12 to the carton.

NEW ED-U-CARD PACKAGES

To give the retailer a higher unit sale, Ed-U-Cards has just announced two new packages, each containing 2 of their colorful children's educational card games. These packages sell for 59c each, have eye-appeal and make an attractive kiddie gift item in the low-priced bracket. Each package is labeled with the age group recommended for the games, making it easier for the sales clerk to sell and the customer to buy. One set is for ages 3 to 8 and the other for ages 5 to 10. These new packages and the complete Ed-U-Card line, including a new idea in games for the very young, called a "Game-on-a-Chain" can be seen during the Toy Fair at the Hotel McAlpin, Room 1069, and 200 Fifth Ave., Chas. H. Carroll, Room 351.

ADVERTISING COURSES

Two new courses in advertising, one dealing with operation and procedure and the other covering advertising production, are being offered by Southern Methodist University, Dallas, in co-operation with the Dallas Advertising League.

Ira E. DeJernett, president of DeJernett Advertising Agency and governor of the 10th District, Advertising Federation of America, teaches the class in operation and procedure, while Dave McDonnell, account executive of Rogers & Smith Advertising Agency, teaches the class in advertising production.

A course in advertising copywriting offered by SMU last semester is being repeated with Nathe P. Bagby, executive vice-president of Leche & Leche, as teacher.

NEW ADVERTISING MANAGER

The appointment of Mrs. Lois Hale as advertising manager of W. A. Green Co. has been announced by Holmes Green, secretary-treasurer. She succeeds Roy E. Kyle, who had held the position since 1923 and who resigned effective Jan. 1 to join the Ferguson Advertising Agency as account executive.

Mrs. Hale has been associated with W. A. Green since 1933 and immediately preceding her promotion had served as assistant advertising manager. Starting in the mail order department, she later became the store's personal shopper. For a brief time she left Greens to be in the advertising department of Sears, Roebuck. She is a native Texan, a member of the Dallas Advertising League and the Dallas Business and Professional Women's Club.

Here Comes
The BRIDE...

And The
BRIDESMAID...

So
LOVABLE
So
REMARKABLE

So SELLABLE!

You'll simply fall in love
with these "lovelies"—designed for top
"sales appeal" by MAJESTIC.

We predict everyone, everywhere, will go head-over-heels over these exquisite dolls—only two of the many sales "pace-setters" in the new MAJESTIC line. Sell them individually . . . sell them together as a 2-in-1 package . . . sell them all year 'round for the greatest toy profits of your life!

BRIDE DOLL, No. 666 Fully 18" tall, all composition, a creation of artists, with realistic features throughout! Head, arms, and legs that can move and be adjusted to the cutest positions. Sleeping eyes, sparkling white, set-in teeth, and neatly curled, soft, honey-colored hair crowned by a sweeping white veil. Coloring that's rich and flesh-like. And she's draped in a flowing bridal gown of rich white satin and lace, with a tailored slip and panties underneath, dainty pumps and stockings on her feet . . . all removable. Truly a typical MAJESTIC creation, individually boxed and priced for quick sales at \$72 dozen.

BRIDESMAID DOLL, No. 665 Also 18" tall, and lovely with her movable head, arms and legs, sleeping eyes, and white set-in teeth sparkling against her ruby-red lips, and fine pink face. Her soft, carefully curled hair has flowers in it for the occasion, and on her head she wears a lace-trimmed picture hat made of the same maine taffeta as her sweeping bridesmaid's dress. Her dress itself has a full skirt, big puffed sleeves, and a smart trim of warm black velvet. Underneath, she's fully clothed in removable, tailored slip and panties; her feet in white pumps and stockings. This fine example of MAJESTIC's distinctive art is individually boxed and priced for rapid profits at \$72 dozen.

The retail price is \$2.00

Stake body truck

MOTORS GUARANTEED FOR LIFE

So enthusiastic have buyers been over the sales and merchandising power of motors guaranteed for life that their response has been instantaneous and the Courtland Manufacturing Company factory has been working day and night turning out orders and repeats.

Also, for the first time, buyers are not getting returns on sales. A written guarantee in each individually boxed toy states that the motor can be returned to the factory should it ever cease to operate in a satisfactory manner. The consumer deals directly with Courtland Mfg Co., not with the store where it was purchased.

Parents Magazine gave Walt Reach trucks an illustrated write-up in July. Parents Magazine said:

"The bright colors and lifelike look of this gasoline truck (one of the numbers featured) will delight the child who winds it up and sends it speedily on its way. No worries about motor trouble; mechanism is guaranteed, will be replaced or repaired

for 25 cents which covers shipping charges. Truck is made of steel and aluminum, has rubber wheels. \$1.25 in stores. . ."

Publicity is expected on these numbers in *Mechanics Illustrated* and *Popular Mechanics* in the Christmas issues.

The article in *Parents Magazine* has caused many mothers to write direct for the trucks and many dealers claim that parents have come to their stores asking for the Walt Reach trucks with motors guaranteed for life which they saw in the magazine. According to Walt Reach, president of Courtland Mfg. Co., the acceptance of parents and magazines of motors guaranteed for life is proof of the good judgment of toy buyers who have placed orders for these numbers. Walt Reach toys with

Motor is easily removed

guaranteed lifetime motors are on display at 108 Breslin Toy Circle, 1186 Broadway, New York City

FIRE CHIEF HAT

The Fire Chief Hat, which is almost an exact copy of the real thing, continues to be a favorite of children at toy, novelty and variety store counters throughout the country. It is made of molded fibre. It's extremely durable and water repellant. Finished in bright red, it fits all children's heads. Suggested retail price 59c. Packed 3 dozen to a carton. Weight 10 lbs. gross. Irving L. Hartman Co., 62 West 39th St., New York 18, N. Y., manufacturers of the Fire Chief Hat is in a position to make speedy shipments, regardless of quantity.

For junior fireman

Transplastic's inflated magnetic fish have year round play value

"ITTY BITTY" FISHING GAME

Five gaily colored, permanently inflated plastic fish, fishing pole and line with a magnet for the "hook"—catches fish by their metal noses. Color-fast Vinylite plastic—equally at home in tub or at a table. Set complete, in attractive display box retails at \$1.00. Transplastic Mfg. Co., Inc., 109 West 24th St., New York 11.

Majestic introduces "Sweetie" No. 672 in their "Feature" line

"SWEETIE" DOLL BY MAJESTIC

No 672 in the "Feature" line is "Sweetie," a lovely 16" composition doll with moveable head, arms and legs. She has a bright face with sleeping eyes, set-in teeth and a very pretty hair-do. She's dressed in a cute, crisp custom-featured pinafore of checked rayon taffeta in choice colors, plus lace-trimmed blouse and panties, and laced shoes and stockings. To retail from \$5.95 "Sweetie" is manufactured by the Majestic Doll & Toy Corp., 737 Broadway, New York 3, N. Y.

World Hobby Exposition Crowded

One of the most reassuring proofs of growing hobby interest is the record-breaking attendance at the World Hobby Exposition which was held February 21 through 23 in the Coliseum, 1530 S. Wabash Avenue, Chicago. One hundred and thirty-nine exhibitors, ranging from manufacturers to distributors to large department stores and small dealers, not to mention the U. S. Army and Navy, displayed an estimated variety of five hundred different kinds of hobbies to a public which included young children as well as oldesters in obvious retirement.

Admission of one dollar for adults and sixty cents for children proved no obstacle to the fifteen to twenty thousand people who daily jammed the place on the opening week-end. Monday attendance benefited from Washington's birthday holiday which closed schools, numbers of business houses, and industries.

Show hours were wisely scheduled from 1:00 to 11:00 P.M. daily, with many special exhibits and events and with demonstrations run off at specified hours during the afternoons and evenings in the activities area, main hall, ballroom, and mezzanine.

Home workshop drills and other tools were juxtaposed to the newest in television receiving sets; weaving looms stood near model aircraft booths. Needlework vied with the latest editions of encyclopedias. Newest craft materials for plastic or leather work or wood sculpture were as crowd-drawing as the booth which urged the raising of chin-

chillas for fun and profit. Several camera and photographic equipment houses offered everything for the snapshot addicts and serious photo hobbyists as well as conducting a photo contest with live models and the screening of movies in the Revue Theatre, located in the ballroom. Model Railroaders had a heaven all their own in the Model Railroad Roundhouse set up in the South hall.

Race car speed contests and warm-ups of model plane engines for flight demonstrations brought the crowds on the run from every section of the Coliseum. The Signal Corps' dry ice seeding, comparable to actual recent experiments in man made snow, commanded more than passing interest from the spectators. The Corps' display of the Zeiss lens collection, conservatively valued at a million dollars and totaling nearly two thousand different types of lenses, aroused as much curiosity as the Navy's Pratt & Whitney engine on display in another part of the activities section.

Out in the main hall, the Cozzone model of the George Washington bridge in New York rivaled the B & O Model Train in the South hall for crowd admiration. Philatelists had their own gala show featuring rare stamps in hundreds of frames along the mezzanine walls and roamed the bourse tables to buy or trade, while lovers of excellent photographic prints enjoyed the First International Salon entries hung in another gallery on this floor.

Radio hams seemed to be as popular as the Navy's hometown newspaper service. The school-aged businessmen in the Junior Achievement booths drew admiring glances from many adults old enough to be their parents. The bus completely equipped as a machine and woodworking shop had a steady line of passers-through. Young and old sat down at chess boards to pit their skill against the experts on hand.

Several other booths participated on that natural crowd stopper, audience participation. One exhibit of a liquid plastic allowed passers-by to experiment with this comparatively new hobby material. A leather supply house hung hides in its space so that "customers" could feel the skins and admire the colors. A glass-blowing firm had hundreds of tiny glass animals and other objects on top of 11-play cabinets within close range of the curious. A lace making company had an instructor-demonstrator on hand to help any woman timid about trying so difficult an art as this.

One young boy suddenly snapped out of his intense absorption in an exhibit to nudge his companion and ask in alarm, "Say, where's my mother? She was here a minute ago!"

A minute? It had probably been an hour. For the crowds at the show completely lost track of time and forgot their everyday worries in one of the best of all possible escapes: hobbies.

Even the exhibitors seemed satisfied.

SALKIN & LINOFF ACQUIRE NEW STORE

Salkin & Linoff, Incorporated, owners and operators of thirty-six department stores throughout the Northwest, announce the completion of the remodeling program of their newly purchased department store in Thief River Falls, Minnesota.

Before being acquired by Salkin & Linoff, the store was operated by the Oen Mercantile Company, founded in 1889 by Rasmus Oen, father of Roy J. Oen, former president of the store. It was the oldest business firm operating in the city.

The new owners have made comprehensive changes in the store; among them, adding new departments and 4,875 square feet for soft lines alone. The entire building includes three selling floors, consisting of 31,500 square feet.

The departments covering women's apparel, shoes, millinery, infant's and girls' wear have all been enlarged. The entire second floor is now covered with 8,500 square feet of asphalt tile. Six new fitting rooms have been added to the downstairs store. New enclosed tables and glass show cases have been installed throughout the store.

Unusual improvement has been effected with the installation of fluorescent lighting in the recent remodeling.

Clarence R. Waldern, new manager of the store, has been with the Salkin & Linoff Company as manager of several of their stores since 1927 and left the company store at St. Cloud, Minnesota, to take over his present position.

The S & L Company was founded in Elkton, S. D., in 1921 by Samuel F. Salkin and J. L. Linoff. S & L Stores are now operating in Minnesota, North and South Dakota, Iowa, Montana, Wisconsin and Illinois.

Salkin & Linoff executive offices and warehouses are located at 400 First Avenue N., in Minneapolis. They own and operate their own buying office at 225 West 34th Street, New York City.

BASEBALL GAME PROMOTION AT LIT BROTHERS

Four major league ball players were in Lit Brothers' Toy Department all day Saturday, October 16, to autograph a new baseball game that is being sold exclusively in Philadelphia at Lit Brothers.

The unique "Autograph Baseball Game" has the autographs of 36 major league stars around the borders of its green Masonite playing field. Every play in the big league game is possible in this "Autograph Baseball Game" and each play happens in just about the right percentage of cases. Scores come out surprisingly close to actual ball-game scores.

Players who were in Lit Brothers' Toy Department Saturday, October 16, to add another personal autograph or two to the game for baseball fans were: Early Wynn of the Washington Senators; Bill McCahan, Philadelphia Athletics; Dell Ennis, Philadelphia Phillies, and Micky Harris, Boston Red Sox.

Among the home run kings whose autographs appear on this game are "Hank" Sauer, Cincinnati Reds, and Vern Stephens,

Boston Red Sox; famous pitchers, Harry "The Cat" Brecheen, St. Louis Cardinals, and Ralph Branca, Brooklyn Dodgers; great outfielders, Eros "Country" Slaughter, St. Louis Cardinals, and Grant Mitchell, Cleveland Indians, as well as other big league stars.

The game is being sold in Lit Brothers' Magic Lady Toyland, third floor.

Brass and aluminum cannon

AUTHENTIC CANNON BY MALATOY

Machined from solid brass and aluminum this sturdy authentic cannon is the first of a series of lifetime toys to be manufactured by the Malatoy Co., 235 Indiana Ave., Youngstown, Ohio.

Master craftsmen designed and constructed the rugged toy to survive even the roughest handling. Breach loading, the cannon is capable of lobbing a pellet approximately 40 feet. The pellet has no penetrating force and will not injure or mar.

The eight-inch barrel and pedestal of the gun are solid brass finished in a gun metal. The air cylinder and handles of control wheels are natural brass. The slide channel is nickel plated with a satin finish. The turret yoke is bright copper. Control wheels and base are formed of solid aluminum. A rubber shoe fits around the base to prevent scratching and sliding.

The gun has a vertical elevation and a horizontal turret ratio of 45 degrees each. The barrel has a one-inch recoil, adding reality.

The excellent workmanship and quality materials make this item adaptable as a desk piece for father as well as a toy for a son.

The manufacturer announces that several ample pieces are now available for this Christmas and invites inquiries.

BUTLER BROTHERS APPOINTMENT

E. Tanner Johnson, Manager of the New York Buying Office, has been appointed Special Assistant to W. L. Smith, Vice President and Director of Merchandising of Butler Brothers. Mr. Johnson has been in charge of the New York Buying Office since early 1947. Prior to that he was connected with Montgomery Ward & Company for 19 years in various executive capacities.

Mr. Johnson will be located in Chicago and will assume his new position about October 4.

No matter what price-class washer you want

you get more for your money with Maytag!

Did you know that you can get a genuine Maytag for scarcely more than you'd pay for the lowest-priced washer on the market?

And did you know that Maytag prices have increased far less than those of washers in general? In fact, Maytag's percentage of increase is less than half as much as the average — comparing all today's washer prices with those of all washers in 1941.

You certainly know Maytag's reputation for quality and all 'round excellence... extra-fast, extra-efficient washing performance... the rugged dependability that's built into every part. These are some of the reasons more than five million Maytags have been sold — far more than any other washer.

And now you can start using a Maytag right away. If your dealer can't deliver your new Maytag immediately, ask about the Maytag Accommodation Plan, making a Maytag available for use in your home till your own arrives. For earliest possible delivery, order immediately; small down-payment and easy monthly terms. The Maytag Company, Newton, Iowa.

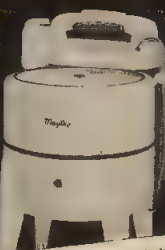

ASK ANY *Maytag* OWNER

THE MAYTAG MASTER — finest Maytag ever built — built all-time high in true washer value. An important feature is its huge square tub of heavy cast-iron and aluminum.

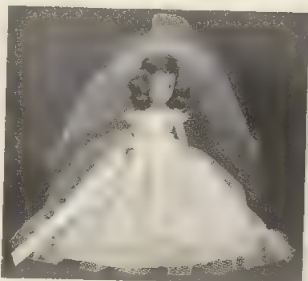

THE MAYTAG COMMANDER — Maytag's great washer in the medium-price field — has an extra-large, square tub of porcelain, famed for its capacity, speed and efficiency.

THE MAYTAG CHIEFTAIN — America's finest low-priced washer. A genuine Maytag in every respect. It gives you slightly more than the cost but, slightly more than the lowest-priced washer you can buy.

NEW TOYS ON PARADE

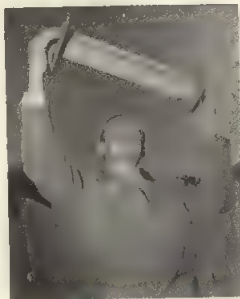

Wirlwing off to Flying Start!

Biggest news in kites since Benjamin Franklin is the new "Wirlwing" developed by inventor Jesse C. Donaldson. Manufactured by WIRLWING FLYERS, San Gabriel, California, this new kite that "spins on the wind—flies like an airplane" was first introduced in Life Magazine, December 8, 1947.

The new Wirlwing, sometimes described as "controllable flying discs" operates on a revolutionary new principle of aerodynamics. A center wing section (or airfoil) measuring 18 inches long by about 4 inches wide is suspended between two 8 inch diameter discs. The whole unit rotates on two bearings (one at each end) through which are run the guide wires controlling direction.

Complete assembly weighs approximately 3 ounces. Wing and discs are made of paper or paper products. The Wirlwing is sold knocked down, in kits containing all parts including cement for assembling and two 60-yard spools of control thread. Assembly usually takes 5 to 10 minutes.

In the air the Wirlwing performs aerial maneuvers similar to those of an airplane. Under complete control from the ground at all times, it is well adapted to dog fights, racing, landing contests, etc. Roadside demonstrations in and around Los Angeles have stopped traffic on more than one occasion.

Promotion, now under way, calls for radio and motion picture tie-ins, point-of-sale material and locally sponsored flying contests. Because of Wirlwing's unique features of maneuverability as opposed to the standard kite flying operation, it is expected that consumer demand will continue throughout the year in most areas.

Ny-Lint Lift Truck

Ny-Lint engineers have captured all the appeal and action of big lift trucks in their new mechanical toy. Just wind it up and off the truck goes to pick up its load, turn around, and bring back its burden to the starting point! Completely automatic, the Ny-Lint Lift Truck is so simply operated that children from six up can run it in a jiffy.

Although the smallest tykes may not have to know what makes it work, many an adult is curious. Actions of the truck are automatically controlled by a small, swivel-mounted guide wheel beneath the chassis. This wheel is governed by a double-cam mechanism which determines both straight-run and turnabout travel. The double cam also serves to actuate the raise-lower lever of the lift platform. A start-stop bar is located at the top rear of the body and a non-removable winding key is on the right hand side.

Precision-made, the one-piece, deep-drawn body, the lift platform, and the skid are of heavy-gauge metal. Wheels are rubber. Overall dimensions: 11" long x 4" x 4". The finish is red or green infra-red baked enamel. Manufactured by NY-LINT TOOL AND MANUFACTURING COMPANY, 1823 Sixteenth Ave., Rockford, Illinois, the lift truck retails for \$3.98. On display at the showroom of Hugh D. Kenney, 1443 Merchandise Mart, Chicago 54, Ill.

Kiddies Love Mechanical Toys

No. 3A21—Tailspin Pup. Tail spins—pup performs in 3 different positions. Sturdy all-metal construction. Hithersubbed in 3 colors. Clockwork motor with machine cut gears. Detachable key. Size 4 inches long, 3 inches high. Attractively packaged in individual multi-color box
Per dozen **\$3.20**

No. 3A4—Jungle Pete Mechanical Alligator. Startling life-like all metal representation of a large alligator. Jungle Pete snaps his jaws as he crawls along. Works on sturdy mechanical spring action that is durably constructed for long usage. Beautifully finished in green, brown and yellow with touches of red to resemble the real thing. He is bound to delight every youngster. Overall size of toy, 18 inches long. Individually packaged in decorated carton depicting jungle scene.
Each **75¢** Per dozen **\$8.25**

It's new ...it's magnetic!

Magic Mary

the doll that
CLOTHES "CLING TO!"

NO TABS . . . NO GLUE . . . NO MUSS . . .
NO FUSS. The "New Look" dresses of Magic
Mary are held securely in proper position by
tiny metal tabs applied to each dress and at-
tracted by the small magnet in the paper doll.
Children thrill to this new MILTON BRAD-
LEY "box office" champion with the magnetic
personality.

A PROSPEROUS NEW YEAR A *Model* NEW YEAR!

HERE'S THE INSIDE DOPE ON *model* MERCHANDISING PLANS

a Christmas present of increased sales and higher profits which you'll enjoy all through 1948!

BIG SALES COME IN SMALL PACKAGES. First of the items in the Model Merchandising Plan is a package deal consisting of two Model Bucket Loaders, two Model Concrete Mixers, and one Model Dump Truck. Included in this deal is an attractive counter display that gives point-of-sales power and kicks off "chain-action" selling.

PROFITS LIE IN DISCOUNTS. With 1948 come more attractive trade discounts on the entire Model line . . . for higher profits in your business.

BACKING YOU UP ALL THE WAY. More than ever, the Model Merchandising Plan includes hard-hitting national advertising, publicity, and public relations . . . to make your selling even easier. And, as usual, Model quality stands behind your sales. Model Toys are scaled from heavy construction equipment. They're built like that heavy equipment too . . . built to last and last to withstand the roughest kind of treatment. That means assured parent satisfaction . . . the solid basis of bigger business for you.

Here's

BEAUREGARD—*Elsie's Baby Boy!!*

His alert up-turned face has an irresistible "take-me" look! Famous Elsie's baby calf has had, and will continue to have, full-page nationwide advertising in such magazines as LIFE, SATURDAY EVENING POST, COLLIER'S and others—a build-up which will impress his identity and appeal on thousands of potential consumers.

Made by the patented KAYSAM process of pure, soft latex, little Beau's features are molded with wonderful detail that are accentuated by gay, harmless colors. He squeals with delight when squeezed.

Beauregard's individual package is an unusual picture-frame box which, by means of a clever, simple cut-out, can be used as an effective counter or window display to attract immediate attention.

A word to the wise—order now for prompt delivery.

See BEAUREGARD and other KAYSAM latex Joy Toys at the Molded Latex Toy Fair Exhibit—Rooms 642-644, Hotel McAlpin

for ALL season's sales . . .
choose the JOY BALL

Place Orders NOW for
Spring and Summer delivery
(We were overwhelmed last season!)

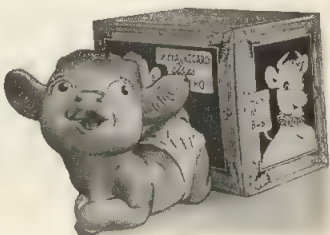

Show the famous Joy Ball from Christmas to July Fourth, and all year 'round. You will find it substantially profitable.

Molded of seamless rubber by the patented KAYSAM process, an inflated Joy Ball can be stepped on and pushed right down to the ground without breakage. Its unique valve, mouth-inflated, leaves no annoying bulge. You'll like the gay color, 14" diameter, high bounce, and safe, velvet-soft touch. And the *really low price* makes it ideal as a playball for every season—your sales will prove it!

The Joy Ball Jr. is the same, but smaller—especially suited for the younger child.

SHOTGUN CHOKES

WEAVER-CHOKE

The bore of the Weaver-Choke is equipped with a series of baffle rings. The high velocity powder gases strike these baffles tending to pull the gun forward, reducing recoil. The gas is diverted out through the vents before the shot leaves the muzzle, reducing the muzzle blast and eliminating blown patterns and scattered shot. Six choke tubes are available, each correctly designed for its particular purpose.

No.	Type
XFO	Extra full choke, deadly to 70 yards.
FO	Full choke similar to the standard full choke.
3/4	Three-quarter choke, for small game to 40 yards.
1/2	One-half choke, fairly wide shot spread, good killing pattern on small game to 35 yards.
1/4	One-quarter choke, wide spread for short shots to 30 yards.
S	Skeet or Scatter, a wide even pattern for use at Skeet or for very close game shooting.

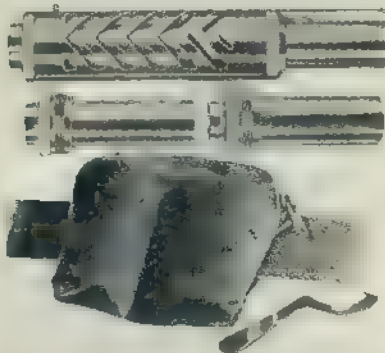

Can be had in 12, 16 or 20 gauge with any of the chokes listed above. Two tubes as selected, supplied with each choke.

No.	Wt. each	Each
Weaver Choke	2 1/2 OZS.	(F) \$10.25
Extra Chokes (Two tubes as selected with each choke)		(F) 1.75

Fitting charges extra. Always advise make of shotgun.

One set in a carton

PACKMAYR POWER-PAC

An anti-recoil and shot control device for single barrel shotguns. Complete with three tubes: short, medium and long range; and carrying case and wrench. The short range tube is designed for expert skeet or close range field shooting. The medium range tube is effective (80%+) pattern spread to 30-inch circle at 30 yards, especially for trap and skeet shooting, and general field shooting. The long range tube is effective 80 to 90% to a 30-inch circle at 30 yards. A strong full choke tube for long range wild fowl shooting. Supplied in 12, 16 and 20 gauge, plain or ribbed barrel.

No.	Wt. per set	Per set
Power-Pac	1 lb.	★\$18.50

One set in a carton

Always specify make and model of shotgun to be fitted.

POLYCHOKE

Aero-Dyne super Poly Choke, enables the user to select all the degrees of choke necessary for different types of shooting. By turning the element which is the end section of the Poly Choke, you can secure any desired choke without removing any part from the complete gun. Made for repeating or automatic shotguns in 12, 16 or 20 gauge. The end of barrel is threaded, to which the sleeve is fitted and the element added, makes the complete choke.

Return the gun barrel only or barrel assembly to us and the Poly Choke can be fitted in San Francisco within five days. Will not be sold separately, but must be fitted by the factory authorized gunsmiths only.

No.	Each
Poly Choke (Plain Sleeve)	★\$14.75
Poly Choke (Ventilated Sleeve)	★ 18.75

Price includes all fitting charges

SPOTTING SCOPE

MOSSBERG—SPOT SHOT

A high grade optical instrument. 20 power, designed for spotting targets on the firing line, but equally effective for marine and general observation. Micrometer adjustment for focus. 8000 W. Roosevelt Rd., Dept. 32, Chicago 58, Ill.

**Expecting a Baby?**

Mother's Friend massaging preparation helps bring ease and comfort to expectant mothers.

MOTHER'S FRIEND, an exquisitely prepared emollient, is useful in all conditions where a bland, mild anodyne massage medium in skin lubrication is desired. One condition in which women for more than 70 years have used it is an application for massaging the body during pregnancy... it helps keep the skin soft and pliable... thus avoiding unnecessary discomfort due to dryness and tightness. It refreshes and tones the skin. An ideal massage application for the numb, tingling or burning sensations of the skin... for the tired back muscles or cramp-like pains in the legs. Quickly absorbed. Delightful to use. Highly praised by users, many doctors and nurses. Millions of bottles sold. Just ask any druggist for Mother's Friend—the skin emollient and lubricant. Do try it.

"One moment," said the distant voice.

Mr. McFadden frowned. "It's after midnight, boy. Mr. Lauder won't like to be awakened. That he won't. He's a difficult man..."

Robbie turned his head away, shaking. He ought to be back on the schooner, right now. The thought of the hulk lying there, just off the beach, waiting to be picked up, drove him frantic. There was a click on the line and a harsh, sleepy voice came on.

"Are you there?"

ROBBIE blurted out his story. He had the *Mary Ann*. Dismasted and deserted, he had her anchored off the beach below Brannock. He, Robbie Hawkins, had swum out and saved her.

"I want to claim salvage, Mr. Lauder."

"All right, all right," the voice said. "But morning is time enough for that. Twenty after twelve, mister... the hulk can wait 'til morning..."

"I'm just a boy," Robbie explained.

"I'm not going to lose the ship, now."

"All right, all right..."

The line went dead. Robbie turned and started for the door.

"Where're ye going?" demanded Mr. McFadden.

"Back," said Robbie. He staggered with fatigue. "Back to the *Mary Ann*."

Mr. McFadden grabbed his arm. "Before ye go, lad—tell your mother. She's frantic, she is..."

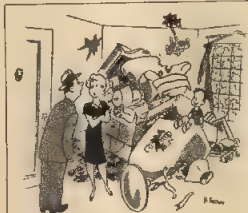

ROBBIE jerked away. He could visualize the anxiety in his mother's face, and the thought tore at his heart, but he couldn't leave the *Mary Ann*. Not now, he couldn't. His mother would have to go on, thinking him lost a little while longer.

"I can't," he said, turning. "I've got to get back."

He dropped off the warm blanket and plunged out into the darkness.

He ran until his lungs burned within him. He knew his feet and hands were bleeding, but he kept picking himself up and running on.

He rounded the little point and looked off into the darkness. A light bobbed out there! He sobbed and stumbled ahead. A boat was there—alongside his schooner. Without hesitation he

"Appleton has been
playing stom bomb."

Beware Coughs from common colds That Hang On

Croemulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Croemulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CROEMULSION
For Coughs, Chest Colds, Bronchitis

plunged once more into the heaving sea.

All he remembered of that trip was the coldness of the water and the feeble light ahead, rising and falling in slow, rhythmic arcs. When he reached the bulk there was a small power boat lying alongside, and two big men stood on the *Mary Ann's* forepeak, struggling with the windlass.

Robbie staggered forward, naked, into the faint light.

"Get off!" he screamed. "This is my boat! I claim salvage!"

The men turned with a start. One of them was a man Robbie had seen

Men have sight; women, insight.
—Hugo

before, but couldn't place. They stared at him, then laughed.

"Where the devil did ye come from, boy?"

Robbie tore at the thick arm that held the windlass crank.

"Get off! This ship is mine!"

The burly man brushed him aside easily, growling in his throat.

"Dinna be a fool," he snarled. "The *Mary Ann* is my ship. I'm Cap'n McGaan. Away, boy—before ye get hurt!"

The crank turned and chain clanked over the drum. Each dripping link that came aboard seemed to mock Robbie. He saw red before his eyes, and threw himself on the men.

McGAAN SWEEPED his arm back and Robbie staggered, tripped and fell over, hitting his head on the rail cap. He lifted himself slowly, after a time, and sat up, swaying, shaking his head to clear it. He heard the men talking to themselves, and saw the anchor come out of the water. He watched dazedly as they hoisted it over the stern of the work boat. He felt the motion of the hulk ease as it no longer strained at the anchor. He struggled to his feet and stumbled forward again.

McGaan swung around, baring his yellow teeth in the light.

"Get away, boy—get away before I really hit ye!"

"It's my boat," Robbie said thickly. "I found her. I claim salvage."

The other man raised up from where he bent over the work boat's engine.

"Wet him down, Mac," he grinned. McGaan reached swiftly for Robbie. He felt himself lifted clear of the deck, the horizon spun, and the next he knew he was floating in the water, gasping and sputtering. The engine coughed reluctantly into life. The light and the boat began to move away.

"Stop!" Robbie cried. A wavelet filled his mouth and he choked.

He floated on the surface for a time, numb to the cold, numb to everything but the loss of his prize. Then he turned over slowly and swam feebly to shore. He rested on his hands and knees in the coarse sand, crying with exhaustion.

It was late afternoon when Robbie,

JOHNNY LUJACK, GREAT ALL-AMERICAN COLLEGE AND PROFESSIONAL FOOTBALL STAR,

SAYS,

"Like Football, Motorcycling is one of America's great national sports. The new Indians make it possible for everyone to enjoy it!"

Come Ride These Great New *Indian* LIGHTWEIGHT MOTORCYCLES

**SENSATIONAL IN
PERFORMANCE...
YEARS AHEAD IN
DESIGN**

Never ridden a motorcycle? You can learn to ride these new safety lightweight Indians in a single lesson. And then you'll join hundreds of thousands who make motorcycling their hobby.

Indian now makes this possible with the new lightweight Arrow and Scout, the world's most modern motorcycles.

These new machines are completely different from any previous motorcycles. In one step, Indian has gone years ahead in design, in construction, in styling...using new

materials and new methods to produce revolutionary new machines that outmode all previous production motorcycles.

The new Indians deliver more horsepower per pound of weight, more horsepower per cubic inch, and consequently, more brilliant performance than any motorcycles ever produced before. Yet they are the safest motorcycles ever built. Perfect balance, instant maneuverability, and light weight all contribute to safety and easy riding. They are low in cost, economical to operate, com-

fortable to ride—and built to the highest standards of quality for years of dependable use. See your Indian dealer and ask for a trial ride.

**NOW, THOUSANDS WHO NEVER
RODE BEFORE CAN ENJOY
MOTORCYCLING**

FARM SERVICE BULLETIN

Another Precious Wheat Year

Again in 1948 the whole world will be watching and waiting the outcome of the American wheat harvest. Here are news bulletins from Washington telling how you can improve crops... protect crops and reduce loss in grain storage. For more information, write first to your own state agricultural experimental station or to the Director of Information, U. S. Dept. of Agriculture, Washington, D. C.

New Wheat Is Resistant To Sawfly

Rescue, a variety of wheat, is resistant to the sawfly. USDA wheat breeders are crossing it with domestic varieties to give good-quality, sawfly-resistant wheats, adapted to U. S. conditions.

Defense Against Hessian Fly Damage

This insect has cost American farmers as much as \$100,000,000 in a single year. Safe planting dates, to avoid fly injury, have been determined for each area by the USDA and State agricultural experiment stations. Plant your wheat during the fly-free period recommended by your county agricultural agent.

Clean-Up Solvent For Gasolene-Burning Engines

A Cities Service product, Cisco Solvent, is a proven, fast-acting engine cleaner. A treatment dissolves and flushes away harmful crankcase accumulations. Ask your Cities Service Farm Representative for a demonstration.

Improved Quality Motor Oils

Cities Service Motor Oil and Cities Service Premium Koolmotor Oil are reducing maintenance and repair costs of gasoline engines on all types of farms. Buy both from your Cities Service Farm Representative or at your town dealer.

Reduce Wheat Rust Loss

Damage from stem rust is checked by planting new rust-resistant varieties bred by Federal and State scientists and by ridding the area of rust-spreading barberry bushes.

Protect Stored Grains

300 million bushels of grain are ruined every year by insects. This half billion dollar loss can be prevented. The USDA recommends frequent and careful inspection of grain and also advises correct fumigation of all stored grains. Write USDA for facts.

EXTRUDED ALUMINUM SPARS

Proven on "GESTURE" and "EROICA" in 1947

We are prepared to bid on extruded aluminum spars of a special corrosion-resistant alloy for yachts of any size—from dinghies to ocean racers. They have been tried under the most arduous conditions.

These aluminum spars are lighter than wood, stronger than wood, better airfoil than wood, lower in upkeep cost than wood, and the fabrication methods have been worked out so they compare favorably in original cost with wood.

All fittings for spreaders, standing and running rigging, winches, goosenecks and sail tracks are built in during manufacture to form a one-piece unit.

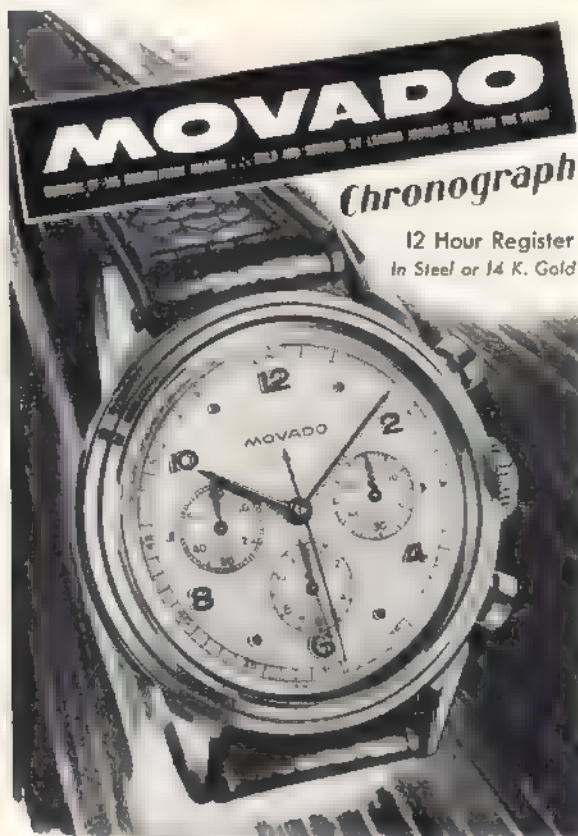

You can have spars like these on your boat. They are supplied complete, ready to step. Write for details.

TO NAVAL ARCHITECTS AND BUILDERS

We shall be glad to consult with you about the construction of spars to your specifications for any size yacht. Special prices for quantities of identical spars for class boats.

For further information write to:

Newest Sensational Dolls

No. 6M1611—Musical Doll. A really different doll destined to have unlimited appeal for all tiny mothers. Beautifully made with fine, curable stuffed body and lovely unbreakable plastic composition face. Delightful painted features, heavy curls of wool yarn. Features precision movement musical unit in back. Doll is fully jointed—can stand or sit. Charming dressed in bright colored checkered jumper and white blouse with matching ribbon bow in hair and shoes and socks. Stands 17 inches tall.
Each **\$6.95**

No. 3D355—Musical Clown. Sensational new stuffed toy features fine music box unit. Made of soft, bright two-toned plush with beautifully painted plastic face, hilarious roguish expression. Assorted color combinations. Overall height, 15½ inches.
Each **\$5.75**

No. 6M1608—Large Musical Woolly Lamb. Soft and cuddly. Beautifully made of fine quality plush, white, with pink rayon satin neck ribbon. Eyes are permanently wired in. Features a built-in music box, 18 note movement, with choice of assorted kiddie tunes. Overall size, 14 inches high, 10½ inches long.
Each **\$4.90**
No. 6M1609—Small Musical Woolly Lamb. Similar to above model but 9½ inches high, 11 inches long.
Each **\$6.00**

No. 112D48—Cuddle Doll. Large size cuddle doll. Beautifully constructed of soft, bright colored fleece with contrasting bolero jacket trimmed with long fringe and ribbons and a two-tone bonnet. Soft stuffed body is designed as a standing model. Features an unbreakable plastic composition face with intricate painted features and curls of bright yellow yarn. Large size and pleasant charm of this unusual doll will delight every little girl. Overall height of doll 26 inches.
Each **\$3.00** **\$34.50**

No. 112D46—Cuddle Doll. Same entrancing size as above model but fashioned in a sitting position.
Each **\$3.00** **\$34.50**

Soft Stuffed Fawn. An entrancing new stuffed toy that will delight and intrigue the youngsters. This tiny little fawn is beautifully styled of soft golden plush over a cuddly body and wears a pretty red bow around the neck. Beguiling expression on his winsome face will capture the heart of every youngster. Designed for real sales appeal!

No.	Size	Each	Per dozen
384022	Large	\$3.75	\$43.00
384023	Extra Large	4.65	53.75
384024	Jumbo	5.75	66.50

No. 112D44—Cuddle Dog. A fully proportioned, completely soft-stuffed standing dog that will hit a new high in popularity. Beautifully finished in soft gold rayon plush, he has large brown ears, and is designed to withstand all the hugs and squeezes inflicted by young youngsters. Overall size 14 x 11 inches.
Each **\$3.15**
Per dozen **\$36.00**

No. 112D44—Fur Cat and Mat. Beautiful toy petcat on this is suitable for a petting dog ration that is really different. About the size of a large Persian kitten, it is fashioned of white bunny fur and comes complete with a matching fur mat on which to rest. Has a very bright colored ribbon around its neck and shiny natural appearing green glass eyes with black irises. Makes an ideal gift.
Each **\$2.85**
Per dozen **\$33.00**

No. 384026—Bobo, the Personality Clown. Quality from the top of his flaming hair to the tips of his white-bonneted toes. Completely jointed, flopping limbs. Stands 21 inches tall. Made of cotton. Bobo can take anything. Delightfully attired in gay stripes, plaids, polka dots, in a variety of colors. Amusing painted features. A sure best seller with eye appeal and sales appeal!

Each	Per dozen
\$2.30	\$26.00

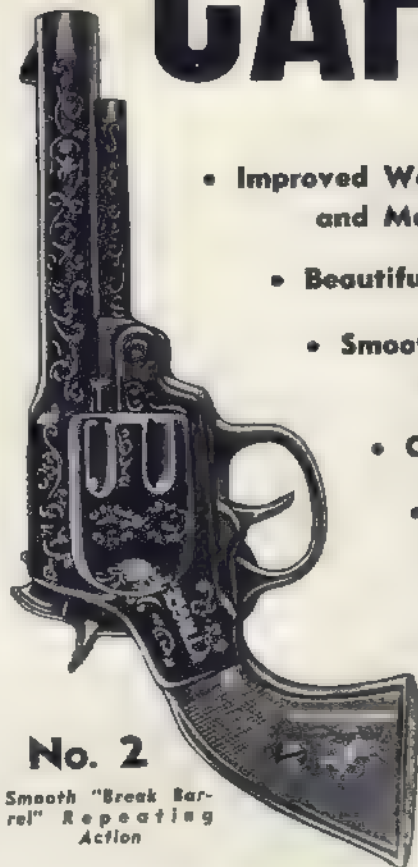

No. 3D646—Mooing, Milking Toy Cow. A new toy sensation—a cow that can be milked. Designed to catch the fancy of every youngster. Soft-stuffed toy bovine, beautifully finished in brown and white plush has a removable rubber udder with a built-in reservoir. A squeeze produces instant response. When lifted to either side, bovine moos realistically. Measures 9½" in height, 13" in length. She comes fully bedecked with a flower-embellished ribbon around her neck. Packed one in a box.

You'll be hearing a lot about Snap Action this season

1

SNAP ACTION means speed!

Clip Craft's solid, crushproof aluminum rods and arcs are joined by tempered spring steel clips
-- instead of slow, ponderous nuts and bolts.
That spells speed in building models
speed in taking them apart.

SNAP ACTION means safety!

Boys use fingers -- not screw drivers or wrenches
-- when they build their unbreakable Clip Craft models

SNAP ACTION means flexibility!

Not only does Clip Craft build hundreds of construction models
such as buildings, vehicles, airplanes, guns
it builds animated models, too
-- amusing caricatures of people and animals.
It's a modelling set as well as a construction set
wonderful for boys (and their dads).

SNAP ACTION means snap sales!

This "New Look" building set amazed the stores handling it this winter
with an overwhelming consumer response
at point-of-sale and direct over-the-counter purchases.
You'll make this profitable discovery, too,
when you add this sensational new building set to your line.

...and only

Clip Craft

NEW YORK 12, N. Y.

You'll be hearing a lot about Snap Action this season

SNAP ACTION means speed!

Clip Craft's solid crushproof aluminum rods and arcs are joined by tempered spring steel clips instead of slow, ponderous nuts and bolts. That spells speed in building models speed in taking them apart.

SNAP ACTION means safety!

Boys use fingers — not screw drivers or wrenches when they build their unbreakable Clip Craft models.

SNAP ACTION means flexibility!

Not only does Clip Craft build hundreds of construction models such as buildings, vehicles, airplanes, guns it builds animated models, too amusing caricatures of people and animals. It's a modelling set as well as a construction set wonderful for boys (and their dads).

SNAP ACTION means snap sales!

This "New Look" building set amazed the stores handling it this winter with an overwhelming consumer response at point of sale and direct over the-counter purchases. You'll make this profitable discovery, too when you add this sensational new building set to your line.

We are pleased to announce the appointment, as our Sales Representative, of

**TO GET MILTON BRADLEY TOYS AND GAMES
FOR YOUR CHRISTMAS OPENING!"**

You can be sure of plenty of fast-selling Milton Bradley Toys and Games to handle your Christmas requirements. Last year, stores all over the country lost thousands of dollars in sales because their Milton Bradley stocks sold out 10 days to 2 weeks before Christmas and there wasn't time to get more to them. So rush your order and we'll rush shipment. Do it now, for Christmas sales of Milton Bradley Toys and Games promise to be bigger and better than ever!

WE'LL HELP YOU SELL!

We've prepared a complete sales promotion kit for the five games shown. It includes photos of suggested window and counter displays, radio spots, reprints of national ads, glossies, newspaper ads and our new Toy and Game Catalog No. 88. It's yours for the asking! Simply address your request to: **Milton Bradley Company, Springfield 2, Massachusetts.**

OUTBOARD MOTORS

Still the best buy in Outboard Motors

5 H. P.

ALTERNATE FIRING

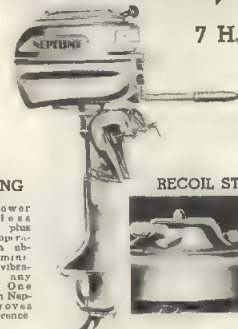

More power with less weight, plus smooth operation. An absolute minimum of vibration at any speed. One trial with Naptime proves the difference.

MODEL AA-4

A medium weight motor of exceptionally smooth power and great maneuverability. Two cylinder alternate firing, "Rollator" rubber pump cooling system and tiltable automotive type, non-flooding carburetor. Crankshafts are drop-forged chromium steel, counter-balanced, hardened and ground. Recoil starter, automatic pilot, synchronized gas and spark control. Easy starting and steady power. Vibrationless performance. One of the finest values in our new streamlined motors. Suitable for canoes and rowboats. 46 in. long, 18 in. wide. Stern height 16 in. Weight of motor, 40 lbs.

No. 45-M-4A-1: List \$148.00; Dealer's, each, 103.60
Net

101⁵³

7 H. P.

RECOIL STARTER

A pull of the handle, and the motor is ready to go. No rope or cord to coil; cable recoils automatically when released, ready for instant use. Not at all built on, but a built-in feature, completely enclosed. No lost pull-ropes.

MODEL AA-6

A very powerful motor for its size and weight. Alternate firing twin cylinder with flash starting and smooth, quiet operation. Recoil starter, automatic pilot, synchronized gas and spark control; underwater silencing. Entire motor streamlined and completely shrouded. An outstanding value and a fine motor throughout. Centrifugal pump for positive cooling. Powerful, excellent for large row boats and runabouts. Length 47 1/2 in.; width 11 1/2 in.; stern height, 15 in.; weight of motor, 52 pounds.

UNDERWATER SILENCING

Muffler and exhaust are cast integral with the gear housing. Gas vapors exhaust into the slip stream. This silent and highly effective exhaust adds greatly to the pleasure of operating an outboard motor.

MODEL B-1

A small motor with astonishing power, fine for women and children. Calibrated dial type needle valve control. New underwater silencing. Special self-lubricating Amplex Oilite bearings. Two-blade semi-woodless type propeller. Efficient centrifugal pump and siphon cooling. New type high-tension flywheel magneto, moisture proof, for easy starting. Tiltable automotive type float feed carburetor. Synchronized gas and spark control. Suitable for canoes and row boats. Length 35 1/2 in.; width 4 1/2 in.; stern height 15 in. Weight 17 pounds. Capitol's New Bunny Book

ELEVEN BOOKS

Powder Puff's ears move in any direction. His tail is a real soft and cuddly cotton tail. The story concerns his adventures in the city. It's a big book—stands well over a foot high. It's a sturdy book—24 heavy cardboard pages. It's a colorful book—full color illustrations throughout by artist Jane Flory. It's a book that every child will want to play with and take to bed at night. For the child who loves things magical. To be a nurse, a fire engine driver, a circus performer, boat racer, steam shoveler . . . anything at all—just press the magic Cricket locked in the book by a specially patented device and your wish comes true. The delightful full color pictures by Erika are mounted on extra heavy cardboard and indestructibly bound. Here is fun, education and imagination brilliantly combined. Published by Capitol Publishing Co., 139 Fifth Ave., New York 10, N. Y.

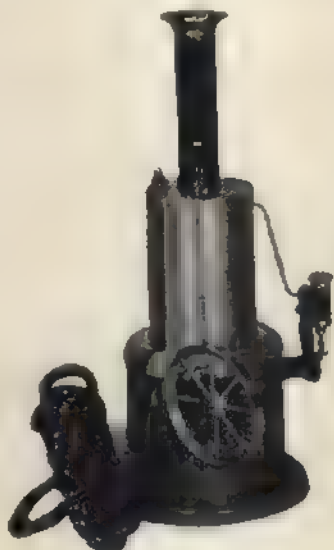

The Magic Cricket Locked in the Book Makes Your Wish Come True

NATIONAL PLAYTHINGS FEATURES WEEDEN STEAM ENGINES

George Wallach, sales representative for National Playthings, Division National Fairpoint Company, New Bedford, Massachusetts, states that buyers visiting his showroom, room 309, 200 Fifth Avenue, will find the full line of the well-known Weeden steam engines very much in evidence.

Weeden Steam Engines can well be said to be one of the oldest lines in the American toy industry. Established more than 65 years ago in New Bedford, Mass., literally millions of Weeden steam engines have been sold since 1883 all over the country and throughout the world. Old-time buyers will remember playing with Weeden steam engines when they were youngsters, as can the fathers and the grandfathers among the consuming public

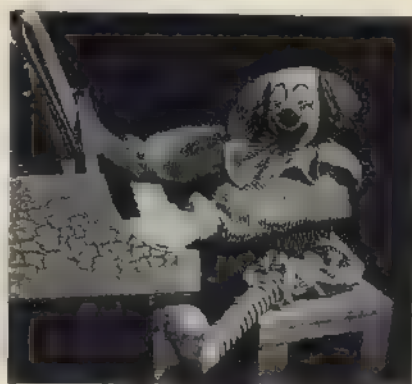

The Weeden Steam Engine

who see them featured on toy counters.

Weeden steam engines have always been made in New Bedford and the factory making the present line is still located there. William Ritchie, Jr., son of the late "Bill" Ritchie, is very much on the job in the Weeden plant, capably assisted by many of the original Weeden craftsmen. Among the features for which Weeden Steam Engines are known are brass boilers and fittings, and a rigid standard of quality workmanship that enables them to meet the highest safety standards.

BOZO AT THE FAIR

One of the feature attractions at the Toy Fair, to be held in New York at the Hotel McAlpin, March 8 through March 20, will be Revelco, Inc.'s famous Bozo, the Clown, replete with a "mittul" of new sales promotion ideas. Material, which will plug destinies of Revelco's famous red haired Bozo, will include floor displays, illuminated signs, broadsides, literature. A strong advocate of dealer sales promotion,

Revelco's "Bozo" Will Be at the Toy Fair

Revelco plans through these additional sales devices to carry the already phenomenal sales of Bozo, the Clown, to all time highs.

NEW TOY GUN

The Safe-Tee Toy Company, 21000 South Alameda Street, Long Beach 10, California, are manufacturing a new item under the title of Safe-Tee Rapid Fire Toy Gun. This is automatic and repeating, holding five colored sponge rubber balls. It is designed from a well-known double barrel shotgun and is said to be surprisingly accurate up to 30 feet. The material used is chiefly aluminum with handsomely finished hardwood stock and grip. The mechanism is simple and the whole gun is light in weight, weighing only one pound, four ounces.

BIG BOY REALISM

Plastics and electricity combine to present "big boy" realism in this toy automobile made by the Kenton Plastics Corp., of Kenton, Ohio. Powered by flashlight batteries, and equipped with a make-and-break type motor, the car has several forward and one reverse speeds which are easily set by the small shift. The lightweight plastic body, molded of Lustron, a polystyrene plastic produced by Monsanto Chemical Company's Plastics Division, resembles in detail present day styling of automobiles.

Kenton Combines Plastics and Electricity in this toy automobile

No. K16-IB—Ivory and brass ..\$

Six in a standard package.
Weight each 2½ pounds.

ELECTRIC DOOR CHIMES
NUTONE "LEADER"

Two Note Model

A shapely, compactly constructed chime of metal construction. Blends well anywhere, especially in restricted kitchens or hallway areas.

Sounds two notes for front door, single note for rear door.

Height 4½ in., width 6½ in., depth 2½ in.

Each

No. K10-WC—White and chrome ..\$

No. K10-IB—Ivory and brass ..\$

Weight each 1½ pounds.

Twelve in a standard package.

ELECTRIC BELLS
LIBERTY

Single coil type; new, modern design. Gong is triple plated and polished to a mirror finish.

Large size coil; entire mechanism is very rugged and built for long use. Silver contacts.

Adjusted to operate on either batteries or transformer before being shipped.

Pearl gray enameled chrome trim.

Each

No. 100—2½ in. gong; wt. per std. pkg. 43 lbs.\$

100 in a standard package.

Heavy Duty

Ideal for use as industrial elevator call bells, warning signals, burglar and fire alarms, etc.

Durably constructed and has heavy contacts which last for years.

Perfect performance is obtained on either battery or transformer

operation. Black enameled nickel gong

Each

No. 89—5 in. gong; wt. each 2½ lbs.\$

Open stock

ELECTRIC BUZZERS
LIBERTY

Rugged mechanism. Large size single coil; silver contacts. Adjusted to operate on either transformer or battery.

Enclosed terminals. Pearl gray enameled chrome trim.

Each

No. 100—Wt. per std. pkg. 35 lbs. ..\$

100 in a standard package.

BELL TRANSFORMERS**LIBERTY**

Deliver the full rated voltage and current.

Not cheaply made but built in accordance with transformer standards. Stripped line leads, polarized. Approved. Black enameled

5 watts; 110 volts primary, 10 volts secondary; 50-60 cycles, A.C. only.

Each
No. 212-A Weight per std. pkg. 50 lbs. \$
50 in a standard package

LIBERTY TRI-VOLT

Delivers full rated voltage and current. Built in accordance with transformer standards.

Black finish
5 watts; 110 volts primary, 6-12-18 volts secondary; 50-60 cycles, A.C. only.

Each
No. 220-A Weight per std. pkg. 50 lbs. \$
50 in a standard package

CHIME TRANSFORMERS**NUTONE**

Delivers sufficient power to operate a door chime under practically any wiring conditions. Made primarily for chime operation but can be used for bells where a

louder tone is sought

Paper section wound coil offers greater insulation; annealed core laminations are varnish-sealed to guard against the weather. Listed by Underwriters' Laboratories.

115 volts, 50-60 cycles, A.C.

Each
No. B-10-A—Wt. per std. pkg. 12 lbs. \$
Twelve in a standard package

LIBERTY

Delivers full rated voltage and current. Built in accordance with transformer standards.

Black finish.
8 watts; 110 volts primary, 16 volts secondary; 50-60 cycles, A.C. only.

Each
No. 215-A—Weight per std. pkg. 55 lbs. \$
50 in a standard package.

ELECTRIC PUSH BUTTONS**RODALE****Midget Round**

Brown bakelite finish.
Complete with two screws

Each
No. 300—1 1/4 in. diam.; weight per standard package 9 lbs. \$
20 in a carton, 200 in a standard package.

**Square Type**

Brown bakelite finish.
Complete with four screws

Each
No. 301—1 1/2 x 1 1/2 in.; wt. per standard package 10 lbs. \$
20 in a carton, 200 in a standard package.

TROUBLE LAMPS**RODALE****Heavy Duty**

Large rubber handle fits shape of hand. Protected switch; heavy rubber cable and handle cap; heavy duty reflector guard

Each
No. 339—25 ft. long wt. per std. pkg. 57 lbs. \$
30 in a standard package.

OUTDOOR FLOODLIGHTS**OAMCO**

Can be used outdoors for lighting gar dens, entrances, yards, driveways, roadside stands, signs, parking places, or any other place that requires an economical floodlight. Also recommended for indoor use in stores, furnace and laundry rooms and similar places.

Reflector is steel, porcelain enameled green outside and white inside. The adjustable bracket allows reflector to swing in any horizontal or vertical position. Bracket and base are electro galvanized.

With 5 ft. rubber cord and rubber plug cap.

Each
No. 1139—For 75 or 100 watt lamp;
8 in. diam. reflector; wt. each
2 lbs. \$
One in a standard package.

WEATHERPROOF BRACKET FIXTURES**OAMCO****Gooseneck**

For farm yards, backyards, areaways, entrances, driveways, etc.

Wired complete and ready to install. Consists of electro galvanized 1/2 inch gooseneck bracket, wall flange, lag screws, porcelain enameled reflector finished in green on outside and having a white reflecting surface and a porcelain socket. Set screw in flange prevents fixture from turning.

Each
No. 877E—For 75 and 100 watt lamps, diam. reflector 12 in., length over all 27 in.; wt. per std. pkg. 24 lbs. \$
5 in a standard package.

**Straight**

For farm yards, backyards, areaways, entrances, driveways, etc.

Wired complete and ready to install. Consists of electro galvanized 1/2 inch straight bracket, wall flange, lag screws, porcelain enameled reflector, finished in green on outside and having a white reflecting surface, and a porcelain socket. Set screw in flange prevents fixture from turning.

Each
No. 1195—Diam. reflector 12 in., length over all 22 in.; wt. per std. pkg. 20 lbs. \$
5 in a standard package.

**With Angle Sign Reflector**

For farm yards, backyards, areaways, entrances, driveways, etc.

Wired complete and ready to install. Consists of electro galvanized 1/2 inch straight bracket, wall flange, lag screws, porcelain enameled reflector, finished in green on outside and having a white reflecting surface, and a porcelain socket. Set screw in flange prevents fixture from turning

GAS RANGES

ODIN BEAUTY RANGE

All Odin ranges are built to C.P. (Certified Performance) Specifications and carry the A.G.A. Blue Seal of Approval. Heavy steel construction fully insulated with rock wool, and finished in gleaming white porcelain and chrome.

THE CHARMER

Specifications:

Divided one-piece china-white porcelain top.
Two polished chrome vents.
Two electric outlets for your toaster and coffee-maker.
Chrome trim range lamp.
Telechron electric combination clock-timer.
Salt and pepper shakers.
Polished cast aluminum pancake griddle.
Two Supra-Flex giant burners.
Two Hi-Lo simmer burners.
Removable highly polished spill-over trays.
Seamless one-piece large porcelain oven.
Robertshaw heat control.
Glass in oven door provides "Day Like" baking.
Light in oven automatically lights when door is opened.
Odin's original Swing out Hi Broiler and Barbecue.
Odin cook-chart at your fingertips.

DEPT. 9

ANIMAL TRAPS

VICTOR

Similar in pattern to genuine Newhouse, but lighter in construction.

SINGLE SPRING

Nos. V-0 to V-1½

For rat

No.	Jaw spread	Wt. per doz.	Per doz.
V-0	3½ in.	6 lbs.	\$4.70

For muskrat

V-1	4 in.	8 lbs.	5.20
-----	-------	--------	------

For mink or skunk

V-1½	4½ in.	12 lbs.	8.00
------	--------	---------	------

No. V-0, fifty-five dozen; No. V-1, forty dozen; No. V-1½, twenty-five dozen in a barrel

DOUBLE SPRING

Nos. V-2 to V-4

For fox

No.	Jaw spread	Wt. per doz.	Per doz.
V-2	4½ in.	12 lbs.	\$11.50

For otter or coyote

V-3	5½ in.	21 lbs.	17.70
-----	--------	---------	-------

For beaver

V-4	6½ in.	24 lbs.	21.90
-----	--------	---------	-------

No. V-2, sixteen dozen; No. V-3, ten dozen; No. V-4, nine dozen in a barrel.

ONEIDA NEWHOUSE FOR BLACK BEAR AND MOUNTAIN LION

No. 50

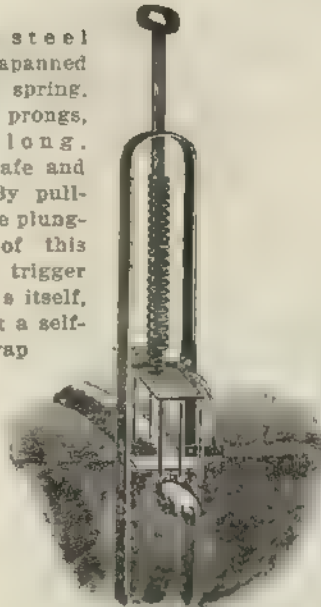

Double springs, jaws with teeth, for black bear, or mountain lion. Length of chain, 16 inches.

No.	Jaw spread	Wt. per doz.	Per doz.
50	10 in.	167 lbs.	\$309.90

One dozen in a barrel

MOLE

Tinned steel frame, Japanned steel coil spring. Six steel prongs, 5 inches long. Simple, safe and strong. By pulling up the plunger rod of this trap the trigger catches itself, making it a self-setting trap

REDDICK

No.	Wt. per doz.	Per doz.
Reddick	36 lbs.	\$29.70

One-half dozen in a crate.

VICTOR MOLE TRAP STANDARD SPEAR TYPE

A sure sensitive and effective spear, or plunger type trap that harpoons the mole causing instant death. Six prong spears rigidly made from flat steel with rust resisting coating. Card of instructions for setting and using. Length when sprung, 16¼ inches.

No.	Wt. per doz.	Per doz.
33	30 lbs.	\$22.00

One-half dozen in a box

VICTOR OUT-O-SIGHT

Absolutely reliable. Directions for setting and full explanation of the mole's habits furnished with each trap. Heavy powerful springs malleable iron jaws. Teeth designed so as not to injure hide.

No.	Height, ins.	Spread of jaws, ins.	Wt. doz., lbs.	Doz. in box	Per doz.
Out-O-Sight	5½	2¾	18	1	\$39.50

GOPHER TRAPS

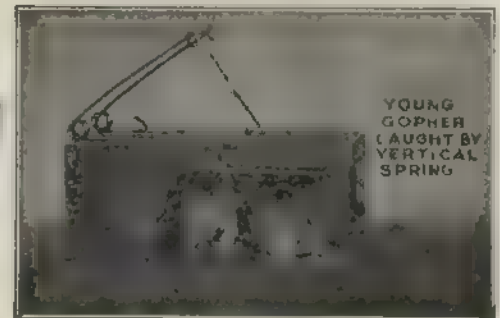

Steel spring, painted green, two prong. Length over all, 6 inches.

MACABEE

No.	Wt. per doz.	Per doz.
Regular	2½ lbs.	\$7.70

Two dozen in a box.

YOUNG
GOPHER
CAUGHT BY
VERTICAL
SPRING

DOUBLE CATCH

Easily and quickly set.

Catches large and small gophers.

Trap is set with one end (or entrance) down, in path of gopher so that the rear end is flush with surface of the earth. The air hole permits enough air (or ventilation) to enter to annoy the gopher, causing it to approach this opening for the purpose of closing it, and will strike lever springing the trap.

No.	Wt. per doz.	Per doz.
Double Catch	9 lbs.	\$6.50

One dozen in a carton

CALIFORNIA POCKET

No. 44

A sure catch; seldom fails when properly set; used extensively by fruit growers for catching pocket gophers.

No.	Size	Wt. per doz.	Per doz.
44	3x3¼x6¼ in.	9 lbs.	\$6.80

One dozen in a box; one gross in a carton

CROSS CUT SAWS

SIMONDS

CHINOOK—BUCKING PATTERN

General utility medium price saw. Used extensively on construction work. Tapers from 13 gauge on teeth to 17 gauge on back.

See what *fresh* orange juice does for *you*

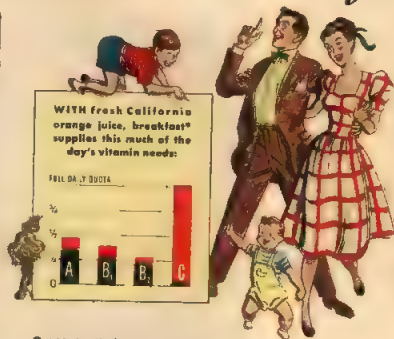

WITHOUT fresh California orange juice, breakfast* supplies this much of the day's vitamin needs:

FULL DAILY QUOTA

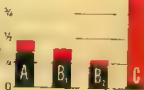

1. This family is missing vitamin C. It's the vitamin that fights fatigue and infection, protects teeth and gums, keeps youngsters growing sturdy and grownups feeling gay and young. You need a new supply of vitamin *Every day*—your body doesn't store it. But most foods are poor sources. Cooking destroys it.

WITH fresh California orange juice, breakfast* supplies this much of the day's vitamin needs:

FULL DAILY QUOTA

2. This family knows the value of *fresh* California orange juice. A 6 to 8 oz. glass fills the day's need for vitamin C. No other juice is so rich in C—gives so many other health benefits. That's why *fresh* California orange juice works health wonders for you. And so pleasantly! It looks inviting, tastes delicious. Drink up—every morning!

*cereal with milk, egg, toast and coffee

HOW TO GET A BUDGET DOWN

Oranges have not soared in price like many foods. Wise shoppers know they are one of today's biggest food values. Buy them for juice, snacks, for tempting and refreshing fruit salads and desserts

REMEMBER: Only the best oranges are shipped FRESH. They give you ALL the flavor, ALL the health.

TOY NEWS AND NEW TOYS

Apache Air Pistol

NEW AIR PISTOL

With the success of the Apache Air Rifle behind them, National Cart Corporation, well-known Pasadena, California manufacturers, began work on a new air pistol some six months ago with the result that today, with mass production line-humming, this new product of this up-and-coming company in the West is now a reality; off the drafting boards and into production in a little under half year! Using the same precision ball ammunition, in the big .250 Cal. size, the new Apache Air Pistol parallels its big brother, the Apache Dual-Caliber Air Rifle is shooting ability although not in range, of course. Test firing from a fixed position, the new Apache Air Pistol makes a very neat pattern on the 50-foot target, penetrates $\frac{3}{4}$ " pine easily—and the big .250 Cal. pure lead ball shot lends itself to really "knocking them down" with uncanny accuracy. A great deal of this accuracy comes from the precision rifling employed, the beautiful balance of the gun itself, its easy "squeeze" trigger and the amount of air under pressure in its firing chamber.

Made entirely of brass and aluminum, the new Apache Air Pistol is completely rust-proof, a big factor in hand guns as well as rifles. Both the firing barrel and the air pump barrel are pure brass, with the stock of aluminum inset in tooled walnut. Of extreme interest to the sporting goods trade is the fact that this new pistol carries a six-shot, automatic loading device. This allows loading but once for six shots, each fed into the firing chamber singly by an inset plunger that is worked quickly by a loading pin in the breech housing. The .250 Cal. bullets in the loading chamber are kept under loading tension by means of a spring and all that is required to load is to pull back the plunger, the ball shot then rolling into position for seating in the rifling. Other important features of the new Apache Air Pistol are Precision rifling, adjustable sights (for windage and elevation or for use in "sighting in"); all brass valve parts, duo-tone finish, easy pump action, air reservoir storage, automatic safety device (the pistol may be pumped only on safety although it may be carried loaded); lifetime service guarantee. The "lifetime service guarantee" parallels the guarantee which has worked out so successfully on the Apache Air Rifle and consists of a warranty in writing with each pistol which covers it completely. All materials and workman-

ship are unconditionally guaranteed; operation and use of the pistol are covered by a "return privilege" whereby any pistol which gets out of order will be repaired and reconditioned for \$1.50 if returned to the factory. Attractively packaged in a simulated walnut display box, the Apache Air Pistol is 11 $\frac{1}{2}$ " in length and weighs but 20 ounces. Made by the National Cart Corporation, 330 South Fair Oaks Avenue, Pasadena 2, California, an affiliate of Burhans & Associates

JUVENILE STORES TO HOLD MEETING

Announcement is made by Juvenile Stores, Inc., that a meeting will be held at the Hotel Pennsylvania in New York on March 12th. Juvenile Stores, Inc., was formed by a group of stores from coast to coast specializing in children's furniture and toys. The purpose of the organization is to exchange merchandising ideas and other information. Those who are interested should write to I. M. Weiraub of the Darling Baby Carriage Company, 370 Gerard Avenue, New York City

Scale Model by Doepke

THE "MODEL" ROAD GRADER

The Charles Wm. Doepke Mfg. Co., of Rossmyrne, Ohio, has announced its 1948 addition to the Model Toys line . . . the Model Road Grader. As the name "Model Toys" implies, the toys are skillfully patterned after giant construction equipment; and the Doepke Company spares no time or expense in making their toys faithful replicas of the great trucks, concrete mixers, bucket loaders and road graders that are helping to build postwar America. Model Toys even carry trade mark decals—many of their prototypes in addition to the model insignia. The new Doepke toy carries on the tradition of "realism in miniature." It's a faithful copy of the Adams Diesel Motor Grader—even down to the front wheels, the jointed front axle, and the tandem rear wheels. The scraper blade turns in a 90° arc, and adjusts both vertically and diagonally. Even the color is the same—Adams brilliant orange! Actually, the only big difference between the original and the copy is the size. One weighs over ten tons; the other, just 10 lbs. 2 oz. Another new Doepke development is a special packaging deal, including the three other Doepke numbers. One Earth Hauler, two Bucket Loaders, and two Concrete Mixers are packed with a special counter card, making a complete window display. The Charles Wm. Doepke

Mfg. Co. is a member of the Toy Guidance Council, and the American Toy Manufacturers Association and holds the Seal of Commendation issued by Parents Magazine

HERBERT GEORGE'S NEW TOOT-MON

Among the various new items which the Herbert George Company, Chicago, will display at the Toy Show is their latest creation, the Toot-Mon Scottish Bagpipe. Officials of the company state it is their belief that the Toot-Mon is one of the most unique, universally appealing and saleable items they have ever produced in their long history as manufacturers of precision-built toys and optical specialties. Victor Israel, speaking for his company, predicted that this new item would sweep the country, particularly since it is purposely priced to appeal to the mass market, retailing for 49c.

The new Toot-Mon is modeled to look and sound like a genuine Scotch bagpipe. It has a brilliantly colored balloon bag of Lee-tex gum rubber and a highly lustrous two-toned plastic pipe upon which any tune may be played. In principle, too, the Toot-Mon is constructed after its Scottish model. An automatic valve built into the pipe controls the release of air from the inflated balloon so that it flows out through stops in the pipe and produces the skirling notes typical of the Scotch bagpipe. The Toot-Mon will be sold on individual display cards, complete with instructions and a tune book.

Another new item being shown for the first time by the Herbert George Company is their 4 Power De Luxe Herco Binocular, which will retail for \$5.95 complete with an ever-ready carrying case of simulated leather. Mr. Israel says that no effort has been spared to make this binocular an extraordinary value. It embodies many features found in the most expensive binoculars—having optically ground and pitched polished lenses, extra wide field of vision, center break for inter-pupillary adjustment, quality aluminum fittings, etc.

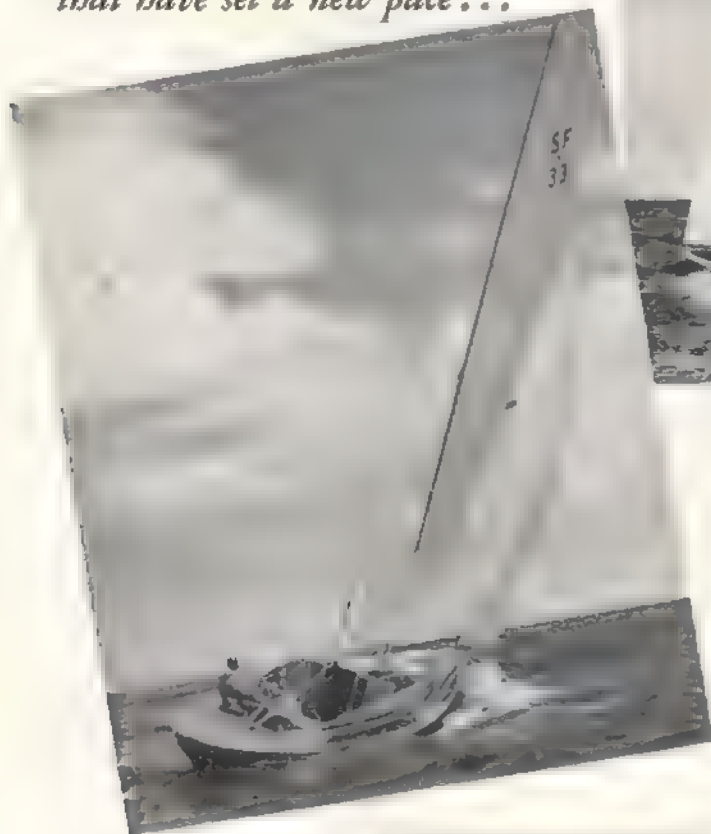

The company announces that due to record-breaking sales of their 3-piece Snow White Dresser Set they have stepped up production to the extent that they are now in a position to offer it at a new low price. The set can now be retailed for \$2.50. The Snow White Dresser Set, consisting of brush, comb and mirror, is decorated with Walt Disney's appealing Snow White and the Seven Dwarfs figures and is sold in a Disney designed gift box.

Toot-Mon by Herbert George

STOUT FELLAS

*Gilbert Dunham's famed Sailors
that have set a new pace...*

33-YAWL OR SLOOP RIG

For spanking good day sailing and week-end cruising, nothing fills the bill quite like the new Stout Fella 33. Streamlined in design and function, she has already proved herself a most able sailer under all kinds of weather and trying conditions.

Accommodations include a cabin which houses two large, comfortable berths, a galley, head, and lockers. In addition, there is a deep, comfortable guest cockpit which easily and quickly converts into an enclosed cockpit-cabin combination — providing bunks for two more. This enclosure is achieved by an accordion type canvas hood which operates on a sliding track. This hood also provides perfect protection from the elements when sailing under wet weather or an extremely hot sun.

Principal dimensions are: L.O.A. 32'11", L.W.L. 26'3", Beam 8'6", Draft 4'6". Stout Fella carries 455 sq. feet of sail as a Sloop and 480 sq. feet when rigged as a Yawl. All rigging trims inboard and sheets lead directly to the helmsman's self-bailing cockpit. Auxiliary powered.

Here is a boat you'll be mighty proud to own for she is comfortable to sail in, easy to handle, and inexpensive to maintain. New literature giving full details is in the making.

27-SENIOR SLOOP

An increasingly popular day sailer all over the country. Her cuddy boasts two full size bunks and her midship seats in the extra roomy cockpit provide two more. A boom tent provides the protection needed. Other equipment includes a stationary head, portable ice chest and stove and food lockers. Sail area is approx. 278 sq. feet. Write for complete specifications today.

Builders of Sailing Yachts and Power Cruisers

Palmer Johnson

STURGEON BAY BOAT WORKS • STURGEON BAY, WIS.

PROVED! The Boat Most People Want

REYNOLDS ALUMINUM BOAT

"Fastest, safest, easiest-handling boat I ever owned!"

Response like this from boat owners... reports of complete sell-out by enthusiastic dealers from coast to coast... *prove Reynolds Aluminum Boat the boat most people want!*

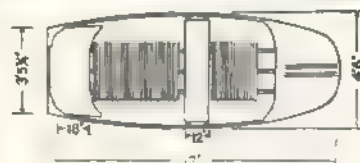

And no wonder! Here's a boat that streaks along at 25 mph with a 10 hp outboard—yet so light, even a *child* can easily row it... a boat so skillfully designed, it's practically impossible to sink or swamp. So handsome and beautifully streamlined, too!

The Reynolds Aluminum Boat is extra strong and sturdy—with a hull stamped from *one* piece of super-tough, heavy gauge, special alloy aluminum—only the transom is welded on. It's rustproof and leakproof... requires no upkeep—no painting, scraping or caulking. Furthermore, *it stays cool in the hot sun!*

And she handles like a dream! White oak rub strakes, recessed in hull-length channels, prevent side slip and drift. Balanced weight assures finger-touch control with oars—lets you "turn on a dime" with an outboard.

For all-'round utility—for fishing, hunting, safe fun for the entire family—*this is the boat for you!* Ask your dealer to order your Reynolds Aluminum Boat now, or write the Reynolds Metals Co., Marine Division, 2000 South Ninth Street, Louisville 1, Ky.

DEALERS: Write regarding sales franchise in your area.

Overall length, 12'. Beam, 54". Negligible draft. "Clinker-type" hull. Weight, app. 150 lbs. Seats 4. Forged aluminum oar locks and handles. Motor clamp blocks at right height (15 1/4"); takes any outboard motor up to 10 hp. Bulkheads in bow and under seats packed with newly developed, *non-waterlogging* buoyant product, one-tenth the weight of cork. All-purpose finish for fresh or salt water.

LEFT: Ideal for rowing or as yacht tender.
RIGHT: Beached at full speed undamaged!

IF YOU SEE RUST

REYNOLDS ALUMINUM

NEW FOR 1948

The PALMER SCOTT SLOOP and PALMER SCOTT HURRICANE

The **PALMER SCOTT SLOOP**, pictured above, is the popular and successful Wood-Pussy round-bilged hull in a new dress developed for those who want somewhat more advanced sailing than offered with the original cat rig. The mast of the sloop is the same as that of the cat. Stepping it further aft, using an overlapping jib, shorter boom and new stays, provides a lively sloop with performance far superior to that of the older rig and offers racing crews the opportunity to handle jib sheets or even a spinnaker. (This new rig can be applied to existing Wood-Pussy hulls.) The sloop price is **\$695.00 with sails.**

The **HURRICANE**, a Rhodes-designed 19' over all round-bilged molded plywood sloop is a fast, sporty and roomy racing and day sailing sloop which has a rapidly growing national class organization and has met with an unusually enthusiastic reception wherever she has been introduced. Her molded construction makes her light, lively and easily maintained—she's a lot of boat for her size.

For organized racing fleets or for individual day sailing boats the **HURRICANE** is the nearly ideal boat in her size range.

Now offered by Palmer Scott without sails.

Other Famous Palmer Scott Boats

The **WEASEL*** is a popular priced small sailing boat, 11'4" long, developed for the kids or their elders. She's a smart, lively cat. Carefully engineered in marine plywood her cost is kept to a minimum and her V-bottom is especially designed to perform as well with a low horsepower outboard as under sail. **Price \$395.00 with sail.**

The **WEASEL* KIT** offers the same Weasel in knockdown form for those who enjoy home woodworking or wish to save an appreciable sum of money. The kit is made up from our regular production parts to assure perfect fit, and includes full instructions, all wood parts, fastenings, glue, primer and hardware. **Price \$198.00 without sail.**

The **WOOD-PUSSY*** is our nationally famous 13½' cat-boat, designed by Rhodes, of which there are more than 1000 boats distributed in fleets throughout the country. An ideal boat for juniors or adults who are beginning to race for there is ample competition. They are easily altered to the sloop rig described above. **Price \$595.00 with sail.**

The **SCOTT CHARTER FLEET** of 31' over all auxiliary cruising cutters is being augmented by the building of additional boats this winter because of their popularity in previous seasons. Offered for charter completely equipped and with comfortable accommodations for a party of four, some of these *Amanthas* are still available for parts of the coming season. We suggest early action by those who would enjoy a cruise in one of these smart and able yachts as the time is rapidly being booked. Write us now for open time and rates.

ARTIFICIAL BAITS

HEDDON NEW PERFECTED PUNKSEED

A sinking bait which travels approximately 2 feet under the surface when retrieved, depending upon the speed of reeling.

Catches bass, walleyes and pike when other lures fail.

2 1/4 in. Body. Two Treble Hooks

Per dozen

No. 730SUN—Sunfish

No. 730BGL—Bluegill

Weight each 5/8 ounce.

One in a box, one dozen in a carton.

CLARK'S WATER SCOUT

Floating

Designed by a fisherman for fishermen. Has proven to be a killer in all kinds of water, no other plug on the market can duplicate its action. Small, compact and casts like a tournament weight.

3 1/4 in. Body. Two Treble Hooks

Per dozen

No. 301—White, red head

No. 307—Silver scales, ribs striped, blended with yellow on belly

No. 309—Rainbow, red, yellow and blue blend

No. 310X—Shiner scales, etched with white, red sheen on sides

No. 315—Pearl, red eyes

No. 320X—Yellow, white ribs

No. 327—White with silver ribs, blended streak of red scale on sides

Weight each 3/4 ounce.

One in a box, one dozen in a carton.

HEDDON LUCKY 13

A floating minnow drawing slightly below the surface with a zig-zagging swimming movement.

4 in. Wood Body, Three Treble Hooks

Per dozen

No. 2500L—Yellow perch

No. 2500RH—White, red head

No. 2500JRH—Frog scale, red head

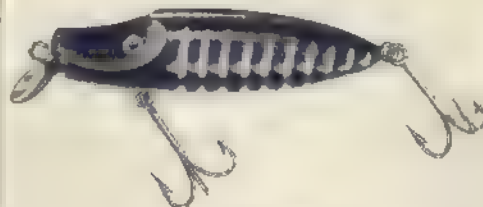

No. 2500PRH—Shiner scale, red head

Weight each 3/4 ounce.

One in a box, one dozen in a carton.

ARTIFICIAL BAITS

PAW PAW MINNOW

Sinking Pattern

Body made of durable lasting tenite. Has all of the true-to-nature action, shape and finish of a real minnow. Darts and wiggles under the surface when retrieved.

3 in. Body. Two Treble Hooks

Per dozen

No. 3801—Yellow perch

No. 3804—White, red head

No. 3807—Pike scale

No. 3851—Black, white ribs

No. 3856—White, silver ribs

No. 3858—Silver, black ribs

No. 3859—Yellow, white ribs

Weight each 5/8 ounce.

One in a box, one dozen in a carton.

PAW PAW WOTTA FROG

True to nature in design and color-actions—swims, dives and floats with all the real action of a real, live frog. Legs are hinged to body, permitting them to move in a kicking, swimming motion. Treble hooks are covered with hair and look like feet.

3 3/4 in. Body. Three Treble Hooks

Per dozen

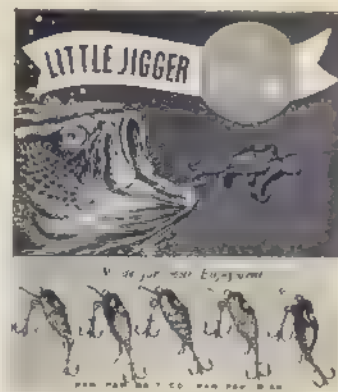

No. 73 True frog markings, wt

each 5/8 oz.

One in a box, one dozen in a carton.

ARTIFICIAL BAITS

PAW PAW JIG-A-LURE

A dandy little lure that "dances a jig" when retrieved. Dives under the surface and swims with a short, choppy wiggle that makes him a tantalizer for sure. Iridescent pearl finished.

1 1/4 in. Body. Two Treble Hooks

Per card

No. 2700C—One each of six assorted patterns on a display card;

wt. each individual bait 5/8 oz. \$....

One card in a carton

SHAKESPEARE DOPEY

Gets 'em all big or small. Whether retrieved slowly or fast, it has a devastating wiggle. Casts easily and is especially attractive to bass, pickerel and even panfish.

1 1/4 in. Body. Two Treble Hooks

Per dozen

No. 6603WRS—White body, silver

fitters, red head

No. 6604YP—Yellow perch

No. 6603SF—Silver flash

Weight each 5/8 ounce.

One in a box, one dozen in a carton.

EGER DILLINGER

Deep running lures that insure good catches even when conditions are tough and when other types of bait fail to attract. Especially recommended for large and small mouth bass, pike, etc. Finely finished by secret process. Rustproof spinners and natural fish eyes.

2 in. Long. Two Treble Hooks

Per dozen

No. 01—White body and black stripes

No. 03—White body and red stripes

No. 05—Pearl

Weight each 1/2 ounce.

One in a box, one dozen in a carton.

ARTIFICIAL BAITS

BOMBER

An entirely new development in lures. This bait was developed by fishermen for fishermen. Bait is retrieved tall first. When retrieved it runs deep and wiggles fast. By experience it was learned that best catches are made by sending the bait down to the fish. At rest the bait floats; thus, if a snag is encountered, tension on the line is relaxed and the bait floats out.

Two Treble Hooks

Small Size	Large Size	Color	Per dozen
403	603	Gray scale	...
404	604	Red head	...
409	609	Pearl spots	...
411	611	Frog scale	...
414	614	Black, white ribs	...
418	618	Shad	...
419	619	Yellow, silver flakes	...

Average weight each $\frac{1}{2}$ ounce

WEESNER'S CASTING WEEZEL

Casting Weezel with Wiggle Disc

The original spinning or wobbling feathered minnow—a two bait in one combination—with an interchangeable spinner and wiggle disc. Each gives a distinctively different action to the feathered minnow.

Natural feathers are carefully selected and tied to a perfectly balanced lead body with lifelike head and eyes. The white tail feathers give the body an added pork rind effect. Has a positive spring weed guard, and its special English Saanich hook is designed to overcome short strikes.

No. 5—Red head, white body, white tail; wt. each $\frac{1}{2}$ oz. Per dozen \$....

One on a card, one dozen in a box.

WEESNER'S FLY ROD WEEZEL

Baby Weezel for Fly Rods

Same as the Casting Weezel, but smaller in size and furnished with spinner only.

No. 3F—Red head, white body, white tail; wt. each $\frac{1}{20}$ oz. Per dozen \$....

One on a card, one dozen in a box.

ARTIFICIAL BAITS

ARBOGAST HAWAIIAN WIGGLER

No. 1—With Single Spinner

Runs very deep—intended for deep snaggy streams where bass are found among stumps and drowned tree tops, or for deep, rocky waters.

Skirt made of 40 rubber tails.

The incredible squirming, struggling, writhing, wiggling Hula Hula dance gets bass that ignore less active baits. Most action is obtained by putting skirt on in reversed position.

Complete with skirt.

Colors—Red, white, yellow, black, red and white, red and yellow, black and white, black and yellow, black and red, white and yellow.

No. 1—Wt. each $\frac{1}{2}$ oz. Per dozen \$....

One dozen assorted colors in a box.

No. 2—With Single Spinner

Runs shallower—wiggles through and over lily pads, snags and weeds. The favorite bait in the south in thick trees, cypress swamps, etc.

Skirt made of 40 rubber tails.

The incredible squirming, struggling, writhing, wiggling Hula Hula dance gets bass that ignore less active baits. Most action is obtained by fitting skirt on in reversed position.

Complete with skirt.

Colors—Red, white, yellow, black, red and white, red and yellow, black and white, black and yellow, black and red, white and yellow.

No. 2—Wt. each $\frac{1}{2}$ oz. Per dozen \$....

One dozen assorted colors in a box.

EXTRA RUBBER SKIRTS

For use with Nos. 1, 2 and 3 Hawaiian Wigglers.

Colors—Red, white, yellow, black, red and white, red and yellow, black and white, black and yellow, black and red, white and yellow.

Large—With forty tails; for use with Nos. 1 and 2 Per dozen \$....

Small—With twenty tails for use with No. 3 \$....

One dozen in a box (specify color wanted when ordering).

ARTIFICIAL BAITS

WEEZEL REX SPOON

RS1 Pearl Finish

A first class lure in any type of water and will bring results in open pools as well as in weeds and lily pads. Can be dragged through the heaviest sort of going.

Used in combination with frog type pork chunk, it will take fish under conditions when ordinary baits are absolutely worthless.

2 $\frac{3}{4}$ in. Long, Single Hook

No. RS1—Pearl Per dozen \$....

No. RS2—Red and white \$....

Weight each $\frac{1}{2}$ ounce.

One in a box, one dozen in a carton

WEEZEL MEDAL MINNOW

One of the neatest best producing baits made. Rides upright in the water with quick erratic movements of a darting fish attempting to get away. Properly handled it will leap from the water, skip on the surface exactly like a crippled minnow.

2 $\frac{3}{4}$ in. Long, One Treble Hook

Medalminnow—Stainless, chrome finish; wt. each $\frac{1}{2}$ oz. Per dozen \$....

One in a box, one dozen in a carton

JOHNSON SILVER MINNOW

Especially constructed for fishing in weedy waters. Will not spin and gather weeds, but wiggles through. Weed guard will not interfere with hooking fish. Fast wiggling motion.

Can be used alone or with a pork strip or hunk.

Bait Casting Size: 2 $\frac{3}{4}$ in. Long, No. 4/0 Hook Per dozen \$....

No. 2—Silver plated; wt. each $\frac{1}{2}$ oz. \$....

Fly Casting Size: 1 $\frac{1}{2}$ in. Long, No. 5 Hook Per dozen \$....

No. B—Silver plated; wt. each $\frac{1}{24}$ oz. \$....

One in a box.

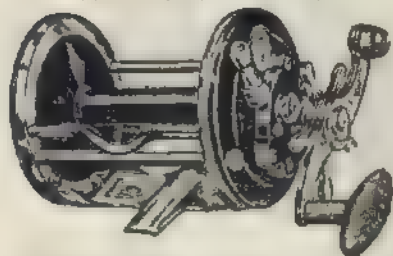

10. Pennant's Parakeet (*Platycercus Pennantii*)

FISHING REELS

Each **\$5.00**

No. 1111—Cigarette Box. Same as above chests but without musical unit.

Each **\$1.00**

No. 1187—Children's Music Box. The kiddies will love it! This colorful little music box comes in many different assorted covers which would surely appeal to the children. The box is fully decorated with small nursery rhyme characters. By a simple twist of the dial a tune comes tinkling out of it that even the grown ups would get a kick out of. When the tune plays, a panorama of scenes shows up on the dial as the music box starts to wind. The children will enjoy turning it many times over.

It is immensely sturdy built, it can stand any amount of handling. Size, 8 1/2 inches width, 3 inches, depth, 3 1/2 inches.

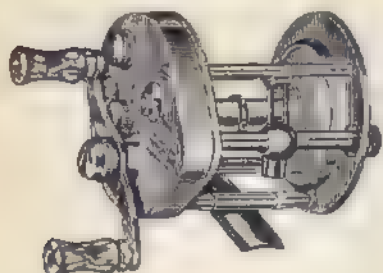

Each **\$4.95** Each, lots of 6 **\$4.75**

No. 6M1608—Children's Musical Radio. Charmingly styled in the manner of the new table mode, this children's music box is an exact replica of a real radio. Wound by the dial on front, the Swiss movement plays children's music while the dial revolves bringing to sight the top hatted fireman, the juggling juggler, the tumbling clown, a bike riding bear, performing acrobats, a dancing harem and other well known circus performers. Formed of clown decorated ivory plastic, the set measures 8 1/4 x 5 1/2 inches, overall.

Each **\$4.50** Each, lots of 6 **\$4.25**

FISHING REELS PFLUEGER SUPREME

Level Winding, Anti-Back-Lash Quadruple Multiplying

Satin finish nickelum and polished diamolite; phosphor bronze bearings; phosphor bronze generated spiral tooth gear; tool steel generated spiral tooth pinion; adjustable back sliding click; balanced crank, pyralin handles, mottled black and pearl

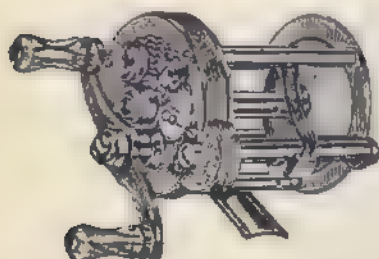

Complete with cork arbor spool filler, Marvel pocket oiler, Speede reel oil. Run-free gear grease, Little Giant screw driver wrench, soft rubber back plate ring and one pair soft rubber handle grips.

Each

No. 1573—Cap. 130 yds. 18 lb. test silk line, diam. of plates $2\frac{1}{4}$ in., length of pillars $1\frac{1}{2}$ in.; wt. each $7\frac{1}{2}$ oz. \$.....

One in a leather bag, in a box.

PFLUEGER SUMMIT

Level Winding, Anti-Back-Lash Quadruple Multiplying

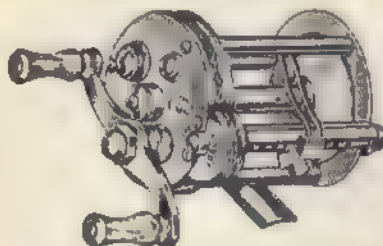

Polished diamolite finish on fancy nickel silver; phosphor bronze bearings; diamalloy pivots; bronze gear; tool steel pinion; adjustable back sliding click; genuine scarlet agate jewels; fancy balanced crank with two pyralin mottled grips

Each

No. 1993L—With aluminum spool, cap. 110 yds. 18 lb. test silk line, diam. of plates 2 in., length of pillars $1\frac{1}{2}$ in.; wt. each $7\frac{1}{2}$ oz. \$.

One in a leather bag, in a box.

FISHING REELS PFLUEGER NOBBY

Level Winding, Anti-Back-Lash Quadruple Multiplying

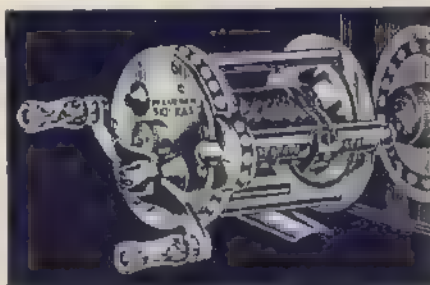

Satin finish nickelum trimmed in polished diamolite; phosphor bronze bearings; rustproof diamalloy spool pivots and gear post; spiral cut tool steel pinion; adjustable back sliding click; genuine scarlet agate jeweled oil cups; fancy balanced crank.

Each

No. 1963—Cap. 110 yds. 18 lb. test silk line, diam. of plates 2 in., length of pillars $1\frac{1}{2}$ in.; each $7\frac{1}{2}$ oz. \$..

One in a box

PFLUEGER SKILKAST

Level Winding, Anti-Back-Lash, Quadruple Multiplying, With Mechanical Thumber

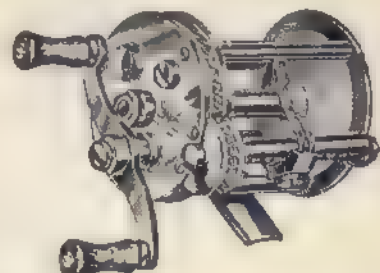

Polished diamolite finish, precision built extra wide phosphor bronze line guide; mechanical thumber does away with all need for thumbing reel after cast is started—adjustable with micro-precision to suit line and lure used. It affords distance casts without any tendency to over-run or back lash—thumber operates only when line is running out; replaceable bearings for double thread shaft; light weight aluminum spool with cork arbor cemented in perfect balance.

Each

No. 1953—Cap. 75 yds. 18 lb. test silk line, diam. of plates 2 in., length of pillars $1\frac{1}{2}$ in.; wt. each 11 oz. \$..

One in a box

FISHING REELS PFLUEGER AKRON

Level Winding, Anti-Back-Lash Quadruple Multiplying

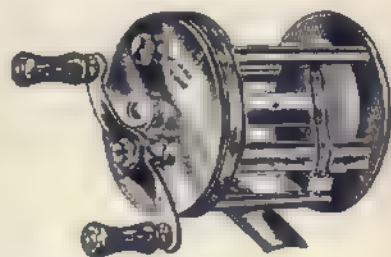

Polished diamolite finish; phosphor bronze bearings; diamalloy spool pivots and gear post; adjustable back sliding click; tension oil cups, each with bearing oil feeder are inset with large genuine agate jewels; fancy balanced handles.

Each

No. 1893H—With aluminum spool, cap. 110 yards. 18 lb. test silk line, diam. of plates 2 in., length of pillars $1\frac{1}{2}$ in.; wt. each 10 oz. \$.....

One in a box

PFLUEGER TRUMP

Level Winding, Anti-Back-Lash Quadruple Multiplying

Polished diamolite finish; jeweled tension oil cups inset with scarlet jewels; hardened steel pivots; adjustable back sliding click; steel pinion; anti-back-lash operated by knurled button located near edge of front cap; line guide loop travels entire width of spool, insures full and even wind of line; fancy balanced crank; mottled brown pyralin handles.

Each

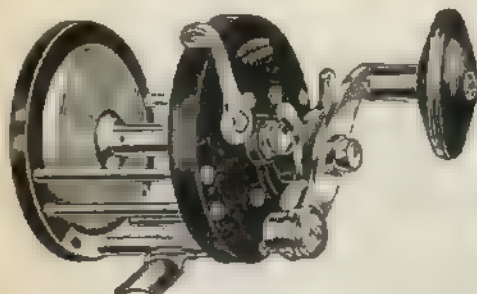

No. 1943—Lightweight, cap. 90 yds. 18 lb. test silk line, diam. plates $2\frac{1}{4}$ in.; length pillars $1\frac{1}{2}$ in.; wt. each $7\frac{1}{2}$ oz. \$.....

One in a box.

FISHING REELS

SALT WATER SURF CASTING

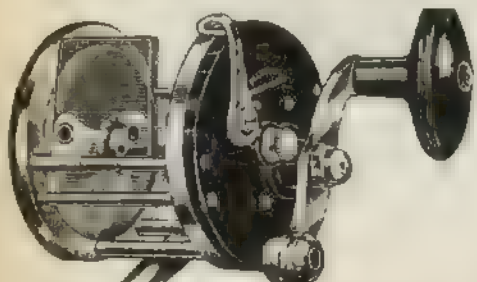

PFLUEGER TEMCO

Double multiplying, free spool reel with star drag. Perma mesh gears. Black bakelite sidewalls with polished chromium metal parts. Open top construction with top free spool lever. Large torpedo shaped bakelite handle knob.

No.	Capacity	Wt. each	Each
2075	100 yds.	16 ozs.	...★\$9.45

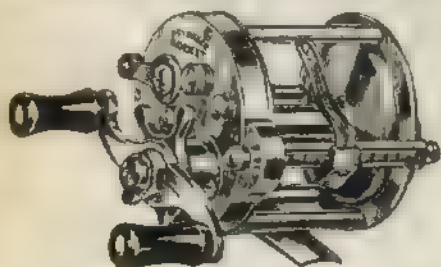

PFLUEGER INTEROCEAN

Triple multiplying, light tackle, salt water type free spool reel of nickel silver with black bakelite metal-bound side plates. Leather thumb brake, sliding click, bronze spool pivot bearings, and adjustable tension oil cups. Bakelite torpedo shaped handle

No.	Capacity	Wt. each	Each
1885/S	190 yds.	12 1/4 ozs.	...★\$6.75

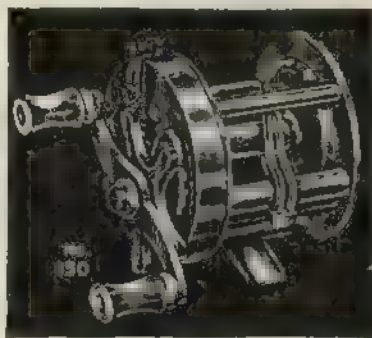

PFLUEGER ROCKET LEVEL WIND

Triple multiplying, level wind and anti-backlash reel with adjustable star drag. Made of polished diamolite metal. Anti-backlash thumbs the spool automatically and may be thrown off altogether if desired. Extra pawl is provided with each reel

No.	Capacity	Wt. each	Each
1835	170 yds.	15 ozs.	...★\$18.50

PERFECTORINO

A light tackle reel especially made for steelhead and salmon fishing. Quadruple multiplying. Non-reversing crank. Free spool with star drag. Level wind, anti-backlash with three piece takedown construction. Chrome plated frame. Capacity, 150 yards 18-pound test nylon line.

No.	Capacity	Wt. each	Each
850	150 yds.	13 1/2 ozs.	...★\$16.00

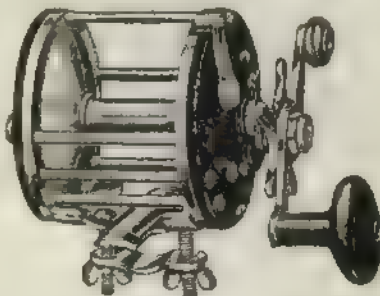

COXE

Level wind casting and trolling reel with star drag and free spool action. Special spool drag on end plate to eliminate backlash in casting.

No.	Capacity	Wt. each	Each
1815L	150 yds.	14 ozs.	...★\$18.50

COXE

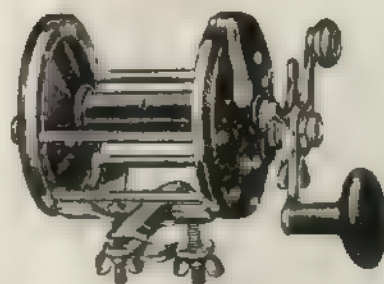

A big game fish reel with bakelite side plates, reinforced with metal bands. Fitted with star drag, and throw-off lever. Metal spool. Perfectly balanced handle with large torpedo type grip. Fitted with the Coxé silent ratchet, auto-mesh, drag and reel clamps. All metal parts chrome plated.

No.	Capacity	Wt. each	Each
940	400 yds.	30 ozs.	...★\$12.00
950	500 yds.	31 ozs.	...★\$13.00

All above, one in a carton
★ Factory Suggested Resale Price

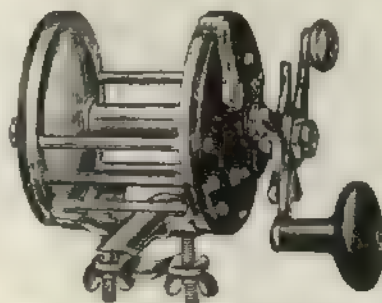

COXE

Black bakelite side plates, reinforced with metal bands. Patented Coxé auto-mesh, and fitted with bakelite spool. Star drag and throw-off lever, and torpedo type handle. Supplied with reel clamps. All metal parts heavily chrome plated.

No.	Capacity	Wt. each	Each
622	250 yds.	21 ozs.	...★\$11.00

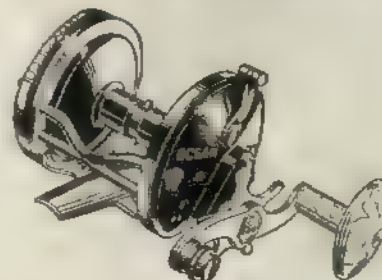

COXE

Black bakelite side plates, reinforced with metal bands. Patented Coxé auto-mesh. Star drag and throw-off lever. Metal spool. Large torpedo type handle. Supplied with reel clamps. Recommended for boat, pier, or barge fishing. All metal parts chrome plated.

No.	Capacity	Wt. each	Each
625	250 yds.	20 ozs.	...★\$10.00

OCEAN CITY INDUCTOR

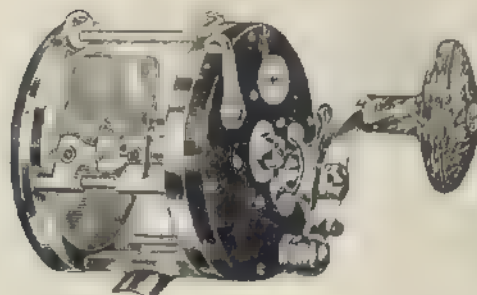

A new type reel that will revolutionize surfcasting, squidding and live bait fishing. A magnetic principle built into the left side plate of reel, offers speed control and eliminates 99% of backlashes if used properly. Permits free casts without fear of over-runs. Fitted with star drag. Packed in a chamolite bag.

No.	Capacity	Wt. each	Each
250R	200 yds.	18 ozs.	...★\$25.00

FISHING REELS

SALT WATER SURF CASTING

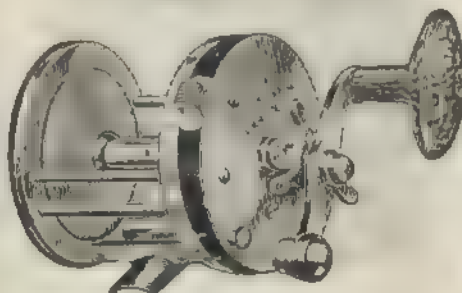

PFLUEGER TEMPLAR

A strong and powerful reel for ocean fishing, with free spool, gear ratio, $2\frac{1}{2}$ to 1. Internal star wheel drag with gears always in mesh. Drag tension adjustable when fish is in play. Black bakelite side-walls with nickel silver band. All other metal parts, heavily chrome plated. Fitted with line harness attachment

No.	Capacity	Wt each	Each
1419 $\frac{3}{4}$	400 yds.	3 $\frac{1}{2}$ lbs. . .	\$45.00
1420 $\frac{1}{2}$	500 yds.	4 $\frac{1}{2}$ lbs. . .	\$49.50

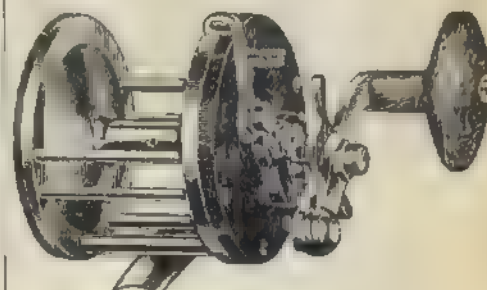

PFLUEGER CAPITOL

Black bakelite side plated bound with heavily chromium plated metal bands. Nickel silver free spool controlled by throw-off lever on upper edge of reel. Star interval drag operated by wheel next to handle. Take apart construction controlled by locking screw. Removable bushings and patented adjustable tension oil cups. Fancy balanced crank with colored bakelite torpedo handle.

No.	Capacity	Wt each	Each
1985	100 yds.	15 ozs. . .	\$13.75
1986	250 yds.	22 ozs. . .	\$15.40
1989	300 yds.	28 ozs. . .	\$16.95

PFLUEGER SEA-VUE

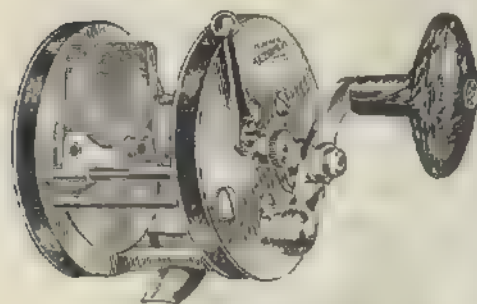

DOUBLE MULTIPLYING

Bakelite side plates with chromium plated metal bands and double bar construction. Satin finish free spool reel with perm-mesh gears and star drag. Adjustable back-sliding click. Fitted with mechanical thumber to control line while running out. Balanced crank with torpedo shaped handle.

No.	Capacity	Wt. each	Each
2018	250 yds.	21 ozs. . .	\$18.75

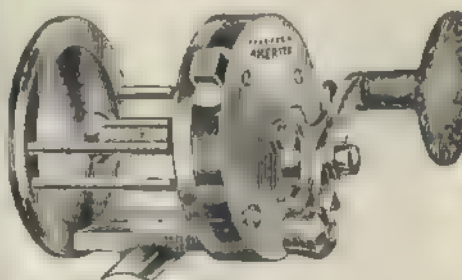

PFLUEGER AUTOPLA

Anti-slack safety spring line control, plays fish automatically. No possibility of a broken line through a sudden rush of the fish. All metal parts are extra heavy chromium plated nickel silver. Double multiplying. Phosphor bronze bushed for bearing with spiral tooth gears. Free spool construction controlled by shifting lever. Leather thumb brake. Balanced crank with colored bakelite torpedo handle.

No.	Capacity	Wt. each	Each
2475	100 yds.	24 ozs. . .	\$15.00
2479	300 yds.	31 ozs. . .	\$18.00

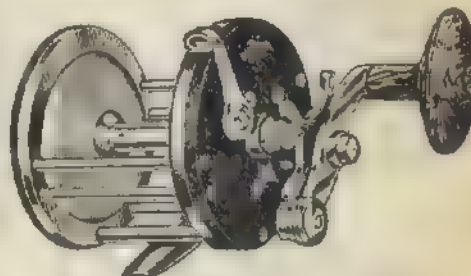

PFLUEGER AKERITE

Black bakelite and nickel silver side plates. A take apart reel with free spool operated by pressing in lever on front edge side plate. Extra heavy chromium plating on all exposed metal parts. Internal star drag, double side bar construction. Fitted with mechanical thumber operating only while line is running out. Balanced handle with torpedo shaped handle.

No.	Capacity	Wt each	Each
2068	250 yds.	25 ozs. . .	\$16.95

PFLUEGER OHIO

DOUBLE MULTIPLYING

Satin nickel silver free spool with chromium plated metal bands, bound on black bakelite side plates. Internal drag operated by star wheel permits adjusting tension and smooth action, but strong drag. Adjustable tension oil cups with removable bearings. Throw-off lever with balanced crank, single rubberoid handle.

No.	Capacity	Wt. each	Each
1978	350 yds.	20 ozs. . .	\$11.00

ELECTRIC OUTBOARD MOTORS

PIONEER

Dependable electric outboard motor, ideal for children and family use and perfect for fishing. Has no complicated machinery, no noise or vibration, no gasoline, grease or smell, requires no cranking.

Motor is 6-12 volt air cooled equipped with life-time grease seal bearings. Three speeds available with 6 volt hook up and three additional speeds on 12 volt series hook-up. Speed control lever is within easy reach of the operator.

Cable drive eliminates power wasting gears and keeps motor out of water. The adjustable mounting bracket permits motor to be swung a full 360 degrees. This permits a full reverse. Tiller lock may be used to lock the position of motor to drive boat over a fixed course.

Without Batteries

Pioneer—For 6 or 12 volt operation, complete with battery cables; net weight each 23 lbs. ...

One in a carton.

OUTBOARD MOTOR LUBRICANT

DIXON'S NON-LEAK

A non-fluid lubricant for use in the outboards lower unit. Eliminates lubricant drag resulting in higher speed and lower gasoline consumption.

A rugged lubricant, a compound of several non-viscous waterproof lubricants, one being Dixon's graphite, recognized in its own right as the worlds most stable and lasting lubricant.

NOTE

The Motor Boat Law of April 25, 1940, an Act of Congress, became effective and in full force on April 25, 1941.

It is important that your Life-Save Equipment complies with the Motor Boat Law and that you are fully acquainted with the provisions of this Law so that you can assure your customers that the products they are buying are of an approved type.

Ta-Pat-Co Products bearing Government approval numbers comply in every way with these regulations.

The Law requires that motor boats in Class A, 1 or 2 not carrying passengers for hire provide either an approved buoyant cushion or an approved life preserver for each person on board.

LIFE SAVE VESTS

TA-PAT-CO

Sportster

Made of strong, closely woven, snag resistant olive drab cloth.

Filled with highest quality new Java Kapok, thus guaranteeing maximum buoyancy. Always ready — non-inflated, hence puncture-proof.

No padding around neck and shoulders, adds much to comfort.

Double bend at waist allows vest to turn up when sitting down or bending over. Also prevents vest from pushing up around head.

Reversible—impossible to put on wrong. Special tunnel construction at waist with draw tape enclosed, assures snug fit.

Cut out allows access to pockets and free action of lower part of vest.

Guaranteed to comply with Act of April 25, 1940, for motor boats in Classes A, 1 and 2 not carrying passengers for hire. Government approval No. B62.

No. 10A Universal size, to fit

small, medium and large person, web strap fasteners and adjustable feature under arms insure comfortable fit; wt. each 2¾ lbs. \$. . .

Six in a carton

TA-PAT-CO STAY-A-FLOAT

For Children and Youths

A neat, compact, cloth covered, Kapok filled swimming belt for children and adults, permits the child to play in and about the water with safety.

Compactly filled with specially prepared new Java Kapok, which is five to six times more buoyant than cork. Covered with closely woven high grade cloth. Straps over the shoulders are adjustable and the vest fastens in front with strong webbing ties. It also has special web harness which passes between the legs and buckles in front. Red or orange colors.

63 1/2	3 x 3 1/2 in.	2 1/2 lbs.	21.00

MILLER COMPOSITION

GOODRICH

The head is made of multiple layers of hard fabric completely imbedded in tread rubber. Wears like a tire, but does not bounce or rebound. Black in color. Used in working sheet metal and in milk plants for starting pipe joints when pipe is dismantled for regular cleaning. The lighter mallets are used by jewelers, cabinet-makers, radio builders, and similar tradesmen.

No.	Size	Wt. head	Handle	Per doz.
8	2 x 3 1/2 in.	8 oz.	11 in.	\$18.00
16	2 1/2 x 4 1/2 in.	16 oz.	12 in.	\$2.00
24	2 3/4 x 5 1/2 in.	24 oz.	14 in.	\$9.20
41	3 1/2 x 5 1/2 in.	40 oz.	13 in.	\$4.00

RUBBER

Hard composition rubber construction. Won't crack, dry or chip. Especially useful to millwrights and sheet metal workers. Outlasts rawhide, lead or copper mallets.

No.	Size	Handle	Wt. each	Each
2	2 x 3 1/2 in.	12 in.	1 1/4 lbs.	\$1.40
3	2 1/2 x 4 in.	14 in.	2 lbs.	2.20

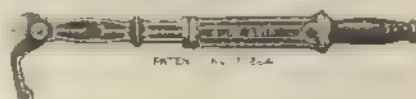

All the above, loose

NAIL PULLERS
CYCLOPS

NEW PLASTIC PORTABLE WADING POOL INTRODUCED

A brand new plastic portable Wading Pool made from Vinylite and which incorporates many new patented features, is being manufactured by the Alvarez Patent Corporation who have appointed Redell & Demov, Inc., of New York City as their exclusive Eastern sales representatives and distributors.

There are two models now comprising the line—Model "A," incorporating the use of a two-piece mat to be placed underneath the pool when in use, and Model "B," which has a double thickness plastic bottom which obviates the need of the mat.

Both of these types inflate to dimensions of 6' x 4', with a capacity of 200 gallons of water. However, the folded size of the Model "A" is only 36½" x 7½" x 7½", weighing 8½ lbs and the Model "B" folds to 12" x 10" x 6" and weighs 6½ lbs.

For extra insurance against puncture damage a complete repair kit is included in each package.

Two-foot-high side walls which slant inward at a 15-degree angle and a reinforced plastic upper rim eliminates spilling when the portable pool is filled with water to the recommended depth of 14 to 16 inches.

It can be easily inflated with a gasoline station pump, the ordinary bicycle pump or, through the ingenious arrangement of an additional valve attachment, the exhaust end of the regular home vacuum cleaner will accomplish the same purpose.

The factory is in full production at this time and is prepared to make early spring delivery at a price aimed at volume sales for the retailers. Samples are now on display at the showroom of Redell & Demov, Inc., 230 Fifth Ave. (at 27th St.), New York City, and will also be shown by them at the McAlpin Hotel, Room No. 741, during the Toy Fair.

FRANK H. NEELY IS PRESIDENT OF RICH'S

Election of Frank H. Neely as president of Rich's, Inc., has been announced by the board of directors of that company. Mr. Neely succeeds Walter H. Rich, who died recently. Richard H. Rich, Ben R. Gordon and Oscar R. Strauss are to continue as vice-presidents.

Mr. Neely's election assures a continuity of management in the department store firm which in 1946 had retail sales of \$42,410,512, the greatest sales of any store south of Philadelphia and a record for the 80-year history of Rich's. As executive vice-president since 1923, Mr. Neely had been chosen by the late Walter H. Rich to be the chief operating official of the store and to carry out the broad policies which Mr. Rich laid down.

Mr. Neely also is chairman of the Federal Reserve Bank of Atlanta and has served in a notable series of civic posts. He was awarded a Chamber of Commerce trophy for distinctive and unselfish public service in 1926. During World War II he directed mobilization of the South's industrial resources as regional chairman of the War Production Board.

FIRE EXTINGUISHERS

PYRENE 4-STAR

Foam Type

Blankets fire in hazardous materials such as gasoline, oils, naphtha, tar, grease, and inflammable solvents as well as ordinary combustible materials. Discharges about 22 gallons of fire-smothering foam which spreads over burning surface and cuts off the supply of oxygen.

Has seamless drawn one-piece shell and dome and patented solderless collar.

Tested to withstand 350 pounds pressure.

Labeled by Underwriters' Laboratories.

Polished Copper

Complete with charge, wall hanger and recharge date tag.

Each

No. P-13—Cap. 2½ gals., 24 in. high, 7 in. diameter; ship. wt. including charge 25 lbs.; wt. charged ready for use 38 lbs.\$37.00

One in a carton.

PYRENE

Foam Type

For use against fires in oil, gasoline, naphtha, tar, wax, grease, shellac and inflammable solvents.

This extinguisher, similar in operation to the Pyrene Foam 4-Star, is available at lower cost without sacrifice of effectiveness. Produces about 22 gallons of foam for smothering fires in flammable liquids and ordinary combustibles. It is tested to 350 pounds hydrostatic pressure

Labeled by Underwriters' Laboratories.

Standard Finish

Complete with charge, wall hanger and recharge date tag.

Each

No. PX-13—Cap. 2½ gals., 24 in. high, 7 in. diameter, ship. wt. including charge 25 lbs.; wt. charged ready for use 38 lbs.\$33.00

One in a carton.

Our many years of consistent growth is the dealer's assurance that our knowledge of selections is a real asset

Send us your mail orders for quick and efficient service!

FIRE EXTINGUISHERS

PYRENE

Soda-Acid Type

Discharges a 40 ft. stream, effective on incipient fires in ordinary combustible materials.

Shell, dome and bottom are cold-rolled copper with seams thoroughly sweated and backed with solder. Side span is riveted and soldered. Tested to 350 lbs. pressure.

Labeled by Underwriters' Laboratories.

Standard Finish

Complete with charge, wall hanger and recharge date tag.

Each

No. SX-13—Cap. 2½ gals., 24 in. high, 7 in. diameter; ship. wt. including charge 19½ lbs.; wt. charged and ready for use 40 lbs.\$30.00

One in a carton.

Vaporizing Liquid Pump Type

Double-action pump with patented rotating pickup will discharge a steady, continuous stream 25 to 30 ft., no matter in what position the extinguisher is held. For smothering all kinds of fire in its incipient stage

Use only Pyrene fire extinguishing liquid, as other liquids may cause corrosion or make use on electrical equipment dangerous.

Inspected and labeled by the Underwriters' Laboratories and approved by Associated Factory Mutuals, The U.S. Bureau of Marine Inspection and Navigation and Good Housekeeping Institute.

Brass Finish

Complete with charge and wall bracket.

Nos.	C21	C31
Capacity, qts.	1	1½
Wt. each, lbs.	7½	11½
Each	\$15.00	18.00

One in a carton.

Auto Type

Modeled after one-quart sizes listed above and has a special bracket for mounting in automobiles.

Quickly kills incipient fires in gasoline, oil, wood, upholstery or electrical system. Liquid is non-deteriorating and anti-freezing

Every motorist needs this protection.

Brass Finish

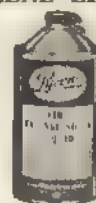

Each

No. C11A—Cap. 1 pt., wt. each 5½ lbs.\$14.00
Twelve in a carton.

FIRE EXTINGUISHER

RECHARGES

PYRENE LIQUID

For refilling vaporizing liquid type extinguishers.

Can be safely used on electrical fires. Will not injure delicate fabrics or sensitive machinery. Will not freeze at 50° below zero F.

before he starts to school, although he has never had any trouble with them aside from a few sore throats.
—Mrs. C. D., Ohio.

Let your family doctor make the decision. From what you say, however, I doubt that he would recommend an operation if your son has never had trouble with his tonsils.

Nowadays, doctors do not believe in removing tonsils and adenoids just as a matter of course, because we have found that *only about a fifth of our children ever need this operation.*

If, however, a child has repeated tonsillitis, repeated or severe bouts of sore throat, frequent colds with sore throat or abscessed ears, the chances are that the tonsils and adenoids should be removed. But not otherwise—not even if the tonsils are enlarged.

Unless tonsils and adenoids become so large as to interfere with breathing, we no longer advise their removal unless they are also infected and are causing trouble. Normal tonsils probably act as a pretty good barrier against respiratory infections, because they filter out some of the germs that get in the nose and throat.

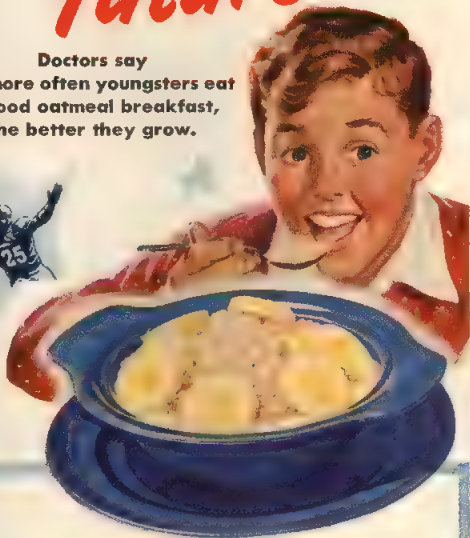

I read the letter from the young mother (*Farm Journal*, May, 1948) who seemed a bit put out that she should be "expected" to nurse her baby. It burns me up to hear such foolishness! I wonder if a good selling point for breastfeeding might not be that it is the best protection against interfering inflaws. No more of this "Oh, give me a bottle of formula and let me have him this afternoon." No sir, when a howling infant refuses a nipple and wants Mama, believe me they are anxious to let Mama keep him.
—Mrs. R. C. B., Oregon.

I must say I had never thought of this particular angle, but I certainly

QUAKER OATS HELPS GROW

"Stars of the Future"

Doctors say
the more often youngsters eat
a good oatmeal breakfast,
the better they grow.

THE GIANT OF THE CEREALS IS QUAKER OATS!

A GIANT in Nutrition!

Your youngsters get more growth, more endurance—your grownups get more energy, more stamina from nourishing oatmeal than any other whole-grain cereal! That's why Quaker Oats is recommended for a better breakfast! According to a recent survey, *only 1 school child in 5* gets the kind of breakfast he should have. So doctors say, the more often youngsters eat a good oatmeal breakfast the better they grow! Serve Quaker Oats often!

A GIANT in Value!

Delicious Quaker Oats still costs less than a penny a serving! That's really amazing in these days of higher food prices! Saves precious time, too—Quick Quaker Oats cooks in 2½ minutes!

A GIANT in Flavor!

People eat more Quaker Oats than any other cereal in the world because THEY LOVE THAT QUAKER OATS FLAVOR! Tempting recipes on the package. Remember to buy delicious Quaker Oats.

FOR THE NEW YEAR...

ARRANBEE extends every good wish for your happiness and prosperity. We regret our inability to meet all of your last year's demands for Arranbee dolls but are pleased to announce that we look forward to an increased production in 1948. Our famous Arranbee family:

LITTLE ANGEL—DREAM BABY
ANGEL SKIN—NANCY
NANCY LEE

will be made of plastic, a feature that will add new laurels to these famous quality dolls at popular prices.

ARRANBEE DOLL CO.

Showroom and Office: 881 BROADWAY, NEW YORK 3, N. Y.
(Corner 19th Street)

DONALD

DUCK

Dressed in his inimitable sailor outfit, smartly styled by the Arranbee Doll Co.—he's a sure-fire seller!

Donald has a composition head and is mounted on a real steel spring. He's set in a sturdy all-wood box that has locked cornered metal hinges—and an improved metal push button. The box is attractively covered with fine paper print.

*it's amazing-
it's exciting- it's electronic*

The new Franklin "Electric Eye" Shooting Gallery is an interesting example of the unusual playthings you can design inexpensively around RCA Electron Tubes.

Aim the rifle—pull the trigger—and if you're good, a narrow beam of light strikes the bull's-eye of the moving target. Instantly and automatically an RCA Phototube flashes a light and sounds a buzzer, indicating a direct hit. More fun than a barrel of monkeys... yet the whole outfit retails for less than \$15.00!

Maybe you would like to cook up an electronic game

that works on *invisible* light... or an educational toy that creates its own brand of music. But whatever your ideas, the chances are that you can solve your design problems—simply and inexpensively—by using RCA Electron Tubes. It will pay you to investigate their possibilities.

RCA Application Engineers will be pleased to consult with you and advise on the adaptation of RCA Electron Tubes to your designs—or place you in touch with competent engineering organizations which can translate your ideas into practical working form. Just write RCA, Commercial Engineering, Section CS73, Harrison, N. J.

**THIS TUBE CAN DO
WONDERS FOR YOU**
This inexpensive phototube will respond instantly to a beam of light to perform a limitless number of small "miracles"

gen. If the powder stays white, your
corn needs nitrogen.

Dr. Roger Bray of the University
of Illinois suggests testing in mid-July,
early and mid-August, and early Sep-
tember.

You can get the powder from Ur-
bana Laboratories, or the Illinois Soil
Testing Service, both in Urbana, Ill.

Here's the Prospect For Soybean Growers

Soybean growers have both good
and bad prospects to look forward to,
the American Soybean Association was
told in Memphis this week.

Industrial uses of soybean oil are
expanding. Taxes on oleomargarine
may be repealed. But synthetic deter-
gents, which use no oil, are cutting into
the oil-consuming soap industry.

Northern growers probably also
face more competition from the South.
Better varieties, and a possible cut in
cotton acreage, will boost the crop in
Dixie.

Secretary George M. Strayer re-
ported that \$40,000 raised from a check-
off on growers will be used for educa-
tional work among growers, to promote
use of soybean products, including soy
flour, to pay for research on soybean dis-
eases and insect pests, as well as to fi-
nance the drive for repeal of margarine
taxes.

Strayer told *Farm Journal* that its
September report (page 43) was incom-
plete because it did not include all these
uses for the fund.

Will We Feed Hogs Under Lights?

Will hogs gain faster if you give
them light so they can eat a midnight
snack? Three good Corn Belt hog men
have tried it and swear by it.

Robert Turner of Illinois turned the

Robert Turner of Marshall County,
Ill., used lights to get pigs to feed

You can be sure...if it's Westinghouse

Radio-phonographs may look pretty much alike to you... but there can be a big difference in the listening. You'll get far more enjoyment from a set built up to a standard than you will from one built down to a price. And you don't have to be an expert to tell the difference. You can be *sure*... if it's Westinghouse.

Westinghouse radios and radio-phonographs are available in a wide variety of models. Illustrated is the 186, a bow-front classic with exclusive Automix record changer, Electronic Feather reproducer, and Rainbow Tone FM. Home Radio Div., Westinghouse Electric Corporation, Sunbury, Pa.

Listen...and you'll buy **Westinghouse**

Listen to Ted Malone every morning Monday through Friday ABC Network

These Twin Triumphs in Tone
Found *Only* in Zenith

THE ONE AND ONLY *Cobra Tone Arm*...

Millions have listened—compared—and found that this sensational new way to play records has no equal. Invented by Zenith, perfected by Zenith, the Cobra is yours in no other radio, at any price! Reproduces tones on a Radiocast Wave. So superior that over 700 AM and FM radio stations use the Cobra to broadcast records. Brings out tone beauty never heard before, without a trace of annoying scratch or vibration. Keeps your favorites sounding like new for over 2,000 plays, by actual test!

THE ONE AND ONLY *Zenith-Armstrong FM*...

Once you hear FM on a Zenith, you'll never be satisfied with any other. For only Zenith combines the genuine Armstrong FM circuits with Zenith's patented "power-line" antenna. This brings you FM at its finest... on both FM bands... *without an aerial!* Just plug in—and enjoy glorious static-free fidelity and sharp non-fade tuning not possible with imitation FM sets. You also get the famous Radiorgan Tone Control and other "exclusives" assuring Zenith tone perfection for every kind of radio program.

OFFICIAL U.S. PATENT OFFICE REGISTRATION NO. 11,240

New Zenith "HEPPLEWHITE"

shown closed above, open at right. Console combination with Cobra Tone Arm, Silent-Speed Instant Record Changer—handles 10-inch records, 12-inch, or both sizes *unwind*, FM on both bands, Standard Broadcast, Radiorgan Tone Control, 100% vacuum tubes.

\$329.50*

Zenith Challenges Comparison!
Your radio dealer invites you to compare tone, performance, beauty, durability—before you buy any radio. See and hear the features exclusive with Zenith and you'll agree—in other comparisons such as Zenith's Models from \$26.95 to \$675.*

A black and white photograph of a smiling woman with short, dark, wavy hair, wearing a light-colored jacket with a large star on the left chest. She is holding a RANGER mechanical train set. The train set includes a steam locomotive, several passenger cars, and a freight car, all on a track that curves around a landscaped base with a station and a bench. The background is dark.

ON THE RIGHT TRACK TO **BIGGER PROFITS**

Looking for steady, fast-moving items to keep putting profits in your pocket? RANGER'S your answer, with the smartest, keenest line of toys ever. Bright, colorful action toys in miniature—each a pint-size gem with a man-size sales wallop. Take little space on your shelves, but they're big profit makers. Why not see for yourself?

RANGER

MECHANICAL TRAIN and TRACK SET

A complete layout including mechanical engine with 3 cars, landscaped base with imbedded track, plus tunnel and station. Sturdy, finished quality—brightly lithographed all-metal construction; all edges concealed. Individually boxed.

Send for catalog sheets and price list.

You Can Cook Steaks For 10 Persons In 10 Minutes With A New Hotpoint Automatic Range

America's Leading Electric Range

COMPARE! Revolutionary Speed Broiler— Plus 11 Great New Advancements!

Now you can broil 10 steaks to perfection at one time . . . in Hotpoint's larger, *better* broiler! But that's not all. You get superb styling, matchless convenience plus 11 important new improvements with Hotpoint—America's finest, fastest and *most* responsive electric range!

COMPARE! Exclusive Sealed-Heat Oven For World's Best Baking Results!

Only Hotpoint's advanced design brings you this amazingly efficient oven—the automatic Sealed-Heat Oven for far better baking! You get maximum usable space, because the heating unit is sealed *beneath* the oven—not inside.

COMPARE! 33% Greater Surface Capacity —4 Units Plus Thrift Cooker!

You get a third more top-of-range cooking capacity with Hotpoint's *four* lifetime, pan-hugging Calrod® units. One is easily lowered for deep-well cooking with the handy Thrift Cooker that's provided. See these and many more outstanding features in the brilliant new Hotpoint Automatic Range. You'll agree it's Hotpoint for beauty, performance and value! Your nearest dealer is listed in the phone book.

TUNEMASTER

The Versatile Belt for
Composing Hundreds of Tunes

Use as a composing instrument, but also the KARIOLA can play as easily. TUNE MASTER Belt. Next, push one wooden peg in hole of same color as key designated on the belt. Push down on the keys. With a little imagination you can get any tune you wish. TUNE MASTER Belt is the secret to this new business.

PERMANENT DISPLAY ROOMS

200 Fifth Ave., New York

KARIOLA

THE Sensational TOY MUSIC BOX

Now more colorful, more brilliant, new dynamic sales appeal! That's the vastly improved KARIOLA. And, best of all, mass production plus national acceptance has brought the retail price down to a new low of \$3.98.

Same exquisite bell-like musical tone. Same tremendous play value—a highly educational and entertaining musical toy. Tunes easily set up on music roll by placing wooden pegs in holes designated by colored arrows. Pegs put in 'red arrow' holes play one tune, in 'green arrow' another tune, and 'yellow arrow' holes still another. When belt turns, pegs strike a set of keys which in turn strike a diatonic scale of aluminum pipes.

We repeat—The KARIOLA does not retail at fancy prices. Grandpa paid for his 'Music Box' but at the new low \$3.98 which invites high volume plus a fine profit for you.

NATIONAL EXHIBIT ROOMS 424, 200 FIFTH AVE., CHICAGO 4, ILL.

WANNA BUY A *HOT* CAR ?

Or a truck?—
Or a steam roller?—
Or maybe a jeep?

LINES BROS. LTD. post-war assortment of **MINIC** police cars, jeeps, racing cars, trucks along with many other new types, are a colorful, streamlined reminder that quality mechanical toys are really back and better than ever!

These scale model clock-work toys are built to stand rough treatment and tough going in a playground, a playroom or even in that sand lot down by the corner. Kids love to spend long, thrill-packed hours with **LINES** true to life scale models.

These **MINICS** are not just wind-ups—they're run by clock-work! That means added realism as they scoot all over and seem to take forever to run down. And don't forget, the name **LINES BROS. LTD.** is your guarantee of product dependability, quality and long life.

By the way, **Britains Ltd.** of London has just sent us lots and lots of cavalrymen, cowboys and Indians, Arabs and British Guards in brilliant parade dress. They're all modeled to scale and ready to go into action for you.

REMINGTON LOADED SHOTGUN SHELLS

Remington's new patented Corrugated Shell is faster forcing, easier extraction and smooth ejection. These new improvements make the shell distinctive, as well as stronger and tougher, and non-skid in handling.

KLEANBORE NITRO EXPRESS

Nitro Express load is the outstanding heavy load. Longest range, hardest hitting, with the most even pattern. A wet-proof, corrugated, green colored Nitro Club shell loaded only with a maximum charge of Progressive burning powder and a maximum charge of shot. Fitted with the Remington Kleanbore primer to prevent rust, corrosion and pitting.

MAGNETIC ACTION ICE HOCKEY GAME

Introducing a fast-action magnetic hockey game for two or four players. The men of opposing red and blue teams, moved by Magnetic Remote Control, skate rapidly over the ice, following the moveable puck to score goals as in real hockey.

We also manufacture these Magnetic Action Toys, patented in U. S. A. and Canada

MAGIC FARMYARD • SHIPS IN MOTION • MAGIC RABBIT RUN

REMOTROL COMPANY - 34 West 37th Street, New York 18, N. Y.

"A JURO PRODUCT . . .

A JOY FOR CHILDREN!"

THEY'VE
AMAZED
EVEN US!

... the overwhelming acceptance this colorful pair of ANIMATED CLOWNS, the newest additions to the popular "PLAY-MATE" line, has found in buying offices throughout the country.

THESE GREAT, BIG (18"), BEAUTIFUL DOLLS are dressed gaily in the finest materials, and have bells that jingle-jangle when the arms and legs are activated with the PATENTED pull-string, which makes them the delight of young and old.

Our pair of clowns are but two of the PROFIT-MAKING TEAM you are invited to inspect in Room 923 of the HOTEL McALPIN. An extensive promotion and advertising campaign, including radio publicity on 38 stations, helps sell these dolls to your customers before they reach your counters.

MECHNER & CAMINITI REPRESENT BARCLAY CREATIONS

Barclay Creations, 36 South State Street, Chicago, the home of Fairy Lane and Arcadia Dolls, announce that Mechner & Caminiti, 260 Fifth Avenue, New York, have been appointed Eastern Sales Representatives. Buyers representing the Fifth Avenue Building will find Fairy Lane and Arcadia Dolls on permanent display in Room 455.

For 1948, Barclay Creations have succeeded in designing an entirely new series of character dolls and have boxed them in an unusual manner. The dolls, which will make their debut at the Toy Fair will be known as "The Original State Dolls of

the U. S. A." Each doll is dressed in its authentic state colors. The bodies are of plastic, insuring sturdy construction and life-like qualities.

In addition to the creation of the entirely new characters in this line, the Barclay Creations firm feel that they have introduced a refreshing touch of originality in doll packaging, and it is unnecessary for the dealer to remove the doll from the box in order to display it, as each container has a window top.

It is anticipated that doll collectors throughout the country will not only want a doll representing the state in which she was born but dolls from those states she visits

Old favorites in new dress.

NEW ED-U-CARD PACKAGES

To give the retailer a higher unit sale, Ed-U-Cards has just announced two new packages, each containing 2 of their colorful children's educational card games. These packages sell for 59c each, have eye-appeal and make an attractive kiddie gift item in the low-priced bracket. Each package is labeled with the age group recommended for the games, making it easier for the sales clerk to sell and the customer to buy. One set is for ages 3 to 8 and the other for ages 5 to 10. These new packages and the complete Ed-U-Card line, including a new idea in games for the very young, called a "Game-on-a-Chain" can be seen during the Toy Fair at the Hotel McAlpin, Room 1069, and 200 Fifth Ave., Chas. H. Carroll, Room 351.

ADVERTISING COURSES

Two new courses in advertising, one dealing with operation and procedure and the other covering advertising production, are being offered by Southern Methodist University, Dallas, in co-operation with the Dallas Advertising League.

Ira E. DeJernett, president of DeJernett Advertising Agency and governor of the 10th District, Advertising Federation of America, teaches the class in operation and procedure, while Dave McDonnell, account executive of Rogers & Smith Advertising Agency, teaches the class in advertising production.

A course in advertising copywriting offered by SMU last semester is being repeated with Nathe P. Bagby, executive vice-president of Leche & Leche, as teacher.

NEW ADVERTISING MANAGER

The appointment of Mrs. Lois Hale as advertising manager of W. A. Green Co. has been announced by Holmes Green, secretary-treasurer. She succeeds Roy E. Kyle, who had held the position since 1923 and who resigned effective Jan. 1 to join the Ferguson Advertising Agency as account executive.

Mrs. Hale has been associated with W. A. Green since 1933 and immediately preceding her promotion had served as assistant advertising manager. Starting in the mail order department, she later became the store's personal shopper. For a brief time she left Greens to be in the advertising department of Sears, Roebuck. She is a native Texan, a member of the Dallas Advertising League and the Dallas Business and Professional Women's Club.

SUPER SIX Junior Mechanical TOY TRACTOR and LOADER

An ideal summer toy for the sandbox or at the beach, Super Six Junior performs a variety of play tasks outdoors and in. Fully mechanical—operates with push-pull windup. Scoops up, carries and dumps all kinds of small toys—three distinct operations. Super Six Junior is an actual working scale model of the big tractor-mounted Super Six Loader used on the farm. Helps to develop child's mechanical skill and understanding.

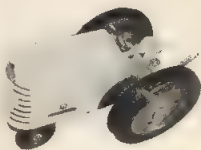

Super Six Junior is built to withstand hard play. Heavy duty all metal construction, mounted on sturdy rubber tires. Size with loader at carry level: 13 inches long, 6 inches high, 5½ inches wide. Tractor length: 8¾ inches. Available in two models as shown. Standard packaging—12 to the carton.

SAALFIELD'S RITA HAYWORTH PAPER DOLLS

The Saalfield Publishing Company is featuring Rita Hayworth in two outstanding doll items. One is a paper doll outfit book and the other is a paper doll box. These items will be ready for shipment in November to be distributed around the country prior to or at approximately the same time the new tech-nicolor picture, "The Loves of Carmen," opens in the various towns.

Saalfield states that this is the most colorful and attractive art work and printing job they have ever done and that these items are already selling better than anything they have brought out this year.

Carmen paper dolls

PARENTS' MAGAZINE SELECTS BANNER ITEM

Parents' Magazine has announced that it will publish in its December issue a special toy article entitled, "A Guide to the Best Things in Toys." The article will consist of a carefully selected group of toys, which, in the opinion of the editors of Parents' Magazine, represent the best available this year for various age children and for best values for the consumer.

Banner Plastic Corp., producers of plastic toys, have been honored with the selection of one of their numbers for this outstanding consumer editorial feature, which many consider to have a marked influence in the purchasing of toys by parents. Since the magazine reaches more than one million families with children, the importance of the article and the 18 toys selected for it have been emphasized.

Banner's popular Children's Refreshment Set is the gift boxed item selected for the story. The set is molded in durable crystal clear plastic and has been so designed to capture and duplicate the fine and delicate designs associated with cut crystal glassware. The set includes a serving pitcher, goblets and sherbets, plus a generous supply of 18 drinking straws, and is beautifully assembled in a two-color gift box.

SOUTH BEND APPOINTS REPRESENTATIVE

Anderson Sales Company, 730 W. 10th Place, Los Angeles 15, California has been appointed by The South Bend Toy Manufacturing Company, South Bend, Indiana as representative for the latter's line of croquet sets, fibre doll carriages, beach carts, doll coaches, and juvenile furniture. The Anderson territory will include Los Angeles and Southern California, New Mexico, Arizona, and El Paso, Texas. Handling a number of prominent nationally-distributed lines, the Anderson Company specializes on jobbers and Class "A" Department Stores. Leland Klingerman is manager.

DOUBL-GLO DECORATIONS NETWORK RADIO SHOWS

This month and next, when you listen in on your favorite Quiz Shows, the chances are you will be one of the millions who will hear Doubl-Glo on the air. This timely and effective publicity has been planned to help all Doubl-Glo Dealers sell more Christmas Tree Decorations. The Doubl-Glo brand will be mentioned on the air over stations on all major networks . . . ABC, CBS, MUTUAL, and NBC. As a tie-in promotion to bring results directly to the dealers, attractive 4-color window and counter display cards have been prepared.

According to Burt Lee, President of Paper Novelty Mfg. Co., the sale of Doubl-Glo Christmas Tree Decorations in their new, smart packages, should exceed all previous years.

GILKISON'S RED RAIDER

Gilkison Manufacturing Company, Elyria, Ohio, reports that their number 3001 Red Raider is proving one of the most popular items they have ever brought out. This attractive, durably constructed spring horse is guaranteed against breakage and is finished in white with a red seat and red trim. An innovation is the new mechanical double spring action. The seat is level and tubular steel handles with rubber grips are an added quality feature. The retail price is \$3.75. The Red Raider together with the complete Gilkison line is on permanent display at the showroom of Max E. Bratman, 200 Fifth Avenue, New York.

DAYTONA RACER

**LEADS THE FIELD
IN YEAR 'ROUND SALES**

Here's a model race car that can build your toy profits in 1948.

It's a sturdy, precision-built, 9 1/4" model of a racing car with a powerful spring motor—real rubber tires on aluminum wheels—brightly colored plastic body in 9 color combinations.

Specially designed motor, front wheel drive and free-wheeling feature

make the Daytona Racer one of the speediest of all toys, and one of the few spring motor toys that will operate on a heavy rug. And it is built for both straightaway or tether racing.

Packed individually in attractive display cartons. Window and store advertising streamers to help you sell. And the price of this better racer is in line—will show a good profit on every sale.

A YEAR-ROUND ITEM
for the
LITTLE GIRL MARKET

ROCKETTE JUNIOR FOOD MIXER

Rockette Junior Food Mixer was designed to cater to the little girl market—to provide a quality toy that will help you tap new profits.

Mixer is 10" high and strongly built. It is operated by an enclosed electric motor run by a single flashlight battery inside the case. A turn of the control knob starts and stops the motor-operated beater. It beats eggs, milk, chocolate and light mixtures of various ingredients in its 5-inch white plastic bowl. It cannot hurt little fingers and there is no possibility of electrical shock.

This quality toy is made almost

entirely of glistening plastic. Base, handle and control knob are brilliant red or black with a contrasting white supporting arm and casing.

Suggested retail price is \$4.95. And volume will surprise you. There is nothing else like it on the market today.

It is attractively packaged in individual cartons—packed 12 to a 20-lb. or 24 to a 40-lb. shipping carton.

Your Order TODAY will save delay

DAYTONA RACER

**LEADS THE FIELD
IN YEAR 'ROUND SALES**

Here's a model race car that can build your toy profits in 1948.

It's a sturdy, precision-built, 9 1/4" model of a racing car with a powerful spring motor—real rubber tires on aluminum wheels—brightly colored plastic body in 9 color combinations.

Specially designed motor, front wheel drive and free-wheeling feature

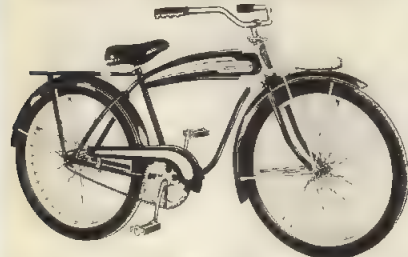

make the Daytona Racer one of the speediest of all toys, and one of the few spring motor toys that will operate on a heavy rug. And it is built for both straightaway or tether racing.

Packed individually in attractive display cartons. Window and store advertising streamers to help you sell. And the price of this better racer is in line—will show a good profit on every sale.

TOYS and NOVELTIES—March, 1948

TRADE CONFERENCE

The third annual Mississippi Valley World Trade Conference will be held in New Orleans April 15-16, according to an announcement by Clarence S. Reinert, general chairman of the committee and president of the Export Managers' Club of New Orleans, sponsors of the event.

Originally scheduled for an earlier date, the conference was postponed to April 15 and 16 to give the expected 500 delegates an opportunity to attend the New Orleans-Time Magazine International Forum which will be held in the Crescent City April 14-17.

The Mississippi Valley World Trade Conference has been an annual event since 1946. Successful meetings were held in March of that year and in January 1947 which attracted hundreds of Mid-Continent exporters and business men here and served to focus attention on trade between the central U.S. and the world.

JOHN HOY PROMOTED

Miss Jan Harris, assistant buyer of Housefurnishings, at Lit Brothers, Philadelphia, resigns her position to be suc-

ceeded by John Hoy, assistant buyer in Lamps, Max Robb, general merchandise manager, announced.

Miss Harris, who came to Lits from Harcum College, was a student in the store's Junior Executive Training Course and has been assistant buyer for about a year and a half. She will return to her home in New York City. Her successor, Mr. Hoy, joined Lits as section manager of Shoes before becoming assistant buyer in the Lamp Department.

Mr. Hoy will be succeeded by Paul Shapiro, who has been temporary assistant buyer in the Toy Department. Mr. Shapiro was with L. Bamberger for 11 years as associate buyer in toys. He studied a merchandising course at Macy's.

HALE-NASS CORPORATION FEATURES NEW POPULAR PRICED SELLERS

Hale-Nass Corporation, 75 Grand St., will display their newly revised 1948 line during the Toy Fair in Room 1066, Hotel McAlpin. In a recent interview, Harry Levine, president of the firm, said: "We have completely revised our line for 1948, adding many new items such as fishing sets and complete fishing outfits in cards

Hale-Nass Policeman Set

and in carrying cases. They all have metal rods and metal reels and retail at popular prices. In addition, we are, of course, showing our popular Hand-Cuff, Police and Detective sets, which have been fast sellers in the jobbing trade for many years. Also prominent in our display are our many 5c, 10c and 25c sellers, including Badges, Whistles, Goggles, etc. A new-comer in our line which we will feature is the "Handy Window Cleaner" for washing and wiping windows, mirrors, woodwork, automobile windshields, etc. These Two Way Cleaners come each on a handsome display card to retail for 35c."

Mr. Levine went on to say that their plant is fully equipped with various types of power presses and four slide wire forming machines, welding and plating equipment and complete tool shop. All their items are manufactured in their own plant, enabling them to give dependable service at the lowest possible prices.

DIRECTOR ELECTED

Willis G. Wilmot has been elected a director of D. H. Holmes Co., Ltd., New Orleans department store, to fill the unexpired term of the late Robert Lienhard. Mr. Wilmot is vice president of the Hibernia National Bank in New Orleans. He is the son of Robert W. Wilmot, also a director of Holmes and one of the original organizers of D. H. Holmes Co., Ltd.

NEW PENNEY MANAGER

J. P. Jones of Shawnee, Okla., has been named manager of the J. C. Penney Company department store at 601 Main street in Houston, Texas. Mr. Jones comes to Houston from his post as zone district manager operating out of St. Louis, Mo. He replaces Wiley C. Johnson, who resigned from his position as manager of the Houston store to retire and make his home in San Antonio.

in colorful box featur-
ing a swell picture of
ROY ROGERS, himself.

Yes—pardner—here's another popular priced "star" for your line of junior "cowboy" equipment—ROY ROGERS WESTERN SPURS, to retail at 50c. Millions of boys will want this latest ROY ROGERS offering. They're pre-shaped from tarnish-proof aluminum—quickly and easily attachable and adjustable, with colorful faces.

Better still—they carry the name of the world's foremost cowboy star—ROY ROGERS—which makes them a natural for quick turnover and profit.

Sackman Showroom has "New Look"

The newly decorated showrooms of Sackman Brothers Co., 200 Fifth Avenue, New York City, manufacturers of Yankiboy Playclothes, are done in a simple ranch style. Highlighted by rustic cedar walls and shelves, the showrooms create a remarkably interesting background for the display of Sackman Brothers products.

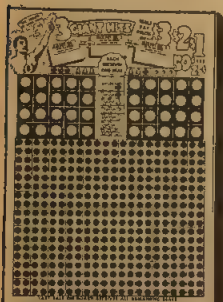

In this impressive outdoor-like setting, about seventy-five mannikins, dressed in Sackman Playclothes, are placed about the rooms. These feature Roy Rogers Cowboy Suits, Big 4 and Big 5 Baseball Suits, and a host of cowboy, Indian, fireman, police, and cowgirl suits. Displayed on nearby open shelves are Roy Rogers Hats and

various cowboy chaps and vest sets. Carefully selected pictures on Western themes and a striking mural carry out the motif.

Sam Cylinder, Sales Manager of Sackman Brothers, designed the displays, which were constructed by the Rustic Furniture Co. of Williamstown, N. J., in authentic western motif.

MANUFACTURED BY

SHERWOOD TOYS—WALDEN, N. Y.

No. 441401—Windmill Lighter. In a gracefully tapered hexagonal shape which resembles a quaint Dutch windmill. It has a 3 1/2-inch base with felt lined edges upon the artistic blades of the chromium windmill and a dependable flame is produced by the concealed lighting mechanism. A strong spring assures positive lighting action. Large fuel compartment requires only one filling a month under ordinary use. Height, 5 1/2 inches. Each **\$2.95**

Table Lighters

NOVEL and ATTRACTIVE Precision Mechanisms

No. 441403—Cannon Table Lighter. An exact replica of an actual artillery piece, even is the rolling spoke wheels, this novelty table lighter is a perfect addition to the home, club or office. Dependable and easy to use—simply remove the breech and press push button. The concealed automatic lighting mechanism is equipped with flint and wick. As practical as it is ornamental, the cannon table lighter is crafted entirely of high grade metal and has a rich finish of light and dark antique bronze. Length, 8 inches; height 3 1/2 inches, width at wheels, 3 inches. Individually boxed. Each, lots of 6 **\$3.10**

No. 4199—Deluxe Marine Lighter. The ship's wheel, is exact down to the finest little rivet. Turn the wheel and a steady dependable flame is produced. Crafted of quality steel with gleaming chrome plated finish. Strong sturdy spring assures powerful flashing is back from extra long fuel. Large capacity fuel compartment. Height, 5 inches. Each **\$3.10**
Each, lots of 6 **\$3.00**

No. 441404—Constellation Table Lighter. In plastic and chrome design. No need to open—lighting the cigar or cigarette is an easy one-movement operation because the automatic mechanism snaps up in a slight pressure instantly producing a steady flame. Features a precision milled spring wheel, long lasting wick and cap. Only a few compartments fittings are of gleaming polished chromium. Height, 4 inches, width, 3 1/2 inches. Each in gift box with full instructions for care and use. Each **\$1.85**

No. 441417—Dumbbell Chrome Table Lighter. King size table lighter, similar in design to popular pocket style, brightly chrome plated, heavy-ribbed chromium tube. Simple lighting mechanism—a flick of the finger on the roller lights it. Holds months of fuel. Makes an ideal household accessory or gift item. Fair Trade \$3.00. Each **\$3.10**
Each, lots of 6 **\$3.00**

No. 4121—Giant Table Lighter. Heavily constructed with chrome plate finish and covered with simulated lizard, Alligator and Morocco in black and tan. Has in hand lighting automatic mechanism and precision milled ignition wheel. Extra large fuel compartment. One extra piece of flint is furnished with each lighter. Individually boxed. Height, 4 inches. Each, lots of 6 **\$3.10**

No. 3125—Helicot Table Lighter. Gracefully poised for flight, this sleekly designed miniature airplane is ready to produce a steady, dependable flame to light a cigar or cigarette. Heavily constructed of quality metal with a gleaming chrome plate finish, this lighter's usefulness is surpassed only by its unparalleled beauty. A twist of the propeller and the ebony plastic "cockpit" flies open to reveal the lighting mechanism. Supplied with flint and properly adjusted wick, the lighter's "fuel tank" is in the base. One filling lasts a month under ordinary use. Wing-spread 5 inches, length of fuselage 8 inches, height 3 inches. Individually boxed. Each, lots of 6 **\$3.70**

No. 3124—Combination Elephant Table Lighter and Ash Tray. Made of antique Walnut finish on wood composition in the shape of a tusked elephant. Has cylinder type spring fired burner set in to elephant back. Features removable lighter unit eliminating having to pick up entire ash tray when a light is needed. Light or has dependable thumb-wheel type mechanism. Long lasting wick and large fuel capacity. Ash tray has center well of crystal clear glass. Width, 4 inches. Each **60¢** Per dozen **\$6.50**

Per dozen **\$8.00**

No. 44P095—Glass Ash Tray. A real value in a large size ash tray. Expertly made of durable glass in an attractive rose color. Has four angled cigarette rests and something new—four cigarette snuffers small 3/8 inch wells which snuff out a glowing cigarette. Designed in a distinctive modern mode. Diameter 6 inches. Packed 2 dozen to a carton. (No less sold)

Per dozen **\$2.70**

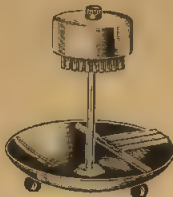

No. 44P091—Glass Ash Tray and Holder. The suited glass ash tray clings firmly into the frame-like holder at a 45 degree angle so that even sharp drafts of air will not scatter the tobacco. Ashes made of heavy square metal wire, nickel-plated for enduring luster. The holder has vents for two cigarettes. Its U-shaped shape allows it to be placed securely on the arm of an over-stuffed chair. Jar-shaped the ash receptacle has a full 2 inch depth. Length of no. 45, 3 inches, height, 2 1/4 inches. Each 2 1/2 inches.

Per dozen **\$1.80**

No. 44P111—Glass Bucket Ash Tray. Decorative as well as useful this glass bucket ash tray is a detailed model of the well known symbol of the Clay Nineties. The old token burner. Turned of crystal clear glass with a removable metal handle. Overall measurements 2 1/4 inches in diameter, 3 inches high.

Per dozen **\$1.20**

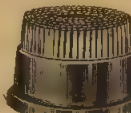

No. 3068—Ash Tray and Pull Match Enclosure. Exceptionally well made of quality metal. It features a bright sparkling chrome plate finish. Ash tray is simple and unobtrusive in design with three long cigarette rests. It is one piece construction. Round match enclosure is made of metal with a chrome finish. Just pull a match out and it lights itself. Ash tray base has three round ball legs of maroon colored plastic. Comes fitted with one roll of pull matches and six extra rolls that easily replace the used ones.

Each **\$3.25**

No. 44P088—Plastic Pull-Match Ash Tray. Similar to above but made of durable unbreakable plastic. Fitted with one roll of pull matches and two extra rolls. Diameter, 7 inches, height, 8 1/2 inches.

Each **\$1.75**

Make an ideal prize. Complete plastic dispenser-holder in assorted colors containing a large roll of pull matches. Available in any drug or dept store. Diameter 2 1/4 inches. Each in box

Per dozen **\$1.95**

No. 3064 — Pull Matches With Plastic Dispenser. The newest safety match sensation. Safe. Easy to use. Simply pull out a match and it lights itself. Excellent for parties, etc. Plastic dispenser-holder in assorted colors containing a large roll of pull matches. Available in any drug or dept store. Diameter 2 1/4 inches. Each in box

Per dozen **\$1.95**

No. 44M1201—Ejector Cigarette Holders. A ringed stainless steel ejector, grips the cigarette firmly, conceals it, and it automatically ejects ash when tip is pulled back. Safe and satisfactory. Comes in shiny ivory amber and cream. Length, 3 1/4 inches. Put up 1 dozen on a colorful display card.

Per dozen **\$1.75**

No. 44M1202—Champion Cigarette Holders. Same attractive plastic stems with ringed aluminum tips as above, but non-ejector. Put up 1 dozen assorted colors to a bright display card.

Per dozen **75¢**

No. 3066—Bakelite Ash Tray. Made of strong durable bakelite. Modern in design. Has three rests for cigars or cigarettes and features four 3/4 inch snuffing wells. Deep slot assures secure place for book matches. Spherically modern in design. Comes one dozen to a box.

Per dozen **\$1.80**

No. 3061—Twirl-Away Ash Tray. Twirl-Away is novel and exciting. Cigarette and clear ends are removed from sight by a finger twirl. The concealed channels cleaner leaves a fresh looking tray. Will not spill over, protects furniture. Discriminating people are not offended by smelly odors. The tray can be emptied without touching the contents. Is the clever new idea of ash trays. Smoldering provisions the big capacity so necessary but so seldom found in ash receptacles of good appearance. Handsomely designed, all metal parts are sparklingly chrome plated. Diameter 5 1/4 inches. Packed in a beautiful midnight blue acetate gift box with silver trimmings.

Each **\$3.85** Each, less **\$3.75**

No. 44P010—Nautical Ashtray. Features a dainty ship's hull made of crystal clear pressed glass with flared 7-gate on its flat bottom and three convenient cigarette rests. Supporting the gleaming chrome sails is a 1-inch brown metal strip across the center of the ashtray. Height, 8 1/2 inches.

Per dozen **\$1.95**

No. 3088—Bakelite Ash Tray. This new durable bakelite ash tray has all the features necessary to insure complete safety for careless cigarette smokers. Large outer rim catches cigarettes and eliminates litter of ashes. Comes in assorted two and three rests with book and box match holders. Features 3 1/2 inch deep, well with modern design. Packed one half dozen to a box.

Per dozen **\$2.60**

PETERS "RUSTLESS" LOADED SHOTGUN SHELLS HIGH VELOCITY

Blue Color

Loaded with Progressive Smokeless Powder; No. 4 Battery Cup Rustless Primer

Peters Rustless High Velocity shell is the finest shell that money can buy.

It is constructed throughout of the very best grade of materials.

The shell proper is made from flax, giving it a toughness that will stand rough handling

It is thoroughly waterproofed by an exclusive process which affords the greatest protection from water and moisture ever developed in a shot gun shell.

It is the first shell on the market especially constructed for progressive burning powders.

It has the Peters reinforced head—"Steel Where Steel Belongs."

The above features along with the real felt wads and uniform shot guarantee the shooter a superior long range

Speed—pattern—distance and killing power combine to make Peters Rustless High Velocity shells the choice of the shooter who demands the best

Quality Ammunition

Every precaution possible is taken to insure the use only of the finest materials in producing Peters Ammunition. All ingredients are subjected to repeated laboratory test. They shuply must meet Peters perfected formulae and latest specifications. This gives quality insurance to Peters products. It means that "Peters" stands for "quality" and that you can sell Peters Ammunition with utmost confidence.

SPINNING TACKLE

AIREX SPINNING ROD

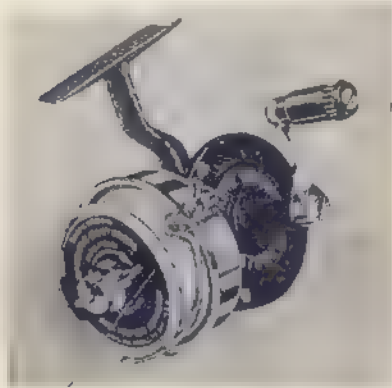

Hand built of finest quality properly seasoned Tonkin cane, strips are accurately beveled and properly staggered to provide maximum strength.

Ferrules of highest quality are fitted to the bamboo to retain all of the outside glass hard bamboo fibre. Guides and tip tops of hard chromed, non-corrosive material, are designed for lightness, long wear, and easy casting. Each coat of varnish hand rubbed.

No. 7010—Lightweight, 7 ft. long; wt. each 4½ oz. Each \$.

One in cloth partitioned case enclosed in fibre tube

BACHE BROWN SPINNING REEL

Mustereel

The reel preferred by most spinning experts. Precision built, with extra large spool capacity. It is positive in action.

Incorporates many improvements making it superior to all other models. Brake remains properly in adjustment even while handling large fish.

Extremely light weight constructed of aluminum castings with non-corrosive parts of monel metal, stainless steel or bronze. Roller bearing deluxe pickup finger of monel metal; Oilite bearing throughout; ball bearing, finger touch brake control. Adjustable spool seat. Hand turned extra large Duraluminum line spool. Improved knob for easy manipulation of the pickup.

No. 7002—Capacity 200 yards special braided 8 lb. braided nylon line, 66:1 ratio winding ratio, wt. each 8 oz. Each \$.

One in a box.

AIREX SPINNING LINE

An ideal spinning line. Braided from Du Pont Nylon, will not rot or lose strength with age, a vitally important point in fine thread line. Has less stretch and greater strength, casts easier and farther and wears better than most other spinning lines.

Line is waterproofed and specially surface-treated to give exceptional casting range with even the lightest spinning lures.

Mist Tan Color

No. 7021-M2—4 lb. test 100 yards on a spool wt. per spool 3 oz. Per spool \$.

Two spools connected in a box.

FLY RODS

FISHING REELS

SHAKESPEARE PRESIDENT

Level Winding, Anti-Back-Lash

Sturdily built throughout of stainless steel with matched set bronze spiral gears and long wearing lifetime Carboly spool bushings. Diamond hard chrome plate instant take down level wind; oiling spool cap and crank nut; automatic thumb casting drag. Lightweight, extra thin, stainless steel end plates.

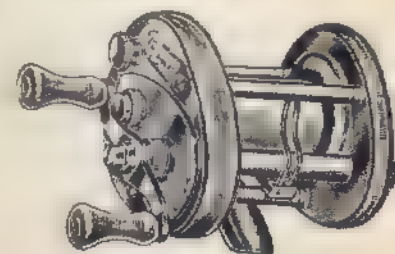

"Built like a fine watch," the pride of Shakespeare angler craftsmen. Represents the finest, quietest reel that Shakespeare can produce.

No. 1970—Cap. 100 yds. 14 lb. test silk line, diam. of spool $1\frac{1}{2}$ in., length of pillars $2\frac{1}{4}$ in.; wt. each 8 $\frac{1}{4}$ oz. \$

No. 1970AS—Same as above but with lightweight easy to cast spool and snap-on plastic arbor \$

One in a leather case, in a box.

SHAKESPEARE NEW IDEAL

Two Gear Level Wind

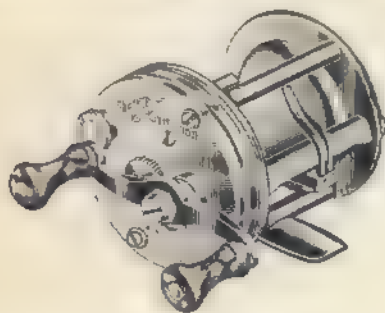

Crank stem provides a direct drive for carriage screw. Drive gear is anchored to the extended line carriage screw and meshes directly with the spool pinion. Thus only two gears, instead of the usual four are used which makes a smooth quiet running reel.

Attractive circle finished green anodized aluminum end plates; long wearing lifetime Carboly spool bushings; adjustable casting drag; diamond hard, chrome plate, level wind.

No. 1990—Cap. 100 yds. 14 lb. test silk line, diam. of spool $1\frac{1}{2}$ in.; wt. each 7 $\frac{1}{2}$ oz. \$

One in a box.

FISHING REELS SHAKESPEARE CRITERION DE LUXE

Level Winding

Diamond hard-chrome finish over nickel brass; three-piece take-down construction; phosphor bronze bearings and replaceable bushings; stainless steel shafts; brass and steel quiet spiral gears; jeweled adjustable spool caps. Auto-matic thumb adjustable casting drag. Coin slotted never-lose quick take-down pillar thumb nuts; easy-grip bell shaped handles.

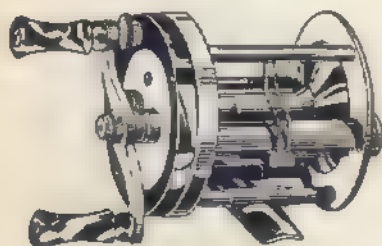

Equipped with lightweight spool for easy casting and snap-on plastic arbor.

Each

No. 1960AS—Cap. 100 yds. 14 lb. test silk line, diam. of spool $1\frac{1}{2}$ in., length of pillar $1\frac{1}{2}$ in.; wt. each $8\frac{1}{2}$ oz.\$.....

One in a box.

SHAKESPEARE MARHOFF

Level Winding

Modern two-tone styling with green anodized aluminum head plate and contrasting nickel silver disc. Every working part precisioned to an accuracy of less than $1/1000$ of an inch.

Long wearing phosphor bronze bushings; polished stainless steel pivot ends; adjustable thumb casting drag; quiet spiral phosphor bronze and steel gears. Spool caps and crank nut have convenient oiling holes.

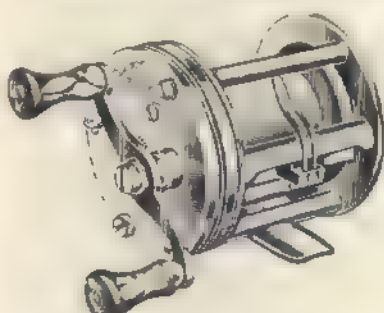

Equipped with lightweight spool for easy casting and snap-on plastic arbor.

Each

No. 1964AS—Cap. 100 yds. 14 lb. test silk line; diam. of spool $1\frac{1}{2}$ in., length of pillar $1\frac{1}{2}$ in.; wt. each 8 oz.\$.....

One in a box.

FISHING REELS SHAKESPEARE TRU-AXIS

Level Winding

Unusually strong and rigid, this rigidity is due to the fact that spool bushings are confined to the spool instead of being located in the tail plate and head cap. Spool revolves on a stationary shaft or axle.

Chrome plated nicked brass frame; smooth and silent spiral gears; lightweight spool; automatic thumb casting drag; never-lose coin slotted quick take-down pillar screws.

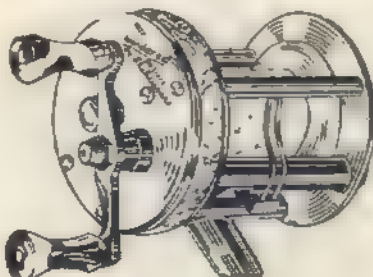

Tru Axis reels are easy to oil. Unscrew tail end spool cap and withdraw center shaft. Drop reel oil in exposed hole. It will reach all metal moving parts, including the spool pinion.

Each

No. 1932—Cap. 100 yds. 14 lb. test silk line, diam. of spool $1\frac{1}{2}$ in., length of pillar $1\frac{1}{2}$ in.; wt. each $8\frac{1}{2}$ oz.\$.....

One in a box

SHAKESPEARE WONDEREEL

Level Winding, Anti-Back-Lash

Equipped with the now famous "no thumbing" feature. Spool speed controlled by oversize tail bearings and adjustable head and spool cap. Makes long, smooth casts—no thumbing and no back-lash.

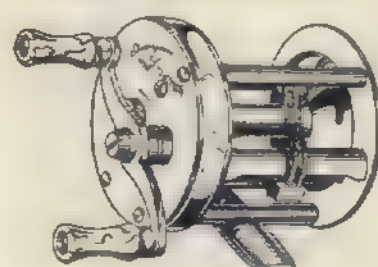

Head and tail plates are nickel silver with dotted black and white plastic head ring. Phosphor bronze bearings, matched 4 to 1 spiral gears; 3-piece take-down. Oiling crank nut assures positive lubrication of vital moving parts.

Each

No. 1922—Cap. 100 yds. 14 lb. test silk line, diam. of spool $1\frac{1}{2}$ in., length of pillars $1\frac{1}{2}$ in.; wt. each $8\frac{1}{2}$ oz.\$.....

around the familiar room, and then snapped off the light. His heart was pounding when he crept down the stairs, and the cold steel of the rifle barrel seemed to be burning his fingers.

The radio program was ending with a deafening response from the studio audience. Danny paused on the bottom step and then made a dash for it. From force of habit he let the screen door slam behind him.

"Danny?"

It was his mother, but he didn't answer. He was already running as fast as he could go across the moonlit fields.

"Danny!"

His father's voice came to him faintly, and this time it was not a question but a command. He knew that his father must be standing on the front porch and peering into the darkness.

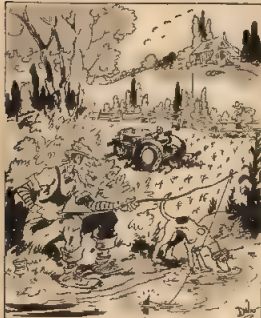

Danny reached the stone fence and shifted the rifle to the crook of his arm. He rested a moment and the sweat began to roll down inside his overalls.

He looked down at the rifle, remembering how furiously Shannon would wag his tail when they started out on a hunt together. His heart contracted, the tears sprang into his eyes, and then his hatred, white hot, swarmed in and took possession of him. He climbed the fence and circled the pond.

When he came to Shannon's body he tried not to look at it. The moonlight had moved away, and the dog was lying in the deep shadows. Danny knew that the body was growing stiff and cold, and that if he should try to bend the legs, they would resist him. He thought he was going to be sick again. Working the bolt of his rifle, he

(Continued on page 100)

PETER TUMBLEDOWN

Much against his better judgment, John Shultz let Peter Tumbledown borrow his corn cultivator. Peter actually did use it—usually he lets the weeds grow and goes fishing—but it was the same old story: when he finished he let the cultivator stand in the field in the rain. Eventually John had to drive over and get it. The last time Peter returned something he borrowed was

in ceramics

AC

SPARK PLUGS

Now you can have AC's *patented* aluminum oxide insulator material in AC Spark Plugs especially designed for your car, truck or tractor engine—plugs that can take terrific punishment—plugs whose wider Heat Range adapts them to a wider range of engine temperatures. Exhaustive tests by a leading tractor manufacturer prove that AC Spark Plugs perform better and last longer than any other make.

AC's new *patented* aluminum oxide insulator material is another "first" in the manufacture of spark plug ceramic insulators. As early as World War I, AC developed the *first* practical ceramic aircraft spark plug, for Liberty engines. It was perfected and ready for World War II—and its *patented* ceramic aluminum oxide insulator was used exclusively in the spark plugs that fired American war planes.

For easier starting—better idling, steadier firing under heavy load, buy AC's. They give you utmost reliability.

Keep an extra set of clean AC's on hand to use while you have dirty plugs cleaned and adjusted regularly at a Registered AC Service Dealer.

Martin, Warren, or even Eisenhower, you'll still have plenty of company.

By this time nearly every one here has taken sides and knows which man he wants, but even insiders on Capitol Hill will say: "I'll tell you the name of the nominee after the first of July."

☆

If you are a Democrat, most observers here will tell you: "Truman will be nominated and defeated."

The President has started his campaign by taking the offensive. At Omaha Saturday night, in a hall four-fifths empty, he repeated his farm program—price support, abundant production, conservation of natural resources, higher standards of living for farmers. He charged that the Republicans, after two years, have still produced no long-range farm program.

In his three years in office, the President has met relatively few Americans face to face, except here in the East. His advisors know that he makes his best impression when talking informally. He has won back the lost approval of the American people before.

Maybe Mr. Truman can do it again, but the capital recalls that it was what he did, not what he said, that earned those brief periods of popularity, and he has done nothing comparable in the last year or more.

☆

The ECA program has recently furnished a new target for charges that government purchases of commodities distort their prices.

Dr. D. A. Fitzgerald, new head of the Food Division of ECA, said last week: "The obvious demand created by ECA dollars will cause prices of these commodities to be higher than they would have been without ECA. The ECA program should not cause farm prices to be higher than they have been in the last couple of years."

He went on to say that European countries have already been buying as much of these commodities as they will

TOY NEWS AND NEW TOYS

Plastic 'Phones by Ideal

IDEAL "MAGIC PHONES"

With a pair of these Tenite plastic 'Magic Phones,' children's telephonitis can be more than make believe. The telephones operate on the principle of sound power—also during the war for sound-power telephone systems to carry voices a distance of two miles. No batteries or plug-ins are involved. Just set the two Tenite phones fifty feet apart and talk. To signal from one phone to the other, the lever on the front of the telephone base is pushed from left to right while both earphones are in their cradles. The Magic Phones are available in two sizes: 4 1/2 by 6 by 3 1/2 inches in size for adult models with bell-enclosed bases. They are made of a lustrous black Tenite and are practically unbreakable. The telephones make a practical intercommunicating set for adults, too, as well as a child's toy. And they're good instructors for any boy or girl who is just commencing the study of physics. Magic Phone intercommunicating telephone sets are manufactured by Ideal Novelty & Toy Co., 200 Fifth Avenue, New York 10, N. Y. Tenite is a product of Tennessee Eastman Corporation, Kingsport, Tenn.

PLUTO FLASHLIGHT NEW DISNEY ITEM

New Walt Disney character item to hit the toy market is the Pluto flashlight. Novel and practical, Pluto's mouth lights up just by pushing his tail. Equipped with a standard battery and bulb, the Pluto flashlight measures 4 3/4 inches long. Molded of chip-proof plastic, the item is cellophane-wrapped and individually mounted on eye-catching display cards for counter sales. Made by Precision

Pluto Flashlight by Precision Specialties

Specialties, Inc., 212 North Western Avenue, Los Angeles 4, California. About 69¢ retail.

NEW COLOR KIT PACKAGE

The American Crayon Company announces a change in the popular No. 1907 Prang Textile Color Kit. The package is completely redesigned into a more compact unit. It is less bulky, easier to carry and easier to work with; takes up less room on the dealer's shelf, and in the home on the closet shelf or the work table; simplifies shipping and handling. In short, the new box is a long step ahead in efficiency. The manufacturer states that while material costs in 1947 have forced a raise in price at this time, by redesigning the package into the more compact unit, it still sells at the same \$4.00 price and saves scarce paperboard at the same time. The new No. 1907 Prang Textile Color Kit contains the same complete contents as the old package—everything needed for

Home Textile Paints

stenciling fabrics with these famous colors. 8 jars of colors and two of Extendor, E-Z Cut Stencil Paper, ready cut stencils in one, two and three colors; stencil brush, stencil knife, complete directions design sheets, and Do It Yourself booklet. All of these contents are fitted into the Kit compactly. The package is smartly designed in magenta, turquoise and black. For further information write The American Crayon Company, 380-480 Hayes Avenue, Sandusky, Ohio.

HERTZ WRITES ABOUT OLD TOYS

Louis H. Hertz, who is well-known as an authority on American toys and who has written several books on this subject is the author of a new book entitled "The Handbook of Old American Toys," published by Mark Haber & Company of Wethersfield, Connecticut, at a price of \$3.50. The book is profusely illustrated and specifically arranged to answer most of the questions generally asked pertaining to this interesting subject. The toys are arranged under special classifications such as tin toys, iron toys, clock work toys, etc. Taken altogether, the book is of outstanding interest to dealers as well as manufacturers.

WILLIAM B. REMINGTON DIED

William Brodie Remington, President of Wm. B. Remington, Inc., advertising agents in Springfield, Massachusetts, died on December 6, 1947 at the age of 56. This company has for many years acted as the advertising agency for the Milton Bradley Company of Springfield.

UNIVERSAL APPOINTS REDELL & DEMOV

The Universal Manufacturing Company, manufacturers of the Gym-Dandy line of outdoor play equipment, has announced the appointment of Redell & Demov, Inc., of 230 Fifth Avenue, New York City, as their exclusive sales representative for the metropolitan New York area, comprising the territory within 75 miles of New York City—the entire state of New Jersey and the city of Philadelphia. The Gym-Dandy line actually consists of two separate groups of playground apparatus in a wide variety of styles; one, under the name of "Playmaster" and the other a de luxe group, the "Parkplay" incorporating the use of heavier tubing, ball bearing hangers and including two models with the exciting and exclusive "Sky Scooter" feature. All models in their clean cut, careful construction clearly reflect the Universal policy using only the finest of materials and workmanship while the wide spread of the uprights and the ample length of the top bars insure that extra degree of safety which is the keystone of all Universal products. The line, as a whole, embraces many desired play features from the simple two-play see-saw to the elaborate 9-play set and the two de luxe sets, No. 346 and No. 456 with the Sky Scooter, the pumping swing which can be operated by either one or two children. Gym-Dandy sets have enjoyed a very wide and enthusiastic acceptance throughout the South. Now, however, expanded manufacturing facilities have enabled the company to extend their sales territories and Redell & Demov, Inc., in keeping with their policy of handling only quality items, are proud to include the

Gym-Dandy by Universal

Universal line in the family of their other "plus" products, Columbia bicycles, Westinghouse chain drive trikes and sidewalk bikes, Ramsdell rockers, etc. Samples are now on display at their showroom, 230 Fifth Avenue at 27th Street, New York City, and Redell & Demov, Inc., cordially invite their many friends to inspect this line of fine and fast-selling play sets.

RACING HARDWARE for WINNING BOATS

DESENCO 1948 Racing Hardware will be used on 1948's winning craft as in former years

Now! Standard or fiddle blocks with or without swivel head. Made in 3 types, in brass or stainless for line sizes 1/4" to 7/16"

Lightest and simplest jib bunks on the market. Easy to install—no parts move. Stainless or brass.

Reinforced phenolic sheaves of Alcora are half the weight of aluminum wear as well and are for more corrosion resistance! Desenco cast brass sheaves accurately machined.

Desenco pintles are made from extruded brass of high strength. Two pin lengths 1 1/8 and 1 1/2" for 3/4" blade.

Desenco swivel attachments are made in brass or stainless. They convert any standard becket or fiddle back to a swivel back. Simple and proven.

Our gudgeons are of extruded brass. Two types—strap and plate. Straps fit 3/4" blade but can be spread or squeezed to fit 1/2" size 13/32". Chrome finish available on order.

No. 112D493 — Later Cradle Toy Assortment. Consists of 4 each of above 1 dozen in all, in carton **\$1.95**

No. 112D494 — "Rabbit." Rabbit. Rubber. 7 1/2 inches high. Decorated features, simulated clothing in contrasting color combinations. Standing position with split legs. Equipped with squeaky-type voice. Made of high grade non-toxic rubber with harmless dyes and fast colors. Sanitary, durable, and safe. Packed in cellophane bag. Each **55¢**

Per dozen **\$5.75**

Sunbabe

Rubber Dolls

Sunbabe Rubber Dolls. The Sunbabe family creates instant eye appeal for youngsters, and for grown ups too. Jointed legs and arms are movable. The head turns and tilt. Sleeping eyes with real lashes and firmly anchored. Models that go to sleep have a hard composition head. With non-closing eyes, the head is of soft rubber. Body contours and facial features are realistic, with natural-looking rosy cheeks, well sculptured nose, mouth, and ears. Both wavy hair and hair are included and realistically styled. The dolls are specially treated by a new process to reduce dirt absorption—they are tinted with fast colors and can be washed as often as desired. Sunbabe drinks her bottle, wets her at joints. Packaged in cellophane box. Nursing bottle and blanket.

No. 112D486 — "Chunky" Girl Rubber Doll. Flesh color with lovable, dreamy expression. Decorated mouth, eyes, and head. Painted matched dress and baby shoes. Split legs. Equipped with squeaky-type voice. High grade non-toxic rubber with harmless dyes and fast colors. Packed in cellophane bag. Height, 7 1/2 inches. Each **55¢**

Per dozen **\$5.75**

No. 112M2557 — Donald Duck Roadster. Here's a speedy, sporty roadster with a lot of "boy" appeal. Donald Duck is at the wheel while Pluto crouches in the rumble seat. Donald's head is movable. Entirely rubber moulded rubber wheels with patented nickel-steel axle assembly. Attractive three color combination with realistic chrome color trimmings. Size, 6 1/2" long and 3 1/16" high, and 2 7/16" wide. Packed in attractive individual carton. Each **65¢**

Per dozen **\$6.75**

No. 112M2558 — Mickey Mouse Tractor. Same quality construction as above but Mickey Mouse on red and yellow tractor. Size 4 1/2" long and 4 1/16" high. Each **65¢**

Per dozen **\$6.75**

No. 112D490 — Mickey Mouse. Best seller wherever Disney performances perform on screen or in comic sections—the world over in a few words. Decorated features, brightly colored clothing. Equipped with squeaky-type whistle. Made of high grade non-toxic rubber with harmless dyes and fast colors. Painful in animation detail. Height, 6 1/2 inches. Each **55¢**

Per dozen **\$5.75**

Each **\$2.10** Per dozen **\$24.00**

Popular Toys For Girls and Boys

No. 361644—Basket-O-Ball Game. Miniature version of basketball—ball rings when basket is made. Consists of 1 over-a-door hanger and bell ringing mechanism. 1 ring 12" in diameter. 1 net 16" long and 4 four-panel 7" diameter heavy fabric ball with lace rubber bladder and tuck-in stem. Each set in bright red, yellow and black box.

Each **\$1.75** Per dozen **\$19.50**

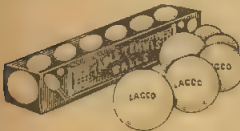

No. 361645—Basketball Game. Similar to above set—but without bell. Includes full size wood back board lacquer finish and all equipment necessary for this popular sport. Each set in box.

Each **\$1.55** Per dozen **\$17.25**

No. 341807—Ten Palooka Football Shoulder Pads. Specially designed for the junior gridiron enthusiast. Beautifully constructed of heavy duty, two-tone, double coated fibro. Finished to resemble those worn by big-time stars. Padded for youngsters from 8 to 14 years. Heavy felt padding will safeguard against painful bruises. Each in attractive, colorful box.

Each **\$2.25** Per dozen **\$25.00**

No. 341601—Table Tennis Balls. Tournament fast with everlasting lively action! Officially approved by the U.S.L.T.A. The toughness and long-life ruggedness of these excellent table tennis balls make them choice equipment for professionals and amateur alike. Regulate size. Packaged in an attractive counter display card.

Per carton **65¢** Per dozen cartons **\$7.20**

Eagle Sponge Balls. Built into Eagle Balls as all the "know how" gained in more than 33 years of rubber manufacturing. Eagle balls are smartly designed for stronger sales appeal—fast turnover—greater profits. Made of the finest red sponge rubber with high gloss natural and red veneered finishes. Bounce higher—last longer.

No.	Size	Finish	dozen
112M2562	1 1/4"	Unpainted	\$0.40
112M2563	1 1/4"	Veneered	.80
112M2564	2 1/4"	Veneered	1.20

No. 112N1254—Pli-Back Paddle Ball Game. One of the most popular toys of all time always a round gopher. Pli-Back has a wonderful play value. Is made from the finest plywood with smooth sanded edge. Each paddle grided with a picture of Pli-Back's famous western horse and rider. Equipped with fast bouncing, 1 1/2 inch pure rubber sponge ball which offers greater range to the operator. Actual dimension of the paddle are 11 1/4 x 5 1/4 x 1/4 inches.

Per dozen **\$1.10**

No. 112M2553—Football. Well made of new tough durable plastic with authentic brown football color. Has realistically printed laces. Rubber valve complete with metal inflating needle that fits regular tire pump valves. Light in weight, regulation in size.

Each **70¢** Per dozen **\$7.80**

No. 343M13—Junior Football. Just the thing to please sports-minded little boys. Mimic pure football looks exactly like the real thing, and durably made to take lots of wear. Features 3-ply construction with brown pebble grain simulated pig-skin cover, white elastic lacing and sturdy seams. Includes inflating needle. Length, 7 1/2 inches.

Each **85¢** Per dozen **\$9.60**

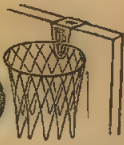

No. 343M04—Junior Football. Similar to above model but lighter weight construction—more economical.

Each **75¢** Per dozen **\$8.00**

RUBBER BALLS

Gas-Inflated Rubber Balls. Attractive, appealing designs and bright high gloss finish result in unsurpassed eye appeal. Made of finest most durable rubber that guarantees long life. Includes colorful assorted patterns of airplane and dangle designs.

Number	Diameter	Per dozen

Back of the handsome appearance of Eagle Balls is quality of the highest degree—assuring customer satisfaction. Mesh ball with long tough flexible rubber attached. Sold only as packed.

No. **Size Packing Per doz.**
112M2565 1 1/4" 3 doz. 40¢
112M2566 1 1/4" 3 doz. 80¢

MAVCO, INC. FEATURES

MECHANICAL DONALD DUCK

J Murray Beveridge, vice-president and sales manager of Mavco, Inc., 14 East 38th Street, New York 16, N. Y. states that the widespread interest already manifested by toy buyers all over the country in their new mechanical Donald Duck indicates that it will lose no time in achieving a top place on the best seller list. In developing and designing their mechanical Donald Duck, the Mavco organization

worked very closely with the Walt Disney artists in a determined effort to produce the most life-like replica possible of this famous Walt Disney character. Ingeniously molded from plastic, Donald Duck is in full color, and is animated by a clock spring motor with unusually long lasting action. Donald thus practically comes to life—one winding sends him waddling off for yards with his arms waving frantically in the true Donald Duck fashion that has endeared him to millions of movie goers. A novel feature is the fact that the wind-

Loader Model 47 LM

SUPER SIX Junior Mechanical TOY TRACTOR and LOADER

An ideal summer toy for the sandbox or at the beach, Super Six Junior performs a variety of play tasks outdoors and in. Fully mechanical—operates with push-pull windup. Scoops up, carries and dumps all kinds of small toys—three distinct operations. Super Six Junior is an actual working scale model of the big tractor-mounted Super Six Loader used on the farm. Helps to develop child's mechanical skill and understanding.

Super Six Junior is built to withstand hard play. Heavy duty all metal construction, mounted on sturdy rubber tires. Size with loader at carry level: 13 inches long, 6 inches high, 5½ inches wide. Tractor length: 8¾ inches. Available in two models as shown. Standard packaging—12 to the carton.

ing stem is fixed to his tail and can't be lost. Mavco's mechanical Donald Duck is 5¼ inches high and is packed in a distinctive colorful display box. Mavco has been told by many experienced buyers that this new item presents an outstanding value to retail at \$1.00.

Although comparatively new in the toy business, the Mavco firm is already noted for having designed and produced several runaway best sellers. Said Mr. Beveridge, "About a year and a half ago when we first offered Giselinda, the Galloping Turtle, we naturally felt we had an appealing toy and a good item; however, it had hardly hit the counters of a few stores when phones started to ring, telegrams descended on us in a manner which definitely showed that not only was Giselinda a good item; it was literally a sizzling record breaker. Our original production schedule had been rather modest and instead of an original anticipated production of four thousand a day, before we knew it one hundred thousand Galloping Turtles were actually leaving our plant every twenty-four hours. Reorders piled upon reorders and within a year seven million Galloping Turtles had actually left our factory, passed over retail counters of thousands of stores, and into the hands of youngsters all over America. We were obliged to exercise every ingenuity in constantly adding to our production facilities, but in one way or another the job was done and the orders were filled. We had a very similar experience with Ambrose, the Ambling Alligator. Ambrose apparently quickly made up his mind to vie with Giselinda for a place on the best seller list and buyers who handled this item know he succeeded. In almost no time at all this fascinating little toy alligator chalked up sales of four million units."

Mr. Beveridge feels that their experience in large volume production of popular priced plastic action toys will stand them in good stead in the production of their new mechanical Donald Duck and other Mavco toys which are to follow. He emphasizes that on every Mavco item months and months of the most painstaking thought and preparation are contributed by the finest toy production staff that can be assembled. Mr. Beveridge and his associates at Mavco are looking forward to the fall and holiday season when thousands upon thousands of mechanical Donald Ducks will be waddling off Christmas toy counters from coast to coast.

New Steering Wheel to be Shown at Toy Fair

THE STATLER MANUFACTURING COMPANY, makers of the popular Jr. Steering Wheel, will exhibit its post-war toy at the 45th American Toy Fair, Louis P. Solomon, president of the firm announced last month.

The Junior Steering Wheel goes into the American Toy Fair this year, following one of the most spectacular receptions ever accorded a toy in America.

Being introduced in October, just 12 weeks before Christmas, the wheel was publicized in over 800 newspapers from coast to coast, was taken up by radio, television and national magazines.

Consumers began asking for the toy in stores, writing in to the magazines, papers, and to the manufacturer.

Establishing itself as an outstanding item, toybuyers began to order and reorder.

And now, the Junior Steering Wheel and its sponsors invite you to see their advertisement in this issue, having selected TOY & NOVELTIES to reach you, the folks who helped to make the Junior Steering Wheel, a truly outstanding toy for 1947 and 1948. It will be shown in Room 545, McAlpin Hotel.

Stuffed Toy "Stars" in Movies

Latest of the Blondie and Dagwood motion picture series is scheduled for country-wide release beginning in April. And when it is screened in New York, you can be sure two of the first customers at the cashier's cage will be Charles Colombo and Loni Honig, president and sales manager, respectively, of Natural Doll Company, 134 Spring Street, New York City.

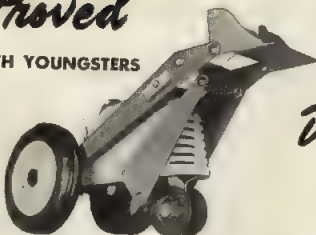

Blondie and Dagwood fans will see one of the Natural Doll Company's stuffed toys starred in this picture along with Penny Singleton, Arthur Lake, and their dog, "Daisy," who is a copy of Natural Doll's stuffed "Daisy"—or is it vice versa? At any rate, it's all perfectly legal for the doll company has full rights to exclusive manufacture of the stuffed toy and to the use of the name, with a license from King Features to make it all binding. And Natural Doll was equally happy to have its creation make that hackneyed phrase, "You ought to be in pictures," come true. Although no one asked them, it's probable both live and stuffed Daisies are happy about the whole thing, too.

Mr. Colombo's remarks are even more to the point, however. He logically considers the picture a natural tie-up, not only for Natural Doll but also for the countless dealers across the country who can capitalize on the movie when it bows in their local theaters.

GAMBLE-SKOGMO REPORTS

The Board of Directors of Gamble-Skogmo, Inc. today declared a quarterly dividend of 20¢ per share and an extra dividend of 10¢ per share on the company's outstanding common stock, payable October 30, 1948, to stockholders of record on October 18, 1948. This makes a total of 90¢ per share paid in 1948. Three common stock dividends of 20¢ each have already been paid in 1948, on January 31, April 30, and July 31.

The board also declared a regular quarterly dividend of 62½¢ on the company's outstanding 5% cumulative preferred stock

payable on October 30, 1948, to stockholders of record on October 18, 1948.

P. W. Skogmo, President, stated that the earnings for the third quarter ended September 30, 1948 and for the nine months would be released about October 20, 1948. He stated that earnings for the eight months through August 31, 1948, exceeded those of the entire year of 1947 by over \$600,000. For the entire year of 1947, consolidated net income of \$2,245,557 equaled 91¢ per share on the common stock.

According to Skogmo, bank borrowings on August 31, 1948, amounted to \$3,400,000,

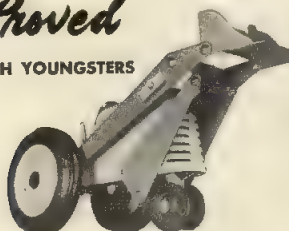

a reduction of \$11,150,000 from the spring peak. This reduction was made through proceeds of the sale of preferred stock of \$6,000,000 and from earnings and reduction of inventories. To accommodate the fall peak a moderate increase in borrowings above the August 31 level is required.

Consolidated sales of Gamble-Skogmo, Inc. for September, 1948 totaled \$13,988,021 compared with \$12,080,596 for September, 1947, a 15.79% increase.

Third quarter sales showed an increase of 16.38% from \$35,155,161 in 1947 to \$40,912,107 in 1948. For the first nine months of 1948, sales of \$112,249,780 were an increase of 9.70% over sales for the same period in 1947.

Albert J. Matson, since 1940 manager of the company's credit division, was elected by the board to the position of Assistant Treasurer.

Belk-Matthews Company, 20 Dexter Street, Montgomery, Ala. announced September 23, 1948 "Toyland opening. . . Thousands of new toys that are better more fun . . . than ever before." The 1½ yard will feature dolls, bicycles, trains, games and a complete line of toys

"DEALER AD-HELP REPORTING SERVICE" FOR RETAILERS

Names, addresses and information describing dealer ad-help material provided by approximately 600 manufacturers are included in Report No. 3, "Dealer Ad-Help Reporting Service," released this week (Sept. 29) by Publishers' Auxiliary, trade paper for the non-metropolitan press.

The report goes to more than 2,400 publishers in smaller communities who requested it in response to The Auxiliary's offer.

Third in a series, it lists "twice as many manufacturers as were included in Report No. 2 and almost seven times the number offered in the original report.

No charge is made either to manufacturers for listing or to newspapers for copies of the reports, according to George H. Bechtel, editor.

The series originated as a service to non-metropolitan advertising men with a two-fold mission: to help increase the volume of local advertising by taking advantage of manufacturers' offers to dealers and to help improve local display with manufacturer's illustrations.

Surveys conducted following Report No. 2 indicated that each of the 2,400 publishers receiving the lists, requested material from 8.25 manufacturers. The survey also indicated that many publishers were waiting for the more opportune fall season to make full use of the service.

The publishers reported manufacturers cooperative and their services "more than adequate," Bechtel said. He added that some newspapers gained as much as 1,400 inches of advertising through use of the service in a single month.

"Report No. 4, featuring spring and summer helps, will be issued in January," Bechtel said.

Novel machine "Plants" fertilizer under grass roots of pasture

Profitable invention: Mr. Fay Mowery's pasture fertilizing machine, which he designed and built, places the fertilizer where it will do the most good — just below the grass roots. The result — better grass

Rancher solves problem of how to grow Better Grass

The idea that he would grow a lot better grass if he could place the fertilizer just below the grass roots, instead of on top of the sod, started Fay Mowery, ingenious rancher of Alameda, Texas, to work in his ranch shop.

The result is the novel machine shown above that can "plant" 500 pounds of fertilizer per acre just below the grass roots without damaging the sod. Built of parts of farm implements with a home-made fertilizer box, the machine covers 2½ acres a day.

The big improvement in grass has already more than paid for the time and labor in building the machine, according to Mr. Mowery, former 4-H Gold Star boy of Harris County.

Like keen ranchers and farmers the country over, Mr. Mowery has also discovered that it pays to farm with Texaco Products.

Nice Family Mr. Mowery lubricates as Mrs. Mowery and daughters look on. Only Marfak Lubricant is good enough for Mr. Mowery's farm implements and tractors, because Marfak sticks to bearings better, lasts longer.

Mr. T. J. Stockstill, popular Texaco Man of Wenatchee, Washington, loads up with Texaco Fire-Chief, the gasoline with superior "Fire-Power," and other Texaco Products, to give his farm customers the timely and friendly service that's typical the country over.

Rugged Tire: Many Texaco Farm Men serve the farmer's tire needs too. Farmers around Thibodaux, La., have learned that it pays to depend on Texaco Man Nolan Gaubert, shown here with Mr. W. Benoit and Mr. A. Chaisson, prominent local farmers.

Farmers Everywhere prefer Marfak Lubricant once they find out how much better and longer it stays on bearings. That's why you see Mr. O. E. Everson, prominent farmer of Whiting, Ia., giving his tractor a "shot" as Joseph G. Stangel, his friendly Texaco Man, stands by.

Tune in: TEXACO STAR THEATER every Wednesday night. See newspaper for time and station

LET'S MAKE A DATE...FOR '48

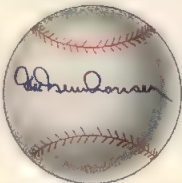

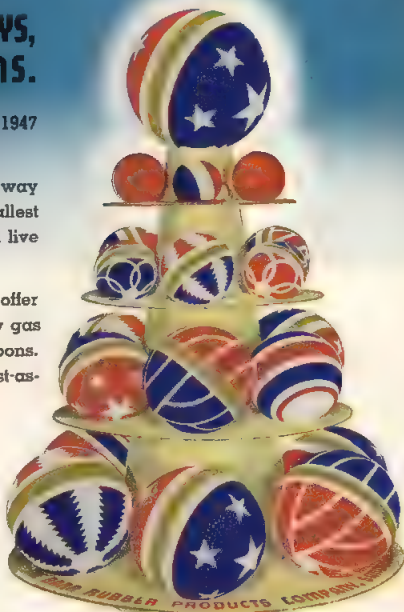

GAS INFLATED BALLS, PET TOYS, SPONGE BALLS, BALLOONS.

Here's the line that surged off counters in 1947 to set a new sales record for the last half.

Here's the line of prewar standards—all the way from the largest gas inflated ball to the smallest sponge ball and lightest balloon. For it's all live rubber and latex for '48.

Your customers know this line. When you offer it they know you are offering highest quality gas inflated balls, sponge balls, pet toys, and balloons. They know you are NOT offering an "almost-as-good" to take a longer margin.

Last year many customers were disappointed because we were completely booked by late summer. Play safe. Get your order in the hopper now, so we can keep that date for '48.

YOU'LL SEE IT ALL — IN JUST ONE CALL

Toy Fair visitors are invited to see our full line on display in our permanent New York show room: Suite 373, Metropolitan Tower (37th floor), 1 Madison Avenue, 24th St. entrance, across the park from the Fifth Avenue Building. Mr. William J. Canary and Mr. Fred Sichel in charge. Phone: Murray Hill 6-3286.

Rubber Toy Need!*

All rubber toy requirements can be taken care of in ONE shipment, thanks to Barr's diversified line. That's Barr "Centralized Service." It means one invoice, one freight bill at a time when freight costs are increasing, one checking-in. Time and money saved in that way means more profit in the end.

Today—as always—the name BARR leads all the rest in rubber balloons. Why? Because Barr Balloons are expertly made, carefully inspected, smartly designed, beautifully colored. Years of experience have given Barr the inside on how to make the rubber playthings that children want . . . that grownups want to buy. Merchandisers and consumers who buy BARR, buy best!

FISHING REELS

SINGLE ACTION

THOMPSON

A precision single action reel, built as a masterpiece to satisfy the exact fisherman. Frame and spool is machined from solid bar duralumin; it is not fabricated or die cast. Monel line guide, diameter, 3 1/4 inches and spool width 1 1/4 inches. Line capacity, 300 feet 18-pound test backing with 30 or 35 yard tapered line. An excellent steelhead or salmon reel.

No.	Wt. each	Each
500T	8 ozs.	★\$33.75

No. 100

Same type reel as No. 500T, except it is fitted with 3/4-inch width spool. Line capacity, 100 feet 10-pound test braided casting line, and thirty yards tapered line. Stainless steel line guide

No.	Wt. each	Each
100	7 ozs.	★\$28.75

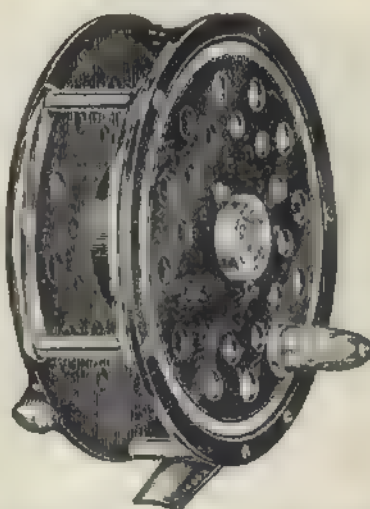

ARNOLD

A new DeLuxe model, metal reel, small single action reel with drive, drag and brake entirely controlled by forward rotation of handle. Working parts entirely enclosed. The handle remains still when line runs out. Turn handle forward to increase tension.

No.	Capacity	Wt. each	Each
17	100 yds.	7 ozs.	★\$ 9.95
18	150 yds.	8 ozs.	★ 10.95

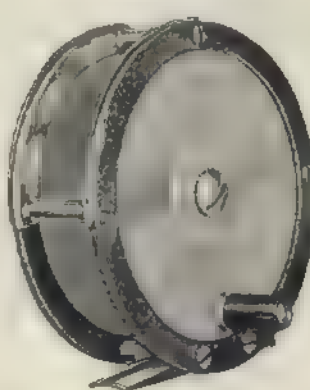

MEDALIST

A single action reel, strong, efficient and free from sharp edges which would injure enameled lines. Perforated spool which permits line drying, operating on a tempered phosphor bronze axle. By pressing a latch, the spool can be removed from the frame. Metal construction of satin nickel throughout, in gun metal finish with diamolite line guide, mottled amber handle. A wonderful trout and salmon reel. This reel can also be had from the factory for left hand fishermen. Fitted with external drag.

No.	Plate, in.	Capacity	Wt. each	Each
1494	3 1/4	115 yds.	4 ozs.	★\$ 9.00
1495	3 1/2	145 yds.	6 ozs.	★ 9.50
1496 1/2	4	260 yds.	7 1/4 ozs.	★ 13.50

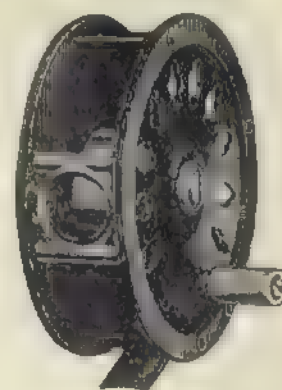

BRISTOL

A single action reel with externally controlled three pointed click. Chrome line guide and pillars, dull black side plate. Capacity 30 yards of "E" level line with a backing of 150 yards of 15 pound test casting line.

No.	Wt. each	Each
66-S	6 oz.	★\$8.25

BRISTOL

Lightweight metal alloy, blue finish single action reel with permanent click. 3 1/2-inch diameter. Polished hard steel line guide. Removable spool.

No.	Capacity	Wt. each	Each
65-RG	50 yds.	6 1/2 ozs.	★\$4.75

BRISTOL

Lightweight metal alloy, blued finish, single action reel with permanent click. 3 1/2-inch diameter. Removable spool.

No.	Capacity	Wt. each	Each
65	50 yds.	6 ozs.	★\$4.50

All above, one in a carton

Jesse Rotman and his Ideal counterpart

DOLL FASHIONED AFTER CHICAGO YOUNGSTER

Most mothers believe their children endowed with doll-like qualities, but the mother of nine-month-old Jesse Rotman, of Chicago, knows her son is actually a doll. That is, her son's doll-like qualities have been incorporated into a life-size doll.

Jesse, who lives at 1631 East 70th Street, Chicago, was seen about six weeks ago by an official of the Ideal Novelty and Toy Company of New York. The latter was so entranced with the child he had his doll creators fashion a replica of the youngster to be sold in department stores throughout the country starting this month.

The doll, to sell for \$25, stands 27 inches high, and has a special Baby Coos voice mechanism which permits it to coo, sob or cry when pressed or squeezed in the hands. It is dressed in velvet jumpers, and wears a velvet beret, white shoes and an attractive "T" shirt.

LIT BROTHERS OPENS SANTA CLAUS LAND

"Santa Claus Land"—a special toy department where Santa Claus will arrange to have children's toys mailed to them

direct from Santa Claus, Indiana, was officially opened in Lit Brothers' famous "Magic Lally Toyland" Monday, October 11.

Lit Brothers' own Santa Claus will serve as postmaster in this unique Santa Claus Land where a total of 58 popular toys for boys and girls which may be mailed direct from Santa Claus, Indiana, will be on display. The toys range from dolls to boxing gloves and include every kind of toy which will appeal to the imagination of the younger set.

All toys which are ordered in Lit Brothers' Santa Claus Land will bear the world famous Santa Claus, Indiana, postmark and will be brightly labeled with colored streamers. These toys will sell at regular retail prices, to which will be added postage, the amount of which will be determined by the weight of the toy rather than by the location of the place to which it is being sent.

Unless requested by the customer, no package will be shipped prior to November 25. To assure delivery in time for Christmas, all orders for toys must be mailed not later than December 11.

Store officials believe that next to seeing Santa Claus himself drop down the chimney, children will enjoy receiving their Christmas gifts direct from Santa Claus Land.

In addition to taking care of the gifts, Lit Brothers' Santa Claus will see that all Christmas cards which are deposited in the store's Santa Claus Land are sent to Santa Claus, Indiana, where they will be mailed and postmarked.

Each year, millions of gifts and letters are sent to Santa Claus, Indiana, for stamping with the town's official postmark. Keeping pace with its record amounts of mail are the record number of tourists that jam-pack the little town. They come to mail gifts and greeting cards and to see the fairland attractions of Santa Claus Land, the town's special park that delights children as the "place where Santa Claus lives."

In addition to the special Santa Claus Land display, Lit Brothers will use newspaper ads, signs throughout the store and a special window display to round out this novel promotion which which is bound to make a hit with the kids.

Kusan employees pose proudly before a boxcar of their products, ready for shipment to California.

Only one tire gives you what he's getting!

LET THIS MOTORIST TELL YOU HOW THE FIRST NEW KIND OF TIRE IN 15 YEARS WILL MODERNIZE YOUR CAR!

C. Y. BENAVIDES, rancher, Laredo, Tex.: "In our country, you often have to drive across the range where there's plenty of tough going. That's why I'm sold on Super-Cushions. I never had such smooth-riding tires in my life. Even on rough ground, you feel like you're driving on a paved highway most of the time."

• • •

This remarkable new kind of tire will do wonders for your car, too! It's bigger and softer . . . runs on only 24 pounds of air. You'll get a softer ride, less wear on your car, fewer rattles and repair bills, greater mileage, blowout resistance! *It'll fit the rims on your present car—so see your Goodyear dealer today!*

Millions of Super-Cushions are now in use on new and older cars.

The new *Super-Cushion*

New Metal Dairy Farm... 8 Cows

"Friendly Acres"—the modern model Dairy Farm. "Farmer Brown" will beam with pride as he herds his cows into this gleaming metal barn, slips their heads into the stanchions for milking. There are 3 Guernseys, 3 Holsteins and 2 Jerseys (plastic models, of course) to care for. After milking, turn them loose in the fenced-in yard while the barn floor is scoured clean. It's all so real looking and built to scale... the metal

fence sections (8 of them) and gate interlock any way you want to make a pasture. The barn is big, 12 $\frac{3}{4}$ in. long, 6 $\frac{1}{2}$ in. wide; has a working pen, six place stanchion, sliding door, and is all metal. Cows are three dimensional and are true-to-type in markings and colors. 2 milk cans are also included.

48 T 2703—Ship. wt. 3 lbs. 4 oz. . . . Set 2 79

A

Wind Them Up and Watch Them Go

[D] HONEYMOON FLYER WITH AIRPLANE. Wind it up ... the little streamlined train speeds around through tunnels and over bridges; airplane flies overhead. Long-running clockspring motor. Lever for starting and stopping. Brightly lithographed metal. $9\frac{1}{4}$ -in. diam. base.

48 T 2824—Shipping weight 1 lb. 97¢

[N] SET OF 3 MECHANICAL RACERS. Wind them all up ... set them off ... and may the best car win! Hold your own races with these 3 little wind-up speedsters. Each a different color and number. Metal, realistically lithographed. Strong spring motor. Each car is 5 in. long.

48 V 2802—Ship. wt. 1 lb. Set of 3 1.00

[M] MIDGET AUTO RACER. Scale replica in plastic of midget racing car with dummy exhaust pipes extending from motor to rear. Front wheels adjustable—direct car on straightaway or in circles. Driven by long-running spiral spring motor with winding key. Car is 6 in. long.

48 T 2802—Shipping weight 10 oz. 79¢

[P] NEW 1949 FORD. Scale model in bright red and plastic of 1949 Ford 4-door Sedan. Metal chassis, doors; rubber tires; shiny hub caps, bumpers. Mirrored metal windows and windshield. Strong wind-up motor. Ford is $7\frac{3}{4}$ in. long.

48 T 2851—Shipping weight 14 oz. 1.85

[R] GEORGE, THE DRUMMER BOY. Brightly lithographed soldier boy with drumstick in each hand. He beats a staccato roll on metal drum when strong spring motor is wound with attached key. Attractively designed and finished in detail. Measures $9\frac{1}{4}$ in. high.

48 T 2818—Shipping weight 10 oz. 77¢

[T] SPARKLING BATTLESHIP. Wind up the strong spring motor and watch this "super dread-nought" roll across floor into circles. Shoots sparks from 2 long-range guns. Bombs and a bomb-elevator that really works are on deck. All steel, brightly lithographed in realistic colors. Moves easily along any flat surface on concealed wheels. Broke lever. 15 in. long.

48 T 2838—Shipping weight 1 lb. 97¢

[U] METAL GASOLINE TRAILER AND VAN TRAILER WITH HAULERS. Gas Trailer has red and yellow enamel finish, is $8\frac{1}{4}$ in. long, has lever to prop trailer up when hauler is disconnected. Back drops for unloading cargo. Red Hauler is 8 in. long, has strong, wind-up motor. "Tool box" in back of cab. Red and blue Van is $8\frac{1}{4}$ in. long, has lever to keep trailer level when off hauler. Hauler is 8 in. long with long-running spring motor, strong enough to move heavy "loads." All have wood wheels.

48 T 2849—2-Truck Set. Ship. wt. 3 lbs. 1.95

[X] TRACEY TAXI. Amusing and mystifying toy. Will not run off edge of any flat surface, speeds up to the edge, stops, turns around and speeds off again. Strong, long-running clockspring motor with key attached. Metal, brightly lithographed. Taxi is $4\frac{1}{2}$ in. long.

48 T 2819—Shipping weight 6 oz. 77¢

[Y] PLUTO DOG. Walt Disney's amusing dog character will delight the tiny tots who can make him run along playfully sniffing as he goes just by pressing his tail down. Metal body, attractively lithographed, droopy rubber ears.

48 T 2803—10 in. long. Ship. wt. 11 oz. 99¢

[Z] MECHANICAL AUTO TRANSPORT. Metal transport with two plastic yellow cabs on individual platforms which tilt for loading and unloading. Transport has baked enamel finish with bright plated hood strip, headlights and radiator grille, is powered by strong, spiral spring motor, winding key attached. Transport is $10\frac{1}{4}$ in. long.

48 T 2809—Shipping weight 12 oz. 98¢

[V] "FLIPPO" THE DOG. This clever mechanical dog does back flips in the air, over and over. Strong clockspring motor, winding key attached. Metal, realistically lithographed.

48 T 2817— $3\frac{1}{4}$ in. high. Ship. wt. 6 oz. 99¢

Tea Sets of plastic with the look of porcelain

Happy is the hostess who serves tea with these dishes. They're ivory-color plastic—lightweight, hard-to-break and actually translucent—look like the fine porcelain grown-ups use. They're even hand-painted with a dainty floral design, and delicately embossed. Sauces 3½ inches in diameter; other pieces in proportion. With pretty paper napkins and plastic cutlery.

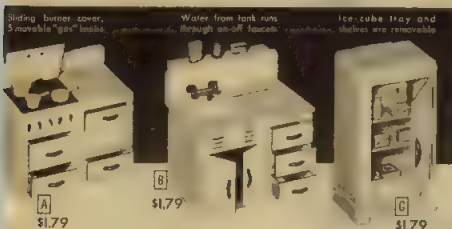

- Service for three:**
 3 cups 3 saucers 3 plates creamer
 3 forks 3 knives 3 spoons sugar bowl
 teapot, cover 6 napkins
 49 N 1814—22-piece set plus 6 paper
 napkins Shipping wt. 1 lb. . . . \$1.49
- Service for six:**
 6 cups 6 saucers 6 plates creamer
 6 forks 6 knives 6 spoons sugar bowl
 teapot, cover 12 napkins
 49 N 1813—40-piece set plus 12 paper
 napkins Shipping wt. 1 lb. 8 oz. . . . \$2.39

Plastic Dinner Sets as complete as mother's own!

The life of the party depends, to a large extent, on the table setting. A full-course dinner is no problem with these sets—they include covered vegetable dishes and gravy boats with ladles! Like the sets at left—same durable ivory-color plastic, same proportions—but more complete!

- Service for three:**
 3 cups 3 saucers 3 plates 1 platter
 3 forks 3 knives 3 spoons 1 creamer
 oval veg. dish with cover, teapot with
 lid, gravy boat with ladle, sugar bowl
 49 N 1816—27-piece set plus 12 paper
 napkins Ship. wt. 2 lbs. . . . \$2.89
- Service for six:**
 6 cups 6 saucers 6 plates 1 platter
 6 forks 6 knives 6 spoons 1 creamer
 veg. dish with cover, teapot with lid,
 footed gravy boat with ladle, sugar bowl
 49 N 1817—45-piece set plus 24 paper
 napkins Ship. wt. 2 lbs. 8 oz. . . . \$3.69

Play Kitchen Equipment that really functions!

Even in large-size toy equipment such realism is rare, so it's headline news to find it in these. Doors and drawers open and close, faucets actually run, ice-trays and refrigerator shelves are removable. Gleaming, durable ivory-color plastic, black trim.

- 49 N 2175—Set. Sink, stove and refrigerator. Ship. wt. 3 lbs. Money-saving price . . . \$4.98
- A** Stove with 2 plastic
 saucepans and a frying
 pan 3½x3½x5½ in.
 49 N 2152—Ship. wt. 1 lb. \$1.79
- B** Sink with metal basin,
 play soap, soap flakes and
 cleanser 5½x4½x6½ in. white
 49 N 2153—Ship. wt. 1 lb. \$1.79
- C** Refrigerator with play
 milk bottle, butter, eggs
 4½x2½x5½ in. high
 49 N 2151—Ship. wt. 1 lb. \$1.79

Treasure Chest of Lapel Pins

Very early in life every girl begins to covet the glitter of jewelry and these authentic Disney-design pins will represent GLAMOUR to any small girl. Six pins, all large and heavy to withstand young wear and tear; all in lustrous gold plate, all with safety clasps. Mickey and Minnie Mouse, Pluto, Donald Duck, Porky, and Jiminy Cricket—each about 1½ inches tall. Richly decorated chest (8½x5½ in.) is sturdy fiberboard, has removable tray. Price includes 20% Federal tax.

49 N 2144E—Ship. wt. 1 lb. . . . \$1.09

These Sets will help her entertain graciously

- D** Gay-colored metal Tea Set. Service for six—unbreakable, easy to handle. The fanciful lithographed designs will delight the jolly hostess, and her guests as well. Six each of the following: cups, saucers, butter plates, salad plates. And one each of these: handled dish with cover, creamer, footed sugar bowl, teapot with lid and 8x10-inch tray. Duck design on butter plates, fairyland bride and groom on all other dishes. Sauces are 2½ inches in diam., other dishes in proportion.
- 49 N 1818—13-piece tea set. Shipping weight 2 pounds 8 ounces . . . \$4.98
- E** Shining Stemware. Clear or glass, practically unbreakable plastic in a pretty floral pattern. Service for four—4 sherbets, 4 goblets, water pitcher (3½ in. high) and some colorful plastic straws.
- 49 N 1801—Ship. wt. 1 lb. 4 oz. \$8.98
- F** Lemonade Set. Replicas of plastic in a pretty floral pattern. 3½½-inch metal tray with big easy-grip handle, holds 4 sparkling glass tumblers 2½ in. high. Pitcher 4 in. high, 2½ in. across.
- 49 N 1955—Ship. wt. 2 lbs. . . . \$8.98

TOY NEWS AND NEW TOYS

PLASCO INTRODUCES "OPEN HOUSE" DOLL HOUSE

While architects strive toward perfecting the solar house of tomorrow, today's young homemakers can enjoy the comforts of a perfect model Plasco's "Open House" Doll House. Complete from antenna (television, of course) to ziggurat (terrace, of course) . . . this dream of a house invites sunshine into every room . . . allows small hands to rove through each nook and cranny without obstacle.

Originally designed as a display piece for Plasco's line of Little Homemaker Furniture, the "Open House" was put on the market because of heavy demand on the part of buyers. It is a modern 6-room castle that would delight any home owner or would be home owner! Each room has interconnecting arched doorways, colorful durable flooring, and walls attractively decorated in today's taste. A central staircase winds from the first floor (where dining room, living room, and kitchen are beautifully laid out) to a second floor central hallway that serves a bed room, nursery, and bath. From the second floor hallway, the "Open House" dweller steps out into a charming flag-stoned open air terrace—a sun-worshipper's wish-come-true.

The "Open House" may be sold as an individual piece, or completely furnished with Plasco's Little Homemaker furnishings. Every piece of furniture is a to-scale miniature of current fashions in cabinetmaker furniture. Youngsters and grown-ups alike thrill to the wood-grain finishes . . . the drawers that open . . . the television pictures that change . . . the wonderful, realistic touches that make "playing house" a source of never ending delight!

For the final touch of perfection, the Plasco Doll House may be turned around on its axis to permit easy access to every room. In every well thought out detail, the "Open House" is designed to keep little homemakers content through countless hours of instructive play. Full details may be obtained from Plastic Art Toy Corp. of America, East Rutherford, New Jersey

The "Open House" by Plasco allows the little housekeeper to rearrange furniture without difficulty

BUYERS MARKET IN NEW ORLEANS

The second annual Buyers Market held in New Orleans since the end of World War II was the most successful merchandising event of its kind ever held in that city, according to the Association of Commerce.

More than 700 out of town buyers registered at New Orleans hotels for the event, in addition to those who participated but did not register especially for the Market.

PETER RABBIT THE MAGICIAN MAGIC SET BY STRATHMORE

The Strathmore Co., Aurora, Ill., report an increasing demand for their Peter Rabbit the Magician Magic Set. The complete outfit is packed in a durable colorful box and case with a beautifully illustrated book in colors. Easy and simple to understand instructions tell how to do each trick and also tells Peter's life story, and, of course, there is an entire outfit of tricks

Magic Set by Strathmore.

and a wand—in fact everything necessary for youngsters to put on a real magic show and mystify their parents and friends. The retail price is \$1.00.

Christmas lights by American Plastics

GLOW BELLS BEAUTIFY CHRISTMAS TREE LIGHTS

Stephen M. Harris, American Plastic Mfg. Co., 2938 North Halsted Street, Chicago 14, states that their new line of Glow Bells Christmas tree lighting sets is meeting with an encouraging reception from jobbers and dealers throughout the country. Made of brilliant, unbreakable plastic, the light shines through and has the effect of making the small tree light bulbs look bigger and more colorful. The Glow Bell line is packed in three different ways. Set number 108 includes Glow Bell shades only, set number 800 is the Glow Bell series set, and set number 700 is the Glow Bell multiple set. Mr. Harris states that the bulb used in the multiple set has an unusual long life—in excess of 1500 hours, practically nullifying the replacement problem.

HAT KIT BY CORONA

Corona Hat Company has placed a new, educational toy on the market consisting of a Miniature Hat box, containing felt hats, ribbons, feathers, flowers, needle and thread. A child can trim and fashion these hats to suit its own individual tastes. The feature of this toy is that the box itself is made of a five color woven fibre, 5 inches in diameter, and 3 inches higher. This enables the owner to carry the box around and play with it when visiting or when out in the open playing with other children. Furthermore, when the contents are removed the box has a very useful purpose in that it can be used for hose, handkerchiefs, gloves or toilet articles around the house. The miniature Hat box sells for 79c.

ANNUAL MASBACK OUTING

Salesmen and executives of Masback Incorporated, New York City, hardware distributors, held their annual outing recently at Schmidt's Farm, Westchester, New York.

Contests were staged in softball, swimming, and tennis, with awards given the winners. A shore dinner was served during the evening.

10 EAST 52ND STREET • NEW YORK 22, N. Y.

Above is a view of the Ken Roberts showroom in San Francisco, showing the unique display arrangement that enhances the beauty of the famous lines that he represents. The doll houses opened show the many buyers this wonderful array of toys.

DOLL HOUSES MAKE INTERESTING BACKGROUND FOR TOY DISPLAYS

One of the most novel display arrangements during Western Winter Market in San Francisco was to be seen in the showrooms of Ken Roberts, factory representative. Hand-decorated plywood doll houses, which open up just the way a doll house

should, "housed" samples of his various lines — Alexander dolls, Knickerbocker stuffed toys, Knickerbocker plastics, and Doepke model toys.

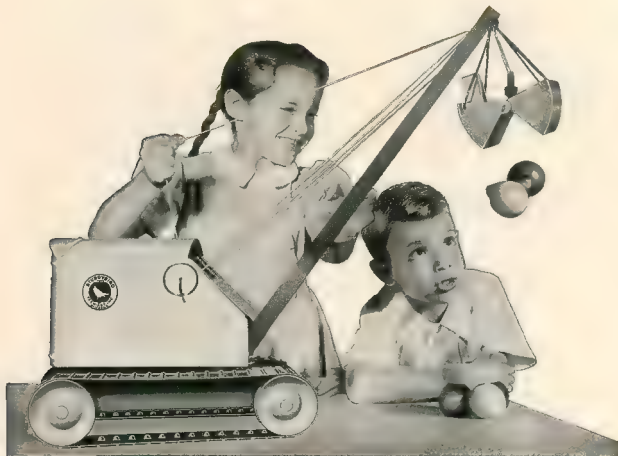

The doll houses are lighted inside with long fluorescent tubes running along each

side. Background colors are pastels — blue for plastic toys, pink for dolls, yellow for trucks.

The Roberts doll houses were painted by a San Francisco artist and have proved to be a favorite with West Coast toy buyers.

Closed, the Ken Roberts showroom looks like a Lilliputian Village, with its gaily painted doll houses, that are a tribute to the ability of the artist. This arrangement also keeps the samples clean and allows for good lighting as well as an attractive appearance.

200 FIFTH AVE., NEW YORK 10, N. Y.

Trailer Truck

A A big truck! 25 in. long over all, 8 in. high. Six rubber-tired wheels; one spare. Glass reflectors just like a real truck, two on rear and three on top front of trailer. Dummy headlights, front bumper and grille. Heavy sheet steel construction; bright baked-on enamel finish. A gift to delight any boy! Shipping weight 8 lbs. 79 N 06182.....\$2.89

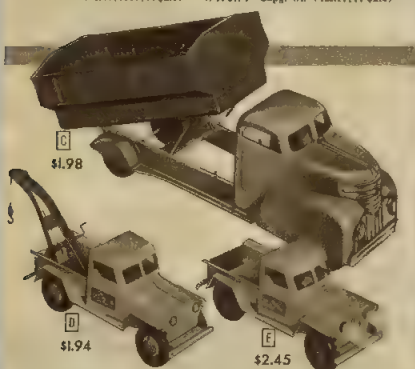

Hook and Ladder

B Lots of fun putting out "make-believe" fires with this realistically photographed hook and ladder! Thrill after thrill as it speeds around corners, trailer swiveling on swivel-mounted cab! Ladder with dummy water nozzle may be hoisted up to 32 in. high by cranking handle. Fire bell on hood. Made of heavy-gauge steel; bright baked-on enamel finish. 25 inches long overall. Six rubber wheels. 49 N 6179—Shpg. wt. 4 lbs.....\$2.49

Steel Rider Truck for your young fireman \$6.39

• Just like a real fire engine! Clang the bell! Unhook the ladders! • Steer with regular steering wheel as you speed to "make-believe" fires. A grand gift for an active youngster! Heavy duty fire engine with sturdy bicycle-type Automobile-type chassis of extra heavy gauge steel, reinforced and welded for strength. Youngsters really go for that bright red enamel... the automobile-type steering gear, the fire bell mounted on the cab... the four, big, easy-rolling, rubber-tired disc wheels. Best of all—two ladders, each 20 in. long, unhook from sides of truck and mount at rear. Truck over 30 inches long overall; 15 1/4 in. high; 8 1/4 in. wide. Seat 1 1/4 in. from floor. 79 N 06187—Shipping weight 16 pounds.....\$6.39

Big realistic all-steel Toy Trucks

C Cool Dump Truck. Heavy gauge sheet steel. Bright baked-on enamel finish. 22 3/4 in. long overall. Lever for dumping. Rear gate opens to pour coal. Dummy grille and bumpers. 4 wheels. 79 N 06157—Shipping weight 5 pounds.....\$1.98

D Jeep-type Wrecker Truck. Replica of famous Willys pick-up truck. Removable wrecker boom. Length 16 in. overall; 7 1/4 in. high to top of boom. Ratchet hoist on boom. Front and rear bumpers; dummy headlights; hook on rear. Hood raises Removable tailgate. Steel, bright baked-on enamel finish. Shipping weight 2 lbs. 8 oz. 49 N 6137.....\$1.94

E Electrically lighted Jeep Truck. Hood lifts for access to battery. Two light bulbs. On-off switch. Big truck bed. Tailgate drops for unloading. Front and rear bumpers. Dummy steering wheel. Hook in rear. 13 in. overall. All-steel; baked enamel. Uses standard flashlight battery (not included). Shpg. wt. 2 lbs. 8 oz. 49 N 6152.....\$2.45

Steam Shovel

F Works just like a real steam shovel. Picks up and dumps anywhere you wish. Heavy gauge all-metal construction, bright baked on enamel finish. About 20 in. long overall with boom extended. Cab revolves on metal base. Two convenient cranks, one on either side; one makes ratchet sound. Shipping weight 3 pounds. 49 N 6154.....\$1.87

Magnetic Crane

G Powerful electro-magnet, attached to die cast lifting hook, picks up heavy metal objects, drops them when battery is turned off. Release-lever and crank to raise and lower cable. Cab revolves. Made of heavy steel; colorful baked-on enamel. Size 7 1/2 inches overall. Uses flashlight battery (battery and small car not included). Shipping weight 4 lbs. 4 oz. 49 N 6180.....\$2.98

Big Auto Transporter

H It's fun to play "car de livery"! 4-wheel cab, detachable trailer has 4 wheels and collapsible supports. Grooves on top hold the 6-in. cars. Two 12-in. rails attach to upper decker cars roll down. Tailgate drops down forming a loading ramp for lower decker cars. Made of heavy steel; bright color. Shipping weight 4 pounds. 49 N 6149.....\$1.94

She walks along,
head nodding!

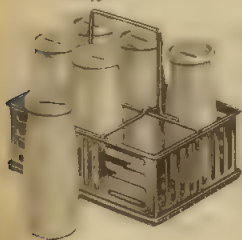

Then she lays
an egg

and cackles
proudly!

Big Walking, Laying, Cackling Hen

Wind her up and watch her strut along in real barnyard fashion, her head nodding all the time! Cackles proudly as she lays real-looking wooden eggs. All-metal; realistically lithographed in bright colors. Strong, long-running key-wind motor. About 8 in. tall.

CUDAWKUT
CUT CUT
CUT CUT

Amusing Balky Mule

B Runs back and forth. "Whoo!" Mule and cart rear up; farmer rocks back and forth in seat. All-steel, lithographed. Clockspring motor; attached key. Length 8 in.

49 N 5721 - Shpg. wt. 10 oz. 94c

With whiffle tree, you can hitch horses to implements without unhorsing

Implements hook to tractor

HAPPITIME
MADE IN U.S.A.

15-pc. Rubber Farm Set . . realistic . . durable!

- Brightly colored . . . looks like real . . . works like real
- Molded of durable, washable rubber . . . easily kept clean
- Sturdy and almost unbreakable . . . easy-rolling wheels
- Safe for young children . . . will not scratch furniture

Think of the fun youngsters will have "doing the chores" with these realistic implements! They're modeled after Sears' famous DAVID BRADLEY line easy-rolling wheels. Set includes: double gang plow, pulverizer packer, manure spreader, mower, tractor, farm wagon, horse team with 2-pc. h. whiffle-tree, calf and colt, 2-pc. cab and trailer—all packed in roomy board barn.

Big truck, consisting of cab and trailer, is ideal for carrying realistic horse and calf. Cab and trailer 9¾ in. long overall; other pieces in proportion. Whiffle-tree permits hitching horses to implements without unhorsing; or team may be backed up and hitched to wagon shaft. Turn shaft on wagon lets front wheels make sharp turns. And, just as on farm, all implements can be hitched on to tractor.

49 N 6457 - Shipping weight 3 lbs. 6 oz. 15-pc. set with barn

Rubber Tool Set

Four molded rubber tools. 9¾-in. folding jack knife, 8-in. dagger, 9¾-in. hatchet, 9¾-in. hammer with wood handles. Shpg. wt. 1 lb.

49 N 6446 57c

Metal Stunt Firemen

Lots of fun at a tiny 39c price! Put firemen on ladder, they zip to ground in tumble race. 2 lithographed "Firemen" 14-in. metal ladder fits on base.

49 N 6407 Shpg. wt. 10 oz. 39c

Metal Mail Box

Saving games easier this way! Insert coins up to quarter size, in slot provided. All-metal, 6-in. high 2¾-in. wide, deep. Key included.

49 N 6432 - Shpg. wt. 10 oz. 49c

a new view in farm power

**ENGINE
in rear**

**IMPLEMENTS
in front**

The Allis-Chalmers Model G tractor and its broad line of front-mounted companion implements bring new visibility, new ease of operation, new economy . . . *new performance* to family farms of all types and sizes.

The rear engine design of the Model G seats you in front with clear, unobstructed, straight-ahead vision. The front-mounted implements are scarcely a hoe-handle length from your eye. Any one of the matched tools can be attached or removed in five minutes or less, and you can operate this economical tractor on two to three quarts of fuel per hour.

When equipped with two-row drill planter (illustrated above) the Model G will enable you to plant up to 25 acres per day. With other tools you can plant and cultivate from one to six rows at a time. Even the 12-inch plow is front-mounted. Wheel treads can be adjusted to fit any desired row spacing of 10 inches and up, and you have a selective speed range of $\frac{3}{4}$ to 7 miles per hour.

Your Allis-Chalmers dealer will be glad to show you this revolutionary new tractor.

**for ALL jobs on some farms
for some jobs on ALL farms**

ALLIS-CHALMERS
TRACTOR DIVISION • MILWAUKEE 1, U.S.A.

search director of New York's big GLF Co-operative Exchange. Butler and Miller soon found themselves at odds.

At the Institute this year, Charley Holman made his comeback. During a discussion of the Institute's future program, Holman blandly said that when commercial public relations (meaning Miller) are eliminated from the Institute, the milk producers would be glad to come back in—with plenty of money. Next day Miller was out.

The Miller-Holman feud is more than just a private fight. The outcome means a general tightening of farmers' ranks in Washington, with the way clear for the milk producers to work again with the Co-op Council.

One other thing was apparent at Amherst—the Northeast co-ops, rich both in man power and money, are becoming a bigger force in U. S. farm policy making. The GLF, New York's Dairymen's League, the Eastern States Farmers Exchange, the Northeast Farm Foundation, and Cornell University, all swing a big stick.

Corn Need Nitrogen? Here's the Easy Test

A plain, white powder called "nitrate testing powder" may mean bigger corn crops for you. With it you can make quick, easy tests right in the field to find out whether your corn is getting enough nitrogen.

All you do is cut a notch in the lower part of the corn stalk, dust some powder in. If the powder turns pink or red, your corn is getting enough nitro-

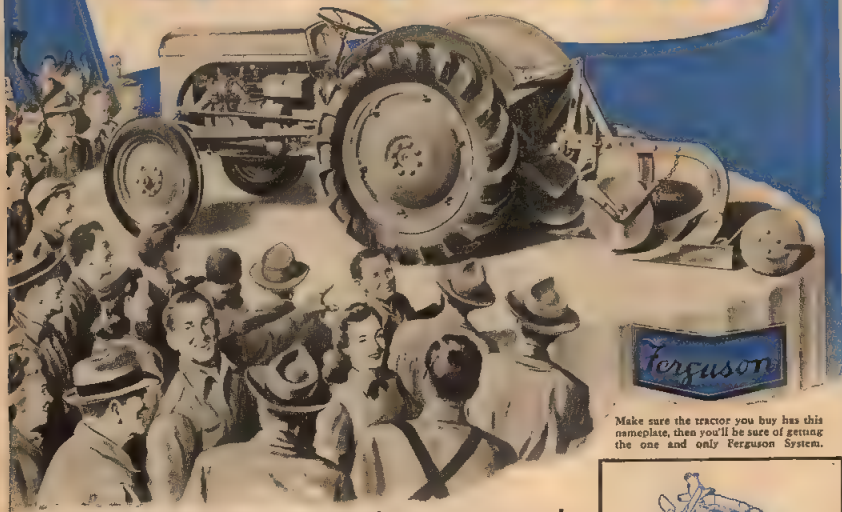

Negro 4-H'ers Camp

For years, white 4-H club members have had a national camp in Washington, D. C. Last month 82 representatives of the 300,000 colored 4-H'ers held their first regional camp in Baton Rouge, La. Here Margaret Young of Texas and Clarence Blair Jr., of Tennessee, award a plaque to David Kellum, Chicago editor, one of three Negroes to be honored for "outstanding service" to colored 4-H club members.

An even Greater Farming Machine...

The new
FERGUSON TRACTOR

**ONLY the Ferguson System gives you so much
for *EASIER, SAFER, LOWER-COST* farming**

Don't fail to see the new Ferguson Tractor at your very first opportunity! It's a great new farming machine, with the one and only Ferguson System, *plus* many new high-performance features.

There's *more power* to give you that extra pull for the tough spots, and *four forward speeds*. *Greater economy* comes with the special design valve-in-head engine that's a regular miser on fuel.

There's *greater safety* with automatic hydraulic overload protection, and brakes that work from a single pedal to stop tractor quickly with no side pull, *plus* individual turning brakes. New tip-up hood makes

engine and accessories instantly accessible.

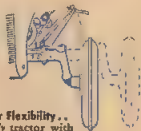

Above all there's the proved Ferguson System with its 3-point, one-minute implement attachment and built-in hydraulic control that "thinks" for itself. It's the *only* System that gives you completely automatic hydraulic overload protection, to protect operator, implement and tractor if the implement strikes a hidden obstruction.

You can easily prove to your own satisfaction that the new Ferguson Tractor is unbeatable for safer, easier, lower-cost farming! Just ask your Ferguson Tractor Dealer for a free demonstration!

Make sure the tractor you buy has this nameplate, then you'll be sure of getting the one and only Ferguson System.

Greater Economy, with fuel-miser Continental valve-in-head engine that combines with the Ferguson System to give you even more work from a gallon of fuel.

Greater Flexibility, the only tractor with front wheel width adjustable for different row widths, without the bother of adjusting the steering linkage to maintain wheel alignment!

Makes Quick Work of These Fall Jobs

FALL IS A BUSY TIME. There's no breathing spell between harvesting crops and seeding winter grains. Often, too, grain stubble has to be fallowed. Before winter sets in, a lot of work needs doing. So . . .

Fall calls for a busy tractor. To say it better, fall calls for a Ford Tractor. It gives you the speed you need . . . the easy handling . . . the quick changing of implements . . . Ford Hydraulic Touch Control . . . and that great new Ford feature, Implement Position Control.

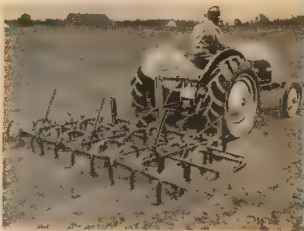

All these you need, especially in the fall. Without them, fall tillage can be long, hard drudgery, extending well into ugly winter weather. With these Ford Tractor advantages, you stay on top of your farming . . . you always are working in the right season.

Perhaps the Ford Tractor and some of the Dearborn Implements shown here can help speed up your fall work.

A free demonstration of the Ford Tractor is yours for the asking. With your own hands on the wheel, you will realize that this is the tractor you need for faster, more profitable farming the whole year through.

PLOWING—Dearborn Plows are available in many types and sizes. Short-coupled, fully mounted on the quick turning Ford Tractor and managed by Hydraulic Touch Control, they do the kind of plowing you'll like.

SPRING TOOTH HARROWING—Dearborn Spring Tooth Harrows with 3 or 2-sections are lifted by Hydraulic Touch Control for quick easy turning and transport. Fine for making seed beds in stony or root-filled soil and for lifting weeds in any plowed land.

*The only time that Counts
is Working Time*

FIELD CULTIVATING

The Dearborn Field Cultivator is a great tool for making seed beds without turning the surface under, for mulch farming, for improving pastures, for renovating alfalfa, and for working small grain stubble. A fine aid in soil conservation.

RIGHT FOR CULTIVATING

... Ready for other jobs in a hurry!

SOME PEOPLE SAY, "cultivating is an easy job." But if you have to spend the better part of a day bolting a cultivator onto old-fashioned power equipment, skinning-up your knuckles in the process, you might not quite agree. Not about that part of the job, anyway.

And at the end of a long day of cultivating, perhaps you don't feel you've been working at an "easy job," either. Not if you have pulled on long heavy levers tens of dozens of times . . . and "threaded" thousands of plants one-by-one between the shovels . . . and sat in a cramped position, constantly alert to keep from tearing out or covering up the corn or cotton. The fact is cultivating can be the most tedious task on the farm.

What a difference when you cultivate with the Ford Tractor and a Dearborn Rear-Attached Cultivator!

First of all you can attach this cultivator to the

Ford Tractor in 60 seconds or less! No bolts and nuts to fuss with, no parts to get mislaid over the winter. No cumbersome cylinders to mount, no, hose lines or leaky couplings to bother with.

You merely move the Ford Tractor's Hydraulic Touch Control Lever to lower the cultivator to the depth you want it to work, or to raise it on the turns. As you make your way down the field you look forward where your cultivator is going to be, not down at the row under the tractor. Thus, you are always ahead of the game; ready—long before you get there—for a bend in the rows, an obstruction, a sticky spot, or a hard spot. You can really look forward because the Dearborn Rear-Attached Cultivator accurately follows the crop rows.

Yes, there's a brand new cultivating experience awaiting you. To get it, right on your farm, just ask your Ford Tractor dealer for a demonstration.

The only time that counts is Working Time

The "QUEEN FLEET"

A NEW, SWIFT-SELLING TRI-STATE PACKAGE!

Sturdy, All-Plastic, Watertight Construction

INCLUDES

SURF-QUEEN

A fast, action-loaded speedboat. Propeller-driven. Sleek, snappy design. Deck and hull in bright, permanent, contrasting colors. 7 inches long. Factory tested.

INCLUDES

JET-QUEEN

New, improved jet-action speedboat complete with a generous supply of powerful, propellant tablets. Scoots about tub or pond like magic! Deck and hull in bright, contrasting colors. 7 inches long. Harmless! No fire or flame.

Extra packages of jet-charges available to retail at 10¢.

INCLUDES

PADDLE-QUEEN

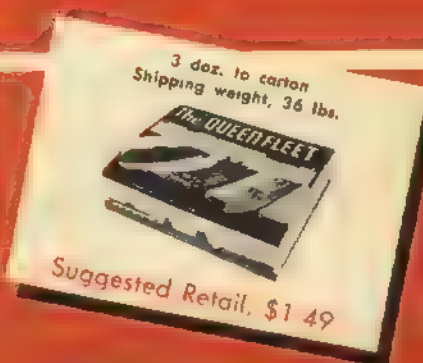

The authentic, *amphibious* river boat model. IN and OUT of water she runs along propelled by the churning stern wheel. Engineered in detail, the "PADDLE QUEEN" even provides a deck for stowing "cargo". Six inches long. Hand painted.

Better Weight Distribution...Easier Handling... Shorter Turning Diameters

You can turn these new Dodge "Job-Rated" trucks in much smaller circles, both right and left. You can back through farm gates, or maneuver in

barnyards with much greater ease. This is due to a new type "cross-steering," shorter wheelbases, and wide tread front axles.

Front axles have been moved back, engines forward, placing more load on the front axle. While cab-to-axle dimensions are the same, wheelbases are shorter, giving better weight distribution, and increased payload.

This new weight distribution, combined with longer springs, and "Air-O-Ride" seats, produces a marvelous new "cushioned ride."

lights on in his hog house from 10 to 11:30 p.m., and from 2 to 3:30 a.m. every night this summer. His 107 pigs gained an average of 1.45 lbs. a day from July 1 to September 2. They ate only 2.75 lbs. of feed for every pound of gain.

Holford Quiggs, a good hog man in Indiana, says lights let him carry 30% to 40% more hogs with the same feeders and waterers in his winter shed. The hogs eat at night; don't fight for the feeders in the daytime.

Charlie Maas, one of the best hog raisers in Wisconsin, leaves lights on over his self-feeders. He says the pigs keep the feeder doors banging all night.

So far as *Farm Journal* knows, no colleges have tested night feeding. Some farmers say hogs eat on moonlit summer nights anyway. What do you think? Has anybody else tried the scheme?

Ideas for Temporary Corn Storage

Get your materials now—they're scarce. If you might hold your corn more than a year, build a semi-permanent or permanent crib. (See September *Farm Journal*, page 48, for a plan).

Allow for plenty of ventilation. Check the best width with your County Agent. In wide cribs use ventilating flues.

Build floors at least six inches off the ground; 12 to 15 inches is better. You can lay a good floor on concrete blocks, or use the blocks alone.

Put in elevator hatches for filling, hatches or a shelling trench for taking out corn.

If you're going to store corn into next spring, make the roof water-tight. Use roll roofing, corrugated metal, or reinforced, waterproof paper. Your County Agent has plans. In round cribs, pile corn into a ridge. Makes roofing easier.

If you store corn in driveways, build an air channel at least a foot wide on each side of the drive. Use snow fence, woven wire and posts, or slats. Then see that plenty of air circulates.

Delay picking if possible. Let corn dry in the field. Pick the driest corn first. Store the first corn you pick in the narrowest cribs. Distribute the corn evenly around the crib.

Subscription Rate Going Up

Much against our will, increasing costs of paper, printing, and everything else, will force us to raise the subscription price of *Farm Journal* to \$1 a year.

New and renewal subscriptions sent promptly will be accepted at the present rate of 2 years for \$1 and 5 years for \$2.

Dept. REN, *Farm Journal*, Philadelphia 5.

THREE-QUARTER-TON 8 FT. PICK-UP

Announcing new 1949 STUDEBAKER TRUCKS

America's newest and finest!

AMERICA'S first 1949 motor trucks are here! They're handsome, rugged, superbly powered, brilliantly engineered new Studebakers!

Yes, Studebaker, first by far with a postwar car, now paces transportation progress still more . . . revolutionizes motor truck design and performance!

These new 1949 Studebaker trucks are outstanding in postwar features that you haven't seen before!

They're America's first trucks with an exclusive new kind of "lift-the-hood" accessibility!

Their cabs have astonishing new spaciousness — undreamed of new comfort — amazing new visibility!

This Studebaker super line for '49 is in full production right now, in a huge modern plant with every advanced facility for truck manufacture! More models than Studebaker ever offered before! An impressive variety of sizes and wheelbases!

Go to a Studebaker showroom for a close-up look at these sensational new 1949 trucks — they're the nation's postwar pace-setters in low-cost hauling!

INFORMATION REGARDING THE CARE AND GRINDING OF AXES

and other information

(Circularized and endorsed by all of the principal Axe Manufacturers.)

CORRECT GRINDING IS IMPORTANT

Ease and efficiency in use and length of service are increased through proper grinding.

Axes will not be replaced if improperly re-ground.

Careless grinding will ruin any axe by either destroying the temper through heat caused by friction, or by making the edge so thin it will not stand up under the force of a swinging blow.

DO NOT USE A HIGH SPEED DRY GRINDING WHEEL

An Axe ground on a dry wheel will surely be ruined.

GRIND SLOWLY ON A WHEEL KEPT VERY WET

The temper of the very best steel is possibly for a thirty-second or sixteenth of an inch back from the edge is EASILY drawn or MADE SOFT IN RE-GRINDING. The axes of all standard Manufacturers are as THIN as they should be—proper gauge—when shipped from the factory.

When Re-grinding, start to grind from two to three inches back from the cutting edge and grind to about one-half inch from edge. Work for fan-shape effect; leaving reinforcement at corners adequate for sufficient strength.

Then "roll off" a convex level as shown in this cross-section illustration of an axe bit. This illustration is exact gauge "life size" and shape of PROPERLY GROUND CUTTING EDGE.

This shows the most FREQUENT MISTAKE IN RE-GRINDING. It is a common error, the wrong way—leaving insufficient support—behind the edge—to withstand any ordinary blow. IT WILL BREAK VERY EASILY.

This shows the cutting edge ground with a long straight bevel; better than the concave bevel next above, but still without sufficient reinforcement back of the edge. Follow instructions. Observe the cross-section illustration (3rd above). "Roll-off" a CONVEX bevel for a PROPERLY GROUND CUTTING EDGE and your axe will give more service and GREATER SATISFACTION.

Printed in U.S.A.

SOME COMMON ABUSES

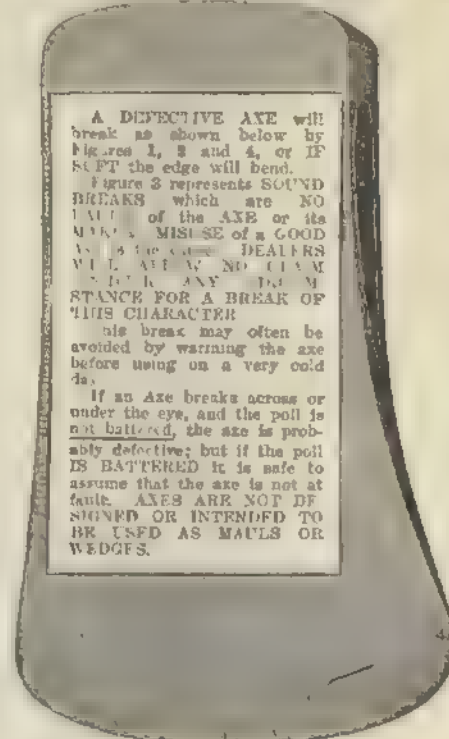

An Axe is not intended for use as a WEDGE or as a MAUL. Anyone so using an axe automatically assumes responsibility for ruining it.

In Cold Weather warm the axe slightly before using. Cold crystallizes steel.

Any axe with frost in it is brittle and will break with a very slight blow.

WARRANTY ON AXES

No Claims for defective axes will be entertained except which are allowed us by the factory.

Defective Axes must be returned to us with freight or express charges prepaid.

The most frequent sources of complaint or claim for replacement are caused by breaks from glancing blows by inexperienced or careless users. Corners broken off in prying the axe loose without sufficient care when the axe binds in the wood. Axes ruined by improper regrinding on high speed, dry wheels, and with the cutting edges ground as thin as the blade of a small pocket knife. Heads battered and eyes bulged, due to the axe being used as a sledge hammer or wedge.

If there is no defect, the break will always be crescent shaped, i.e., segment of a circle and the color of a fresh break will be about the color of frosted silver; such a break is not subject for credit adjustment. A flaw-break will be angular, straight, or irregular; the color will be dark, or the grain of the steel will be coarse.

The dealer or salesman can surely recognize abuse when an axe is presented under claim. If it has been used as a maul or wedge, the head is usually battered and the eyes bulged. Sometimes only one of the two indications appear, other times both. In a double bit where it has been used sideways for striking, it will be out of shape and frequently the eye broken. When an axe is presented showing more than one break (we frequently have them returned with four or five) usually a large break off the corner and either one or two large breaks in the bit and several small breaks. In such cases, the first break was probably accidental; a glancing blow hit against a stone or some such similar cause which would break any good axe. The axe being unserviceable after the first break, only the user could explain the other breaks and he could not explain them satisfactorily enough to receive credit or a new axe from the factory.

Why do Axe & Tool Works decline to sell any axes warranted? Because experience has shown that to warrant an axe is the initial step to a trail of trouble, misunderstanding, dissatisfaction, contention, imposition and ill feeling. A warrant is honestly regarded by many as meaning that the axe cannot be injured or worn out; that it cannot be broken, nor the temper ruined by improper grinding.

DEPT 2

HOW THEY ARE MADE
AND WHY**TRUE TEMPER KELLY HAND MADE AXES ARE BETTER**

Forged, high grade steel.

The blade is correctly shaped and proportioned to easily enter the wood, burst the chip and come clear without wedging or binding.

The steel used is made specially for them from a formula of definite chemical analysis worked out through years of experience and expert scientific tests, as the best for use in axes.

The steel comes to the factory in bars which are cut into pieces of proper size for different weights of axes.

But before being cut, specimen pieces are taken from the bar. These specimens are tempered for trial and **MUST PASS RIGID TESTS FOR TOUGHNESS AND STRENGTH**. Should one fail the test, that bar is rejected and not used for axes.

In forging the poll the eye is formed—taper eye—larger on the wedging side, so that, when wedged, the axe will not fly off from the handle.

In the second operation the polls go to the "Bit Drawers" who skillfully hammer the blade to approximate pattern or shape, during which operation the steel is refined, i.e., the heat expanded particles which compose the steel are crushed under the rapid blows of the trip hammer and are mashed together into a more compact finer, tougher structure.

When the "Bit Drawer" has finished, the axe is a rough forging and is then reheated and placed in a die under a powerful drop hammer which shapes it, true and perfect; exact as to pattern, outline and proportions,—graduated thickness etc. with the excess metal squeezed to the edges in the form of thin fins or flashes which are next cut off and the edges smoothed on giant grindstones.

Following the final forging comes one of the most important and very modern operations through the medium of our new **NORMALIZING FURNACE**. This is a heat-treating operation which eliminates any forging strains, stresses and inequalities in the steel; restores the original structure and permits perfect, even temper—otherwise impossible.

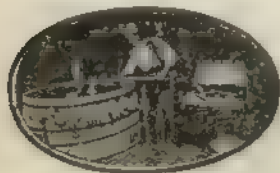

After grinding comes rough-polishing; and the axe is then ready for **THE IMPORTANT OPERATION TEMPERING**.

Each operation in the process of making is carefully guarded and inspected; the most efficient methods and **SKILLED WORKMEN** are employed; but **ABOVE ALL ELSE** in importance is **TEMPER**.

In tempering, uniformity is **ABSOLUTELY ESSENTIAL**.

The old, more or less uncertain method of tempering with Charcoal, Oil or Gas as fuel have been supplanted in this factory by recently perfected Electric Heating Apparatus automatically controlled; and the **TEMPER** is **UNIFORMLY** exact; uniformly **RIGHT; PERFECT**.

The **PERFECT TEMPER** bit cuts **EASILY**, rapidly, deep. It holds a **KEEN EDGE** and does not require frequent grinding and sharpening.

The old method—uncertain. One at a time. Maybe good, maybe not; depending on the man's accuracy of eye and attention.

The new tempering method. Exact—sure. Thirty axes tempered at one time. All perfect temper; thirty or thirty thousand or more; all the same, uniformly **RIGHT TEMPER** regulated by **EXACT, ELECTRIC CONTROL**.

AXE DISPLAY STANDS

TRUE TEMPER

A SILENT SALESMAN!

An attractive axe display any dealer will be proud to have in his store.

Frame and legs lock-seam steel tubing — brilliant aluminum finish.

Body heavy steel, lustre black finish.

Takes little floor space, 31-in. wide;

15-in. deep; 43-in. high

Weight, 17 lbs. Shipping weight, 20 lbs.

Stands firmly

A Display of Outstanding Beauty.

MANUFACTURER — DEALER
CO-OPERATION

To help every hardware dealer sell **TRUE TEMPER** Kelly Axes, we offer this handsome display stand to any hardware dealer in the U.S.A. for only the cost of packing and shipping.

We help your dealers by offering this attractive display at a price any can afford to pay.

Do Your Dealers Want To Sell
More Axes?

The alert dealer does not need to be "preached to" on the advantages of well displayed merchandise but frequently some items are overlooked and are kept in the back of the store where customers seldom see them. By the use of our **Axe Display Stand** a few axes are shown in a prominent spot, and **Axe Sales Are Sure To Increase!**

TOOL SECTION

Hardware Dealers and their CUSTOMERS find ADVANTAGE, PROFIT and SATISFACTION in Known-Brands Tools.

The Factory Brand always identifies THE BEST obtainable. The CUSTOMER benefits through DEPENDABLE QUALITY at the RIGHT PRICE.

An additional ADVANTAGE to the DEALER in selling well known brand tools, is the assurance of fair PROFIT, free from irregular competition.

The best "Booster" for Good Tools is the man who has used them. He TELLS HIS NEIGHBOR

The 1948 Truscotteers

We're mighty proud to present the Truscott 1948 Feet of Cruisers Runabouts and Utilities. Among them you will surely find the boat that exactly meets your desires and requirements . . .

. . . For you who like week-end jaunts or extended vacation cruises with your family or a group of friends—a Truscott Cruiser will be to your liking. In all sizes we have provided commodious living and sleeping quarters, and lots of locker space for storing the many items so necessary to make living aboard comfortable and pleasant. The large, open cockpit will become your favorite spot for lounging and sunning.

. . . And for those who like flash and speed—the Truscott Runabout or the Utility is the boat for you. Tremendous power places them way out in front when it comes to speed. You'll thrill to the sheer magic of their maneuverability.

And whatever your requirements—all Truscotts are outstanding among boats. They are built to the highest standards of construction for endurance and seaworthiness. Only the finest materials are used—Mahogany hulls over solid oak frames; flawless joiner work beautifully finished to satin-smoothness; gleaming stainless steel trim—all combined to give you a boat in which you will have a lasting pride.

Throughout 63 years of boat building, Truscott has maintained a record of finest quality boats at minimum prices. A wise yachtsman buys a Truscott. See your Truscott dealer for full information or write direct to the factory.

The Truscott 28 Sedan. Sleeping accommodations for 4. Speed up to 22 mph. Length 28' 9". beam 8' 11". draft 2' 2". headroom 6' 2".

TOY BUYING GUIDE

Girls

To help mothers, aunts, fond aunts, and kindly uncles buy suitable toys for children

Boys

Young ladies of this tender age have simple tastes. Make the most of it—they soon learn better. Give them:
Baby rockers. Bright colored rattles. Teething rings. Rubber dolls and animals. Stuffed animals and dolls of light weight.* Gong bell push and pull toys.* Light weight, round-cornered blocks. Soft balls. Walkers.

The young lady is taking notice of the world around her and now she's interested in such things as:
Soft small dolls. Miniature housekeeping equipment. Simple drawing books. Picture books with large lettering and pictures.* Pedal toys.* Simple building blocks.* Blackboards.* Scooters.* Kiddie cars.*

My goodness me, what fun it is to play with dolls, and keep house just like mother. So please give me:
Prekindergarten weaving and craft sets. Doll families. Doll houses and furniture.* Miniature housekeeping items.* Larger dolls.* Doll carriages.* Puppet theatres.* Alphabet blocks. Musical cradle and chairs. Playhouses.*

She's growing up, the range of her interests is widening. She can read and write and is an active young person—likes to do things. For her:
Sewing and weaving sets. Simple reading books. Craft sets. Nurse sets. Toy pianos. Modeling sets.* Playhouse furniture. Pastime and scrap books.* Roller skates.* Mechanical toys.

There's practically no limit to the variety of gifts for girls of this age.
Encourage hobby interests in sewing, drawing, painting, craftsmanship.* Large dolls. Doll layettes. Books of classic adaptations.* Ice skates.* Masquerade costumes.* Juvenile furniture for "own rooms." Skill games.* Games incorporating spelling, arithmetic, geography and history and other educational features.*

She'll soon be grown up and thinking of grown-up things. But for a few years yet she'll enjoy:
Books. Puzzles. Hand sewing machines. Miniature phonographs. "Last dolls." Games requiring teamwork.* Table tennis and ping-pong. More difficult craft sets in plastics, metal, wood, leather and weaving.

*Items that may be bought for the child in this age group, but just as appropriate for those in the next older group

Infancy to 2 years

2 to 4 years

4 to 6 years

6 to 8 years

8 to 10 years

10 years and over

He's very young and his preference runs to things he can push and pull and chew. After all, how else is a chap to learn about life:
Baby rockers. Bright colored rattles. Teething rings. Rubber dolls and animals. Stuffed animals of light weight.* Gong bell push and pull toys.* Light weight, round-cornered blocks. Walkers. Soft balls.

Hi-m, things get more interesting. The world is full of exciting things to do. I'd like:
Bathub boat sets. Small wagons.* Toy autos. Velocipedes. Kiddie cars. Simple drawing and picture books.* Stuffed animals large enough to ride. Building blocks with an object.* Horns.* Drums.*

Young men of this age believe in action and more action. So give them toys they can do things with. For instance:
Hammer and nail sets.* Boats. Wooden train sets. Larger velocipedes.* Autos.* Sleds.* Mechanical toys.* Puppet shows.* Prekindergarten craft sets and books. Tops.* Scooters.* Toy telephones.* (Keep him busy, that's the thing.)

Boys show a keen interest in many and varied things—which gives leeway when it comes to selecting gifts for them. We suggest:
Simple model building sets. Electric trains.* Boats.* Simple reading books. Games promoting social activities.* Cash registers. Sidewalk bicycles.* Games promoting dramatic play.* Pastime and scrap books.* Roller skates.*

The inquiring mind is extremely inquiring at this stage. So give it plenty to work on:
Microscopes.* Chemistry sets.* Casting and printing sets.* Movie projectors.* Carpentry tools.* Paint sets.* Target games promoting sportsmanship.* Construction sets.* Puzzles and games incorporating spelling, arithmetic, geography or history.*

Strenuous games, sporting equipment and all that sort of thing appeal to boys from ten years on up. Make them happy with:
Juvenile sporting goods. More difficult games and puzzles. Craft and hobby sets for fine model construction. Good books. Stamp collections. Bicycles. Electric boats.

N.B. Below six years of age both columns should be consulted, as children's interests do not separate much until six years or over

"TOPS in The Popular-price Field"

Morris Sklarsky, president of Uneeda Doll Co

UNEEDA'S RED HEADED DOLL INSPIRES SONG HIT

Uneeda Doll Company, Incorporated, 425 Broome Street, New York, feel justifiably

proud of the fact that a particularly fetching red-headed number in their line served as the inspiration for the Jack Wolf and Carl Sigman song hit, "The Cutest Little

Red Headed Doll." This melody is being sung by such outstanding radio stage and screen stars as Johnny Thompson, Bob Houston of NBC and MGM, and radio's delightful Hildegard. In addition to radio and stage renditions of this popular melody, several records are already available in the music stores. Morris Sklarsky, president of Uneeda Doll Company, states that in spite of the heavy volume of orders already in hand his firm is constantly booking additional business. "The Cutest Little Red Headed Doll" together with the entire Uneeda line is on display at the New York showroom of the company, Room 311-270 Fifth Avenue, New York.

SEATTLE SHOW SCHEDULE FOR FEBRUARY

Looking forward to one of the most important Western Spring Gift, Jewelry, Stationery, Toy and Housewares Shows in recent years, Kay Leber Show Manager of the Western Merchandise Exhibitors, sponsors of the Western Shows in these fields, predicts a continued high demand for all types of Decorative Home Accessories, Housewares, and Gifts of all kinds. The movement of people to the West Coast, the unusually high building permits, and the top level of employment figures, together with a huge backlog of

orders, make the prospects for Spring business more than good. Buyers are looking for more value for their money, but manufacturers are planning merchandising programs to give more dollar value in the competitive days ahead. An early look into 1948 merchandise shows more popular price merchandise of good quality available, better imports and priced right, and new designs, colors and textures in nearly all lines. The Show runs from Wednesday, February 4, through Sunday, February 8, in San Francisco, then moves North for a small show in Portland, Oregon, February 15 through February 18, Portland Mart, and Portland and Benson Hotels. From there, the Pacific Northwest Show in Seattle takes place February 29 through March 3. This Show will be held in the New Washington and Olympic Hotels, and the Oregon Terminal Sales Building. The Seattle Show is co-sponsored by the Seattle Chamber of Commerce.

Film Library, 350 different subjects on travel, cultural and informational subjects. This device, styled by Gifford Mast of Mast Development Company, Davenport, Iowa, is molded in brown and old ivory plastic. It is based on the principle of the old-time "parlor" stereoscope. The film is advanced through the viewer by a pistol trigger arrangement and 14 different pictures are shown in a series on a 3 1/2 inch 35mm filmstrip. The new model viewer is also used by salesmen to help prospects visualize the features and merits of bulky products and is on sale by photographic dealers and department stores at \$2.00 each. For details write to Tru-Vue, Rock Island 3, Illinois.

"JUNIOR ACE" SPORT SETS

The New York Toy and Game Mfg Co. takes pride in presenting their latest and greatest line, the "Jr. Ace" Sport Sets. The "Jr. Ace" sets, all reasonably priced, are quality made replicas of the real thing made especially for the junior sportsman. There are four price lines in the fishing sets, two in the basketball sets, and the golf set and baseball set are in the popular price range. The firm originally entered the sports field by manufacturing fishing sets. Due to this item's vast popularity, they have extended this line to include golf sets, basketball sets, and baseball sets, thereby covering America's greatest and best-loved sports. The New York Toy and Game Mfg Co. have their permanent showroom at 200 Fifth Avenue, where their complete line of other toys and games, in addition to their "Jr. Ace" line, is displayed.

Something to Sing About!

The doll that inspired
a new song hit

THE CUTEST LITTLE
RED HEADED DOLL

A MILLION DOLLARS WORTH OF PUBLICITY EVERY DAY!

Soon, all America will be singing and whistling about the Cutest Little Red Headed Doll. Here's the doll that did it — the doll that inspired songwriters Jack Wolf and Carl Sigman ("Civilization") to write another popular smash song hit.

Now this hit song is sweeping America — and you can tie it in for a big seller for your doll department.

THERMOMETERS

TAYLOR, OUTDOOR WALL ASSORTMENT

Easy-reading, non-fading, red Permacolor filled tubes; tubes are securely hooked and anchored onto metal scales. Lacquered wood backs; outdoor temperature range.

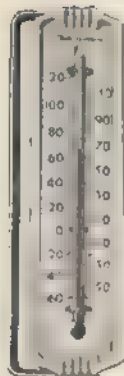

Assortment consists of the following:

- 2—Red lacquered.
- 2—Green lacquered.
- 2—Blue lacquered.

Per dozen
No. 5152 Assortment—Consist of six thermometers as enumerated and described above; wt. per assortment 1½ lbs. \$.

One assortment on a display card

TAYLOR, WINDOW

"Permacolor" tube with magnifying lens and non-fading red liquid. Temperature range 20° to 60° F. below zero to 120° above.

Octagonal design, white vitreous enameled scale, black figures and graduations fired in for permanence.

Complete with mounting bracket and screws.

Per dozen
No. 5316—Size 2 in.; wt. per dozen 7½ lbs. \$.

One in a box, one dozen in a carton.

TAYLOR, WALL

Popular "Comfortmeter." Magnifying glass tube filled with non-fading, easy-reading red Permacolor. Tube hooked and anchored into metal scale moulded into wood back. Ivory scale with maroon back.

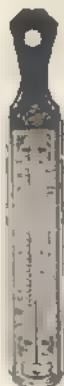

Outdoor temperature range.

Per dozen
No. 5140—7½ in. long; wt. per dozen 2½ lbs. \$.

One in a box, one dozen in a carton.

THERMOMETERS

TAYLOR, CANDY AND JELLY

Binoc mercury filled tube which is easier to read due to its increased width and optical perfection. Tube is fastened to stainless steel scale which is acid and rust-resisting.

Lacquered wood handle securely riveted to scale; adjustable clip on back.

Candy making temperature range 60° to 310° F. in two degree intervals. Candy making terms and degree marks in black.

Per dozen
No. 5908—11½ in. long; wt. per dozen 6 lbs. \$.

One in a box, one-half dozen in a carton.

TAYLOR, DEEP FAT FRYING

Binoc mercury filled tube which is easier to read due to its increased width and optical perfection. Tube is fastened securely to stainless steel scale which is acid and rust-resisting.

Lacquered wood handle securely riveted to scale; adjustable clip on back.

Deep fat frying temperature range 100° to 550° F. in five degree intervals.

Per dozen
No. 5910—11½ in. long; wt. per dozen 6 lbs. \$.

One in a box, one-half dozen in a carton.

TAYLOR, ROAST MEAT

Black permacolor tube fitted to ivory vitreous enameled scale; sharp point for easy insertion into meat.

This thermometer is inserted into the meat and tells when it is done just right—rare, medium or well done.

Per dozen
No. 5936—7½ in. long over all; wt. per dozen 1½ lbs. \$.

One in a box with skewer, one-half dozen in a display carton.

TAYLOR, BAKE OVEN

Binoc-style tube, white vitreous enameled scale with figures and graduations fired in for permanence.

Sanitary construction; pottery base is removable for washing.

Oven temperature range from 200° to 700° F. Complete with recipe file box with card and instructions.

Per dozen
No. 5928—6 in. high; wt. per dozen 7½ lbs. \$.

One-twelfth dozen in a box, one-half dozen in a carton.

THERMOMETERS

TAYLOR, BROODER

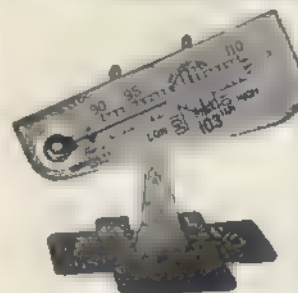

Magnifying glass tube filled with non-fading, easy-reading red Permacolor. White vitreous-enameled scale with black figures and graduations. Temperature range, approximately 30° to 120° F.

Per dozen
No. 5794—4½ in. long; wt. per dozen 1 lb. \$.

One-twelfth dozen in a box, one dozen in a carton.

TAYLOR, INCUBATOR

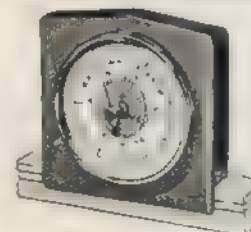

Magnifying glass tube filled with distilled mercury, white enameled scale with black figures and graduations. Green tinted incubation zone designed for easy-reading in dim light. Scale flanged to hang over wire or stand as illustrated.

Per dozen
No. 5776—Scale 4 in. long; wt. per dozen 1½ lbs. \$.

One in a box, one dozen in a carton.

BAROGUIDES

TAYLOR FLEETWOOD MODEL

Blue-cast-phenol case with white contrasting base. Silver and bronze engine-turned dial; chrome bezel.

Each
No. 2287—2½ in. dial; wt. each ¾ lb. \$.

One in a box.

COMPASSES

TAYLOR SHOWAL

Shaped brown plastic case, jeweled aluminum float dial.

Each
No. 2906—1½ in. diameter; wt. per dozen 9 oz. \$.

One in a box, twelve in a carton.

President of Testor Chemical Co., Rockford, Ill. elected Treasurer of Model Industry Association at recent convention in Chicago

HUGH D. KENNEY

Convention manager, who did masterful job with recent MIA trade show in Chicago

Tiger Announces Resumption of Glo Fuel Production

On January 26, representatives of Commercial Solvents Corp., notified principal blenders of model engine fuels that heretofore restricted distribution of nitroparaffins to the hobby industry has been lifted. Their representative states "nitro methane and nitro propane would be available only to reliable blenders and recognized producers of model fuels." It will not be sold in bulk to individuals for experimentation.

At the model industry association convention at Chicago in January 1948, Ray Arden of Mico-Bilt, Inc., pioneer in glo plug manufacture, re-emphasized that in his experiments with hundreds of materials and blends, no more efficient operation could be obtained in glo plug operation than that obtained with nitro methane and nitro propane mixtures.

Coinciding with this announcement, William Korr of Tiger Products Company, advises the resumption of production and expanded facilities of the Tiger processing plant. Adequate supplies will be available throughout the country soon.

TOYS and NOVELTIES—March, 1948

BAKER, THE PUPPET MAKER

Bob Baker and his puppets were featured recently in a half page article in the Graphic Section of the Chicago *Sunday Tribune*. One picture showed Bob Baker at work on a marionette for one of his shows; another showed four figures of a popular marionette show, "The Circus"; and also pictured was Judy, the elephant, which is a favorite, along with ringmaster, slave girl, and swami.

Young Bob Baker of Hollywood is one of the leading makers of marionettes and during the last three years has made 25,000 of these manikins. He makes the original designs and clothes for his puppets and records dialogues and music for puppet shows. He receives as much as \$10,000 for a 30 act show with 300 puppets.

He began to make marionettes 14 years ago, when he was 9, and made and sold marionettes during his high school years in Carmel, Calif.

Dusty Dolls

The William J. Connors, both of Boston and both collectors, could have a family argument over which hobby is the best dust catcher. According to *United Press*, however, Mrs. Connors doesn't fret about it—possibly because the items in hers outnumber her. "It takes a lot more time to run a duster over the three hundred fifty dolls," she is quoted as saying. Mr. Connors has only forty antique clocks.

New Fast-Drying Cement

An extensive advertising campaign is being handled for Cray Products, Inc., Newark, N. J., by Franklin Fader Co., Newark advertising agency, on "Model-Weld," a new, all-purpose, fast-drying, waterproof cement, for hobbyists and model builders. First advertisements were released to tie-up with the introductory showing of the product at the National Hobby Crafts and Science Show at Madison Square Garden, New York, November 23 through 30.

Properties of the cement were demonstrated in actual model building at the Cray Products booth and samples were dispensed by Powers' models. Copy is appearing in national and hobby magazines and trade papers. Model-Weld is also being featured over WOR on the "Breakfast with Dorothy and Dick" program.

Two Distinguished Visitors

Welcome visitors at the offices of TOYS & NOVELTIES, Bell Building, Chicago, on February 17, were Larry Nordstrom, factory representative of Rockford, Ill., and Jack Besser of Monogram Models, Chicago.

Ball Bearing Challenged

Associated Press recently reported from Amsterdam the invention of a plastic bearing for bicycle pedals said to have a lifetime "ten times that of a common ball-bearing." Mere water can serve as lubrication. The designer was vaguely referred to as "a Dutch industry."

BOATS! BOATS!! BOATS!!!

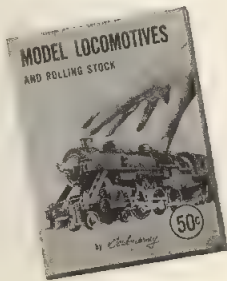

The approach of Spring should find every hobby and toy dealer prepared for the great outdoor sport of sailing boats.

Shown above is the "Cape Cod," retailing at \$3.50 the kit. True shipyard construction. A superb two-masted sailing model with full size plans and true scale plastic fittings. 27" high, 24" long. Attractive individual carton.

[C] WARDS BIGGEST AND BEST CHAIN DRIVE VELOCIPED because every moving part is ball bearing. Bicycle construction is used throughout... and hardware is all chromium plated. Double bar frame is 1 1/4-inch steel tubing with 2-inch tubing head. Ball bearing wheels, pedals, crank hanger and head. 20-inch front wheel and 18-inch rear wheels have bicycle type tangent spokes... 1 1/4-inch semi-pneumatic puncture-proof rubber tires. Tubular steel handle bars are chrome plated, adjust 2 ways, like those on a big bike. Bicycle bell and rubber hand grips. Comfortable seat is large, molded from rubber, has coil springs... adjusts so leg reach at slantest adjustment is 23 inches, can be extended for leg reach of 28 in. (age range from 4 to 10 years). 2-piece bicycle-type ball bearing rubber pedals. Strong bicycle chain with guard that completely encloses it. Baked-on enamel finish in Chinese Red and White. Shipped partly assembled to reduce postage. *Available.*

48 T 5369 M—Shipping weight 50 lbs.

34.95

[H] EASY RIDING CHAIN DRIVE VELOCIPED. Single bar frame is 1 1/4-inch steel tubing with a 2-inch head. Ball bearing pedals, crank hanger. Rear wheel's revolve in ball bearing cups. Plain bearing front wheel. 18-inch riveted spoke wheels front and rear. 1 1/4-inch puncture-proof semi-pneumatic rubber tires. Tubular steel handle bars are nickel plated, adjust... have bell and rubber grips. Bicycle type ball bearing pedals. Seat is molded rubber with coil springs... adjusts for leg reach of from 21 to 24 inches, (age range from 4 to 10 years). Strong chain and guard. Baked-on enamel finish in Maroon and White. Shipped partly assembled, instructions for assembling included. *Available.*

48 T 5385 M—Shipping weight 40 lbs.

27.50

STANDARD MODEL CHAIN DRIVE VELOCIPED (not shown). Same strong frame and construction as the one above, similar in appearance, but with 1-inch tires, painted tubular handle bars and padded artificial leather seat. Finished in Red baked-on enamel with White trim. Shipped partly assembled to reduce postage. Instructions for assembling included. *Available.*

48 W 5354 R—Shipping weight 38 lbs. 21.95

[J] LITTLE TOTS VELOCIPED... exceptionally well made. Strong 1 1/4-inch steel tubing frame, wide enameled rear step plate. Wheels turn on plain bearings. Padded handle bars are adjustable, have rubber hand grips. Solid rubber black pedals. 10-inch front wheel. 14-inch rubber tires. For leg reach of from 15 to 17 inches. Adjustable steel saddle. Notice that the metal seat can be adjusted two inches, which allows for two additional years normal growth of the child. Finished in Red baked-on enamel with Ivory color trim. Shipped partly assembled to reduce postage. *Available.*

48 T 5306 M—Shipping weight 16 lbs.

5.25

How to MEASURE FOR SIZE. Measure child from crotch to ball of foot. This corresponds to "Saddle-to-Pedal" measurement, or "leg reach." Buy on Wards Monthly Payment Plan. See Page 176 for complete Terms.

Steel Autos, Pedal Bikes and Scooters

A AND B STREAMLINED PEDAL AUTOS... a Fire Chief's car, and a sporty blue Roadster. They're built like the new model cars with streamlined fenders a part of the body sides. Low-slung lines make climbing in or out easy for little children. All sturdy steel construction with edges smoothly rounded and finished so youngsters won't get scratched. Black steel bumper in front; steel steering wheel. Nickel plated dummy headlights are built into the fenders. Shiny nickel plated hub caps. Rubber foot pedals are adjustable for leg reach. Roomy seat with black fiber pad. Easy rolling steel disc wheels with $\frac{3}{8}$ -in. rubber tires. Baked-on enamel finish. Body 37 in. long. For children from 2 to 5. Partly assembled.

A 48 T 5454 M—FIRE CHIEF CAR. Finished in fire engine red with white trim. Fire bell with chain on hood. Wt. 34 lbs. Mailable... 16.75

B 48 T 5453 M—ROADSTER. Finished in blue with white trim. Has Plexi-glas (plastic) windshield. Ship. wt. 34 lbs. Mailable... 16.75

B PEDAL BIKE WITH SAFETY SADDLE... baby can't slide off this seat. The usual velocipede seat is small, slippery and has no back... consequently baby feels insecure. His first riding toy must not only be secure, it must feel secure. That is why the steel seat on this pedal bike has a firm lining back that gives confidence to the rider. Handle bar, too, is designed for little hands accustomed to holding railings, chairs, etc. A tiny tot soon feels at home on this bike. Wood steering handle over steel. Tubular steel frame. Rubber block pedals. Height from floor to seat 11 $\frac{1}{2}$ in. Enamelled in red with ivory trim. 48 T 5417 M—Shipping weight 10 lbs. Partly assembled. Mailable... 5.50

D STEEL PEDAL BIKE. A child's first riding toy. Metal with wood handgrips, rubber block pedals. 8-inch wide seat, 11 in. high from floor, 8 $\frac{1}{2}$ -in. front wheel, 6-in. rear wheels. $\frac{1}{2}$ -in. rubber tires. Finished in red and ivory color enamel. Instructions included for assembling. Mailable... 48 T 5410 M—Shipping weight 9 lbs. 3.95

E DE LUXE STEEL SCOOTER with footbrake. Heavy steel frame... non-slip grooved wood footboard bolted on. Tubular cross-handle with rubber hand-grips. Double, steel steering column. 9-inch roller bearing artillery type steel wheels. Big 1 $\frac{1}{2}$ -inch semi pneumatic rubber tires. Parking stand. Red and white enamel. 38 in. long, 29 $\frac{1}{2}$ in. high. Mailable. 48 T 5403 M—Partly assembled. Wt. 16 lbs. 6.95

F STEEL SCOOTER that rolls fast. Strong steel frame with wood non-slip footboard securely bolted on. Turned wood cross-handle with varnish finish. Steel steering column. 9-inch artillery type steel wheels turn on plain bearings. Have $\frac{3}{8}$ -in. rubber tires. Footbrake. Parking stand. Finished in red and ivory enamel. 37 $\frac{1}{2}$ in. long, 32 $\frac{1}{2}$ in. high. Partly assembled. 48 T 5416 M—Ship. wt. 13 lbs. Mailable... 4.49

G LITTLE STEEL WHEELBARROW. Youngsters will have a grand time carting toys around in this wheelbarrow. Body 17 $\frac{1}{2}$ in. long, 14 $\frac{1}{2}$ in. wide, 8 $\frac{1}{2}$ in. deep... is stamped from one piece of metal. Solid disc 7-in. steel wheel, rubber tire. Red and black enamel finish. Partly assembled. 48 T 5517 M—Shipping weight 6 lbs. Mailable... 2.25

ALSO IN PRODUCTION FOR 1948

The new Chris-Craft 40' double cabin cruiser, top speed 23 m.p.h.

The 1948 Vinyard 47' cruiser is powered by twin Packards

VINYARD'S NEW CRUISERS. The Vinyard Shipbuilding Co., of Milford, Del., is offering two standardized cruisers, a 40-footer and a 47-footer. The former has two cabins and a separate crew's quarters, providing accommodations for five persons. Twin engines drive her up to 22 m.p.h. She has a 10' cockpit. The 47' cruiser has three cabins with accommodations for seven in the owner's party plus a separate cabin for a crew of one. Twin 150 hp. Packards are the standard power plant.

CORRECT CRAFT FEATURES RUNABOUT. Featured for 1948 by Correct Craft, Inc., of Pine Castle, Fla., builders of runabouts and cruisers, is the Correct Craft, Jr., a small, fast runabout which is moderately priced. Planking is mahogany. Power options are 45 hp., 75 hp. or 90 hp. Grays. Even with the small engine she is said to step along at 28 m.p.h. The company has a deluxe 19' 6" runabout which is new this year.

SCRIPPS HAS FULL LINE. The Scripps Motor Co., of Detroit, Mich., again offers for the 42nd consecutive year a full line of marine engines ranging from its 4 cyl. 25 hp. engine to the V-12 cyl. 316 hp. job. There are 12 basically different sized engines with over 36 model variations to suit all inboard needs for both pleasure and commercial craft. Truly symmetrical

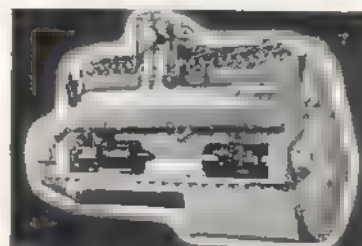

Correct Craft, Jr. (above) is reasonably priced and is available with 45 or 75 hp. The Burger 57' standardized steel cruiser (right)

In spite of the many exhibits at the 1948 New York Motor Boat Show, there are many important builders and manufacturers who, for one reason or another, are not represented. Since no roundup of building activity would be complete without these, YACHTING presents a representative cross section of those companies which are not exhibiting. — ED.

opposed right and left-hand rotation engines remain a specialty of this organization in the higher horse power brackets. The past year's engineering has been principally directed toward improvements in manifolding and carburetion for better economy and all around efficiency. Higher horse power output has been obtained without increasing either r.p.m.s. or compression ratios. Considerable attention has also been given to oil cooling and controlled operating temperatures. Many of the engines have been reduced in weight.

Largest engine in the Scripps line is this V-12 cyl. Series 300 motor. She has 894 cu in. piston displacement and develops 316 hp at 2600 r.p.m.

DANFORTH ANCHORS. New Danforth Anchors, manufactured by Danforth Anchors, of 2121 Allston Way, Berkeley 4, Calif., are now available in a complete range of sizes in three standard designs, the Mark III, IV and V. The Mark III is huaky, built for heavy duty service and comes in sizes 17 to 100 lbs. with drop forged steel shank and cast steel flukes, and in sizes of 150 to 300 lbs. in all cast steel. The Mark IV, shown here, is the same as the Mark III except that the flukes are rolled of alloy steel sections. It comes in sizes of 5 to 28 lbs. The Mark V Rowboat model weighs only 4½ lbs. and is made of carbon steel stampings.

The Mark IV Danforth anchor is available from stock in sizes of 5 to 28 lbs. Larger sizes may be had by special arrangement.

BURGER BUILDS POWER AND SAIL. The Burger Boat Co., of Manitowoc, Wis., is well known as the builder of good-sized yachts, both sail and power. In the past year, it has completed four 77' steel ketches of Rhodes design. Also completed were standardized steel cruisers in lengths of 50', 57' and 67'. Electric welding is used in constructing the hulls of both the ketches and the power yachts. The first of two 42' V-bottom cruisers, designed by Dair Long, has recently been built using wooden instead of steel construction.

(Continued on page 266)

VINYARD

The new Vinyard 40' Sedan is an able, comfortable sea boat.

OUR NEW VINYARDS for 1948 are Built for a Lifetime

Nearly a half century of fine boat construction is behind your investment in a new Vinyard Cruiser. Sound, conservative lines, with heavier construction than average, guarantee extra stability and comfort. Only the finest appointments, gear and equipment will be found on Vinyard Cruisers. Joiner work and finish are characteristic of the finest available in yester-year. Twin powered for extra security at sea, easier handling qualities.

We shall gladly forward brochures describing in detail these new Vinyards to all interested yachtsmen. Sales are handled direct from our plant which is located on salt water.

*Designers and Builders of Yachts
of the Highest Class for 47 years.*

Both the Vinyard 40' Sedan and the 47' Cruiser carry very highest specifications, from their interlocking white oak keels thru the entire bill of particulars, available upon request. Built-in beauty and strength means absolute seaworthiness, incredible smoothness at every speed, with the governing factor in the design—solid comfort. May we give you more specific information on these fine yachts?

TOY NEWS AND NEW TOYS

Bernard L. Gottlieb

BERNARD L. GOTTLIEB SPECIALIZES IN TOY EXPORTS

Bernard L. Gottlieb announces that he has established the firm of Bernard L. Gottlieb, Inc., Breslin Building, 1186 Broadway, New York 1. Mr. Gottlieb's new firm will specialize in exclusive export sales representation for manufacturers of toys, novelties and gifts in addition to representation of prominent overseas firms as resident buying agent.

Mr. Gottlieb, prior to the war, was active in the toy wholesale field during which time he devoted the major portion of his time to toy export activities. His past experience, therefore, gives him an excellent background for the successful operation of his own firm. He states that his organization has an experienced sales force all over the world with every facility for the aggressive distribution of American-made toys. Among the American toy manufacturers now represented by Bernard L. Gottlieb, Inc., for overseas business are Standard Toykraft Products, Inc., The Geo. S. Scott Mfg. Company and The M. A. Henry Co., Inc.

ELASTIC PLASTIC MAGIC MODELING SETS

L. H. Klinger, President, Flora-Lee Industries, Lansing 12, Michigan, in a recent interview regarding their new Elastic Plastic Magic Modeling Sets said, "A heretofore unpublicized, unheralded product, 'our new Elastic Plastic,' is today the reality of desired accomplishment.

"This original as well as exclusive product is manufactured from the finest of raw materials obtainable and are expertly blended and processed into a durable, colorful Elastic Plastic. It is a new scientific development originated by our own firm."

Mr. Klinger went on to say that the educational, creative and entertainment features of Elastic Plastic Magic Modeling Sets appeal to all ages with particular emphasis on vocational development in the promotion of arts, crafts and hobbies. During the relative short time it has been on the market, he states that their product has aroused keen interest among teachers and educators. Each Elastic Plastic Set is distinctively packaged and includes 4 different colored jars of plastic material any

youngster can easily model into almost uncounted artistic articles with his Elastic Plastic Set without the use of water, paints or heat. Mothers are delighted to learn that the material will not stick in rugs, upholstery or hair and cannot stain or discolor clothing. It can be used equally well for carving, stamping or modeling.

Elastic Plastic Magic Modeling Sets are currently displayed together with an assortment of real models which have been made by youngsters from 3 to 16 years of age at the Showroom of Brinkman and Tillman, 112 Arcade, 200 Fifth Avenue, New York.

THE MASTER BUILDER

The Master Builder, a recently introduced plastic construction set, is a welcome addition to the children's world. The bright reds, greens, yellows, and blues, of the toy's cogs and tubes, and the precision tooling which permits the accomplishment of intricate projects are both elements stimulating to the child's imagination. When put together, a Master Builder construction project, such as a merry-go-round or ferris wheel, is sturdy and permanent enough to be driven by a small electric motor. The plastic is washable in warm water and will not break or splinter under ordinary usage. The vivid colored toy has proven a success with children ranging from tiny tots having fun with their simple projects, to the older boy and girl who find interest in actually applying scientific principles of building construction to their games.

Plastic Flashlight by Precision Specialties

PLUTO FLASHLIGHT

Walt Disney's canine now serves the useful function of pointing the way. Press his tail and the light concealed in his mouth gives forth the same beam as pencil type flashlights. The case is molded of gleaming red Lustron, polystyrene plastic product of Monsanto Chemical Company's Plastics Division. Moulded by Precision Specialties, Inc., of Los Angeles, Calif., and marketed by Revell Plastics, 210 No. Western Ave., Los Angeles 4, Calif.

NEW ESCALATORS FOR MAISON BLANCHE

Four-foot, high-speed escalators operating up and down on all floors of the Maison Blanche Company store will be installed soon, Herbert J. Schwartz, president, announced.

Modern escalators will replace the present one, which was installed in 1928 as the first in a department store in New Orleans.

The new escalators, capable of transporting 65,000 persons daily, will be the latest in high-speed design, embodying every protection for shoppers.

Charlie Snyder

CHARLIE SNYDER WITH ALEXANDER DOLL COMPANY

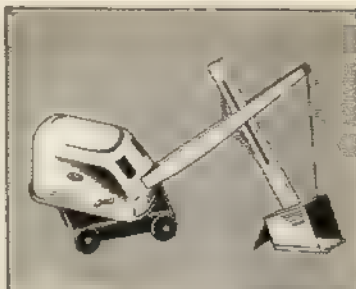

Charlie Snyder has recently joined the sales force of The Alexander Doll Company. Mr. Snyder brings to his new connection a long background in the doll business and is looking forward to greeting Toy Fair visitors at the conveniently located Alexander Showroom, 153 East 24th St., New York 10.

MELTON REPRESENTS HALPERN

In a recent announcement by the J. Halpern Company, 810 Penn Ave., Pittsburgh, Pa., James R. Melton has been appointed southern representative for Halco Products, including dolls, Texan Holster Sets, American Beauty Sparklers, Halco Costumes, Silver Bright Icicles and Snow, Superb Brand and Doughboy Caps and Hales Sky Fliers. Mr. Melton's territory will cover the states of Texas, Oklahoma, Louisiana, Arkansas, Tennessee, Mississippi, Alabama, Georgia, Florida, North and South Carolina. A permanent display room for Halco Products will be maintained by Mr. Melton at 324 Santa Fe Bldg., Unit 2, Dallas 2, Texas. Mr. Melton, known throughout the trade as Jimmy, has been prominent in the toy field for many years. This is his first association with the J. Halpern Company.

STURDY SLEDS

The Pratt Manufacturing Company of Coldwater, Michigan, have been producers of steering sleds for many years. Their "Silver Streak" sled is especially designed for speed, stamina and beauty. Streamlined; the high front, tapering gently to the rear and the grooved, properly curved runners offer less resistance and cut clearly through the snow. Runners are high carbon steel assuring great strength and flexibility. Sturdily built—the shapely decks are made of selected hardwood, attractively decorated and covered with two coats of weather-resistant varnish. Runner sections, heavy reinforced knees and all other metal parts baked aluminum finish. Patented safety guard on rear of Sled, together with patented steering device, puts this sold ahead of all competition in value and customer acceptance.

"Hurray for 'Quick-Clean' washing!" says Art Linkletter

LET ME ASK YOU, girls—do you sing on washdays?

"Do you toss off your weekly laundry in double-quick time—then sit back and relax? You *will*—with a grand, new General Electric Washer!

"No kidding, washday is practically carefree with this honey of a machine. And I've never seen whiter wash than General Electric's 'Quick-Clean' washing—done in quick-time, too!

"I've been putting some mighty heavy, grimy clothes in there, too, and they come out as brand-span clean as those lightweight ones. And this washer's so easy to operate—even I can do it! (Why not get your husband interested?)

"I'll be telling you more about this washing beauty on 'The General Electric House Party,' CBS Network, five days a week. In the meantime, hurry to your General Electric retailer's and let him demonstrate this wonder-worker for you!"

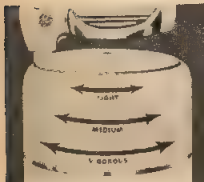

Model shown, AW 332. General Electric Company, Bridgeport 2, Connecticut.

For easier, happier washdays—

*All - Electric
Laundry!*

ENJOY "QUICK-CLEAN" WASHING WITH ALL THESE FEATURES!

G-E Washing Zones—Triple "Activator" Action—Continually guides your clothes through three washing zones—Light, Medium, Vigorous.

Trade-mark Reg. U. S. Pat. Off.

G-E One-Control Wringer—Exclusively General Electric. One control starts, reverses, releases! Knob regulates pressure for every fabric. Kind to buttons.

G-E "Permadrive" Mechanism—No exposed machinery. Only four moving parts, permanently lubricated! Example of G-E precision engineering you'll appreciate.

G-E Adjustable Timer—Regulates washing or rinsing time up to 15 minutes. Set it to **HOLD** position for continuous operation. **OFF** position stops the motor—a very handy feature.

GENERAL  ELECTRIC

YOU DON'T HAVE TO BE TWINS

UNIVERSAL'S 2 SPEED WASHER

DOES EVERYTHING IN THE WASH SAFELY!

1
AMAZING NEW
LOW SPEED
ELIMINATES
TIRESOME HAND
LAUNDERING OF
FINE GARMENTS!

2
EXTRA-THOROUGH
REGULAR
SPEED
FOR FORCEFUL
CLEANING OF
HEAVY GARMENTS.

FIRST, TOO, with the NEW SUPER-SAFE

CONTROL-O-ROLL WRINGER

Universal is first with the sensational new "Control-O-Roll" Wringer for safety without stopping to think. A slight instinctive pull on the clothes or wringer will stop the rolls instantly. And for new convenience—a gentle push shifts the wringer to any operating position.

A NEW KIND of washdry is here! The new Universal 2-Speed Washer does all your washing—your sheerest lingerie and filmy curtains as well as heavy garments and work clothes. No more holding out your fragile pieces for tiresome hand laundering. Universal, for the first time, gives you "Two-Way" controlled speed washing. Simply set

the exclusive Speedselector to **LOW** for your delicate silks and fine woolsens...to **REGULAR** for thorough washing of heavy fabrics and extra-soiled garments. There's no danger of overwashing, no tedious watching. Universal's Time-A-Matic Timer automatically times washing, shuts off current. Special Protect-O-Switch guards against overloading.

... facts of life are everyday

What's the Fuss About?

DEAR EDITOR: To those of us with farm background, all this to-do stirred up by sex education is a little amusing. The facts of life are all such a part of farm life that they are commonplace. Farm-reared children are pretty well acquainted with the mysteries of reproduction by the time they start to school. And it all comes as naturally as water flowing down the hill.

What farm child hasn't found a nest of eggs in the weeds after Biddy has taken off with the first two or three hatched chicks? And basted every one of the eggs to see what was inside? Since the eggs were doubtless laid in Biddy's nest at varying dates—especially if another hen laid in with Biddy—the reproduction story is cracked wide open!

New lambs and piggies and calves bring the wonderful miracles of recreation to the tiniest tots. And as they are old enough to toddle about at chore time, growing into duties of their own, little pieces of the great pattern fall into place, without question or thought of shame.

It is only when human beings are involved that the pattern seems to take on some hidden something. This thing known as civilization seems to have created a lot of bugaboo that has to be torn apart and built up again just about where our farm youngsters had it figured out in the first place.

Maybe it might not be a bad idea for every child to spend at least six months—preferably spring and summer—on the farm. And it wouldn't hurt some of our city-bred educators, either. —Beulah M. Davenport, Washington

To Vote—Or Not to Vote

DEAR EDITOR: Which is worse: not to vote or not to know what or whom you are voting for?

Every year, an election time ap-

ELGIN

\$3750 to \$7150

Make Elgin Watches a cherished
gift tradition in your family

Chosen by four generations of distinguished Americans for superb individuality and expert craftsmanship. Now Elgin brings you the most important watchmaking development in over 200 years—the DuraPower Mainpring. Will not rust, holds its original springiness indefinitely, is non-magnetic and cannot be broken by overwinding. Star-timed Elgins give you beauty, too. There are exquisite, original creations that will thrill any feminine heart; there are handsome models for men. No extra charge for Easy Terms due to standard practice. Beautifully boxed. Postpaid (Shipping weight each 9 oz.). Shown ¾ actual size. All prices include 10% Federal Tax. Watch bands 1/20 12K gold filled or better quality.

Give him the watch he'd choose for himself... an Elgin

A Elgin in a modern, streamlined style... designed for the strictly masculine taste. Smart 10K yellow gold filled case has stainless steel back. Rugged ends add a different touch. Silvered dial, gilt numerals, hands. Leather strap. 4 N 07031E 15 jewels \$37.50

B Elgin Deluxe... material watch design. 10K yellow gold filled square case with smooth curved effect. Ultra modern large size that's always smart. Flexible, finely woven gold filled mesh band. Silvered dial with raised gilt numerals and hour markers, gilt hands. 4 N 07031E-17 jewels \$60.00

C Elgin with heavy-looking expansion band that gives an air of distinction to the modern square case. 10K yellow rolled gold plate case, gold filled band, stainless steel back. Gilt hands and raised numerals, dots on silvered dial. 4 N 07011E -15 jewels \$42.50

D Lord Elgin... designed to appeal to men who know and appreciate the finest in watch quality and style. Dignified 14K yellow gold filled case with gleaming, beveled end pieces. Silvered dial, gilt hands and raised numerals, hour dots. Handsome leather strap. 4 N 07041E 21 jewels \$67.50

E Elgin Deluxe. Gleaming beveled style with clean, vigorous lines. 10K yellow gold filled case is highly polished. Silvered dial with gilt hands, raised numerals and hour markers. Domed crystal. Leather strap. 4 N 07021E 17 jewels \$47.50

F Lord Elgin. One of these remarkable watches belongs on your Christmas list. Distinguished, smart... they achieve dramatic style by the intriguing use of design. 14K yellow gold filled case. Silvered dial, gilt numerals, hands. Leather strap. Domed crystal. 4 N 07051E 21 jewels \$71.50

Be as Proud and Popular Santa... give her an Elgin

G Elgin in richly polished, 10K yellow gold filled case. Stainless metal back. Sparkling, swirling end pieces give this watch an extra touch of superb styling. Silvered dial with gilt hands and numerals. Black cord band, state wrist size. 4 N 07051E 15 jewels \$39.75

H Elgin. At last something excitingly new! Smart square dial between charming curved end pieces... trim "telescope" link expansion band to match 10K yellow gold filled case. Case has stainless metal back. Silvered dial with black numerals, gilt hands. 4 N 07521E-15 jewels \$47.50

I Elgin Deluxe with petal-ends burnished to a brilliant luster, sparkling high-curved crystal. Matching link band reflects the same petal design. 10K yellow gold filled case and matching bracelet. Raised gilt markers, numerals and hands. State wrist size. 4 N 07531E-17 jewels \$55.00

J Lady Elgin... one of the newest and most charming of all watch styles! Modern stepped sides, gloriously sparkling end pieces. 14K yellow gold filled case with high domed crystal. Silvered dial, gilt numerals and hands. Black cord band, state wrist size. 4 N 07571E-19 jewels \$67.50

K Elgin with brilliantly polished link bracelet in a striking new style. Richly polished 10K yellow gold filled case has stainless metal back. Gold filled band; state wrist size. Silvered dial with raised gilt numerals and hands. Black cord band; state wrist size. 4 N 07511E-15 jewels \$42.50

L Elgin Deluxe for sentimental, and practical, Santa... delightfully sophisticated case combined with the famous Elgin dependability. 10K yellow gold filled case. Domed crystal. Black cord band; state wrist size. 4 N 07531E-15 jewels \$50.00

M Elgin Deluxe for a gift to a gay and deeply thrilled young lady. 10K yellow gold filled case with gleaming, curved end pieces. Matching "telescope" link expansion band is the result. "Breton Queen" Silvered dial has raised gilt numerals and hands. 4 N 07561E-17 jewels \$57.50

N Lady Elgin... the aristocrat of fine watches. The square case with gleaming black overlay on ends is polished 14K gold. High domed crystal. Silvered dial, gilt hands, numerals. 19 jewels. Black cord band, state wrist size. 4 N 07591E Yellow gold \$71.50

The wonderful time we've spent together...

FOR OUR ANNIVERSARY—the finest watch I could get, to remind you, every single moment, of the wonderful time we've spent together, so many happy hours that have gone so very fast—from that first day that seems like yesterday. Bless you for the time we've had—and for the promise of the years to come.

FOR A GIFT to cherish—none is more perfect than a watch. Your jeweler has a wide choice to show you, achievements of free craftsmen of America and Switzerland—oldest democracies on two continents. No matter what the make of your watch, it can be repaired economically and promptly, thanks to the efficiency of the modern jeweler.

For the gifts you'll give with pride—let your jeweler be your guide

The WATCHMAKERS OF

SWITZERLAND

Make this a time to remember . . .

IF YOU COULD SEE the yearning in those eyes, you'd know the joy that waits for you when you present her with her first important watch.

For this is the time to which everyone who's young looks forward, a time when it's such fun to mark the precious moment of growing up with the most perfect gift of all.

FOR A GIFT to cherish—none is more perfect than a watch. Your jeweler has a wide choice to show you, achievements of free craftsmen—of America and Switzerland—oldest democracies on two continents.

No matter what the make of your watch, it can be repaired economically and promptly, thanks to the efficiency of the modern jeweler.

For the gifts you'll give with pride—let your jeweler be your guide

LATEST IMPROVED
SAFE V-BOTTOM
DESIGN

Note in diagram above how the deep "V" shape of the bow (A—A) acts to cut and spread the water, then undens, increasing in depth as it approaches the beam of the WATER-MASTER hull

As the "V" approaches the point (B—B) at the beam, it loses its sharp cleaving character and definitely "rounds" out at its lowest point.

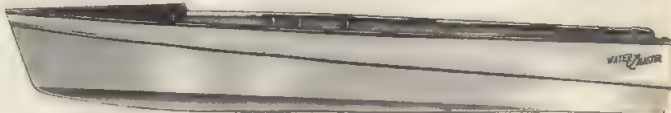

The "rounding" feature then gradually disappears into the horizontal plane of the flat bottom section (C—C), above, which continues for proportionate distance into the new "Super-Stern."

LIGHT WEIGHT ALL WOOD BOATS NEW STYLES AND MODELS — 12 FT. AND 14 FT.

SAFE V-BOTTOM
EASY TO HANDLE
ADAPTABLE
ROOMY
DURABLE
NO NAILS

SUPREME WITH SPRAY DECK — 12 FT. AND 14 FT. MODELS

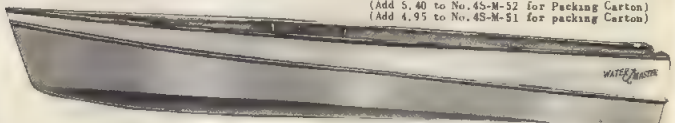

An all around boat in the popular 12 and 14 ft. lengths. Of proven design and remarkable performance. Smart and trim, its appearance and style that appeals especially to the outdoor enthusiast. Staunch and speedy, easily 42 1/2 in. long streamlines the bow and also provides dry structure. Full length splash deflectors and curved fumbled transoms are essential designed features. Exceptional performance with small motors and capable of handling the larger sizes. Easily handled with oars and light enough to be transported on top of car.

Has 5 ply full 1/4 in. thick V-bottom, wide beam and ample depth for sea worthiness. Greater seating capacity for increased loads. Wood screw assembled. Finished in attractive 3 color durable indelible. Constructed to assure the same of performance.

No. 45-M-52: 14 ft. model; List 122.50; Pkg. ctn. 5.40 Dealer's, each 126.88; Lots of 3, each, 127.76 **125¹⁹**

No. 45-M-51: 12 ft. model; List 107.50; Pkg. ctn. 4.95 Dealer's, each 118.12; Lots of 3, each, 119.25 **108⁸⁴**

(Add 5.40 to No. 45-M-52 for Packing Carton)
(Add 4.95 to No. 45-M-51 for packing Carton)

SUPER OPEN STYLE — 12 FT. AND 14 FT. MODELS

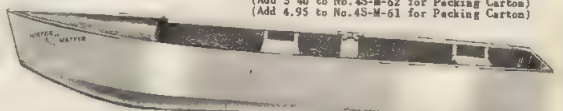

The ideal craft for rough water fishermen, easily rowed yet fast under outboard power with the style and trim appearance that gives pride of ownership. These models are the same as the Supreme except provided with bow seat in place of spray deck.

No. 45-M-62: 14ft. model; List 170.00; Pkg. ctn. 6.40 Dealer's, each 177.50; Lots of 3, each, 178.80 **116⁸²**

No. 45-M-61: 12 ft. model; List 147.50; Pkg. ctn. 4.95 Dealer's, each 150.62; Lots of 3, each, 151.15 **101¹⁸**

(Add 5.40 to No. 45-M-62 for Packing Carton)
(Add 4.95 to No. 45-M-61 for Packing Carton)

DELUXE
12 FT.
WITH
SPRAY
DECK

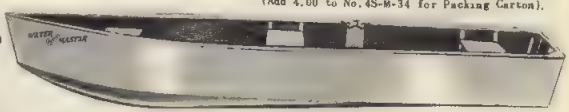

Deluxe Model Water-Masters are the finest boats of their type ever offered. Built of quality materials by master craftsmen, incorporating proven design principles. They offer the same maximum safety, comfort, durability and ease of handling both in and out of water. Ideal for rowing and for outboard motor use. Equipped with 36 in. transoms, custom built plywood foredeck that protects the interior from speed-thrown spray. Rib frame work of solid clear pine, cut, beveled and fitted to shape. Solid one-piece piece of double rubbed clear glass. Super stern is heavy duty, especially designed for outboard

motor use, with center and side supports, plus secondary ribs. Solid one-piece full length keel combined with keel-sole to make a "T-bottom," which rigidly supports the bottom from stem to stern. Interior and deck finished with two coats Marine Spar Varnish, Exterior two coats, waterproof primer, finished with bakelite gloss. Complete with seats, floor boards and oarlocks.

Outdoor Cutlery and Hunters Needs

No. 8452—Hunting Knife. The 4 1/2-inch forged blade is of high grade hardened and tempered steel. Blade has mirror finish and is fitted with a genuine leather handle. Complete with extra heavy genuine leather sheath. Altogether a proud possession. Overall length, 9 inches.
Each .. **\$1.75**

No. 8453—Kinfolks Hunting Knife. An excellent knife and genuine leather sheath similar to above knife. Has 4-inch blade and is fitted with handle in genuine leather with colored composition and brass inserts. Overall length, 8 inches.
Each .. **\$1.70**

No. 8454—Hunting Knife. Features mirror finish tempered carbon steel 8-inch blade, hard black plastic sheath-effect handle that is shaped for easy grip and brightly polished brass rivets holding the handle firmly in place. Excellent for skinning, slicing and carving. Complete with extra heavy genuine leather sheath. Length, overall, 8 1/2 inches.
Each .. **85¢** Per dozen .. **\$9.60**

No. 24P27—Automatic Pocket Knife. Precision built automatic press button pocket knife with safety lock—opens quick as a wink. Has mirror polished high-carbon steel blade. Entirely brass lined. Sure grip colored plastic handle—assorted colors. Length of knife 4 1/2 inches with 3 inch blade.
Each **80¢** Per dozen .. **\$8.75**

No. 24P25—Fish Knife. Curved style extra long fish knife. Highly polished blade. Plated finish with ivory colored celluloid handles. Has one extra long tempered steel spear blade that serves as a scaler hook remover and bottle opener. Length of knife closed, 8 inches.
Each .. **80¢** Per dozen .. **\$8.50**

No. 24P26—Switch Back Knife. Same as above but without fish scaler blade. One dozen up card length of knife closed 5 inches.
Each .. **55¢** Per dozen .. **\$5.75**

Sportsmen's Specials

No. 8459—Western Hunting Knife. A new and practical knife with a 5 1/2-inch mirror-finished tempered steel blade designed for skinning, scraping and whittling. Has sturdily constructed brown leather handle with colored composition inserts at each end. Complete with genuine leather sheath. Length, overall, 10 inches.
Each .. **\$1.65**

No. 8451—Western Hunting Knife. Same as above but has wider curved blade. Length, overall, 9 1/2 inches.
Each .. **\$1.65**

"Western" Sportsman's Knives. Brilliant orange green, ivory and red handles of long lasting plastic. Perfectly balanced, with sharp hand ground blades of high carbon electric-hardest, chrome vanadium, cutlery steel—edges that hold up under the hardest kind of field usage. Ranges from 4" to 6 1/2" models, with the two larger sizes having blood groove blades. All equipped with genuine side leather embossed sheaths.

No.	Blade	Each	Per doz.
36K402	4 1/2"	\$1.80	\$21.00
34K403	3 3/4"	1.70	19.50
36K404	3"	1.85	18.00

A Jafal of Value—Cap One

No. 24P28—Jack-Master Pocket Knife Assortment. White pearl-effect and assorted bright colored celluloid handles. Assorted styles—broad, streamlined, serpentine. Nickel plated bolsters, brass liners. Large spear blade, smaller pen blade. Size closed, 3 1/2 inches. One dozen on card.
Per dozen .. **\$6.25**
No. 24P29—Jack-Master Pen Knife Assortment. Similar to above but slightly smaller size. Closed 3 inches.
Per dozen .. **\$6.25**

No. 8484—Western Hunting Knife. Features polished forged tempered steel 4 1/2-inch saber blade, hand ground. Has a genuine leather handle with brass and colored fiber inserts and is fitted with a solid aluminum grip-shaped knob. Complete with a flat saddle stitched genuine leather sheath. Length of knife, 8 3/4 inches.
Each .. **\$1.75**

No. 32MB13—All-Purpose Knife. This knife is manufactured from genuine Swedish Steel. Knife has many uses as a hook disgorger, bottle opener, fish scaler etc. A file will not touch this blade because of its exceptional hardness. Oxidized finish. Length 8 1/2 inches.
Each .. **50¢** Per dozen .. **\$5.70**

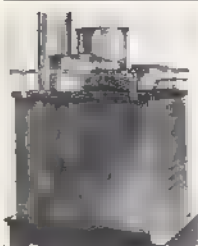

No. 24P438—"Little Admiral" Pen Knife. Colorful new pen knife—handsome assorted plastic finishes—brass bolsters—one blade strong steel. Complete with key chain. Overall length of knife 2 1/2 inches.
Per dozen .. **\$2.75**

No. 24P424—Miniature Hunting Knife. A tiny souvenir knife that is patterned after a regulation size hunting knife. Makes a clever item for the writing desk—can be used as a letter opener. Strong, durable, shiny steel blade firmly attached to ivory colored composition handle. Complete with leather sheath. Overall length of knife, 4 inches.
Per dozen .. **\$5.75**

No. 24P423—Jack-Master "Barlow" Pocket Knife. "Barlow" pattern with extra long nickel plated bolsters. Celluloid handles in assorted solid black or red, and white pearl-effect colors. One large spear blade, pen blade. Triple brass liners. Length closed 3 1/4 inches. One dozen on card.
Per dozen .. **\$6.25**

Freeport, Long Island, New York

business meetings are in full swing and, having attended one or two as an innocent observer, it seems to me that members get steamed up in inverse ratio to the amount of contention that has taken place during the summer. Or maybe argument in winter makes things smooth for summer sailing.

► Some new boats are being built, mostly aimed at the Olympic Games. Camper and Nicholson's, for instance, are building one new "Six" and eight Dragons. Seven of these are for that famous loathed of Dragons, Belfast Lough. Aimed first at the elimination races for the Olympic yachting event, all seven are likely to be the nucleus of a real, one-design fleet for the North of Ireland.

The other Dragon, at Gosport, also aimed at the Olympics, is for the Rt. Hon. R. S. Hudson, P.C., C.H., M.P., a well-known Dragon expert, while the "Six" one of three new boats building over here, is for a syndicate headed by Kenneth H. Preston.

► At Camper and Nicholson's are the two *Endeavours*. Those who remember their prewar battles for the America's Cup will be glad to learn that T. O. M. Sopwith's two ships are not for the scrap heap after all. *Endeavour II* is to become an auxiliary cruising ketch for her new owner, Pitt Millward. New materials are hard to come by so much of her gear and fittings are ex-other vessels. The original *Endeavour*, now known as *Endeavour I* and not likely to be ready for quite a while, is to be rigged as a cruising staysail schooner. Her new owner is R. A. Lucas.

► Just before the war the Germans built a flat-out racing machine, the yawl *Skaggerak*, with the intention of really cleaning up in offshore races. She never had a chance to show what she could do but has now been sold by the agents of the British Admiralty. Since her new owner, named Whiteside, has not figured in ocean racing up to the present, it seems likely that poor *Skaggerak* will still get no chance to show what she could do beyond quiet cruising.

MAINE COAST NOTES

By Lawrence B. Catchell

► Although current boatbuilding here appears to be slackier than a year ago, ships are flying in several shops as work progresses on a variety of craft scheduled for spring delivery.

► A number of boats designed by V. B. Crockett Associates, of Camden, are now under construction at different places along this coast. Among them are a 28' auxiliary sloop and a 30' cruiser being built by Elmer Collier, of Camden. The sloop is for William Wadsworth, of Belmont, Mass.; the cruiser for Jason Westerfield, of Camden. Morse, of Thomaston, is building a 32' auxiliary sloop for Hodding Carter, of Greenville, Mass., and a 32' cruiser. The Boothbay Boat Co., of Boothbay Harbor, has a 47' party boat under construction for George Bowden of that port.

► Raymond W. Cook, of Bristol, Conn., is having a 40' Warner-designed yawl built by Paul Luke, of Ocean Point. Her name will be *Snapper II* and she will measure 28' 11 1/2" on the water line, 10' 6" beam, 6' draft. Sail area 894 sq. ft. Auxiliary power will be a Gray 162, direct drive. Luke also is working on designs for a twin screw 42' sport fisherman.

► Hodgdon Bros., of East Boothbay, which recently turned out the handsome ketch *Lille Dansker*, is building a 43' ketch designed by John G. Alden for Maurice Frank of New York City. She will have a Chrysler Crown for power. A 44' twin screw Ford-Olco powered cruiser, designed by William Millett, of Danvers, Ohio, is also building here for Henry F. Shuey, of Dayton, Ohio. He plans to use her in Maine and Florida waters. Other construction at this yard includes a pair of 27' power boats designed by George Hodgdon, Jr. One is for E. R. Dodge, of New York City, the other for P. W. Whittemore, of Boston. Both will have 90 hp. Kermath engines.

HOUSE SIGNS

WHITEHALL

BASKETBALLS

WILSON

Official Laceless Model

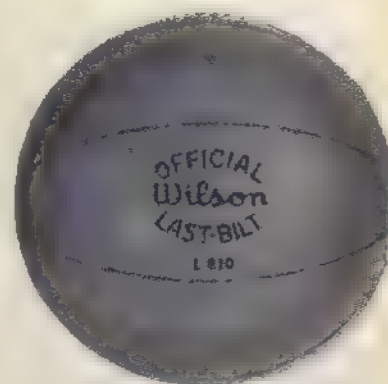

The laceless feature eliminates projecting laces and permits a continuously smooth spherical surface. The molded rubber valve bladder is light in weight and cemented directly to casing, eliminating dead spots. These features together with the double lining and lock-stitched construction produce a ball with perfect symmetry of balance, accurate rebound and steady flight.

Made of the finest selection first grade full grain pebble cowhide.

Each

No. CJO—Wt. each 2½ lbs. \$..

One in a box

Official Last-Bilt

Approved by the National Federation of State High Schools Athletic Association. Made of the finest quality tan grain leather with a non slip feel. Two valves eliminate valve repair.

Perfectly round and balanced; built over a rigid spherical last with cover vulcanized to inner carcass, no sewed seams or soft spots to upset split-second timing. Rebounds are accurate and dependable.

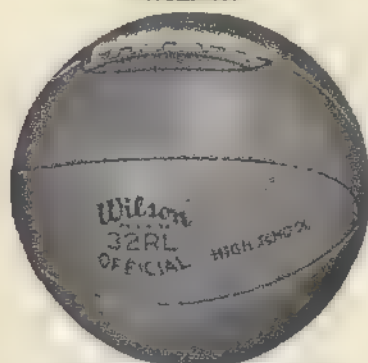

Each

No. LB10—Wt. each 2½ lbs. \$..

One in a box

both crocheting
and knitting
(right).

...the edges? And if it
does who shall do it? Each each
obviously was their
their handwork?
The four by six-foot afghan is
to be sent to a nearby children's
hospital and it represents the
effort of four months by the
pupils each of whom knitted one
six-inch square for the coverlet.
The whole thing really began
when the class was chosen as the
winning big group in a plan by the
Institute for Hand Knitting to in-
troduce an educational program
of knitting and crocheting in the
schools throughout the country.
If this class of unschooled children
could concentrate and be integrat-

Common Project.
The mechanics of knitting and
crocheting would not in them-
selves be sufficiently interesting,
and what was needed was a
common project, something all
could work on together. Thus the
idea of knitting sample
squares sewing them together
and making an afghan to present
to sick children was devised. It
was so appealing to the group
that boys and girls soon were busy
with bright colored yarn and
sturdy wooden needles. Master-also
for the group were provided by
the institute. Once the program
is regularly started, the Board
of Education will provide ma-
terial as for any other part of the
curriculum.

There never seemed to be
much idea of knitting being slow
stuff for boys," says Miss Peg
O'Grady, assistant managing di-
rector of the institute. A few
boys did question the idea until I
thought in a clipping about a pa-
tient at a Veterans' hospital; so
prominent at crocheting that he
teaching others as part of the re-
habilitation program. If it was
good enough for a veteran it was
good enough for a student it was.

In crocheting, the simple single
stitch was taught first. One boy
progressed so fast Miss O'Grady
showed him the double stitch.
Another boy watched daskly and
later called Miss O'Grady aside.
Say he whispered, how about
teaching me the triple stitch?
She did too.

Make Garments.
Some of the boys are learning
how to knit simple squares and
sew them into sunshirts for smaller
brothers and sisters. They like
it because it seems rather like
a pebble or measuring—putting
the squares together to form a
pattern, says Miss O'Grady.
So successful has the handwork
project been with this class that
several others at P. S. 167 are work-
ing on knitting and crocheting.
What's more the original pupils
are going into other classes to
help teach.

It is planned by the Department
of Education to introduce the
knitting and sewing classes into
other schools next fall and a spe-
cial knitting class for teachers is
also contemplated.

Household Hints

The secret of bright, sparkling
silver is clean water. Soap
merely attracts the dirt and is
hard to wash off.

Mrs. Anne Ritter,
42, considers
the turtle
named "Tilia,"
Angelica Rosado,
12 is the
knitting pupil.

What happens when you drop
a stitch? Adeline Segarra, 8,
sees and finds out (above).

Cutting Technique For All Meats

Although a different cut of meat
requires different techniques,
few fundamental rules apply to all
cutting.

- 1 Draw each stroke of the knife
the full length of the blade to
produce a smooth slice do not
use a sawing motion.
- 2 If there is not enough of
the choice portion of the cut to
fit around meat serving should
consist of part of the

It's a Sight to See...

....that
NEW LOOK
in **TOY**
creations

It's really a sight to see the new 1948 toy designs of Wight Rushton. Each has that freshness in design and costuming which is so important this season. That smart "new look" in fashions which offers a complete change in appearance from head to toe.

If you are looking for something that is different then see the brilliant showing of soft, cuddly toys at the Toy Fair. Dolls, bears, dogs, cats, deer, and a score of novelty items . . . all fashioned with a sparkling and irresistible appeal. Don't fail to visit Room 432 - 5th Avenue Building. It's a sight to see.

“THE BEAUTY AND DISTINCTION OF CUSTOM CAR STYLING”

Otis F. Bryan

Bryan Leaves TWA For Position at PAL

Otis F. Bryan, one of the last remaining top executives of the Jack Frye administration, has resigned from TWA to become vice president and assistant to the president of Philippine Air Lines.

A veteran of 19 years service with TWA, Bryan joined the organization as a pilot in 1929. In 1943 he was elected a vice president in charge of TWA's war projects. After the war he was placed in charge of operations on the company's new international routes, later taking over the duties of general manager of the international division.

► **Position Shift**—Following the departure of the Frye administration and consolidation of domestic and international division operations under John A. Collings, Bryan late last year was placed on special assignment in connection with TWA's contracts with associated airlines. Bryan's headquarters with PAL (in which TWA has a small stock interest) will be in Manila.

TWA also announced the resignation of Robert H. Biron, vice president of industrial relations. He will become a vice president of Consolidated Vultee Aircraft Corp., which is now headed by Lamotte T. Cohu, who left the TWA presidency last month. D. W. Harris has been named TWA system director of industrial relations to replace Biron. ► **Heads Public Relations**—Meanwhile, Gordon Gilmore was appointed director of public relations for TWA's domestic and international operations.

• Other personal developments:

American—Theodore P. Gould, who has resigned as vice president of Scandinavian Airlines System, will become AA's director of passenger sales on July 1.

Northwest—Larry Kimbrell has been named director of sales.

Pan American—A. S. Galbraith has been appointed supply manager for Latin American operations.

"PACIFIC-WESTERN" assists in Aviation Progress

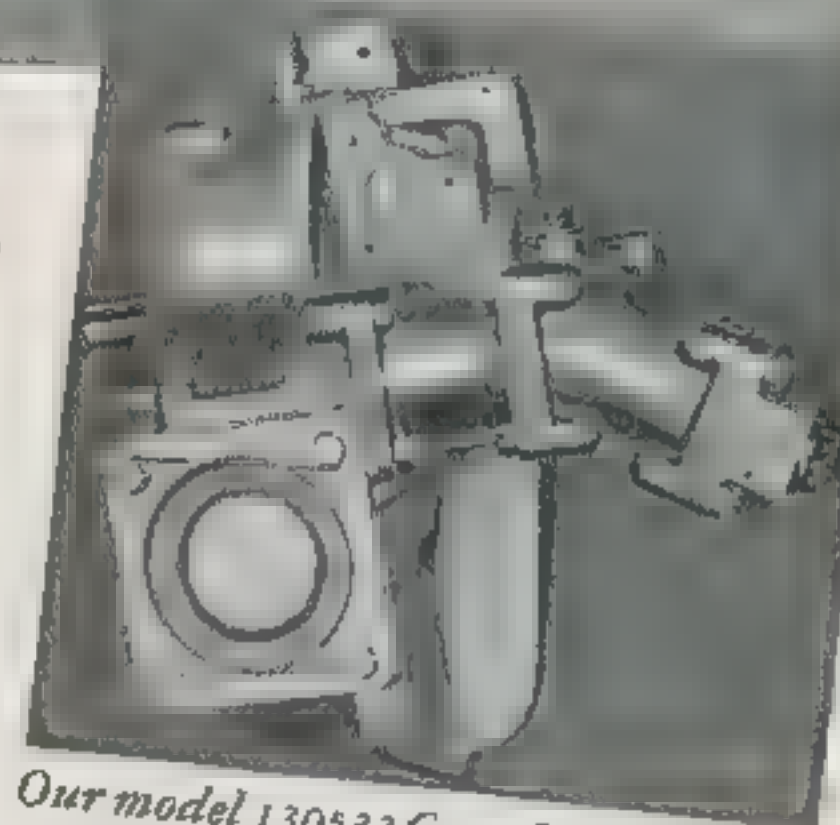

This is the Convair 240, 40-passenger plane being put into service by major airlines.

CONE GEAR ACTUATOR USED IN NEW CONVAIR 240

For the first time in Aviation history, Cone Gear type actuators have been designed for use aboard commercial airliners. Cone type gearing, recently added to PACIFIC-WESTERN varied lines of equipment, was selected for the Convair 240 because its high load carrying capacity results in minimum actuator weight.

PACIFIC-WESTERN engineers, alert to the fast pace of progress being made in the air, completely designed this 250:1 ratio lightweight heavy-duty wing flap actuator.

Our model 130533 Cone Gear type actuator, shown above, is rated at 5800 inch pounds torque at 10 RPM output.

Let our engineers give you a "LIFT" on your gearing problems

For over a half century, PACIFIC-WESTERN engineers have been designing special gears and geared products to serve industrial power transmission needs. Pioneers in the use of mechanical gear type actuators for aircraft, PACIFIC-WESTERN can help you. We invite you to consult with the specialists on our staff who are trained to serve the aircraft industry.

Write, wire or phone our Lynwood plant for complete information, or if you prefer contact our office nearest you.

PINEHAVEN

Built on the site of an old Indian Village
50 Acres of Forest on the Shore of
LAKE ANASAGUNTICOOK

Pinehaven is convenient to reach by rail or car. Parking facilities for cars and those arriving by train are met by our boat at Canton R. R. station.

Swimming, canoeing, boating, fishing and hunting (during season), hiking are among the activities provided.

Satisfying meals with the privilege of "seconds" served in our dining hall adjacent to the Main Lodge where pleasant evenings are spent around the log fire.

And so to bed for restful slumber in a cozy rustic cabin of your own.

Those who love the woods and waters and desire the peace and contentment to be found there will enjoy to the full the informal program provided by Pinehaven.

Leave your "New Look" and your "Bold Look" at home because camp clothes are the order of the day at Pinehaven where what you have under the skin counts for far more than what you have over it.

Bring the children (over seven). Trained counselors will provide an active program for them while you relax.

tournament in this town is the Mecca of many sportsmen.

Rumford is the largest community in the county and is the site of one of the largest paper mills in the world, the Oxford Paper Company. Here the Ellis, Swift and Concord Rivers flow into the Androscoggin and the Falls are within direct view of the business section. This latter is on an island formed by a canal and three bridges connect it with the mainland.

An important social center for that section of the County, Rumford is also regarded as Maine's outstanding winter sports center, with championship ski jumps, ski trails, skating rinks, and other facilities. Nearby is Mount Zion, famous for its Moontide Spring, the flow of which is influenced by the moon's phases and increases 22 gallons a minute when the moon is full.

North from Mexico are Frye, Roxbury, Byron and Houghton on the road to Oquossoc. Route 17 here follows the course of the Swift River through a region of farms and woodlands, full of ponds and streams, where fishing and hunting facilities abound. Byron, on the Swift River, is one of the few places in Maine where gold can be washed right out of the river bed.

Oxford County comprises a total of 1,980 square miles. It has 301 named peaks and scores of others that bear no name. It is a county of lakes and hills, of medium elevation, where sparkling, pineladen air adds to the zest of living in summer or winter. Its agriculture and industry have been a source of prosperity for its residents and to the thousands who visit the county annually for sports or vacations it offers a rendezvous with nature that has no equal.

Now A Pioneer Parachute Co.
CHAIR PARACHUTE
 with Exclusive
Fool-Proof, Foul-Proof Features

Here's a chair parachute with all the time-tested safety features of other Pioneer fool-proof, foul-proof parachutes. Back-pack designed, the new chair chute becomes an attractive part of the airplane chair upholstery and, when needed, may be put on quickly. No fussing.

The chair chute is equipped with Pioneer's Quick-Fit* Harness which can be adjusted to fit any user perfectly, regardless of size, in less than three seconds.

An achievement resulting from years of research and development by Pioneer Parachute Co., the chair chute can be easily installed, and replaced as easily as a slipcover on most types of airplanes. Pioneer's chair chute means cabin beauty plus safety. It's there when you need it, but you don't have to wear it while in flight. Constructed according to military standards, Pioneer's chair chute is made of nylon with webbing of the highest tensile strength and standard 24 foot canopy.

** Patents applied for in U. S. and all principal countries throughout the world.*

Right—Navion front seat chair as it appears in normal use with chute hidden in upholstery.

Left—"Quick-Fit" Harness has been pulled out to show readiness for split second action.

A tug at chest and leg straps draws harness into perfect fit.

In less than three seconds, wearer moves from chair with chute ready for instant action.

Pioneer's chair chutes can be designed to fit the seats of any type of airplane.

NEW HIGH SPEED EXPRESS REFRIGERATOR CARS FOR...

Transporting perishables of every kind is an important part of Railway Express Agency services. With 500 high-speed, passenger train-equipped Express Refrigerator Cars just off the assembly line, we'll be able to do this better than ever.

Known as the REX Silver Reefers, these cars carry many types of commodities requiring protection against spoilage. They are also used for non-perishable traffic. This means fruit and vegetable growers, for example, can utilize these cars to rush their products to market, while on the return trip the same cars can be loaded with manufactured goods of every description.

This new double-purpose equipment spells the kind of progress Railway Express is ever alert to offer its customers.

Waldo County

On the western shores of Penobscot Bay and the mouth of the Penobscot River, stretching from the blue Camden Hills to the head of ice-free winter navigation at Winterport, Waldo County in south central Maine comprises an area of 724 square miles extending back into an inland farm and lake country bordered by Knox, Lincoln, Kennebec, Somerset and Penobscot Counties.

Focal point in the county is the City of Belfast, a famous seaport town and hub of a network of roads radiating to all sections of the county. On the seaward side, Belfast is likewise a hub for steamer and small boat traffic from the islands to the east and southeast in Penobscot Bay and thus serves as a shopping and commercial center for an area within a great land and sea circle from the city center.

Along the shores of the bay and river are a series of other seaport, fishing and resort towns, while back from the coast is a large farming, lake and mountain region, where apples, potatoes, vegetable raising, poultry farming and dairying combine with lumbering and resort activities to provide a healthy, economic livelihood for Waldo County residents. Its shoreside quarries have provided granite for paving blocks and buildings in some of the largest cities of the Country

U. S. Route One enters Waldo County from Camden, skirting the shore through Lincolnville and Northport, both favorite resort towns for surrounding areas. From Lincolnville a ferry services Islesboro, largest island on this section of the coast, with an exclusive summer colony and a yachting center that make it the richest town in the county. An auxiliary road from Camden, Route 137, follows the northern side of Megunticook lake to Lincolnville Center and Camden, passing through a beautiful countryside area.

Belfast is situated on a side-hill sloping gradually to the shores of Belfast Bay and the Passagassawaukeag River, its highest points commanding a sweeping view over the island-studded waters of Penobscot Bay. Many fine old mansions sheltered by stately trees recall the days of past mercantile and seafaring glory. A 15-acre city park is directly on the shores of the Bay and has modern facilities for trailers, camping, swimming and other activities. The city's excellent hotels and shopping facilities, its quiet streets and nearness to all forms of recreational opportunities make it a center for visitors in this section of the State.

North of Belfast is Searsport, home of many sea captains and ocean shipping point for the Bangor and Aroos-

MRS. WILLIAM VON OESSEN

HERE'S WHY THERE'S PROFIT FOR YOU IN A RYAN NAVION DEALERSHIP

A QUALITY PRODUCT. The 4-place, all-metal *Ryan Navion* is the ideal personal and business plane . . . a unique balance of safety, speed, ruggedness and comfort. Millions of dollars in engineering and tooling have been invested to bring the *Navion* to matchless perfection.

A PROVEN PRODUCT. Thousands of hours of actual performance under all conditions have proven that the *Ryan Navion* has the most intelligently chosen and best engineered combination of all the features desirable in a personal and business plane.

AN ACCEPTED PRODUCT. More than a thousand present *Navion* owners agree there is no finer plane on the market. Here's the plane that even competition praises . . . the plane that makes news in aviation publications, national magazines and on network radio. *Navion* orders now exceed production.

A NATIONALLY ADVERTISED PRODUCT. We're bringing your customers to you in hard-hitting, month-in-and-month-out advertising campaigns, such as the actual *Navion* case histories now running in *TIME* Magazine. We also have a practical sales and advertising kit for dealers, and we are able and willing to give sales and advertising assistance to dealers.

AN AGGRESSIVE MANUFACTURER. Ryan backs up the *Navion* with over 25 years of know-how in design, manufacturing, sales and operating experience. We're already turning out a specialized group of factory-trained mechanics for dealers. We also have a result-getting program for the promotion of parts and accessories.

A GENEROUS FRANCHISE. You'll find us a manufacturer who understands the problems of our dealers. That's why we have a sound, workable franchise open to operators and businessmen who can sell planes and serve customers to complete satisfaction. If you are not now representing a 4-place airplane in this rapidly growing market, wire or write us immediately for full details about excellent territories still open.

Ryan Navion

RYAN AERONAUTICAL COMPANY, 410 Lindbergh Field, San Diego, California

engineers, cost of modifying the cockpits of the planes affected and the possible payload loss have figured importantly in the airlines' opposition to the flight engineer requirement. Flight engineers' pay averages around \$500 monthly. American, United, Braniff, National, Delta and Panagra probably will require around 327 engineers for their 109 DC-6s. Result: additional expense of almost \$2,000,000 annually.

CAB officials and the Air Line Pilots Association claim that additional safety will more than compensate for the extra expense. Only this month TWA was making public relations capital out of the fact that its Constellations had flight engineers. Large TWA newspaper advertisements stated that the presence of "this extra man in the cockpit" is one of the biggest reasons why airline travelers should ride Constellations.

CAB Issues Findings On Three Accidents

Mechanical failures were responsible for two accidents and pilot error probably caused a third mishap on which reports were issued recently by the Civil Aeronautics Board.

The crashes, which resulted in only two fatalities:

► **Eagle Air Freight**—Crash of a DC-3 on Mt. Hamilton, near San Jose, Calif., last Mar. 8 was probably caused by the flight's deviation from its clearance and from approved instrument procedure. The crew had been cleared for a straight-in approach to San Francisco Municipal Airport, where the ceiling was 700 ft. and the visibility three miles. The plane hit the mountain 20 miles east-southeast of the Moffett radio range station at an 1800 ft. elevation. There was no evidence of structural failure or mechanical malfunctioning. The two crewmen, only occupants were killed.

► **Capital Airlines**—The accident which severely damaged a company DC-3 while on a ferry flight from Norfolk, Va., to Washington, D. C., on May 8, 1947, was probably caused by fatigue failure of one of the articulating rods in the left engine during flight. The two crewmen, only occupants of the craft, were uninjured in the emergency landing in a field near Hartfield, Va.

► **Pan American Airways**—The mishap involving a wheels-up landing of a PAA Constellation at Accra Gold Coast, Africa, last Mar. 24, was probably caused by failure of the nose wheel actuating mechanism. Investigators found that extension of the nose wheel gear was restricted by the hydraulic actuating cylinder, whose piston did not extend sufficiently to permit engagement of the lock-down device. No one was injured in the landing, and the plane was not damaged extensively.

The Unseparated Crew

— an Important Safety Factor

Flying a modern traffic aircraft is teamwork; each member of the crew pulls his weight. External conditions on a flight sometimes change as rapidly as the picture sequence on a screen. At such times there must be swift communication among the members of the crew, if every piece of information is to be coordinated in to a unified picture for the pilot's guidance. In Saab Scandia the entire crew sits grouped in the pilot's compartment; talk is unhampered, and every observation can be reported as it is being made. The crew of four functions as one man — an exceptional safety factor.

Rangeley Chain

Excellent bathing beach and tennis courts
Golf nearby American Plan

Folder on request
Florence B. Harnden, Mgr. P. O. Rangeley, Maine

From Rangeley Route 4 goes northeast to follow the South Branch of the Dead River, through Dallas Plantation to Stratton. A private toll road goes north to the Kennebago Region, with Big and Little Kennebago Lake and connecting Kennebago Stream, a region where fly fishing is unequalled.

West from the village of Rangeley is the road along the northern side of Rangeley Lake to Mountain View, Oquossoc, Haines Landing, Bald Mountain, Barker and Mooselucmeguntic Lake. From Oquossoc Route 16 traverses Northern Oxford County to Wilson's Mills at the western side of this magnificent recreational area. Like Northern Oxford County, this northern side of Franklin County is a wonderland of lakes, streams and mountains with nothing but trails and woods roads once the vacationer leaves the paved main highways.

In spite of its wilderness appeal, the region is well spotted with camps, lodges, summer resorts, hotels and other modern conveniences. In addition to the seaplane base a Class One airport at Rangeley brings in vacationers and private planes. State fish hatcheries breed salmon and trout at Oquossoc and the Rangeley Game Preserve covers many hundreds of acres, assuring a constant supply of game to the surrounding areas.

The log cabin style of summer hotel life was born in this region, with comfortable camps containing fireplaces, baths, housekeeping service and other details, such as central dining rooms, libraries, group entertainment, etc.

From its rich agricultural areas and thriving industrial activities to its wonderland of recreational features, Franklin County has long been one of the outstanding and most attractive areas in Maine for visitor and resident alike.

YORKS LOG VILLAGE LOON LAKE RANGELEY, MAINE

Free—saddle horses, golf, tennis, garage, boats, canoes are included in the weekly rates. Every cabin has long distance telephone. American Plan. Presenting the SEALAND...

You've only got to ask

The Sealand, new 5/8-seater amphibian, is now coming off Short's production line. It's worthy of your attention wherever you are operating and whatever your aviation purpose. For the Sealand is the most adaptable, universally useful aircraft of its type ever designed. It's just the thing for charter companies and feeder lines. It is readily converted into a freighter, an ambulance, a mobile showroom, or—equipped as an office—a business man's transport. And it's as light and easy to handle on land as on water.

Getting down to it

Let's have a few estimated performance figures. The Sealand, at maximum economic cruising power—altitude 6,600 ft.—does 174 m.p.h. Its range, at 127 m.p.h., is 776 statute miles with full tanks (120 gallons) and 926 lbs. of freight. With less fuel (54 gallons) it will carry 1,400 lbs. of payload, which is roughly equivalent to 7 passengers and baggage, a range of 305 statute

Passengers will praise the Sealand's attractively designed interior, finished in washable leather fabric, its comfortable seating and wide windows

miles. Take-off distance is only 575 yds. (in 28 seconds) from water; 370 yds. from land. Landing speed is 69 m.p.h., and service ceiling is 21,600 ft.

The Sealand is reliably powered with two 330-h.p. D.H. Gipsy 70 engines. The cockpit is neatly and effectively laid out, and affords an exceptionally wide field of vision.

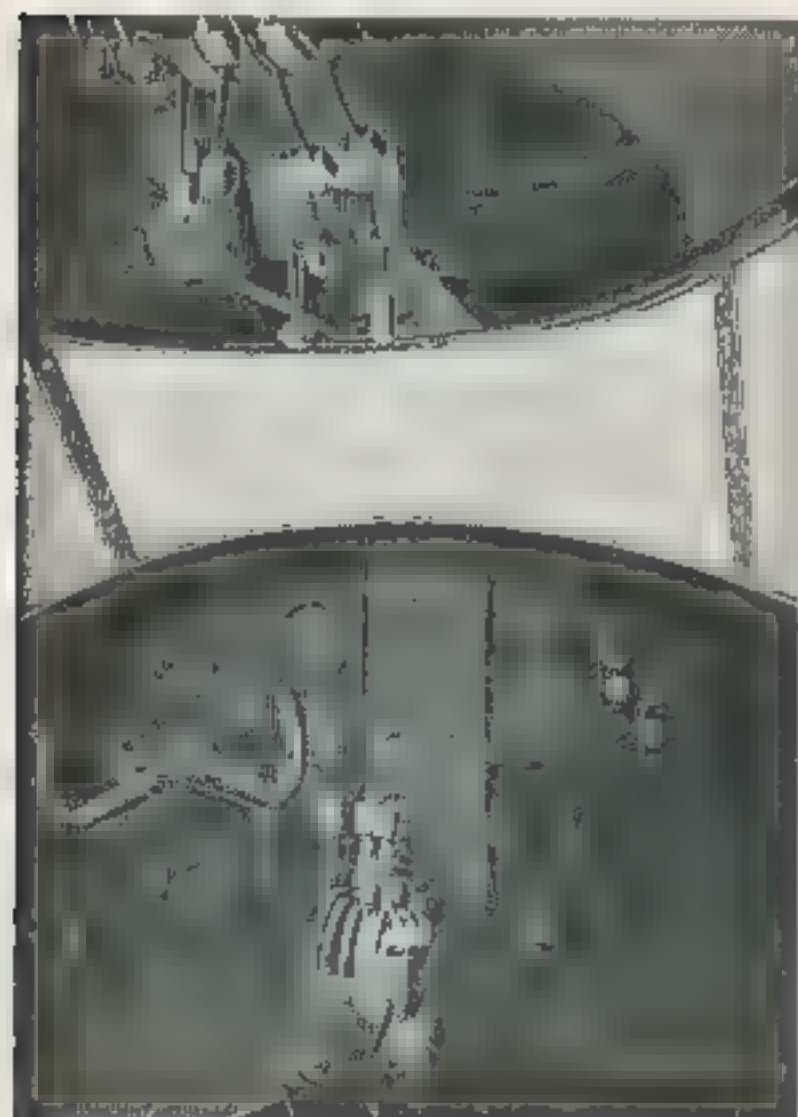

Where breeding counts

Of course, great care has been taken to ensure that all Air Registration Board safety requirements have been met, and that airworthiness is unimpaired if one engine fails. Why "of course"? Because for nearly 40 years Shorts have been designing and building their famous family of flying boats. The Sealand thus has a proud ancestry. We suggest that, if you would care to operate this new amphibian, you write for complete details and tell us your requirements.

Salute to Convair-Liner 240

A notable addition to America's air transport fleet! The Convair-Liner is the world's first pressurized medium range passenger transport . . . It flies with the Simmonds Pacitor Fuel Contents Gauge.

THE SIMMONDS **PACITOR** GAUGE (REGISTERED)

As the leader in the field of electronic fuel contents gauging the Pacitor was a natural selection for the Convair-Liner. The Pacitor Gauge is now standard on more than 15 types of planes built by nine different manufacturers. It flies in the equipment of 15 different domestic and foreign air lines. It is also specified for an impressive number of advanced-type military air craft.

Specified on Equipment for:

American	KLM
Braniff	Northwest
Delta	Scandinavian
TWA	Airlines
National	Sabena
Trans-Canada	Panagra
Capital	Air France
United	Western Airlines

SKOWHEGAN

On the KENNEBEC

*From the Indian Name Meaning
"A PLACE TO WATCH"*

Bearing one of the best known names of any town or city in the United States, SKOWHEGAN is annually the mecca for tourists from far and wide. While it is not a resort town in the strict meaning of the term, the fame of the nearby theatrical colony of Lakewood and the annual Skowhegan State Fair are magnets which attract visitors in ever increasing numbers from every state of the Union.

Named years ago by Artemus Ward as the "Garden Spot of America" Skowhegan's location on the storied and historical Kennebec River is one of unsurpassed beauty. Located at the junction of U. S. trunk highways Nos 2 and 201, Skowhegan is a natural stopping off place for travelers to Quebec, Moosehead Lake, Bar Harbor and the White Mountains and many choose it as their headquarters from which to make side trips to points of interest all over Maine.

A gift to the town from a former resident and Governor of the State of Maine, Coburn Park, at the easterly end of Water Street, impresses strangers with its tranquil and unspoiled natural loveliness. The park's flowers, shrubs, countless trees of many varieties, lily pond and broad lawns are a lure which can not be resisted.

SKOWHEGAN STATE FAIR—ANNUALLY SINCE 1819
August 14-16-17-18-19-20-21, 1948

Featuring livestock exhibits of prize farm animals, poultry, rabbits, farm and garden produce, agricultural machinery, 4-H Club exhibits, Fish and Game exhibit, magnificent flower show, pari-mutuel racing and horse pulling Automobile Thrill Show, mammoth midway, Contest to select Miss Maine to represent the state at Atlantic City's Miss America Pageant

*Northwest's Martin 2-0-2's fly with Sperry Gyropilot...**

Northwest Airlines has joined the many leading airlines that bring to their passengers the additional comfort and safety provided by automatic flight. The swift, luxurious Martin 2-0-2's that fly Northwest's "Overland Route" from coast-to-coast are now equipped with the Sperry A-12 Gyropilot to help the pilot do his job better.

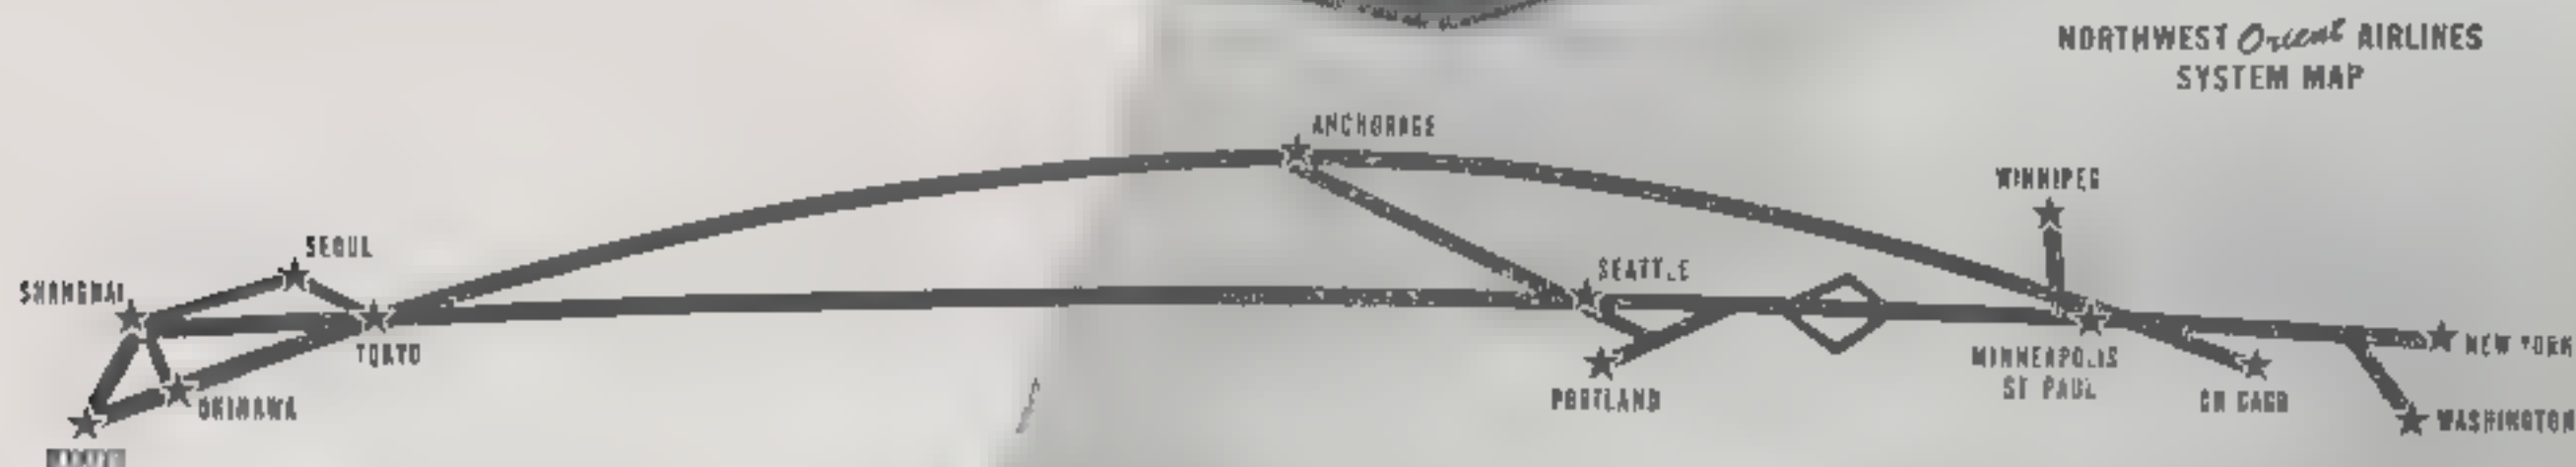

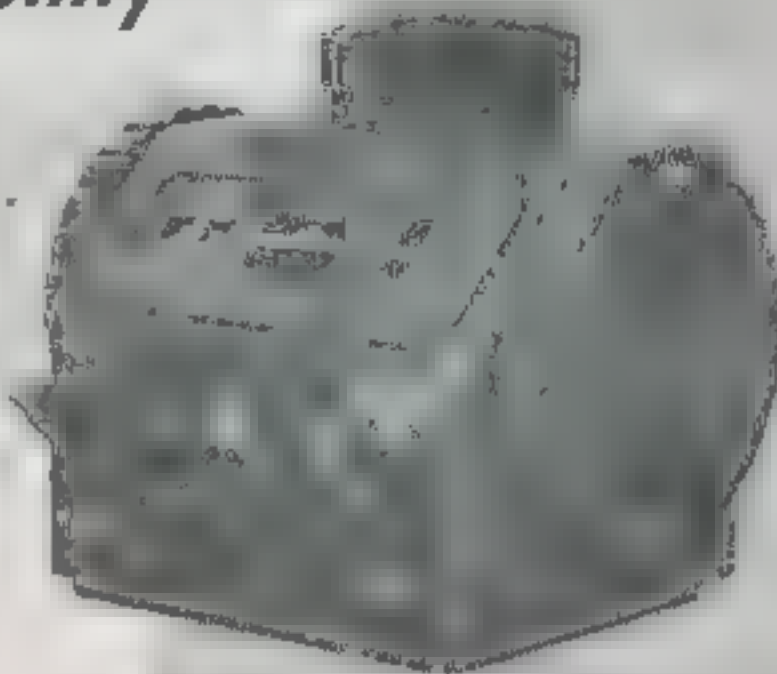

for smoother travel under all flight conditions...

The Sperry Gyropilot gives the human pilot complete automatically stabilized control of his aircraft at all times . . . enables him to keep his plane proceeding smoothly on course and on time regardless of weather . . . lessens his tension and fatigue

more passenger comfort and greater schedule reliability

Thus, the Sperry Gyropilot's accurate control of the aircraft brings to passengers the comfort of smooth flight even in rough air . . . to the pilot relaxation and higher efficiency . . . to the airline operator greater schedule reliability.

Piscataquis County

Piscataquis, the "county of lakes", is the second largest county in Maine. Within its 4,205 square miles are 252,872 acres of water, almost twice as much as any other Maine county.

Located in the north central part of Maine, it contains four outstanding features: In the northern section it contains hundreds of large and small lakes in a wilderness of forest and mountain; it contains Moosehead Lake, largest in the State; it is the site of mile-high Mount Katahdin and Baxter State Park; and its southern section, containing most of its built up villages and towns, is an important agricultural and industrial area.

The Moosehead Lake region is one of Maine's most popular hunting, fishing and vacationing areas. Forty miles long and twenty miles wide, the lake contains several large islands, many bays and inlets and is fed by scores of streams and lesser lakes. Hemmed by rugged mountains and flanked by the virgin forest, Moosehead has been a haven of rest and a center of sports and recreation for many years. Its waters provide unexcelled trout, togue and salmon fishing from the time the ice goes out, early in May, until the hunting season in October. From Moosehead Lake start

five famous canoe trips: The East and West Branch trips, the Allagash, the Allagash Circuit and the St. John River trip.

Greenville, at the foot of the lake, is the starting point for excellent roads that strike for many miles northward along both sides of the lake into the wilderness regions beyond. To the west one road leads through Greenville Junction to East and West Outlets, Rockwood and Seboomook to Caucomgomoc Lake 80 miles to the north. To the northeast the other road leads through Lily Bay and Kokadjo to Ripogenus Dam at the foot of Chesuncook Lake and around Harrington Lake to Baxter State Park and the Katahdin region.

From Greenville also lake steamers and other boats travel to various resort centers on the lake. Opposite Rockwood and West Outlet, Kineo Mountain rises sheer from the heart of the lake. A beautiful resort spot, it is the largest mass of hornblend in the world and Indian implements and weapons made from its flint have been found in all sections of New England. A few miles from Greenville, on Little Wilson Stream, a fifty-seven foot falls in a sheer slate canyon makes one of the prettiest cascades in the State. Big Squaw Mountain, near Greenville Junction

Join up with Stinson NOW!

Plan ahead with the industry's
most successful manufacturer!

It's always possible for a successful factory to have a few unsuccessful dealers . . .

. . . but there's no such thing as a successful dealer for an unsuccessful factory!

That's why all airplane dealers are paying so much attention to the four words: "*Stinson is making money.*"

They know that Stinson dealers, likewise, are making money . . . and making sure of a prosperous future.

Stinson has the right product for today's market. Stinson backs the product with modern merchandising methods. Stinson has developed the best dealer team in the business . . . and it's growing stronger every month!

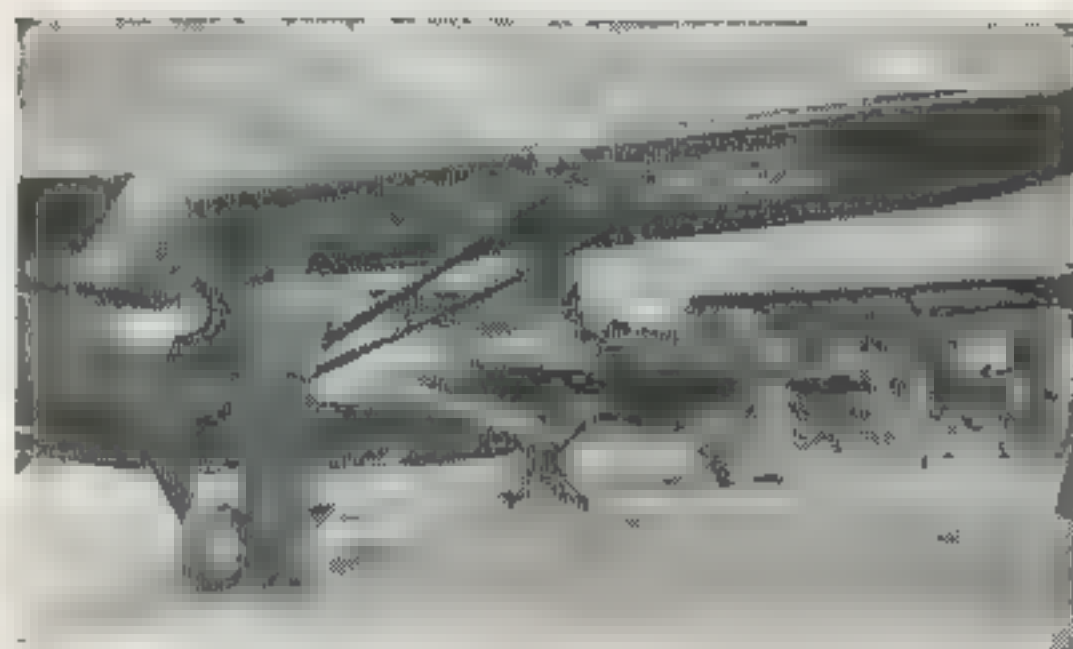

Stinson knows merchandising! Stinson backs its product, and its dealers, with the kind of advertising and sales promotion power that delivers live prospects and helps close sales. Result? Stinson sells more 4-place planes than all other makers combined!

Join aviation's finest dealer organization!

The Stinson organization is growing . . . on a planned, long-range basis.

Additional opportunities are now being created for qualified operators!

Want the facts? Just write or wire (in confidence), to Wm. H. Klenke, Jr., General Sales Manager, Dept. G, Stinson Division, Consolidated Vultee Aircraft Corp., Wayne, Mich.

Stinson is making money! With 22 years of production "savvy"—backed by the combined research and test facilities of Consolidated Vultee Aircraft Corporation—Stinson knows how to build top-quality planes at realistic, competitive prices. And Stinson knows how to sell them.

Stinson provides management counsel! Stinson won't tell a dealer how to run his business. But Stinson management can show him how to simplify and straighten out his paper work . . . how to do *more* of the activity that *makes* money . . . how to do *less* of the activity that *loses* money.

The Martin 2-0-2, 36-40 passenger twin-engine airliner, one of the first airliners of completely postwar design to be approved by the CAA, is now in service on leading airlines. Advanced aerodynamically clean design, eliminating drag, plus new improved models of war-tested 2400 horsepower engines, give the new luxury airliner nearly 100 miles an hour faster cruising speeds over prewar twin-engine airliners it is replacing.

**KEEP FLIGHTS
ON SCHEDULE**

Use Texaco's outstanding Lubrication Engineering Service and Texaco Aviation Products to keep mechanical equipment in top form.

THE willing cooperation of Texaco Lubrication Engineers (Aviation) has helped airlines all over the country to keep their flight schedules up, their maintenance costs down.

Make use of this service. A Texaco Lubrication Engineer specializing in aviation will gladly work with you . . . to help you overcome the causes of too frequent engine overhauls . . . of mechanical troubles that interrupt service. You'll find his broad practical experience helpful in other ways, too.

Texaco has the industry's most extensive line of aviation lubricants and fuels . . . more that meet A-N specifications than any other brand. Airline preference for Texaco is indicated by the fact that —

More revenue airline miles in the U. S. are flown with Texaco Aircraft Engine Oil than with any other brand.

Enjoy the benefits of Texaco Aviation Products and Lubrication Engineering Service. Just call the nearest of the more than 2500 Texaco Wholesale Distributing Plants in the 48 States, or write The Texas Company, *Aviation Division*, 135 East 42nd Street, New York 17, N. Y.

WELLS BEACH, MAINE

**"WITH US IT'S A MATTER
OF DOLLARS AND CENTS"**

Mr. W. W. Davies' position as Director of Engineering for United Air Lines causes him to look at aircraft with a practical eye.

"When United buys a new type, of course we check design, construction and all the rest.

"But we go even farther. We ask, 'How much money can this airplane earn for us? How does payload compare with operating cost?' You see, with us, it's a matter of dollar and cents.

"That's why we're always glad to see 'Honeycomb' used. Because it saves weight. And every pound of dead weight saved shows up on the black side of the operating ledger."

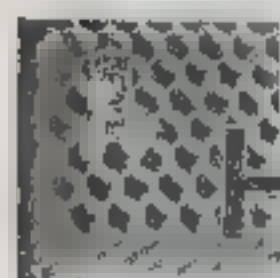

In United Air Lines' DC-6 Mainliner 300's, built by Douglas, Honeycomb is used in many places to save important pounds: Vertical Cabin Partitions . . . Coatroom Shelves . . . Main Entrance Ceiling Panels . . . Magazine Rack . . . Card Tables . . . Lounge Tables . . . Mirror Backing . . . Cabin Stowage Cabinets.

Honeycomb cores are made from impregnated cloth, paper, Fiberglas or other materials, depend-

ing on requirements. The core is faced with decorative wood veneers, aluminum, stainless steel or plastic . . . to fit any need for a lightweight, yet very strong and stiff structural material.

Weldwood and Armormply Honeycomb have an amazingly high strength/weight ratio. Extremely light, the core weighs only 4 pounds per cubic foot.

Full engineering data on Honeycomb is available on request. Write for complete details.

NWA Plans Rebates For Delayed Flights

Fare increase also provided in new tariffs which will go into effect Mar. 15.

Northwest Airlines has taken unprecedented steps to recompense passengers on delayed flights, but at the same time it has acted to nudge fares higher.

Starting Mar. 15, Northwest plans to give a five percent rebate on its ticket prices whenever a flight reaches its destination more than 30 minutes late. The practice—similar to one in effect on some crack, extra-fare railroad trains—will apply to all domestic flights and to all seasons of the year.

► **Plan Explained**—In the case of flights cancelled short of their destination, passengers will get a five percent rebate of the entire fare, as well as the customary refund on the unused transportation. When a plane is more than 30 minutes late, the stewardess will make out refund checks and turn them over to passengers as they disembark.

When a transcontinental flight is cancelled with only a short distance of the trip completed, a long-haul passenger may receive in refunds virtually

the entire cost of his ticket. A passenger holding a roundtrip ticket would receive a five percent rebate on one-half of the roundtrip fare.

► **Hunter Statement**—Admitting that much of the public's criticism of delayed flights has been justified, NWA President Croil Hunter declared that flying planes "on time all the time" has become a major objective of his company. It has adopted a program which goes into the causes and correction of delays from the time a plane leaves its hangar until it lands at its destination.

Cost troubles and delays in meeting schedules have been on the ground, Hunter stated. It is reported that Northwest will offer some sort of bonus to the most efficient ground crews each month if CAB approves the rebate plan.

► **A Fare Boost Sought**—Meanwhile, Northwest has asked CAB for permission to boost its domestic passenger fares, eight percent effective Mar. 15. The present 10 percent discount on roundtrip tickets would be continued.

The proposed increase would be the third by the carrier in less than a year. All the domestic trunklines instituted 10 percent increases in April, 1947, and (with one exception) again early this winter.

Even with the eight percent in-

crease, Northwest's roundtrip fares will be two percent lower than the combined one-way regular tariffs of its competitors, which do not have the 10 percent roundtrip discount. The company's roundtrip fares will also be 12 percent lower than competitive combined one-way premium fares on DC-6s and Constellations.

CAB SCHEDULE

Feb. 18—Hearing on Willis Air Service's S.-Puerto Rico exemption request. (Docket 3141.)

Feb. 18—Reargument in Middle Atlantic Area case on Eastern Air Lines' application for trunkline service to Pittsburgh. (Docket 174 et al.)

Feb. 19—Hearing on Mid-Continent's application for alternate Kansas City-New Orleans route. (Docket 1946)

Feb. 21—Hearing on Mid-Continent's Motion N. D. Regia Saskatoon, route and. (Docket 628.)

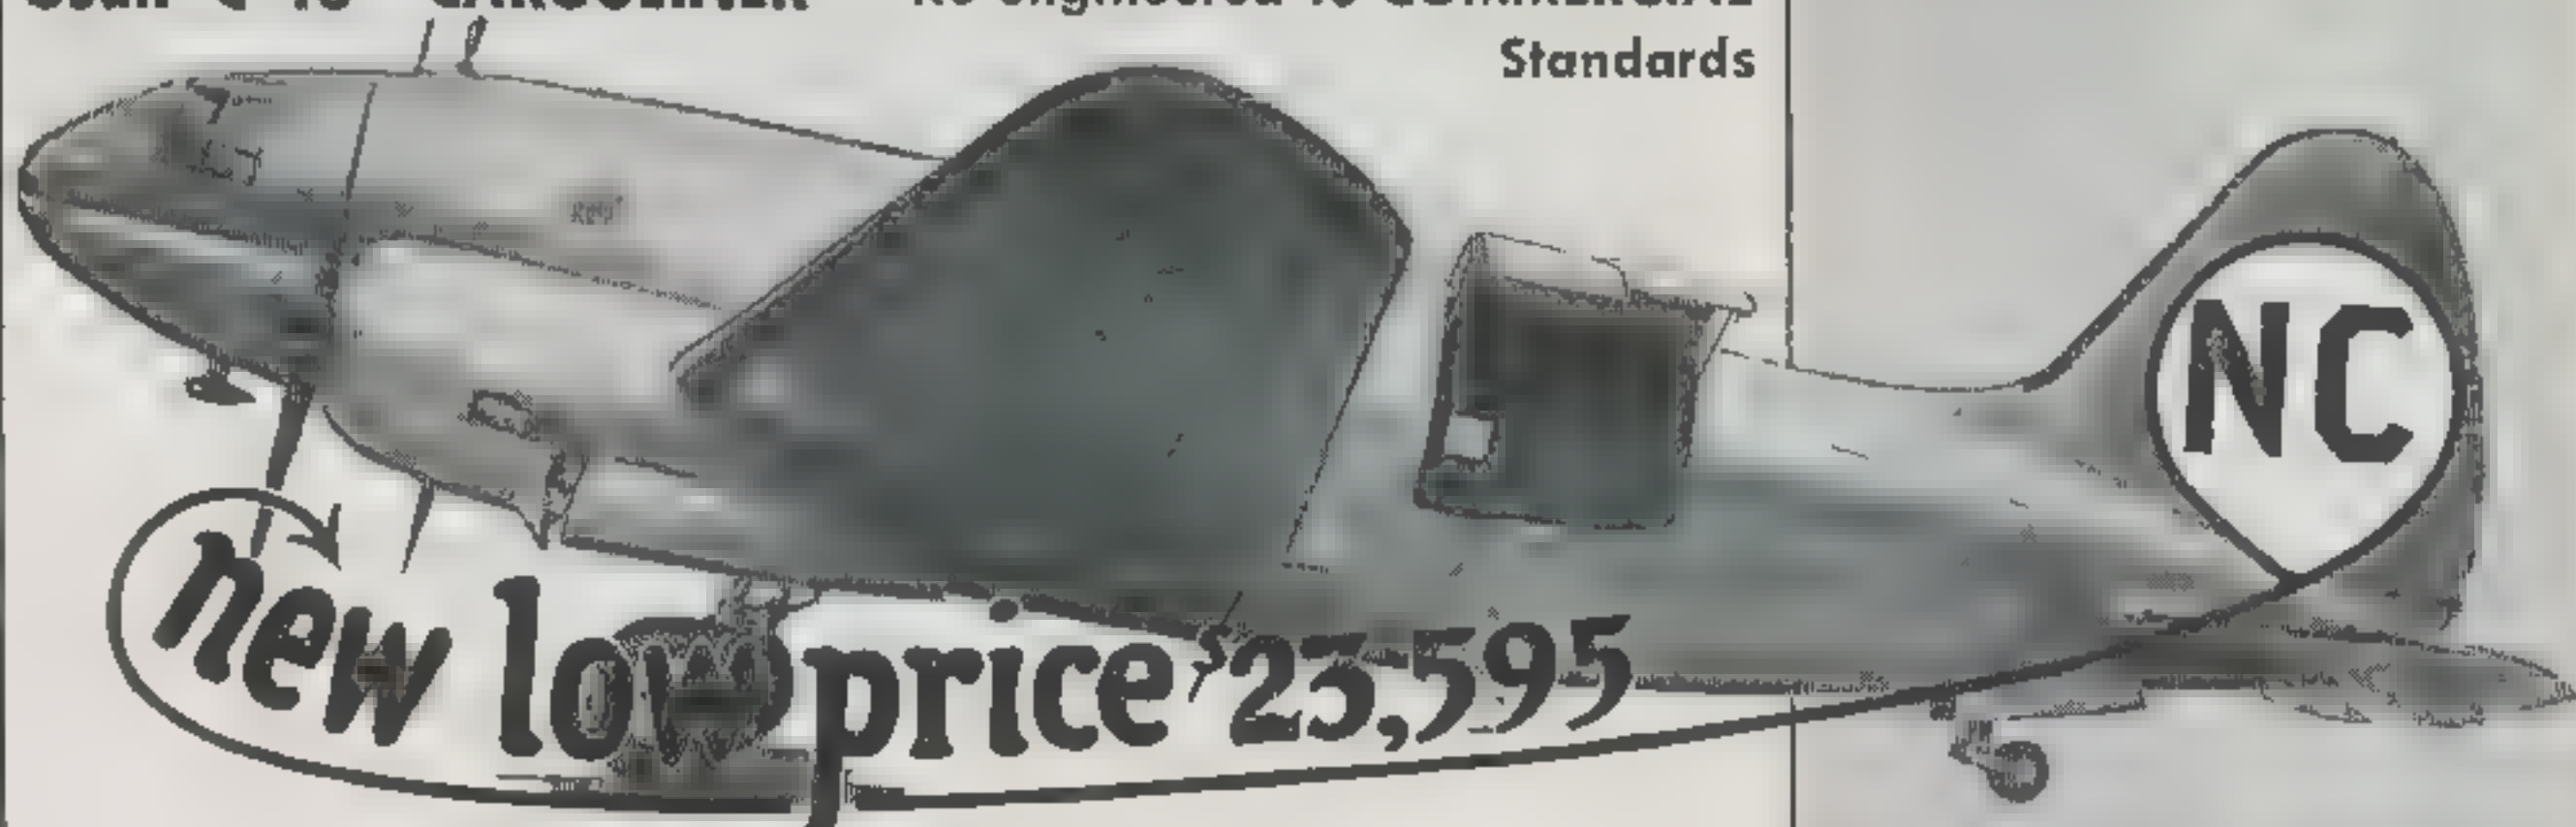

Mar. 15—Hearing on additional service to Hawaiian Islands. (Docket 2790 et al.)

VICKERS VALETTA

Troop carrier, freighter, ambulance, glider tug or paratrooper—the Vickers Valetta lends itself readily to a conversion to any one of these roles.

This versatile 'plane incorporates all the proved characteristics of the famous Viking. There are two main changes in design—a wide door has been cut in the rear fuselage to facilitate rapid loading and unloading of military equipment, and the floor has been specially strengthened. A cargo hold below the floor runs the entire length of the fuselage and is easily accessible from the ground. Carrying heavier and more varied loads at a greater speed than is possible with similar transport 'planes at present in use, the Vickers Valetta will prove itself invaluable as a transport aircraft. Accommodation is provided for a crew of four. Maximum speed of the Valetta at 34,000 lb is 255 knots at 5,500 ft. on 4,110 h.p. or 253 knots at 10,000 ft. on 3,520 h.p. The service ceiling on one engine is 5,000 ft. using rated power or 7,500 ft. using maximum power.

MILITARY DOORS. Specially wide doors are arranged to allow speedy, unrestricted loading and unloading of jeeps, guns and other equipment. An inset door is provided for the dropping of paratroops or supplies.

AS GLIDER TUG. The Vickers Valetta taking off with an Airspeed Horsa glider in tow. The Bristol Hercules 230 engines each provide 2,000 h.p. at take-off.

VICKERS ARMSTRONGS LTD • VICKERS HOUSE • BROADWAY • LONDON • ENGLAND

Kennebec County

Three famous lake regions, beautifully situated in a country of wooded, rolling hills and fertile farmlands on both sides of the majestic Kennebec River, are distinctive features of one of Maine's most attractive counties, Kennebec. Site of the State Capitol, Augusta, and covered with historic landmarks that played their part in the struggles of a young nation, Kennebec has been called the very heart of the Nation's Vacationland.

The City of Augusta occupies a large area on both sides of the river, whose sloping banks contain several picturesque parks and many historic shrines and monuments. The dome of the Capitol, the main structure built of Hallowell granite, rising above the tops of majestic oaks and elms, is visible for many miles up and down the river. From in front of the Capitol, facing eastward, the 20-acre State Park stretches down to the banks of the river, with thousands of trees, shrubs, an artificial pond and other landscaping features making it one of the most attractive in the State.

On the eastern bank of the river is historic Fort Western, built in 1754 as a protection against the Indians and recently restored as an historic shrine. The Kennebec Dam, just north of the main bridge across the river, supplies hydro-electric power for the city and its manufacturers. Here is the upper limit of tidewater on the Kennebec and,

although 45 miles from the sea, a rise and fall of four feet with the tides is registered here.

Both the State House, with its Museum, Hall of Flags, and State Library and the Blaine House, residence of the Governor, are open to the public. Other points of interest include Lithgow Library, with an important collection of volumes and early Americana; Camp Keyes and the Augusta Airport on a high, treeless plateau nearly a square mile in area, from which a sweeping panorama of the countryside is obtained; and Ganeston Park of 475 wooded acres, where hiking, riding, picnicking and winter sports are enjoyed in the midst of a State Game Preserve and Bird Sanctuary.

On the western bank of the Kennebec below Augusta are Hallowell and Gardiner, with the neighboring town of Farmingdale. These are active industrial and shopping centers, with beautiful old homes and estates harking back to the days when sailing vessels by the hundreds carried the name of the Kennebec region to all parts of the world. Into the towns below Augusta lead roads from the southwestern corner of the county, where the towns of Litchfield and West Gardiner are centers of a farming and small lakes region containing summer camps and fishing, boating and vacationing facilities.

PHANTOMS SCORE IN MAJOR SEA TEST

Again, Westinghouse Yankee Turbojets Prove Their Dependability

To prove the operability of jet aircraft with the fleet under tactical conditions, the Navy put sixteen McDonnell Phantoms through their paces off the carrier USS Saipan. Sixteen Phantoms catapulted off the carrier deck, dive-attacked targets, maneuvered in formation, and landed on a rolling, pitching deck. Sixteen Phantoms did everything that could be asked of carrier fighters . . . and did it flawlessly.

One reason for the success of the test was the faultless per-

formance of the Yankee (J-30WE) Turbojets—power plants of the Phantoms. Engine starts were unfailing. Performance was excellent—with no engine trouble throughout the four-day test. What's more, the ship's crew liked the jets—liked their much lower noise level . . . the accessibility of the engines—the convenience of handling.

Thus, in the first full-scale, tactical jet operation, the Navy gave an enthusiastic "Thumbs Up". Again, the Yankee Turbojet engines have proved their practicability in operation with the fleet. Westinghouse Electric Corporation, P. O. Box 868, Pittsburgh 30, Pennsylvania.
